Preface

Chapter 1: Structural Metals

Effect of Strain Hardening on Wear Resistance Property of 316 Austenitic Stainless Steel A.M.Y. Taher and M. Shukuka	3
Regularities of Martensitic Transformations in New Medium-Entropy Single Crystals of CoNiAlFe Alloys A.S. Eftifeeva, I. Fatkullin, A. Tagiltsev, E.Y. Panchenko, S.G. Anikeev and Y. Chumlyakov	9
Influence of Silicon on Solidification Behavior, Microstructure and Oxidation Resistance of Gray Iron for Cookware Applications K. Amatachaya, N. Kallaya, K. Worakhut, W. Boonyarit, N. Wanmai and S. Boonmee	17
High-Speed Milling of Hardened AMS 6260 Alloy Using Radius End Mill (Effect of Cutting Conditions on Flank Wear and Surface Roughness) K. Kawasaki	25

Chapter 2: Additive Manufacturing

Assessment of the Influence of Surface Quality on the Bending Fatigue Strength of WAAM Ultra-High-Strength Steel M. Hietala, M. Keskitalo, M. Jaskari, J. Päkkilä and A. Järvenpää	33
Mechanical Characterization of 3D Printed Carbon Fiber Reinforced PLA Composite and Parameters Optimization K.K. Guduru and S. Gangisetti	41
Effect of Printing Resolution on the Dimensional Change and Microstructure of the Additive-Manufactured Parts for Dental Applications P. Jatupongpairoj, T. Khwankitsirikhun, N. Jatupongpairoj, C. Thumthae, O. Suebsamarn and S. Boonmee	49
Mechanical Characterization and Fatigue Behavior of AlSi10Mg Alloy Fabricated via Laser Powder Bed Fusion: Influence of Printing Orientation T. Rautio, M. Jaskari, M. Hietala, A. Mustakangas and A. Järvenpää	55

Chapter 3: Polymers and Composites

Development of Bamboo Based Nylon 66 Composite through Friction Stir Processing-An Attempt S. Dhasan, P. Shome, U. Khound, S. Das, J. Bhukhan and B. Das	65
Influence of Silicon Carbide Incorporation on Thermal and Ablation Properties of Carbon Fabric-Phenolic Resin Composites B. Praveen Kumar and N.V.S. Naidu	71

Chapter 4: Materials for Energy Conversion and Storage

The Effect of Chemical Texturization Parameters on the Diameter of Pyramids on Silicon Solar Wafers R.A.S. delos Reyes, L.A.V. Acbang, C.J.S. Rosell and J.L.M. Saba	79
Electrodeposition and Characterization of Cobalt (Co) Foam with Food-Grade Agar via Dynamic Hydrogen Bubbling Template (DHBT) C.A.N. Macababbad and M.D.L. Balela	85

Chapter 5: Synthesis Methods and Properties of Nanomaterials

Fabrication of Metal Particles Using Differences in Standard Electrode Potentials	95
R. Kasori, N. Yamauchi, S. Tada and Y. Kobayashi	
Synthesis of Samarium Doped Tin Oxide Using Wet Chemical Precipitation Approach	101
H.T. Gammad, E.M.A. Pranada, P.M.C. Gahol and M.C. Marquez	
Evaluating Filter Efficiency for TiO₂ Nanoparticle Deposition under Various Water Chemistry and Simulated Conditions	107
E. Abdallah and A.M.Y. Taher	

Chapter 6: Green Building Materials

Comparative Performance Analysis of Reclaimed Asphalt Pavement and Virgin Aggregates as Base Layer Materials in Flexible Pavement	115
T. Rinya and D. Pal	
Simulation of Temperature and Humidity Effect on Thermal Conductivity of Cellulose Fiber-Based Multilayered Insulation Materials for Building Envelope Applications	123
L.D.H. Anh	

Chapter 7: Mechatronics and Automation

Extruder for Concrete Containing PET Resin and Coir Fiber in Concrete 3D Printing Robot	131
T.D. Dang and T.T. Nguyen	
Modeling of Automated Guided Vehicles in Material Transport within Flexible Manufacturing Systems Using Fuzzy Logic	141
M. Chandrasekaran and N. Teyi	
Sensor Assisted Closed-Loop Conformal Printing of Electronics Using Multiaxis Additive Manufacturing	149
K. Tran, T. Rizak, C. Bonner, U. Nguyen, M. Mirotznik and X. Li	
Fundamental Study on Oblique Impact Drive Stage for Ultra Precision Positioning	157
S. Sakuta and Y. Takada
