

Table of Contents

Preface

Chapter 1: Materials for Energy Conversion and Storage

The Effect of Chemical Texturization Parameters on the Diameter of Pyramids on Silicon Solar Wafers R.A.S. delos Reyes, L.A.V. Acbang, C.J.S. Rosell and J.L.M. Saba	3
Electrodeposition and Characterization of Cobalt (Co) Foam with Food-Grade Agar via Dynamic Hydrogen Bubbling Template (DHBT) C.A.N. Macababba and M.D.L. Balela	9

Chapter 2: Additive Manufacturing

Assessment of the Influence of Surface Quality on the Bending Fatigue Strength of WAAM Ultra-High-Strength Steel M. Hietala, M. Keskitalo, M. Jaskari, J. Päckilä and A. Järvenpää	19
Mechanical Characterization of 3D Printed Carbon Fiber Reinforced PLA Composite and Parameters Optimization K.K. Guduru and S. Gangiseti	27
Effect of Printing Resolution on the Dimensional Change and Microstructure of the Additive-Manufactured Parts for Dental Applications P. Jatupongpaioj, T. Khwankitsirikhun, N. Jatupongpaioj, C. Thumthae, O. Suebsamarn and S. Boonmee	35
Mechanical Characterization and Fatigue Behavior of AlSi10Mg Alloy Fabricated via Laser Powder Bed Fusion: Influence of Printing Orientation T. Rautio, M. Jaskari, M. Hietala, A. Mustakangas and A. Järvenpää	41

Chapter 3: Green Building Materials

Comparative Performance Analysis of Reclaimed Asphalt Pavement and Virgin Aggregates as Base Layer Materials in Flexible Pavement T. Rinya and D. Pal	51
Simulation of Temperature and Humidity Effect on Thermal Conductivity of Cellulose Fiber-Based Multilayered Insulation Materials for Building Envelope Applications L.D.H. Anh	59

Chapter 4: Mechatronics and Automation

Extruder for Concrete Containing PET Resin and Coir Fiber in Concrete 3D Printing Robot T.D. Dang and T.T. Nguyen	67
Modeling of Automated Guided Vehicles in Material Transport within Flexible Manufacturing Systems Using Fuzzy Logic M. Chandrasekaran and N. Teyi	77
Sensor Assisted Closed-Loop Conformal Printing of Electronics Using Multiaxis Additive Manufacturing K. Tran, T. Rizak, C. Bonner, U. Nguyen, M. Mirotznik and X. Li	85
Fundamental Study on Oblique Impact Drive Stage for Ultra Precision Positioning S. Sakuta and Y. Takada	93
