

# Table of Contents

## Preface, Committees

## Chapter 1: Analysis Properties and Production of Cements and Concretes

<b>Influence of Fly Ash and Basalt Fibers on Strength and Chloride Penetration Resistance of Self-Consolidating Concrete</b> O.A. Mohamed and W. Al Hawat	3
<b>Rheological Optimization of Self Compacting Concrete with Sodium Lignosulfate Based Accelerant Using Hybrid Neural Network-Genetic Algorithm</b> N.C. Concha	9
<b>Error Estimation of Linear Polarization Resistance Measurement Caused by IR Drop for Reinforcement Corrosion in Concrete</b> J.X. Xu, Y.L. Cao, L.H. Jiang, Y.B. Song and W. Feng	14
<b>Belite Cement Prepared from High Carbon-Content Fly Ash</b> Y.Y. Wan and Y.H. Fang	20
<b>Uncertainty Analysis in Fatigue Life Prediction of Concrete Using Evidence Theory</b> H.S. Tang, J.H. Mei, W. Chen, D.W. Li and S.T. Xue	25
<b>Effect of Cement on the Engineering Properties of Pavement Materials</b> A. Sounthararajah, N. Nguyen, H.H. Bui, P. Jitsangiam, G.L.M. Leung and J. Kodikara	31
<b>Relationships for Size and Dispersion of Pores with Mix Factors for Cement Sand Mortar</b> B. Kondraivendhan	37
<b>Chloride Ion Diffusion Model of the Concrete under Multiple Factors</b> C.F. Yuan and D.T. Niu	43
<b>Experimental Study on Hematite Concreting</b> H.S. Kahai, M. Paliwal and S. Geete	49
<b>Study of the Technical Capability of Sugarcane Bagasse Ash in Concrete Production</b> T. da Cruz Sessa, M.M. Silvano, E. Vazquez, E.L. Qualharini, A.N. Haddad and L. Amaral Alves	53
<b>Effect of Substitution of Crushed Waste Glass as Partial Replacement for Natural Fine and Coarse Aggregate in Concrete</b> O.M. Olofinnade, J.M. Ndambuki, A.N. Ede and D.O. Olukanni	58
<b>Structural Properties of Concrete Containing Ground Waste Clay Brick Powder as Partial Substitute for Cement</b> O.M. Olofinnade, A.N. Ede, J.M. Ndambuki and G. Bamigboye	63
<b>Effects of Concrete Mix Proportion on Electrical Resistivity of Concrete</b> S.W. Hnin, P. Sanchaen and S. Tangtermsirikul	68
<b>Economic Exploitation of Gravel in Place of Granite in Concrete Production</b> G. Bamigboye, A.N. Ede, A.A. Raheem, O.M. Olofinnade and U. Okorie	73
<b>Influence of Portland Cement Brands and Aggregates Sizes on the Compressive Strength of Normal Concrete</b> A.N. Ede, G. Bamigboye, O.M. Olofinnade and K.K. Shittu	78
<b>Performance Using Boiler Ash Clinkers as Replacement for Course Aggregates in Concrete</b> G. Vasudevan	83
<b>Influence of Mineral Admixtures on Fracture Energy of Refractory Cement at Elevated Temperatures</b> B. Geethakumari, R. Ramesh Kumar and V. Syam Prakash	88
<b>Research on Physical and Hydration Heat Characteristics of the Multi-Component Cementitious Materials</b> L.B. Bian, J.H. Liu and L. Li	94
<b>Durability of Red Mud Based Geopolymer Paste in Acid Solutions</b> S. Singh, M.U. Aswath and R.V. Ranganath	99

## Chapter 2: Design and Analysis Properties of Structures

<b>Structural Behaviour of Ferrogeopolymer Slabs under Flexure</b> R. Kumutha, K. Vijai and P. Rajeswaran	109
<b>Effects of Carbon Fiber Reinforced Polymer Strips on the Flexural Strength and Deflection of Steel I-Beam</b> M.A. Ahalajal and N.C. Tarranza	114
<b>Seismic Upgrading of a Masonry Church with FRP Composites</b> G. Milani, R. Shehu and M. Valente	119
<b>Laboratory Tests of Reinforced Concrete Beams with the Use of Operational Modal Analysis</b> M. Musiał	124
<b>Influence of the Anchorage of PBO-FRCM Composites on the Effectiveness of Behaviour of Shearing Beams</b> D. Urbńska, T. Trapko, M. Musiał and T. Kowalik	129
<b>The Reliability Analysis of the Initiation Time for RC Members under Chlorine Salt Ingress and Local Micro-Climate</b> J.T. Jiao, Y.H. Ye, C.F. Wang and G.C. Ye	134
<b>Structural Damage Assessment of FRP Strengthened Reinforced Concrete Beams under Cyclic Loads</b> A.N. Ede and G. Pascale	139
<b>Producing High Strength Hollow Core Reinforced Concrete Slab with Silica Fume and Polypropylene Fibers</b> E.J. Castil and N.C. Tarranza	143

## Chapter 3: Material Properties and Processing Technologies

<b>Impact of Tool Pin Geometry and Optimized Process Parameters on Mechanical Properties of Friction Stir Welded AZ80A Mg Alloy</b> V. Jaiganesh, P.K. Nagarajan, P. Sevvel, J. Dhileep Kumar and S. Manivannan	151
<b>Synthesis Route of ZnO Nanostructures in Basic Solution</b> S. Wahyuningsih, A.H. Ramelan, U. Chasanah, R. Hidayat, L. Saputri and H. Munawaroh	156
<b>Effect of Hydroxyl Concentration on the Structural and Optical Properties of Zinc Oxide Nanoparticles</b> C.M. Pelicano and F. Mulimbayan	161
<b>Antibacterial Properties of Unique Urchin-Like CuO Nanostructures by Chemical Bath Deposition</b> J.C. Felizco and F. Mulimbayan	166
<b>Development of Photocatalytic Self-Cleaning Cotton Fabric</b> B.M. Kale, J. Wiener, S. Rwahwire and J. Militký	171
<b>Influence of Gel Aging Time on the Properties of Various Silica Aerogels Synthesized from Water Glass</b> S. Yücel, B. Karakuzu, P. Terzioğlu and T.M. Temel	176
<b>Rapid Densification of Forsterite Ceramic via Microwave Sintering</b> Y.M. Tan, C.Y. Tan, S. Ramesh, Y.C. Teh and B.K. Yap	181
<b>Identification of Kinematic Hardening Material Parameters for Martensitic Steel Sheets</b> J.H. Song, J.S. Park, C.A. Lee, H.Y. Kim and W.H. Choi	186
<b>Cyclic Voltammetric Study of the Pitting Corrosion Behavior of Low-Nickel Austenitic Stainless Steels in Citric Acid</b> F. Mulimbayan and M.G. Mena	191
<b>Effect of Temperature and Cooling Rate on the Microstructures of 35MnB and 25Mn Tubes during Heat Treatment</b> S.H. Jung, S. Lee and J. Lee	196
<b>Empirical Modeling of Sound Absorption Properties of Natural Nonwoven Fabric (<i>Antiaris toxicaria</i> Barkcloth)</b> S. Rwawiire, B. Tomková, J. Militký, L. Hes, B.M. Kale and A. Jabbar	201
