

Table of Contents

Preface, Committees, Lecture Programme, Poster Presentations

Chapter 1: Biohydrometallurgy and Biotechnologies in the Processing of Raw Materials in the Mining Industry

Effect of Temperature Ramping on Stirred Tank Bioleaching of a Copper Concentrate	3
S. Hedrich, C. Joulian, T. Graupner, A. Schippers and A.G. Guézennec	
Column Bioleaching of a Saline, Calcareous Copper Sulfide Ore	7
E. Pakostova, B.M. Grail and D.B. Johnson	
Production Development of Olimpiadinskoe Gold Processing Plant through BIONORD® Technology Processing	12
A. Belyi, D. Chernov and N. Solopova	
Bioelectrochemical Leaching of Copper Sulfide Minerals	16
M. Ranjbar, M. Esmailbagi and M. Schaffie	
Bioleaching of Supergene Porphyry Copper Ores from Sungai Mak Gorontalo of Indonesia by an Iron- and Sulfur-Oxidizing Mixotrophic Bacterium	20
S.K. Chaerun, F.Y. Putri, M.Z. Mubarok, W.P. Minwal and Z.T. Ichlas	
Comparison of Reductive and Oxidative Bioleaching of Jarosite for Valuable Metals Recovery	24
J. Mäkinen, M. Salo, H. Hassinen and P. Kinnunen	
The MONDO Minerals Nickel Sulfide Bioleach Project: From Test Work to Early Plant Operation	28
J. Neale, J. Seppälä, A. Laukka, P. van Aswegen, S. Barnett and M. Gericke	
Recent Advances in Biomining and Microbial Characterisation	33
A.H. Kaksonen, N.J. Boxall, T. Bohu, K. Usher, C. Morris, P.Y. Wong and K.Y. Cheng	
Linking Microbial Community Dynamics in BIOX® Leaching Tanks to Process Conditions: Integrating Lab and Commercial Experience	38
M. Smart, R.J. Huddy, C.J. Edward, C. Fourie, T. Shumba, J. Iron and S.T.L. Harrison	
Enzymatic Pre-Treatment of Carbonaceous Matter in Preg-Robbing Gold Ores: Effect of Ferrous Ion Additives	43
K.T. Konadu, K. Sasaki, K. Osseo-Asare and T. Kaneta	
Microbial Population of Industrial Biooxidation Reactors	48
A. Bulaev, A. Belyi, A. Panyushkina, N. Solopova and T. Pivovarova	
An XPS and XANES Study on the Bioleaching of Arsenopyrite with or without Pyrite	53
Y. Yang, W.H. Liu, C. Wang, M. Chen, R. Ram and S.K. Bhargava	
Evaluation of Long-Term Post Process Inactivation of Bioleaching Microorganisms	57
M. Bomberg, H. Miettinen, M. Wahlström, T. Kaartinen, S. Ahoranta, A.M. Lakaniemi and P. Kinnunen	
Bioleaching of Copper Slag Material	61
A. Schippers	
Biooxidation of a Refractory Gold Ore: Implications of Whole-Ore Heap Biooxidation	65
B.W. Chen, J.Z. Sun, H. Shang, B. Wu and J.K. Wen	
Approaches for Eliminating Bacteria Introduced during <i>In Situ</i> Bioleaching of Fractured Sulfidic Ores in Deep Subsurface	70
H. Ballerstedt, E. Pakostova, D.B. Johnson and A. Schippers	
Attachment of <i>Acidithiobacillus ferrooxidans</i> and Bioleaching of Chalcopyrite under Influence of Organic Substances Associated with Copper Solvent Extraction	75
X.R. Liu, H. Zhang, H.L. Yu and Y.H. Zhu	
Bioleaching for Removal of Chromium and Associated Metals from LD Slag	79
S. Thallner, C. Hemmelmair, S. Martinek and W. Schnitzhofer	
Examining the Effects of Typical Reagents for Sulfide Flotation on Bio-Oxidation Activity of Ferrous Iron Oxidizing Microorganisms	84
M. Jafari, S.Z. Shafaei, H. Abdollahi, M. Gharabaghi, S. Chehreh Chelgani and S. Ghassa	

Reduction of Iron(III) Ions at Elevated Pressure by Acidophilic Microorganisms	88
R.Y. Zhang, S. Hedrich and A. Schippers	
The Influence of Pyrite on Galvanic Assisted Bioleaching of Low Grade Chalcopyrite Ores	93
B. Wu, H. Shang, M.L. Wu and J.K. Wen	
Bio-Heap Leaching of Primary Copper Sulfide Ore by JOGMEC	99
T. Shinkawa, T. Chida, S. Furukawa and T. Kamiya	
Fabrication and Application of Polyethylenimine/Ca-Alginate Blended Hydrogel Fibers as High-Capacity Adsorbents for Recovery of Gold from Acidic Solutions	103
J.K. Bediako, M.H. Song and Y.S. Yun	
Selective Chemical and Biological Metal Recovery from Cu-Rich Bioleaching Solutions	107
S. Hedrich, R. Kermer, T. Aubel, M. Martin, A. Schippers, D.B. Johnson and E. Janneck	
Bioleaching of Tailings Resulting from Beneficiation of Polymetallic Ores for Recovery of Valuable Metals	113
N.S. Vardanyan, G.G. Sevyan and A.K. Vardanyan	
Electrochemical Process Engineering in Biohydrometallurgical Metal Recovery from Mineral Sulfides	118
C. Tanne and A. Schippers	
Heap Biooxidation of Gold-Sulphide and Polymetallic Ores and Tailings	122
A.V. Epiforov, A.N. Seleznev, Y.Y. Emelyanov, S.V. Balikov, L.Y. Shketova and N.V. Kopylova	
Screening of Important Variables of Organic Acids Degradation by <i>Phanerochaete chrysosporium</i> Using Plackett-Burman Design in Refractory Arsenic-Bearing and Carbonaceous Gold Ores	126
Q. Liu, H.Y. Yang, L.L. Tong and J. Peng	
Biogenic Hydrogen Sulfide for Cyanide Regeneration in Solutions during Cupriferous Gold Ores Processing	131
A.A. Faiberg, A.N. Mikhailova, V.E. Dementiev and S.S. Gudkov	
Microbial Community Analysis inside a Biooxidation Heap for Gold Recovery in Ecuador	135
C.L. Aspiazu, P. Aguirre, S. Hedrich and A. Schippers	
Comparative Bioleaching and Mineralogical Characterization of Black Shale-Hosted Ores and Corresponding Flotation Concentrates	139
A. Kamradt, J. Schaefer, A. Schippers and S. Hedrich	
Effect of X-Ray μCT Scanning on the Growth and Activity of Microorganisms in a Heap Bioleaching System	143
M. Ghadiri, S.T.L. Harrison and M.A. Fagan-Endres	
Pilot-Scale Bioleaching of Metals from Pyritic Ashes	147
E.A. Vuorenmaa, J. Mäkinen, T. Korhonen, R. Neitola and A.H. Kaksonen	
The Use of Heap Bioleaching as a Pre-Treatment for Platinum Group Metal Leaching	151
J.M. Mwase and J. Petersen	
Bioleaching Experiments on a Low-Grade Complex Zinc Ore from Inner Mongolia	155
J.F. Li, L.L. Tong, Q. Chen, Z.N. Jin and H.Y. Yang	
Investigation of Intermediates Evolutions during Bornite Bioleaching by Mesophilic Mixed Bacteria	159
X.X. Wang, M.H. Hu, X.T. Huang, R. Liao, H.B. Zhao, M.X. Hong and J. Wang	
A Comparison of Bioleaching Behavior of Two Pure Chalcopyrite Minerals through Investigating Chalcopyrite Crystallographic Properties	164
Y. Zhang, J.M. Zhang, B. Zhang, K.X. Chang, J. Wang, J.P. Xie, W.Q. Qin and G.Z. Qiu	
Effect of Marmatite on Bioleaching Behaviors of Chalcopyrite	168
R. Liao, J. Wang, H.B. Zhao, X.X. Wang, X.T. Huang and M.X. Hong	
Influence of Citrate on Metal Dissolution and Respiration Rate of Microbial Leaching Cultures	172
F. Giebner, J. Rolle, J. Helmich, M. Schlömann and S. Schopf	
Research on Bio-Leaching of Nickel-Bearing Tailings in Jilin, China	177
X. Wang, H.Y. Yang, L.L. Tong, Z.N. Jin and S.X. Zhao	
Recovery of Copper from Pyritic Copper Ores Using a Biosurfactant-Producing Mixotrophic Bacterium as Bioflootation Reagent	181
E. Sanwani, R.Z. Mirahati and S.K. Chaerun	
Insights into Heap Bioleaching at the Agglomerate-Scale	185
A. Cox and C.G. Bryan	

Comparative Variants of Microbial Pretreatment and Subsequent Chemical Leaching of a Gold-Bearing Sulphide Concentrate	
I. Spasova, M. Nicolova, P. Georgiev and S.N. Groudev	189
Biosynthesis of Copper Nanoparticles Using Aqueous Extracts of <i>Aloe vera</i> and <i>Geranium</i> and Bioleaching Solutions	
A. Pawlowska and Z. Sadowski	193
Nickel Bioleaching at Elevated pH: Research and Application	
J.Z. Sun, B.W. Chen, J.K. Wen and B. Wu	197
Biological Production of Copper Sulfide Concentrate from Flotation Tailings and Low Grade Ore	
V.J. Zepeda, I. Nancucheo, M. Guillen, E. Becerra, C. Escuti, D. Cautivo, D. González, C. Colipai, C. Demergasso and P.A. Galleguillos	202
Biodesulfurization of a Coarse-Grained High Sulfur Coal in a Full-Scale Packed-Bed Bioreactor	
A.D. Milan, A. Ahmadi and S.M.R. Hosseini	207
Pyrite Oxidation by Moderately Thermophilic Microorganisms	
A. Bulaev and M. Labyrich	211
Biooxidation of a High-Grade Arsenopyritic Gold Ore Using a Mixed Culture of Moderate Thermophilic Microorganisms	
H. Abdolah, A. Ahmadi, H. Zilouei and M. Khezri	215
Microbial Survey on Industrial Bioleaching Heap by High-Throughput 16S Sequencing and Metagenomics Analysis	
M. Acosta, P.A. Galleguillos, M. Guajardo and C. Demergasso	219
Preliminary Study on <i>In Situ</i> Realtime Quantitation of Target Bacteria on the Principle of Flow Cytometry	
G. Murakami, Y. Sugai and K. Sasaki	224
Investigating the Microbial Metabolic Activity on Mineral Surfaces of Pyrite-Rich Waste Rocks in an Unsaturated Heap-Simulating Column System	
D. Makaula, R.J. Huddy, M.A. Fagan-Endres and S.T.L. Harrison	228
The Impact of Heap Self-Heating on Microbial Activity during the Bioleaching of Low-Grade Copper Sulfide Ores	
D.W. Shiers, D.M. Collinson and H.R. Watling	233
Bioleaching of Low-Grade Chalcopyrite Ore by the Thermophilic Archaeon <i>Acidianus brierleyi</i>	
N. Saitoh, T. Nomura and Y. Konishi	237
Influence of CO₂ Supplementation on the Bioleaching of a Copper Concentrate from Kupferschiefer Ore	
A.G. Guézennec, C. Joulian, J. Jacob, F. Bodenan, P. d'Hugues and S. Hedrich	242
Unravelling the Complexity of Heap Bioleaching	
J. Petersen	246
Copper Heap Bioleach Microbiology - Progress and Challenges	
F.F. Roberto	250
Microbial Dissolution of Iron Surface Coatings in Industrial Minerals	
J. Šuba, I. Štyriaková, I. Štyriak and D. Štyriaková	255

Chapter 2: Innovative Methods in Bioleaching

Characterization and Localized Insight into Leaching of Sulfide Minerals	
M. Chen, Y. Yang and M. Vepsäläinen	261
Method for the Recovery of Indium from Diluted Bioleaching Solutions	
R. Vostal, U. Šingliar and M. Bertau	265
Changes in Metal Leachability through Stimulation of Iron Reducing Communities within Waste Sludge	
M. Roberts, D. Sapsford, A. Weightman and G. Webster	269
Mechanism of Silver-Catalyzed Bioleaching of Enargite Concentrate	
K. Oyama, T. Hirajima, K. Sasaki, H. Miki and N. Okibe	273
Bioleaching of Chalcopyrite with Two Different Metallogenetic Types: A Mineralogical Perspective	
S. Deng, G.H. Gu, J. Ji and B.K. Xu	277

Investigation of Controlled Redox Potential with Pyrite during Chalcopyrite Bioleaching by Mixed Moderately Thermophiles	281
X.T. Huang, J. Wang, H.B. Zhao, M. Gan, R. Liao, J.W. Liyu, X.X. Wang, M.X. Hong, W.Q. Qin and G.Z. Qiu	
From Knowledge to Best Practices in Bioleaching	285
C. Demergasso, R. Véliz, P.A. Galleguillos, S. Marín, M. Acosta, V.J. Zepeda, J. Bekios and J. Zeballos	
Microbial Community Composition of Mine Wastes in Cornwall and West Devon (UK)	290
T. Sbaffi, A. Buckling and C.G. Bryan	
Incorporation of Indigenous Microorganisms Increases Leaching Rates of Rare Earth Elements from Western Australian Monazite	294
M.K. Corbett, J.J. Eksteen, X.Z. Niu and E.L.J. Watkin	
Reductive Dissolution of a Lateritic Ore Containing Rare Earth Elements (REE) Using <i>Acidithiobacillus</i> Species	299
I. Nancuchoe, D.B. Johnson, M. Lopes and G. Oliveira	
The Mechanism of In and Ge Occurrence in Sphalerite Crystal and the Influence on Properties: A DFT (Density Function Theory) Simulation	303
L.L. Tong, H.Y. Yang, J.N. Xu, P.C. Xu and C. Li	
Innovative Biohydrometallurgical Approaches in the EU Project FAME	307
S. Reichel, M. Martin, C.G. Bryan, C. Vila, A. Fiúza and W. Reimer	
Fabrication of Magnetic Polymer Composite Sorbents and its Application for Recovery of Platinum from Acidic Solution	311
M.H. Song, D.H.K. Reddy, J.K. Bediako, S. Lin and Y.S. Yun	
Process and Cost Improved Agitator Solutions for Bioleach Reactors	315
J. Jung and W. Keller	

Chapter 3: Properties of Microbial Agents, Interaction Mechanisms of Microbial Agents and Processed Media

In Situ Characterization and Molecular Mechanisms Evaluation of Interfacial Interaction between Minerals and Bioleaching Microorganisms	321
J.L. Xia, H.C. Liu, Z.Y. Nie, L.Z. Liu, H.R. Zhu, L. Wang, Y. Yang, Y.L. Ma, X. Pan, Y.D. Zhao, C.Y. Ma, L. Zheng, X.J. Zhen, L.J. Zhang and W. Wen	
Mineralogical Dynamics of Primary Copper Sulfides Mediated by Acidophilic Biofilm Formation	325
R.A. Bobadilla-Fazzini	
Molecular Regulatory Network Involved in Biofilm Structure Development by <i>Acidithiobacillus thiooxidans</i> Includes Pel Exopolysaccharide Machinery	330
M. Diaz and N. Giuliani	
Mineral Specific Biofilm Formation of “<i>Acidibacillus ferrooxidans</i>” Huett2	334
F. Schieferbein, M. Bauer, A. Klingl and S. Schopf	
16S rRNA and Multilocus Phylogenetic Analysis of the Iron Oxidizing Acidophiles of the <i>Acidiferrobacteraceae</i> Family	339
F. Issotta, P.C. Covarrubias, A. Moya-Beltrán, S. Bellenberg, C. Thyssen, W. Sand, H. Nuñez, C. Mena, D.S. Holmes, R. Quatrini and M. Vera Véliz	
Proteins Binding to Immobilized Rusticyanin Detected by Affinity Chromatography	344
J. Kucera, O. Janiczek, J. Smoldas and M. Mandl	
Inhibition Kinetics of Iron Oxidation by <i>Leptospirillum ferriphilum</i> to Residual Thiocyanate Present in Bioremediated Cyanidation Tailings Wastewater	350
C.J. Edward, A. Kotsopoulos and S.T.L. Harrison	
Fungal Mineralization Processes in Rio Tinto	354
M. Oggerin, N. Rodriguez and R. Amils	
Genetic Basis of Metal Resistance in <i>Acidiphilium</i> sp. DSM 27270 (Yenapatur)	358
F. Issotta, R.A. Bobadilla-Fazzini, A. Moya-Beltrán, P.C. Covarrubias, R. Quatrini and P. Martinez	
Microorganisms Oxidize Iron (II) Ions in the Presence of High Concentrations of Sodium Chloride - Potentially Useful for Bioleaching	364
D. Huynh, S. Kaschabek, W. Sand and M. Schlömann	

Expression of Candidate Cold Stress and Metabolic Related Genes in <i>Acidithiobacillus ferrovorans</i> PQ33 Strain Using Ferrous Iron as Electron Donor	
G. Guerra-Bieberach, R. Ccorahua-Santo, A. Eca, J. Bernaldo, T. Sánchez, C. Rojas-Ayala and P. Ramirez	368
Bioleaching of Pyrite by Iron-Oxidizing Acidophiles under the Influence of Reactive Oxygen Species	
D. Huynh, S. Bellenberg, M. Vera Véliz, A. Poetsch and W. Sand	372
Transcription Dynamics of CBB-Pathway Genes in <i>Acidithiobacillus thiooxidans</i> Growing under Different CO₂ Levels	
S. Marín, M. Acosta, P.A. Galleguillos, Y. Villegas, D. Cautivo, V.J. Zepeda and C. Demergasso	376
Microbial Ferrous Ion Oxidation versus Ferric Ion Precipitation at Low Temperature Conditions	
E.C. Chukwuchendo and T.V. Ojumu	381
Comparative Study of NaCl-Tolerance Mechanisms in Acidophilic Iron-Oxidizing Bacteria and Archaea	
J. Rivera-Araya, M. Schlömann and G.J. Levicán	385
Use of Specific Metal Binding of Self-Assembling S-Layer Proteins for Metal Bioremediation and Recycling	
M. Vogel, S. Matys, F. Lehmann, B. Drobot, T. Günther, K. Pollmann and J. Raff	389
Biochemical Aspects of Energy Metabolism in <i>Sulfobacillus thermotolerans</i>	
A. Panyushkina, V. Melamud and I. Tsaplina	394
Adhesion Studies of Microorganisms on Natural Ore Material	
N. Eisen, F. Straube, S. Schopf and M. Schlömann	398
The Effect of Initial Solution pH on Surface Properties of Ferric Ion Precipitates Formed during Biooxidation of Ferrous Ion by <i>Leptospirillum ferriphilum</i>	
B. Mabusela and T.V. Ojumu	403
The Mechanism of Skutterudite Acid Leaching: A DFT Study of H⁺ Effect on CoO (010) Surface	
J.N. Xu, H.Y. Yang, L.L. Tong, Z.N. Jin and Y. Song	408
Production of Amphiphilic Hydroxamate Siderophores Marinobactins by <i>Marinobacter</i> sp. DS40M6 for Bioflootation Process	
S. Schrader, S. Kutschke, M. Rudolph and K. Pollmann	413
In Situ Characterization of Superficial Organic Composition Changes of Thermoacidophilic Archaea <i>Acidianus manzaensis</i> YN-25 in Response to Energy Substrate	
L.Z. Liu, X. Pan, X. Xia, Y.H. Zhou, Z.Y. Nie and J.L. Xia	417
Construction of a Cell Surface Engineered Yeast Aims to Selectively Recover Molybdenum, a Rare Metal	
M.F. Chien, N. Ikeda, K. Kubota and C. Inoue	421
Introduction to High-Throughput Sequencing Technologies and Review of its Application in Bioleaching	
P. Lei, M. Gan, B.J. Yang, X.D. Liu, S.B. Yang and S. Zhou	425
Type IV Secretion Systems Diversity in the <i>Acidithiobacillus</i> Genus	
R. Flores-Ríos, A. Moya-Beltrán, P.C. Covarrubias, L.G. Acuña, O. Orellana and R. Quatrini	429
EPS Characterization of a Cell Wall-Lacking Archaeon <i>Ferroplasma acidiphilum</i>	
R.Y. Zhang, V. Blanchard, M. Vera Véliz and W. Sand	434
Metagenome-Derived Draft Genome Sequence of <i>Acidithiobacillus ferrooxidans</i> RV1 from an Abandoned Gold Tailing in Neuquén, Argentina	
R. Ulloa, A. Moya-Beltrán, F. Issotta, H. Nuñez, P.C. Covarrubias, E.R. Donati, R. Quatrini and A. Giaveno	439
Phage Display - A Promising Tool for the Recovery of Valuable Metals from Primary and Secondary Resources	
S. Matys, F.L. Lederer, N. Schönberger, R. Braun, F. Lehmann, K. Flemming, S. Bachmann, S. Curtis, R.T.A. MacGillivray and K. Pollmann	443
Simplified Expression and Production of Small Metal Binding Peptides	
R. Braun, S. Matys, N. Schönberger, F.L. Lederer and K. Pollmann	447
Investigation of Fluoride Tolerance in <i>Acidithiobacillus ferrooxidans</i>	
J.M. Tao, L.Y. Ma, C. Qin, H.Q. Yin, Y.L. Liang, G.Z. Qiu and X.D. Liu	452
Potential Bioleaching Effects in <i>In Situ</i> Recovery Applications	
C. Richter, H. Kalka and H. Märten	456

Identification of Sulfur Activation Relevant Protein Genes of Extremely Thermophilic <i>Acidianus manzaensis</i>	461
H.C. Liu, J.L. Xia, Z.Y. Nie, Y.L. Ma, Y. Yang, L.Z. Liu, X. Pan and P. Yuan	
Evolution of Compositions and Contents of Capsule and Slime EPSs for Adaptation to and Action on Energy Substrates and Heavy Metals by Typical Bioleaching Microorganisms	466
Z.Y. Nie, H.C. Liu, J.L. Xia, H. Liu, Y.L. Cui and G.Z. Qiu	
Resistance of Moderately Thermophilic Acidophilic Microorganisms to Ferric Iron Ions	471
A. Bulaev	
Effect of Galactose on EPS Production and Attachment of <i>Acidithiobacillus thiooxidans</i> to Mineral Surfaces	476
P. Aguirre, A. Sanchez Rodriguez, J.C. Gentina and A. Schippers	
Molecular Response of the Acidophilic Iron Oxidizer “<i>Ferrovum</i>” sp. JA12 to the Exposure to Elevated Concentrations of Ferrous Iron	482
S.R. Ullrich, A. Poehlein, G.J. Levicán, M. Schlömann and M. Mühling	
The Surface Chemistry Characterization of Pyrite, Sphalerite and Molybdenite after Bioleaching	487
S. Ghassa, H. Abdollahi, M. Gharabaghi, S. Chehreh Chelgani and M. Jafari	
Monitoring of Biofilm Development on Surfaces Using an Electrochemical Method	492
O. Fysun, A. Maher, H. Brehm, B. Wilke and H.C. Langowski	
EIS Studies of Chalcopyrite Involving Iron(II) Ions	496
F.A.A. Delfino, D. Bevilaqua and A.V. Benedetti	
Thermochelin, a Hydroxamate Siderophore from <i>Thermocrispum agreste</i> DSM 44070	501
T. Heine, M. Mehnert, R. Schwabe and D. Tischler	
Siderophore Purification via Immobilized Metal Affinity Chromatography	505
T. Heine, M. Mehnert, R. Schwabe and D. Tischler	
Revisiting the Chrome Azurol S Assay for Various Metal Ions	509
M. Mehnert, G. Retamal-Morales, R. Schwabe, S. Vater, T. Heine, G.J. Levicán, M. Schlömann and D. Tischler	
Gallium Mobilization in Soil by Bacterial Metallophones	513
R. Schwabe, B. Obst, M. Mehnert, D. Tischler and O. Wiche	
On the Immobilization of Desferrioxamine-Like Siderophores for Selective Metal Binding	517
M.K. Anke, K. Szymańska, R. Schwabe, O. Wiche and D. Tischler	
Are there Viruses in Industrial Bioleaching Econiches?	521
P.C. Covarrubias, R. Muñoz, R.A. Bobadilla-Fazzini, P. Martinez and R. Quatrini	
Diversity of Thermophilic Iron-Pyrite-Oxidizing Enrichments from Solfataric Hot Springs in the Chilean Altiplano	526
S. Barahona, J. Cortés, M. Hengst, C. Dorador and F. Remonsellez	
Comparative Analysis of Functional Gene Diversity of Acid Mine Drainage and its Sediment by Geochip Technology	531
L. Tan, H. Yun, X.Y. Xu, J. He, H.Y. Wu, G.Z. Qiu, X.X. Liu and J.P. Xie	
Investigation of a Bioflootation Interface with Infrared Spectroscopy	537
T. Firkala, F.L. Lederer, K. Pollmann and M. Rudolph	
Leaching of Pyrite by <i>Acidithiobacillus ferrooxidans</i> Monitored by Electrochemical Methods	541
A. Saavedra and E. Cortón	
X-Ray Diffraction of Iron Containing Samples: The Importance of a Suitable Configuration	545
Y.M. Mos, A.C. Vermeulen, C.N.J. Buisman and J. Weijma	

Chapter 4: Biosorption, Bioremediation and Biopurification in the Environmental Engineering

Biogenic Iron Compounds for Hazardous Metal Remediation	551
L. Castro, M.L. Blázquez, F. González, J.A. Muñoz and A. Ballester	
Optimization of Bioscorodite Crystallization for Treatment of As(III)-Bearing Wastewaters	555
M. Tanaka, T. Hirajima, K. Sasaki and N. Okibe	
Chemical vs. Biological Crystals, all the Same?	559
J. Weijma, P. González-Contreras and C.N.J. Buisman	
Microbial Recycling of Precious and Rare Metals Sourced from Post-Consumer Products	563
N. Saitoh, T. Nomura and Y. Konishi	

Microbial Production of Schwermannite: Development from Microbial Fundamentals to Marketable Products	568
S. Reichel, E. Janneck, D. Burghardt, S. Peiffer, G. Kießig, T. Koch, I. Arnold and J. Laubrich	
Rare Earth Elements Recovery and Sulphate Removal from Phosphogypsum Waste Waters with Sulphate Reducing Bacteria	573
J. Mäkinen, M. Bomberg, M. Salo, M. Arnold and P. Koukkari	
The Use of Algal Biomass to Sustain Sulfidogenic Bioreactors for Remediating Acidic Metal-Rich Waste Waters	577
A.L. Santos and D.B. Johnson	
Integrated Sulfate Reduction and Biosorption Process for the Treatment of Mine Drainages	582
D. Cotoras, C. Hurtado and P. Viedma	
Detoxification of Heap after Gold Leaching Using Biodegradation	587
M.P. Belykh, S.V. Petrov, A.Y. Chikin, G.I. Voiloshnikov and N.L. Belkova	
Development of Metal Ion Binding Peptides Using Phage Surface Display Technology	591
N. Schönberger, S. Matys, K. Flemming, F. Lehmann, F.L. Lederer and K. Pollmann	
Recycling of Florescent Phosphor Powder $Y_2O_3:Eu$ by Leaching Experiments	596
R. Auerbach, K. Bokelmann, S. Ratering, R. Stauber, S. Schnell and J. Zimmermann	
Analysis of Microbial Communities Associated with Bioremediation Systems for Thiocyanate-Laden Mine Water Effluents	601
R.J. Huddy, F. Kadzinga, S.F. Rahman, R. Kantor, J.F. Banfield and S.T.L. Harrison	
pH and Soil Additive-Depending Uptake of Various Metals and Metalloids by <i>Helianthus tuberosus</i> from a Uranium Containing Test Field Site	605
L. Jablonski, S. Willscher, J. Wittig and D. Kuehn	
Biosorption of Heavy Metals Using Organic Waste from Tequila Processing	609
R.E. Rivera Santillan, F. Patricio Ramirez, Y. Ayala Pichardo, E. Ordaz Romero and V. Sanchez Jimenez	
South African Coal Tailings Bioflootation for Desulphurization Using <i>Mycobacterium phlei</i>	613
M.A. Fagan-Endres and S.T.L. Harrison	
Bioleaching of Cadmium from Contaminated Paddy Fields by Consortium of Autotrophic and Indigenous Cadmium-Tolerant Bacteria	617
Y. Deng, X.D. Liu, H.W. Liu, H.D. Jiang, L.F. Xu, Y.H. Xiao, X.D. Hao, H.Q. Yin and Y.L. Liang	
Bioremediation of Complex Pollutants from the Oil Industry Containing Cobalt and Molybdenum Catalysts	622
S. Miletić, T. Jednak, J. Avdalović, V. Beškoski, M. Ilić, G. Gojgić-Cvijović and M.M. Vrvić	
Biodegradation of Thiocyanate and Cyanide in CIL Leaching Waste's Liquid Phase	626
A. Belyi, A. Teleutov, A. Revenko, N. Solopova, V. Sekachev, A. Malashonok and G. Krasilnikov	
Utilization of Fe-Oxide Composites for as Removal from Aqueous Solutions	630
A. Bekényiová, Z. Danková, I. Štyriaková and D. Štyriaková	
Intensification of Arsenic and Zinc Mobilization by Combination of Bio-Chemical Leaching with EDTA in the Soil and Sediment Bioremediation	634
I. Štyriaková, D. Štyriaková, A. Bekényiová and J. Šuba	
Comparative Analysis of the Sulfate-Reducing Performance and Microbial Colonisation of Three Continuous Reactor Configurations with Varying Degrees of Biomass Retention	638
T. Hessler, T. Marais, R.J. Huddy, R. van Hille and S.T.L. Harrison	
Investigation of the Ga Complexation Behaviour of the Siderophore Desferrioxamine B	643
R. Jain, F. Cirina, P. Kaden and K. Pollmann	
Removal of Arsenic from Aqueous Solution by <i>Aeromonas hydrophila</i>	647
L. Castro, M.L. Blázquez, F. González, J.A. Muñoz and A. Ballester	
In Situ Bioremediation of Tailings by Sulfate Reducing Bacteria and Iron Reducing Bacteria: Lab- and Field-Scale Remediation of Sulfidic Mine Tailings	651
X.Y. Liu, M.J. Zhang, Y.B. Li, Z.N. Wang and J.K. Wen	
Immobilization of Arsenic by a Thermoacidophilic Mixed Culture with Pyrite as Energy Source	656
S. Vega, J. Weijma and C.N.J. Buisman	
Genomic Characterization of the Arsenic-Tolerant Actinobacterium, <i>Rhodococcus erythropolis</i> S43	660
G. Retamal-Morales, M. Mehnert, R. Schwabe, D. Tischler, M. Schlömann and G.J. Levicán	

Microbiological As(III) Oxidation and Immobilization as Scorodite at Moderate Temperatures	
Y. Era, T. Hirajima, K. Sasaki and N. Okibe	664
Investigating the Bioleaching of an Arsenic Mine Tailing Using a Mixed Mesophilic Culture	
E. Ngoma, K. Shaik, D. Borja, M. Smart, J.H. Park, H.J. Kim, J. Petersen and S.T.L. Harrison	668
Manganese Removal from Metal Refinery Wastewater Using Mn(II)-Oxidizing Bacteria	
S. Kitjanukit, K. Takamatsu, K. Takeda, S. Asano and N. Okibe	673
Microbially Catalysed Selenate Removal in an Inverse Fluidised Bed Reactor	
K.Y. Cheng, M.P. Ginige and A.H. Kaksonen	677
Evaluation of Substrate Consumption Kinetics in Different Support Materials for Biotrickling Filters Aiming Biogas Desulfurization	
L.F. Hidalgo, J.L. Santos, S.P. Tayar, A. Sarti, M.C. Palmieri, R.d.B. Solcia Guerrero and D. Bevilacqua	682
Adsorption of Chromium (VI) and Desorption as Chromium (III) from the Aqueous Chromium (VI) Solution Using Persimmon Gel	
T. Tsuruta and T. Hatano	687
Optimization of Ni, Cu and Zn Recovery in Bioleaching of Electronic Scrap	
M. Mostafavi, F. Rashchi, S. Beikzadeh Noei and N. Mostoufi	692
Bioleaching of Valuable Components from a Pyrometallurgical Final Slag	
P. Georgiev, I. Spasova, V. Groudeva, M. Nicolova, A. Lazarova, M. Iliev, R. Ilieva and S.N. Groudev	696
