

Table of Contents

Preface, Scientific Committee

Chapter 1: Polymer Matrix Composites

Rigidity and Damage Evolution of Long Fibre Reinforced Polypropylene Made by Direct Processing Route (LFT-D) K.A. Weidenmann, S. Dietrich, M. Grigo and P. Elsner	3
Fiber/Matrix Adhesion in Glass Fiber Reinforced Inorganic-Organic Polyurea/Polysilicate Resins M. Kopietz, F. Bilgin, S. Grishchuk and B. Wetzel	9
Ultrasonic-Impregnation for Fiber-Reinforced Thermoplastic Prepreg Production S. Sockol, C. Doerffel, J. Mehnert, G. Zwinzsch, S. Rein, M. Spieler, L. Kroll and W. Nendel	17
Use of Recycled Waste Paper as Fiber Reinforcement for Polypropylene - Examination of Mechanical Properties in Comparison to NFRP A. Scholten, N. Plogmann and D. Meiners	25
Processing of Carbon Nanotubes and Carbon Nanofibers towards High Performance Carbon Fiber Reinforced Polymers G. Singer, H. Rennhofer, G. Sinn, M.M. Unterlass, J. Wendrinsky, U. Windberger and H.C. Lichtenegger	31
Influence of the Manufacturing Process (Comparison MuCell and Direct-LFT) of Foamed and Fiber Reinforced Polymer Sandwich Structures on the Fiber Length C. Lohr, A. Menrath, P. Elsner and K.A. Weidenmann	38
Formulation and Manufacturing of Polybenzoxazine Composites J. Werner, H. Schäfer, F.J. Faßbender and K. Koschek	46
Influence of the Chemical Functionalisation of Glass Fibre Surfaces on the Mechanical Properties of Continuous Fibre Reinforced Thermoplastics C. Böhme, K. Hase, J. Tröltzsch, I. Roth-Panke, F. Helbig, D. Nestler and L. Kroll	54
Development of Thermoplastic Composites for Visible Parts in Automotive T. Köhler, K. Vonberg, B. Mohr, T. Gries and G. Seide	62
Surface Pretreatment of Fiber-Reinforced Plastics via VUV Radiation C. Schmäser, K. Rosanova and C. Dölle	70
Toughening of Glass Fiber Reinforced Unsaturated Polyester Composites by Core-Shell Particles A. Klingler, L. Soroachynska and B. Wetzel	74
Tailored Inserts Based on Continuous Fibre for Local Bearing Reinforcement of Short Fibre Thermoplastic Components K. Arnaut and A.S. Herrmann	82
Quality Controlled UD Tape Production for the Individualised Production of Load Optimised Thermoplastic Composite Parts C. Hopmann, C. Beste, M. Hildebrandt, A. Boettcher and K. Fischer	90

Chapter 2: Metal Matrix Composites

Adaptation of TiC Hard Particles Properties and Morphology in Metal Matrix Composites by Refractory Elements A. Mohr, A. Röttger and W. Theisen	99
Manufacturing of Hard Composite Materials on Fe-Base with Oxide Particles S. Brust, A. Röttger, J. Kimm, E. Usta and W. Theisen	106
High Strain Rate Compression Testing of Hot-Pressed TRIP/TWIP-Matrix-Composites R. Eckner and L. Krüger	113
Ti/B₄C Composites Prepared by <i>In Situ</i> Reaction Using Inductive Hot Pressing E. Ariza Galván, I. Montealegre-Meléndez, C. Arévalo, M. Kitzmantel and E. Neubauer	121
Preparation of Titanium Metal Matrix Composites Using Additive Manufacturing L. Vály, D. Grech, E. Neubauer, M. Kitzmantel, L. Bača and N. Stelzer	129

Composite Peening - A Novel Processing Technology for Graded Reinforced Aluminium Matrix Composites	
M. Seitz, A. Reeb, A. Klumpp and K.A. Weidenmann	137
Mechanical Properties of Aluminum-Matrix-Nanoparticle-Composites	
A. Kasakewitsch, U. Arlic and W. Riehemann	145
Silver/Diamond Composite Material - Powder Metallurgical Route and Thermo-Physical Properties	
T. Hutsch, T. Schubert, T. Weißgärber and B. Kieback	151
Continuous Powder Extrusion for Fabrication of Carbon Fibre Reinforced Aluminium	
M. Saefkow, M. List, A. Schubert, A. Lohmüller and R.F. Singer	158
Development and Characterization of Mg-SiC Nanocomposite Powders Synthesized by Mechanical Milling	
D. Penther, C. Fleck, A. Ghasemi, R. Riedel and S. Kamrani	165
Influence of Ti and Zn on Particle Incorporation of AlB₂, B and B₄C Particles in Aluminum Using the Stir Casting Process	
S. Plötz, A. Lohmüller and R.F. Singer	173
Mechanical Properties of AlSi12-Based Metal Matrix Composites with Layered Metallic Glass Ribbons	
K. Lichtenberg and K.A. Weidenmann	181
Development of a TiC_p Reinforced Ni-Based Superalloy MMC, with High Creep Resistance and Reduced Weight	
G. Lemos, M.C. Fredel, F. Pyczak and U. Tetzlaff	189
Intrinsic Aluminum CFRP Hybrid Composites Produced in High Pressure Die Casting with Polymer Based Decoupling Layer	
A. Schmid, K. Arnaut, J. Clausen, M. Koerd, A. Struss, F.J. Wöstmann and M. Busse	197
The Development of Lead-Free Sliding Contacts Based on Bronze-Graphite Composites through Powder Injection Moulding	
H. Ahmad, R. Stelzer, D. Nestler, W. Nendel, L. Kroll and G. Wagner	205

Chapter 3: Ceramic Matrix Composites

Characterization and Simulation of Bending Properties of Continuous Fiber Reinforced C/C-SiC Sandwich Structures	
Y. Shi, B. Heidenreich, P.K. Dileep and D. Koch	215
Manufacturing and Properties of Tungsten Carbide-Oxide Composites	
A. Vornberger, J. Pötschke and C. Berger	223
Process Development for the Ceramic Injection Molding of Oxide Chopped Fiber Reinforced Aluminum Oxide	
M. Tueluemen, T. Hanemann, M.J. Hoffmann, R. Oberacker and V. Piotter	231
How to Tame the Aggressiveness of Liquid Silicon in the LSI Process	
B. Mainzer, K. Kelm, P. Watermeyer, M. Frieß and D. Koch	238
Influence of Hardener Content and Curing Parameters on the Microstructure and Mechanical Properties of Porous C/C Composites	
A. Todt, K. Roder, N. Nier, B. Wielage, G. Wagner and D. Nestler	246

Chapter 4: Bio-Composites

Natural Fibre Reinforced Bioplastics - Innovative Semi-Finished Products for Series Production	
A.A. Ouali, R. Rinberg, L. Kroll, W. Nendel, A. Todorov and H. Cebulla	255
High-Performance Natural Fiber Composites Made from Technical Flax Textiles and Manufactured by Resin Transfer Molding	
S. Pichler, G. Wuzella, T. Hardt-Stremayr, A.R. Mahendran and H. Lammer	263
High Performance Green Composites for Green Technologies	
R. Schledjewski, S. Lloret Pertegas, Y. Blöbl, A. Anusic, K. Resch-Fauster, A.R. Mahendran and G. Wuzella	271
Development of Bio-Based Self-Reinforced PLA Composites	
T. Köhler, T. Gries and G. Seide	278

Chapter 5: Laminates, Cellular Materials, Hybrid Structures and Joints

Optimization of Corrosive Properties of Carbon Fiber Reinforced Aluminum Laminates due to Integration of an Elastomer Interlayer M. Stoll, F. Stemmer, S. Ilanzeer and K.A. Weidenmann	287
CATPUAL - An Innovative and High-Performance Hybrid Laminate with Carbon Fibre-Reinforced Thermoplastic Polyurethane C. Zopp, D. Nestler, J. Tröltzsch, M. Trautmann, S. Nendel, G. Wagner, W. Nendel and L. Kroll	294
Material Selection and Process Configuration for Free-Form, Voluminous and Textile-Based Multi-Material-Design by the Example of a Bucket Seat J. Stiller, K. Schäfer, F. Helbig, J. Tröltzsch, D. Nestler and L. Kroll	302
Micro-/Mesoporous Polymer-Derived Ceramic Structures Using Molecular Porogens T. Konegger, H. Peterlik and R.K. Bordia	310
Material Selection for CFRP-Aluminium-Foam-Sandwiches Manufactured by a PUR Spraying Process P. Rupp, P. Elsner and K.A. Weidenmann	317
Determination of the Damping Characteristics of Fiber-Metal-Elastomer Laminates Using Piezo-Indicated-Loss-Factor Experiments V. Sessner, M. Stoll, A. Feuvrier and K.A. Weidenmann	325
Damascus Steel Inlay on a Sword Blade - Production and Characterization S. Strobl, R. Haubner and W. Scheiblechner	333
Improved Adhesion Strength of Metal Textile Composites by Surface Texturing Using TIG Arc or CW Laser Process M. Gültner, A. Grosse, M. Lohse, M. Hertel, U. Füssel, M. Droß, M. Lammers and J. Hermsdorf	341
TFP Reinforced Metal - One Way to Increase the Specific Strength T. Hutsch, F. Aßmann, T. Weißgärber and B. Kieback	349
Characterization of Hybrid Joining Techniques for FRP/Steel-Structures under Combined Mechanical and Thermal Loading M. Hoepfner, T. Becker, D. Hülsbusch and F. Walther	358
Influence of Laser Surface Treatment for Process-Integrated Joining of Textile Reinforced Thermoplastic Composites to Metal Sheets W. Koshukow, M. Krahel, M. Gude, P. Götz and M. Kirchhoff	366
Mechanical Behavior of Loops with Small Diameters A. Lang, O. Focke and A.S. Herrmann	374
Injection Molded Aluminum-Polymer-Composites - Integral Lightweight Structures with Potential A. Frick and M. Spadaro	381
Polyelectrolyte Treatment of Cellulose Fibers for the Manufacture of Novel Bio-Hybrid Fiber Composites (Bio-HFC) for Lightweight Applications M. Shamsuyeva and H.J. Endres	389
Ultrasonic Torsion Welding of Aging Resistant Al/CFRP Joints - Concepts, Mechanical and Microstructural Properties F. Staab, F. Balle and J. Born	395
Aspects of Preloaded Bolted Joints of Fiber Reinforced Polymers and Metals J.M. Hausmann, B. Helfrich and N. Motsch	401
Characterization of the Bonded Connection in Hybrid-Steel-GFRP-Laminates A.B. Busch and R. Brandt	408

Chapter 6: Surfaces and Coatings

Deposition of CVD Diamond Coatings on Carbon Fiber Composite Substrates R. Haubner and M. Lessiak	419
Yttria-Stabilized Zirconia Thin Films via MOCVD for Thermal Barrier and Protective Applications in Injection Molding G. Fornalczyk, M. Sommer and F. Mumme	427

Entrapment of Hard Particles into Cr(VI)-Free Conversion Layers of Electrodeposited Zinc Coatings to Improve Corrosion Resistance	
P. Jehl, B. Halbedel, M. Lerp, U. Schmidt, G. Teichert and F. Schlütter	434
Anodic Oxidation of Carbon Fiber Surfaces: Influence of Static and Dynamic Process Conditions	
J. Moosburger-Will, M. Bauer, F. Schubert, O. Cheick Jumaa and S.R. Horn	440
Surface Characterization of Carbon Fibers by Atomic Force Microscopy: Roughness Quantification by Power Spectral Density	
B. Brück, T. Guglhoer, S. Haug, C. Kunzmann, M. Schulz, T. Schneck, J. Spoerl, M.R. Buchmeiser, S.R. Horn and W.M. Mueller	447
Wetting Behavior of Carbon Fibers: Influence of Surface Activation and Sizing Type	
E. Laukmanis, B. Brück, M. Bauer, J. Moosburger-Will and S.R. Horn	457
3rd Generation Hot-Dip Galvanized Steel Sheet for Automobile Manufacturing - Interface Reactions between Zinc and Metal Oxide	
M. Maderthaner, A. Jarosik, G. Angeli and R. Haubner	463

Chapter 7: Manufacturing Technologies

An Overview of Impregnation Methods for Carbon Fibre Reinforced Thermoplastics	
T. Köhler, T. Röding, T. Gries and G. Seide	473
Analysis of the Effects of Raster Orientation in Components Consisting of Short Glass Fibre Reinforced ABS of Different Fibre Volume Fraction Produced by Additive Manufacturing	
A. Heuer, P. Pinter and K.A. Weidenmann	482
In-Line Integration of Sensors in Thermoplastic Composite Structures Using Novel Continuous Orbital Winding Technology	
R. Decker, B. Arnold, R. Wallasch, A. Bauer, R. Tirschmann, J. Mehner, W. Nendel and L. Kroll	490
Torque-Fiber-Winding (TFW)-Procedure: Manufacturing of Textile-Based Unidirectional Prepreg for Raw Material and Material Development of Carbon Fibre Reinforced Thermoplastics	
A. Kolonko, F. Helbig, J. Tröltzsch, D. Nestler and L. Kroll	498
One Step Production of Bicomponent Yarns with Glass Fibre Core and Thermoplastic Sheath for Composite Applications	
A. Lüking, R. Brüll, T. Köhler, D. Pico, G. Seide and T. Gries	506
Mechanical Properties of Co-Extruded Aluminium-Steel Compounds	
S.E. Thürer, J. Uhe, O. Golovko, C. Bonk, A. Bouguecha, B.A. Behrens and C. Klose	512
Development of a High Pressure Die Casting Tool for Partial Integration of Glass Fiber Structures	
J. Clausen, M. Kelch, F.J. Wöstmann and M. Busse	520
HybridRTM - Quality Controlled Manufacturing of Hybrid Material Composites through Resin Transfer Moulding	
E. Fauster, P. Hergan, S. Stelzer, S. Scheibelhofer, G. Cespedes-Gonzales, S. Pfeifer, B. Rittenschober, M. Sieberer, M. Lauermann and R. Schledjewski	527
Nozzle and Hot Runner Systems for Injection Moulding Machines for the Manufacturing of Moulded Thermoplastic Composite Parts with Skin-Core Structure (Sandwich Mouldings)	
V. Reichert and W. Nendel	535
FE-Based Design of a Forging Tool System for a Hybrid Bevel Gear	
B.A. Behrens, A. Bouguecha, C. Bonk, M. Bonhage, A. Chugreeva and T. Matthias	544

Chapter 8: Technologies of Recycling and Renovation of Composites

Development of Nonwoven Preforms Made of Pure Recycled Carbon Fibres (rCF) for Applications of Composite Materials	
M. Hofmann, D. Wenzel, B. Gulich, H. Illing-Günther and D. Nestler	555
Properties of Second Life Carbon Fibre Reinforced Polymers	
F. Manis, M. Schmieg, M. Sauer and K. Drechsler	562
Separation of Hybrid Structures for the Reclaim of their Single Components	
S. Schweizer, A. Becker-Staines and T. Tröster	568

Surface Modification of Recycled Carbon Fibers by Use of Plasma Treatment A. Schneller, W.M. Mueller, R. Roessle and S.R. Horn	576
A Holistic Approach to Use Multi-Scale Fractions of Dry Carbon Fibre Production Waste in Filled Bulk Moulding Compounds (BMC) J. Huether, R. Maertens, O. Saburow, E. Seiler, T. Aicher and K.A. Weidenmann	583
Application of Eco-Efficiency Analysis to Assess Three Different Recycling Technologies for Carbon Fiber Reinforced Plastics (CFRPs) M. Dieterle, E. Seiler and T. Viere	593
Recycled Carbon Fibers in Complex Structural Parts - Organic Sheets Made of rCF Staple Fiber Yarns C. Goergen, S. Baz, P. Mitschang and G.T. Gresser	602

Chapter 9: Testing and Characterization, Quality Assurance

Non-Destructive Determination of Residual Stress Depth Profiles of Hybrid Components by Energy Dispersive Residual Stress Measurement B. Breidenstein, B. Denkena, T. Mörke and V. Prasanthan	613
Ultrasonic Fatigue of CFRP - Experimental Principle, Damage Analysis and Very High Cycle Fatigue Properties D. Weibel, F. Balle and D. Backe	621
Mechanism-Oriented Characterization of the Fatigue Behavior of Glass Fiber-Reinforced Polyurethane Based on Hysteresis and Temperature Measurements D. Hülbusch, M. Jamroz, S. Mrzljak and F. Walther	629
Research of the Load Bearing Capacity of Shape-Optimized Metal Inserts Embedded in CFRP under Different Types of Stresses F. Pottmeyer, M. Muth and K.A. Weidenmann	636
Acoustic Emission Analysis during Bending Tests of Continuous and Discontinuous Fiber Reinforced Polymers to Be Used in Hybrid Sheet Molding Compounds A. Trauth, P. Pinter and K.A. Weidenmann	644
Measurements of Mode I Interlaminar Properties of Carbon Fiber Reinforced Polymers Using Digital Image Correlation M. Merzkirch, L. Ahure Powell and T. Foecke	652
Development of a New Method for Residual Stress Analysis on Fiber Reinforced Plastics with Use of Digital Image Correlation T. Rief, J.M. Hausmann and N. Motsch	660
Computed Tomography Experiments on a Laboratory Multipurpose Diffractometer N. Dadivanyan, D.J. Götz, D. Beckers and F. Masiello	666

Chapter 10: Modeling, Numerical Investigation and Materials Selection in Design Process

Numerical Simulation of Low Velocity Impact on Pin-Reinforced Foam Core Sandwich Panel M.A. Dimassi and A.S. Herrmann	673
Simulation of the Influence of Embedded Inserts on the RTM Filling Behavior Considering Local Fiber Structure J. Seuffert, L. Kärger and F. Henning	681
Fiber-Reinforced Plastics with Locally Adapted Stiffness for Bio-Inspired Hingeless, Deployable Architectural Systems L. Born, A. Körner, G. Schieber, A.S. Westermeyer, S. Poppinga, R. Sachse, P. Bergmann, O. Betz, M. Bischoff, T. Speck, J. Knippers, M. Milwich and G.T. Gresser	689
Numerical Investigations of Internal and Residual Stresses in Aluminium-Polymer Laminate Foils during Stretch Forming S. Müller and S.M. Weygand	697
An Integrated Virtual Tool Chain for the Simulation of the Manufacturing Process of a Composite Tidal Blade C. Brauner, F. Pascon, T. van Eekelen, M. Bach, A. Kolovaar and A. Breede	705

Material Characterization for Constituents of Fiber Reinforced Polymers by Experiments and Prediction of Effective Composite Properties J. Goldmann, M. Kaestner and V. Ulbricht	714
Numerical Analysis on the Structural Behavior of a Non-Engaging CFRP Bellows Coupling for Propulsion Technology C. Oblinger, A. Baeten and K. Drechsler	723
FE Analysis of the Influence of Fiber Orientation to Shearing and Wrinkling of Fiber Reinforced Thermoplastic Parts B. Engel and J. Graef	732
A Material Model for Prediction of Fatigue Damage and Degradation of CFRP Materials J. Hohe, M. Gall, H. Gauch, S. Fliegner and Z.M. binti Abdul Hamid	740
An Approach for the Systematic Development of Progressive Light Weight Spring Element Concepts in Vehicle Constructions M. Knorre and R. Brandt	745
Light Weight Vehicle in Natural Fibre Composite S. Wüstenhagen, A. Kromholz, T. Theumer, P. Funke and O. Lange	753

Chapter 11: Structural Health Monitoring

Electro-Mechanical Impedance Measurements as a Possible SHM Method for Sandwich Debonding Detection C. Kralovec and M. Schagerl	763
Highly Elastic Strain Gauges Based on Shape Memory Alloys for Monitoring of Fibre Reinforced Plastics T. Mäder, I. Navarro y de Sosa, B. Senf, P. Wolf, M. Hamm, M. Zoch and W.G. Drossel	778
Sensor Integration in Castings Made of Aluminum - New Approaches for Direct Sensor Integration in Aluminum High Pressure Die Casting R. Tiedemann, C. Pille, G. Dumstorff and W. Lang	786
Experimental Investigations on Integrated Conductor Paths in Fiber-Reinforced Thermoplastic Composite Structures T. Weber, A. Winkler and M. Gude	793
In-Process Monitoring of Joining Operations for Piezoceramic Elements B. Müller, A. Pierer, M. Schmidt, A. Schubert, H.J. Koriath, M. Putz and V. Wittstock	800
Polypropylene Based Piezo Ceramic Compounds for Micro Injection Molded Sensors C. Doerffel, R. Decker, M. Heinrich, J. Tröltzsch, M. Spieler, W. Nendel and L. Kroll	807
