

# Table of Contents

## Preface

## Chapter 1: Green Building Materials

<b>Performance Evaluation of Ultra High Performance Concrete Manufactured with Recycled Steel Fiber</b> A.E. Elrefaei, M. Alsaadawi, M.M. Elshafiey, M. Abdolwahab and A.F. Oan	3
<b>Performance Evaluation of Sustainable High-Strength Lightweight Concrete Incorporating Wastes as Aggregates at Elevated Temperatures</b> A.M. Tahwia, M. Amin, N. Abdelaziz and A.M. Heniegal	15
<b>Sustainable Disposal of Different Solid Wastes as Aggregate for Fabricating Lightweight Concrete: Physio-Mechanical Performance and Durability</b> A.M. Heniegal, M. Amin, N. Abdelaziz and A.M. Tahwia	33
<b>Production of Green Mortar Using Plastic Waste as a Thermal Efficient Building Material</b> M.M. Abd El-Razik, H.M. Shaker, M.M. Kamil and N.A. Taha	51
<b>A Review on the Effect of Marble Powder on Properties of Self-Compacting Concrete</b> M. Amin, M. Hadzima-Nyarko, I.S. Agwa, A.M. Zeyad, B.A. Tayeh, A. Adesina and A.R.G. de Azevedo	61
<b>Geochemical and Experimental Investigations of some Egyptian Volcanic Tuffaceous Rocks as Natural Supplementary Cementitious Materials</b> R.E. El-Shafey, M. Heikal, H. El-Dsoky, G.M. Saleh and A.A. Omar	73

## Chapter 2: Design of Energy-Efficient and Environmentally Friendly Buildings

<b>An Innovative Design for Environmentally Friendly Housing Model in Egypt</b> H.A. Helal and R. Fouad	89
<b>Treatment for Facade Building (Opaque Part) due to Climate Change in Various Regions of Egypt: Environmental Assessment of Office Spaces</b> M.M. Abd El-Razik, A. Al-Desouqi, N.K. Bahgat, T.A. Imam and T.M. El-Shazly	97
