Preface and Scientific Committee

Application of Optical Fiber Sensors for Damage Accumulation Monitoring in Composite Structures W. Błażejowski, P. Gasior, J. Kaleta and R. Rybczyński	1
Test Stand and Method for Determination of the Usefulness of the Magnetorheological Composites in Active Suspension Systems M. Bocian, J. Kaleta, D. Lewandowski and M. Przybylski	7
Fatigue Properties of Aluminium Alloys for Uniaxial Cyclic Loads E. Böhm and T. Łagoda	13
Experimental Analysis of Fatigue Life of Laser Weld Zones D. Boroński	20
The Investigations of Fatigue Cracking of Laser Welded Joint with the Use of 'FatigueVIEW' System D. Boroński, R. Sołtysiak, T. Giesko, T. Marciniak, Z. Lutowski and S. Bujnowski	26
Analysis of CDM Model in the Scope of Low-Cycle Fatigue Life Estimation M. Burak, D. Skibicki and M. Stopel	32
Influence of Pearlite Morphology on Creeping Characteristic Curves of R260 Steel M. Cieśla, J. Herian and G. Junak	39
Interlaminar Mode II Toughness of Unidirectional CF-Epoxy Laminates Made of out of Autoclave Prepregs K. Czajkowska, P. Czarnocki and Z. Lorenc	45
Model of Fatigue Damage Accumulation J. Drewniak and J. Rysiński	51
Damage Size Estimation of the Aircraft Structure with Use of Embedded Sensor Network Generating Elastic Waves M. Dziendzikowski, K. Dragan, A. Kurnyta, S. Klysz and A. Leski	57
The Simulation of Void Growth along Curvilinear Crack Front J. Galkiewicz	63
High Power Actuator Based on Magnetostrictive Composite Core with Temperature Drift Compensation J. Kaleta, K. Kot, R. Mech and P. Wiewiorski	69
The Use of Magnetostrictive Cores for the Vibrations Generation and Energy Harvesting from Vibration, in the Selected Frequencies of Work J. Kaleta, K. Kot, R. Mech and P. Wiewiorski	75
Investigations of Magnetorheological Elastomers Subjected to Cyclic Loading J. Kaleta, M. Królewicz, D. Lewandowski and M. Przybylski	81
Magnetovision Method for Determining the Martensite Phase in the Austenite in Cylindrical and Spherical Objects as a Result of the Cyclic Loads J. Kaleta, R. Mech, M. Rikitatt, P. Wiewiorski and W. Wisniewski	86
Hertzian Crack Propagation in Ceramic Rolling Elements W. Karaszewski	92
Specifics Deformation Aluminium Alloy D16 in Conditions Additional Load Impulse D. Kocańda, V. Hutsaylyuk, M. Czausow, V. Berezin and A. Sobchak	99
Fatigue Behaviour of S235JR Steel after Surface Frictional-Mechanical Treatment in Corrosive Environment D. Kocańda, J. Mierzyński, S. Mroziński and J. Torzewski	105
Effect of Critical Void Volume Fraction f_F on Results of Ductile Fracture Simulation for S235JR Steel under Multi-Axial Stress States P.G. Kossakowski and W. Wciślik	113
Application of Fictitious Radius to Fatigue Life Calculations of Bending Notched Specimens D. Krzyżak, G. Robak and T. Łagoda	119
Effect of Stress Ratio on the Cumulative Value of Energy Dissipation B. Ligaj	125
Impact of the Strain Rate during Tension Test on 46Cr1 Steel Temperature Change A. Lipski	133

Improving Fatigue Life of Riveted Joints by Rivet Hole Sizing A. Lipski and Z. Lis	141
Energy Fatigue Characteristic of C45 Steel Subjected to Cyclic Bending E. Marcisz, Z. Marciniak, D. Rozumek and E. Macha	147
About Fatigue Tests End Criterion in Elevated Temperatures S. Mroziński and M. Piotrowski	153
Effect of Temperature Changes on the Waveform of Fatigue Damage Accumulation S. Mroziński and M. Piotrowski	160
Cleavage Fracture of Ultra-High-Strength Steels. Microscopic Observations. Numerical Analysis. Local Fracture Criterion A. Neimitz, I. Dzioba and U. Janus	168
Master Curve of High-Strength Ferritic Steel S960-QC A. Neimitz, I. Dzioba and T. Pala	178
Numerical Analysis of the Failure Processes of Plates Made of S 960 QC Steel A. Neimitz and A. Grzegorzczuk	184
Temperature Influence on σ_0 and n Characteristics in the R-O Relationship for High-Strength Steel R. Pała and J. Galkiewicz	190
Influence of the Mean Load Value in Fatigue Block Loading on Strains R. Pawliczek	195
Modification of Zenner and Liu Criterion due to Non-Proportionality of Fatigue Load by Means of MCE Approach Ł. Pejkowski and D. Skibicki	201
Study on Fatigue Cracks in Steel – Concrete Shear Connectors Composite Dowels MCL S. Rowiński, W. Lorenc and M. Kożuch	207
Fatigue Crack Growth in Titanium Alloy after Hardening and Ageing D. Rozumek, M. Hepner and E. Marcisz	213
Experimental Verification of Analytical Method for Determining the S-N Curve for Alloy Steel P. Strzelecki and J. Sempruch	219
The Issue of Low Cycle Fatigue Scope in the Description of Two-Parameter Fatigue Characteristics G. Szala	225
Effect of the Exponent in the Description of Wohler Fatigue Diagram on the Results of Calculations of Fatigue Life G. Szala and B. Ligaj	231
Fatigue Properties and Cracking of High Strength Steel S1100QL Welded Joints T. Ślęzak and L. Śnieżek	237
Verification of the Fatigue Test Method Applied with the Use of Mini Specimen T. Tomaszewski and J. Sempruch	243
The Critical Size of Defect in Polyethylene Pipes because of their Cracking K. Werner and W. Baranowski	249
Analysis of P-M Damage Accumulation in Zirconium Dioxide; Testing through Gradually Increasing Load Method M. Wirwicki and T. Topoliński	255
Crack Growth Simulation in the Compressor Blade Subjected to Vibration Using Boundary Element Method L. Witek	261
Fatigue Investigations of the Compressor Blades with Mechanical Defects L. Witek	269
