

Table of Contents

Preface and Committee

Chapter 1: Polymer Matrix Composites

Fast Curing of Carbon Fiber Reinforced Plastics Using the Integration of Nanoparticles W. Exner, M. Opitz and P. Wierach	3
Mechanical Properties of Structural Paper-Polypropylene Composite Laminates M. Prambauer, C. Paulik and C. Burgstaller	11
Short Glass Fiber Reinforced PA6 Materials for Automotiv Applications – Assessment Aging Behavior with Methods of Polymer Diagnostics M. Schoßig, T. Illing, W. Grellmann and B. Langer	19
Influence of Different Thawing Salts on the Material Properties of PA66GF30 C. Bauer, M. Magin and T. Schalk	28
Influence of the Impregnation Velocity on Impregnation Quality and Mechanical Properties of Vacuum Assisted Resin Transfer Moulding (VARTM) Materials V.M. Archodoulaki, M. Merola, D. Kastanis, T. Koch and P. Carlone	36
Cost-Effective Microfibrillar Reinforced Composites for Lightweight Applications T. Krooß, M. Gurka, L. Van der Schueren, L. Ruys, S. Fenske and C. Lenz	44
Toughening of Photopolymers for Stereolithography (SL) P. Dorfinger, J. Stampfl and R. Liska	53
PPS-Polymer-Composites for High Performance Rubber Components R. Hickmann, O. Diestel, C. Cherif, T. Götz, G. Heinrich, A. Hürkamp and M. Kaliske	60
Preparing of Heatable, CNT-Functionalized Polymer Membranes for Application in Textile Composites K. Trommer, B. Morgenstern and C. Petzold	67
Thermal Debinding of Ceramic-Filled Photopolymers M. Pfaffinger, G. Mitteramskogler, R. Gmeiner and J. Stampfl	75

Chapter 2: Metal Matrix Composites and Interpenetrating Materials

Influence of <i>In Situ</i> Formed Tribolayer on Abrasive Wear Reduction M. Varga, A.M.F. Azhaarudeen and E. Badisch	85
High Temperature Squeeze Casting of Nickel Based Metal Matrix Composites with Interpenetrating Microstructure J. Edelbauer, D. Schuller, O. Lott and A. Nagel	93
Innovative Aluminum Based Metallic Glass Particle Reinforced MMCs Produced by Gas Pressure Infiltration K. Lichtenberg and K.A. Weidenmann	101
Interpenetrating Freeze Cast Composites: Correlation between Structural and Mechanical Characteristics M. Merzkirch, P. Pinter, S. Dietrich and K.A. Weidenmann	109
Novel Metal-Matrix Composites Prepared by Paper Manufacturing Technology C. Wenzel and C.G. Aneziris	117
Powder Metallurgical Tungsten Fiber-Reinforced Tungsten B. Jasper, J.W. Coenen, J. Riesch, T. Höschen, M. Bram and C. Linsmeier	125
Interface Characterization of Hybrid Composite Extrusions A. Reeb, V. Schulze and K.A. Weidenmann	134
Influence of the Diamond Surface Termination on the Thermal Conductivity of Al/Diamond- and Ag/Diamond MMCs J. Segl and C. Edtmaier	142
Influence of Reinforcement Geometry on the Very High-Cycle Fatigue Behavior of Aluminium-Matrix-Composites A. Müller, A. Weidner and H. Biermann	150

Analysis and Evaluation of Different Influencing Factors in Processing of Hollow and Full Beads by Alginate Gelation Based on Zirconia and TRIP Steel M. Oppelt and C.G. Aneziris	158
Efficient Processing of Metal-Matrix-Composites by Combining Direct Pressure Sintering and Subsequent Thixoforging A. Storz, T. Schubert, T. Weißgärber, C. Seyboldt and K.R. Riedmüller	167
Influence of Mg-PSZ Particle Size on the Fatigue Behaviour of a High Alloy Steel Matrix Composite M. Droste and H. Biermann	176
Spark Plasma Sintering and Strength Behavior under Compressive Loading of Mg-PSZ/Al₂O₃-TRIP-Steel Composites L. Krüger, S. Grützner, S. Decker and I. Schneider	182
Synthesis of Copper/Silicon-Carbide Composites in a Thermodynamic Disequilibrium M. Klement, A. Nagel and O. Lott	189
Thermal Conductivity Behaviour of Al/Diamond and Ag/Diamond Composites in the Temperature Range 4 K < T < 293 K C. Edtmaier, E. Bauer, Z.S. Tako and J. Segl	197
The Influence of Stress and Heat on the Transformation Behaviour of NiTi for Actuator Applications in Extruded Aluminium Matrix Composites P. Pinter, A. Reeb and K.A. Weidenmann	205

Chapter 3: Ceramic Matrix Composites

Development and Characterisation of Phenolic Resin Moulding Materials for the Production of New Short Fibre-Reinforced C/C-SiC Composites D. Nestler, N. Nier, K. Roder, E. Päßler, J. Weißhuhn, A. Todt, H. Würfel, L. Kroll, S. Spange, B. Wielage and G. Wagner	215
Development and Characterisation of Phenolic Resin Based Liquid Silicon Infiltrated SiC/SiC Composites with SiN_x Fibre Coating B. Mainzer, M. Frieß, K. Roder, D. Nestler, D. Wett, L. Wöckel, T. Ebert, G. Wagner, S. Spange and D. Koch	224
The Evaluation of Thermoplastic Precursors for C/C-SiC Manufactured by Liquid Silicon Infiltration (LSI) F. Reichert, N. Langhof and W. Krenkel	232
Investigation of Different Phenolic Resins and their Behavior during Pyrolysis to Form SiC/C-Composites L. Wöckel, T. Ebert, B. Mainzer, M. Frieß, D. Koch, K. Roder, D. Wett, D. Nestler, G. Wagner and S. Spange	240
Influence of Specimen Geometry and Surface Quality on the Bending Strength of Short Fiber-Reinforced C/SiC Y. Shi, D. Koch, J.M. Hausherr and A. Neubrand	249
Development of a SiN_x-Based Barrier Coating for SiC Fibres K. Roder, D. Nestler, D. Wett, B. Mainzer, M. Frieß, L. Wöckel, T. Ebert, G. Wagner, D. Koch and S. Spange	256
Development of a Silicon-Infiltrated Silicon Carbide (SiSiC) Friction Layer by the Doctor-Blade Technique Using a Computer-Optimized Calculation for the Packing Density P. Seffern, L. Klein, D. Tischer and A. Liersch	264
Damage Evaluation of CMCs after Drilling with Geometrically Defined Cutting Edges A. Rösiger and R. Goller	271
Adhesive Bonding of Oxide Ceramics for Complex Ceramic Parts in High Temperature Furnaces C. Gadelmeier, J. Schmidt, D. Jovanovic, M. Zietkowski, C. Eckardt and M. Gorywoda	279

Chapter 4: Hybrid Structures, Laminates

Interface Phenomena of Co-Sintered Steel-Zirconia Laminates A. Bergner, T. Moritz and A. Michaelis	289
--	-----

Thermophysical Properties of Molybdenum Copper Multilayer Composites for Thermal Management Applications	
M. Seiss, T. Mrotzek, N. Dreer and W. Knabl	297
Fundamental Studies and Development on an Innovative Ceramic/Polymer Material Compound	
D. Nestler, A. Todt, B. Wielage and G. Wagner	305
„Smart Multi Material Joint“ – Hybrid Joint of Steel and FRP	
J. Lotte, U. Reisgen and A. Schiebahn	314
Textile Reinforced Lightweight Shells	
C. Petzoldt, S. Gelbrich, M. Röhrkohl, C. Müller, J. Freund and L. Kroll	319
Surface and Fracture Surface Analysis of Thermally Bonded Metal/FRP Joints	
D. Nestler, C. Döhler, B. Wielage and G. Wagner	328
Workpiece Shape Deviations in Face Milling of Hybrid Structures	
B. Denkena, T. Grove and E. Hasselberg	336
Specific Mechanical Properties of New Hybrid Laminates with Thermoplastic Matrix and a Variable Metal Component	
D. Nestler, H. Jung, S. Arnold, B. Wielage and G. Wagner	344
Smart Material Composites Substitute Monolithic Structures	
A. Frick, M. Spadaro and M. Borm	353
Sandwich Structures: Analysis of Bonding Techniques between Faces and Core and the Effect of Internal Pressure	
L. Müller, B. Lehmann and G.T. Gresser	361
Residual Stresses in Intrinsic UD-CFRP-Steel-Laminates - Experimental Determination, Identification of Sources, Effects and Modification Approaches	
R. Prussak, D. Stefaniak, C. Hühne and M. Sinapius	369
Requirements for a Process Chain for Manufacturing of Piezoceramic-Aluminum Sandwiches	
M. Nestler, S. Hensel, W.G. Drossel and R. Müller	377
Mechanical Requirements of Tailored Joining Technologies for Spring Elements in Multi-Material-Design	
A.B. Busch, M. Knorre and R. Brandt	385
Joining of Aluminum Matrix Composites and Stainless Steel by Arc Brazing	
M. Elßner, S. Weis and G. Wagner	393
Intrinsic Lightweight Steel-Composite Hybrids for Structural Components	
N. Modler, F. Adam, J. Maaß, P. Kellner, P. Knothe, M. Geuther and C. Irmeler	401
Influence of Material Properties on the Bond Strength of a Hybrid Part Consisting of Composite Sheet and Short-Fiber Thermoplastic	
E. Moritzer and C. Budde	409
Increasing the Structural Integrity of Hybrid Plastics-Metal Parts by an Innovative Mechanical Interlocking Effect	
S. Müller, M. Brand, K. Dröder and D. Meiners	417
Carbon Fiber Reinforced Composite – Toughness and Structural Integrity Enhancement by Integrating Surface Modified Steel Fibers	
B. Lehmann, S.K. Selvarayan, R. Ghomeshi and G.T. Gresser	425
Experimental Investigation of the Shear Cutting Behaviour of Sandwich Panels	
P. Stein, D. Übelacker, D. Holke and P. Groche	433
Evaluation of Corrosion Mechanisms of Hybrid Light Metal Structures by High Pressure Die Casting	
D. Joop, S. Heupel, C. Schnatterer, D. Zander and A. Bührig-Polaczek	441
Metal/FRP Connection Module – A Powder Metallurgical Approach	
T. Hutsch, A. Lang, T. Schubert, P. Schiebel, M. Christ, T. Weißgärber, B. Kieback and A.S. Herrmann	449
Optimization of Friction Stir Welded, Spring Steel Wire Reinforced EN AW-6082 Profile Joints	
V. Walter, F.X. Wirth, V. Schulze and K.A. Weidenmann	457
Spin-Blind-Riveting – A New Joining Technology for Hybrid Components	
F. Podlesak, A. Hälsig and P. Mayr	465

Evaluation of Different Hybrid Material Systems and Systematic Analysis of their Physical Mechanisms in Terms of Fatigue D. Hummelberger, L. Kärger and F. Henning	473
Lightweight Hybrid Composites of CFRP and Aluminum Foam C. Fiebig and M. Koch	482
The Consequence on Structural Adhesive Bonding of Humid Thermoplastic Composites and Possibilities of Prevention A.T. Bochtler, C. Knappe and K. Dilger	490
Joining of Zirconia Reinforced Metal-Matrix Composites C. Weigelt, H. Berek, C.G. Aneziris, R. Eckner and L. Krüger	498
Characterization of Metal Inserts Embedded in Carbon Fiber Reinforced Plastics J. Gebhardt, F. Pottmeyer, J. Fleischer and K.A. Weidenmann	506
Combined Detachable Joints for Textile Reinforced Thermoplastic Composites with Embedded Sensor Networks N. Modler, F. Adam, D. Weck and A. Winkler	514
Process Combination of Hydroforming and Injection Moulding for the <i>In Situ</i> Manufacturing of Metal and Plastic Composite Structures A. Albert, W.G. Drossel, W. Zorn, W. Nendel and D. Raithel	522

Chapter 5: Structural Health Monitoring

Analyses of Boundary Conditions for Process Integration of Sensor Elements in Complex Fibre-Reinforced Thermoplastic Spacer Structures T. Möbius, M. Krahl, M. Helwig, F. Adam, N. Modler, E. Starke, S. Sauer and W.J. Fischer	533
Laser Assisted Electrical Contacting in Multifunctional GF/PP Composites N. Schilling, N. Wiegand and U. Klotzbach	541
Preparation of Ni-C Thin Films for Strain Sensor Applications in New Hybrid Laminates with Thermoplastic Matrix D. Wett, D. Nestler, G. Wagner, B. Wielage, T. Seider, J. Martin and T. Gessner	548
Experimental and Numerical Studies on Integration Thermoplastic Composite Compatible Piezoelectric Ceramics for Actuator Application of Cylindrical Hollow Structures T. Weber, M. Gude and T. Kastner	556
Process-Integrated Manufacturing and Embedding of Novel Piezoelectric Sensor Modules into Glass Fibre-Reinforced Polyurethane Composite Structures S. Geller and M. Gude	563
Integrative Manufacturing of Textile-Based Sensors for Spatially Resolved Structural Health Monitoring Tasks of Large-Scaled Composite Components E. Häntzschke, R. Mueller, T. Ruder, A. Nocke and C. Cherif	571
Highly-Sensitive Humidity Sensors for Condition Monitoring of Hybrid Laminates T. Seider, J. Martin, A. Boeddicker, J. Rühling, D. Wett, D. Nestler, G. Wagner, A.C. Huebler, T. Otto and T. Gessner	579
Integration Methods of Sensors in FRP Components H. Christof, L. Müller, S. Küppers, P. Hofmann, E. Giebel, S. Frick, M. Gabler and G.T. Gresser	586

Chapter 6: Coatings

Nanostructured Coatings for Tooling Applications A. Köpf, J. Keckes, J. Todt, R. Pitonak and R. Weissenbacher	597
Diamond Coatings on Carbon Based Substrates R. Haubner and M. Lessiak	605
Al-Mn Thermally Sprayed Coatings as Replacement of Cd-Based Coatings A. Förg, G. Wolf, K. Dotzler, L. Libralesso and P.J. Masset	613
Solvothermal Modified Layers against High Temperature Corrosion S. Wöllmer, A. Förg, S. Schuster and P.J. Masset	621
Oxidation and Decomposition of Ti₂AlN MAX Phase Coating Deposited on Nickel-Based Super Alloy IN718 W. Garkas, M. Fröhlich, K.D. Weltmann and C. Leyens	628

Anodic Oxidation of AMCs: Influence of Process Parameters on Coating Formation R. Morgenstern, D. Nickel, D. Dietrich, I. Scharf and T. Lampke	636
Preparation of Polymer-Derived Ceramic Coatings by Dip-Coating T. Konegger, C.C. Tsai and R.K. Bordia	645

Chapter 7: Modelling, Simulation

Coupling of Mold Flow Simulations with Two-Scale Structural Mechanical Simulations for Long Fiber Reinforced Thermoplastics F. Buck, B. Brylka, V. Müller, T. Müller, A.N. Hrymak, F. Henning and T. Böhlke	655
Surface Structuring of Sheet Moulding Compounds (SMC) for Process Reliable Coatings C. Petzold, M. Lucia, S. Groß, A. Müller, J. Schneider and A. Stoll	663
Virtual Composite Manufacturing Simulation Chain F. Masseria, A. Berger and B. Kaiser	671
pVT-Behavior of Polymers under Processing Conditions and Implementation in the Process Simulation R. Freytag, J.A. Pérez Gil and R. Forstner	677

Chapter 8: Manufacturing Technology, Components/Products/Applications

Continuous Winding Technology for Specific Closed Structural Components R. Wallasch and R. Tirschmann	687
Spinning of Staple Hybrid Yarn from Carbon Fiber Wastes for Lightweight Constructions M. Hengstermann, N. Raithel, A. Abdkader and C. Cherif	695
Support Structures in Lightweight Design for the Construction of Resource Efficient Bridges E. Rudolph, A. Ehrlich, S. Gelbrich, M. Röhrkohl and L. Kroll	699
Tool Life Experiments and Vibration Assistance in Regard to the Machining of CFRP R. Zemann, J. Sacherl, W. Hake and F. Bleicher	707
Innovative Concepts for the Use of Composite Material Solutions in the Production of Automotive Cylinder Heads S. Scharf and R. Baehr	715
High Volume Production Technology for Corrosive Resistant Long-Fiber-Reinforced Plastic Extinguishers R. Tirschmann, J. Czäczine and M. Hunold	724
Experimental and Numerical Analyses of the Lightweight Potential for Hybrid Thin-Walled Members J. Denk, S. Diel and O. Huber	732
Energy and Time Efficient Microwave Curing for CFRP Parts Manufactured by Filament Winding S. Betz, F. Köster and V. Ramopoulos	741
Braiding of Branches for the Fibre Composite Technology S. Küppers, J. Thumm, L. Müller, D. Ewert and G.T. Gresser	749
Applications of Variable-Axial Fibre Designs in Lightweight Fibre Reinforced Polymers E. Richter, A. Spickenheuer, L. Bittrich, K. Uhlig and G. Heinrich	757
Application of Polymer Plaster Composites in Additive Manufacturing of High-Strength Components S. Junk and R. Matt	763
Application of a Composite Hot Shearing Tool Manufactured by Co-Spray Forming R. Rentsch, O. Grohmann, A. Schulz and V. Uhlenwinkel	771
Reinforcement Elements Aligned with the Direction of Forces for Load Transfer Areas of Long-Fiber-Reinforced Thermoplastic Components K. Arnaut, P. Schiebel, A. Lang and A. Herrmann	779
Online Poling of Thermoplastic-Compatible Piezoceramic Modules during the Manufacturing Process of Active Fiber-Reinforced Composites A. Winkler and N. Modler	787

Chapter 9: Testing and Characterization

New Sandwich Structures Consisting of Aluminium Foam and Thermoplastic Hybrid Laminate Top Layers D. Nestler, H. Jung, M. Trautmann, B. Wielage, G. Wagner, W.G. Drossel, C. Drebenstedt and T. Hipke	797
The Edge Shear Test - An Alternative Testing Method for the Determination of the Interlaminar Shear Strength in Composite Materials K.A. Weidenmann, L. Baumgärtner and B. Haspel	806
X-Ray Refraction Techniques for Fast, High-Resolution Microstructure Characterization and Non-Destructive Testing of Lightweight Composites B.R. Müller, F. Léonard, A. Lange, A. Kupsch and G. Bruno	814
Process-Oriented Determination of Preform Permeability and Matrix Viscosity during Mold Filling in Resin Transfer Molding D. Magagnato and F. Henning	822
Morphological Impact on the Fatigue Behaviour of Short Fibre Reinforced Polypropylene M. Palmstingl, T. Koch, D. Salaberger and T. Paier	830
Morphology of Sintered Cr-Mo Porous Materials M. Boehm, T. Schmoelzer, R. Simon and C. Gierl-Mayer	838
Identification of Bearing Defects in Hybrid Thrust Ball Bearings by Vibration Analysis A. Ziebell, O. Schöppel, R. Haubner and T. Konegger	844
Characterisation of Steel Composites Produced by the Damascus Technique S. Strobl and R. Haubner	852
Assembly Injection Molding of a Hard Component with Integrated Rubberlike Shaft Seal and Investigation of its Quality A. Frick, M. Borm and M. Spadaro	860
Characterisation of Anisotropic Fibre Orientation in Composites by Means of X-Ray Grating Interferometry Computed Tomography B. Plank, C. Hanneschlaeger, V. Revol and J. Kastner	868
Characterization of the Mechanical and Fatigue Behavior of Braided Composites Made of Twisted Yarns M. Wolfahrt, J. Grosser, M. Fleischmann and M. Schubert	876
Composite-Composite Joining with through the Thickness Reinforcements for Enhanced Damage Tolerance S. Stelzer, S. Ucsnik and G. Pinter	883
Failure Analysis of High-Strength Fiber Ropes A. Schmieder, T. Heinze and M. Michael	891
Fracture Mechanics Characterization of Sintered 30 Vol.-% Al₂O₃/TRIP Steel Composites Using SENB Miniature Samples R. Eckner, A. Illgen, M. Radajewski and L. Krüger	899
Consideration of Accuracy of Quantitative X-Ray CT Analyses for Short-Glass-Fibre-Reinforced Polymers D. Salaberger, M. Jerabek, T. Koch and J. Kastner	907
Fatigue Delamination Growth in CFRP Composites: From Pure Mode I and Mode II to Mixed Mode I/II S. Stelzer and G. Pinter	914
Method to Quantify the Surface Roughness of Circular Reinforcing Fibres M. Trautmann, D. Nestler, B. Wielage and G. Wagner	922
Micro Test Specimens for Compound Engineering with Minimum Material Needs C. Doerffel, G. Jüttner and R. Dietze	928
Online Process Monitoring and Control by Dielectric Sensors for a Composite Main Spar A. Breede, M. Kahali Moghaddam, C. Brauner, W. Lang and A. Herrmann	936
Phase Change Detection in Neat and Fiber Reinforced Polyamide 6 Using Dielectric Analysis A. Chaloupka, A. Wedel, I. Taha, N. Rudolph and K. Drechsler	944
Practical Results to the Long Term Behaviour of Fibre Reinforced Polymers under Constant Load R. Zemmann	952

Stiffness and Strength Based Models for the Fatigue-Life Prediction of Continuously Fiber Reinforced Composites J. Brunbauer and G. Pinter	960
Strength and Stiffness Degradation of Carbon Fiber Reinforced Plastic under Cyclic Loading under Membran-, Shear- and Bending Loading P. Haeefele and O. Herrera	968
New Approaches in Nondestructive Characterisation of Defects in Metal - CFRP Hybrids M. Schwarz, J. Summa, S. Quirin and H.G. Herrmann	976
Cyclic Deformation Behaviour of Cu Multilayered Films on Si Substrates T. Walter, G. Khatibi, M. Nelhiebel, W. Heinz and W. Robl	983

Chapter 10: Cemented Carbides, Cermets, Wear and Abrasion Materials

3D-FIB Characterization of Wear in WC-Co Coated Composites J.L. Garcia, T. Carvalho Miranda, H.C. Pinto, F. Soldera and F. Mücklich	995
Bimodal Particle Reinforcement for Wear Resistant Powder Metallurgy Steels A. Gianessi, C. Gierl-Mayer and H. Danninger	1001
Control of the Cobalt Surface Layer Formation on Cemented Carbides A. Pasquazzi, W.D. Schubert and R. Weissenbacher	1009
Gigacycle Fatigue Behaviour of Sintered WC-Co Hardmetals Investigated by Ultrasonic Resonance Testing A.B. Kotas, B. Weiss and H. Danninger	1016

Chapter 11: Bio-Composites

Production of 3D Parts from Wood Chips in a Closed Mold Process R. Hartmann and M. Koch	1027
Bio-Pultrusion of Facade-Profiles from Sustainable Materials M.U. Witt, M. Milwich, G.T. Gresser, M. Hammer and J. Knippers	1033
Processing and Characterization of Wood Plastic Composites from Bio-Based Polyamide 11 and Chemically Modified Beech Fibers P. Zierdt and A. Weber	1039
Impact Resistance Bio Compound C. Möhl and A. Krombholz	1047
New Biocomposites for Lightweight Structures and their Processes A.A. Ouali, R. Rinberg, W. Nendel, L. Kroll, A. Richter, S. Spange, C. Siegel, B. Buchelt and A. Wagenführ	1055
Bacterial Cellulose Reinforced Flax Fibre Composites: Effect of Nanocellulose Loading on Composite Properties M. Fortea-Verdejo, E. Bumbaris, K.Y. Lee and A. Bismarck	1063

Chapter 12: Recycling & Sustainability, Building Materials

Sandwich Elements from Renewable Resources as a Structural Component in the Architecture A. Krombholz, P. Werner and A. Weber	1071
Knowledge Based Technologies for Promoting Innovation in Material Science M. Dornhöfer, A. Holland and M. Fathi	1080
Damage Behaviour of Fibre Reinforced Materials Induced by High Temperature Oxidation for Optimisation of Thermal Recycling Routes F. Manis, J. Wölling and K. Drechsler	1088
Integration of Mineral Fiber Semi-Finished Products in Bituminous Matrices M. Lindner, S. Gelbrich and L. Kroll	1096
