

Table of Contents

Preface, Committees, Lecture Programme, Poster Presentations

Chapter 1: Biohydrometallurgy and Biotechnologies in the Processing of Raw Materials in the Mining Industry

Effect of Temperature Ramping on Stirred Tank Bioleaching of a Copper Concentrate S. Hedrich, C. Jouliau, T. Graupner, A. Schippers and A.G. Guézennec	3
Column Bioleaching of a Saline, Calcareous Copper Sulfide Ore E. Pakostova, B.M. Grail and D.B. Johnson	7
Production Development of Olimpiadinskoe Gold Processing Plant through BIONORD® Technology Processing A. Belyi, D. Chernov and N. Solopova	12
Bioelectrochemical Leaching of Copper Sulfide Minerals M. Ranjbar, M. Esmailbagi and M. Schaffie	16
Bioleaching of Supergene Porphyry Copper Ores from Sungai Mak Gorontalo of Indonesia by an Iron- and Sulfur-Oxidizing Mixotrophic Bacterium S.K. Chaerun, F.Y. Putri, M.Z. Mubarak, W.P. Minwal and Z.T. Ichlas	20
Comparison of Reductive and Oxidative Bioleaching of Jarosite for Valuable Metals Recovery J. Mäkinen, M. Salo, H. Hassinen and P. Kinnunen	24
The MONDO Minerals Nickel Sulfide Bioleach Project: From Test Work to Early Plant Operation J. Neale, J. Seppälä, A. Laukka, P. van Aswegen, S. Barnett and M. Gericke	28
Recent Advances in Biomining and Microbial Characterisation A.H. Kaksonen, N.J. Boxall, T. Bohu, K. Usher, C. Morris, P.Y. Wong and K.Y. Cheng	33
Linking Microbial Community Dynamics in BIOX® Leaching Tanks to Process Conditions: Integrating Lab and Commercial Experience M. Smart, R.J. Huddy, C.J. Edward, C. Fourie, T. Shumba, J. Iron and S.T.L. Harrison	38
Enzymatic Pre-Treatment of Carbonaceous Matter in Preg-Robbing Gold Ores: Effect of Ferrous Ion Additives K.T. Konadu, K. Sasaki, K. Osseo-Asare and T. Kaneta	43
Microbial Population of Industrial Biooxidation Reactors A. Bulaev, A. Belyi, A. Panyushkina, N. Solopova and T. Pivovarova	48
An XPS and XANES Study on the Bioleaching of Arsenopyrite with or without Pyrite Y. Yang, W.H. Liu, C. Wang, M. Chen, R. Ram and S.K. Bhargava	53
Evaluation of Long-Term Post Process Inactivation of Bioleaching Microorganisms M. Bomberg, H. Miettinen, M. Wahlström, T. Kaartinen, S. Ahoranta, A.M. Lakaniemi and P. Kinnunen	57
Bioleaching of Copper Slag Material A. Schippers	61
Biooxidation of a Refractory Gold Ore: Implications of Whole-Ore Heap Biooxidation B.W. Chen, J.Z. Sun, H. Shang, B. Wu and J.K. Wen	65
Approaches for Eliminating Bacteria Introduced during <i>In Situ</i> Bioleaching of Fractured Sulfidic Ores in Deep Subsurface H. Ballerstedt, E. Pakostova, D.B. Johnson and A. Schippers	70
Attachment of <i>Acidithiobacillus ferrooxidans</i> and Bioleaching of Chalcopyrite under Influence of Organic Substances Associated with Copper Solvent Extraction X.R. Liu, H. Zhang, H.L. Yu and Y.H. Zhu	75
Bioleaching for Removal of Chromium and Associated Metals from LD Slag S. Thallner, C. Hemmelmaier, S. Martinek and W. Schnitzhofer	79
Examining the Effects of Typical Reagents for Sulfide Flotation on Bio-Oxidation Activity of Ferrous Iron Oxidizing Microorganisms M. Jafari, S.Z. Shafaei, H. Abdollahi, M. Gharabaghi, S. Chehreh Chelgani and S. Ghassa	84

Reduction of Iron(III) Ions at Elevated Pressure by Acidophilic Microorganisms R.Y. Zhang, S. Hedrich and A. Schippers	88
The Influence of Pyrite on Galvanic Assisted Bioleaching of Low Grade Chalcopyrite Ores B. Wu, H. Shang, M.L. Wu and J.K. Wen	93
Bio-Heap Leaching of Primary Copper Sulfide Ore by JOGMEC T. Shinkawa, T. Chida, S. Furukawa and T. Kamiya	99
Fabrication and Application of Polyethylenimine/Ca-Alginate Blended Hydrogel Fibers as High-Capacity Adsorbents for Recovery of Gold from Acidic Solutions J.K. Bediako, M.H. Song and Y.S. Yun	103
Selective Chemical and Biological Metal Recovery from Cu-Rich Bioleaching Solutions S. Hedrich, R. Kermer, T. Aubel, M. Martin, A. Schippers, D.B. Johnson and E. Janneck	107
Bioleaching of Tailings Resulting from Benefication of Polymetallic Ores for Recovery of Valuable Metals N.S. Vardanyan, G.G. Sevoyan and A.K. Vardanyan	113
Electrochemical Process Engineering in Biohydrometallurgical Metal Recovery from Mineral Sulfides C. Tanne and A. Schippers	118
Heap Biooxidation of Gold-Sulphide and Polymetallic Ores and Tailings A.V. Epiforov, A.N. Seleznev, Y.Y. Emelyanov, S.V. Balikov, L.Y. Shketova and N.V. Kopylova	122
Screening of Important Variables of Organic Acids Degradation by <i>Phanerochaete chrysosporium</i> Using Plackett-Burman Design in Refractory Arsenic-Bearing and Carbonaceous Gold Ores Q. Liu, H.Y. Yang, L.L. Tong and J. Peng	126
Biogenic Hydrogen Sulfide for Cyanide Regeneration in Solutions during Cupriferous Gold Ores Processing A.A. Faiberg, A.N. Mikhailova, V.E. Dementiev and S.S. Gudkov	131
Microbial Community Analysis inside a Biooxidation Heap for Gold Recovery in Equador C.L. Aspiazú, P. Aguirre, S. Hedrich and A. Schippers	135
Comparative Bioleaching and Mineralogical Characterization of Black Shale-Hosted Ores and Corresponding Flotation Concentrates A. Kamradt, J. Schaefer, A. Schippers and S. Hedrich	139
Effect of X-Ray μCT Scanning on the Growth and Activity of Microorganisms in a Heap Bioleaching System M. Ghadiri, S.T.L. Harrison and M.A. Fagan-Endres	143
Pilot-Scale Bioleaching of Metals from Pyritic Ashes E.A. Vuorenmaa, J. Mäkinen, T. Korhonen, R. Neitola and A.H. Kaksonen	147
The Use of Heap Bioleaching as a Pre-Treatment for Platinum Group Metal Leaching J.M. Mwase and J. Petersen	151
Bioleaching Experiments on a Low-Grade Complex Zinc Ore from Inner Mongolia J.F. Li, L.L. Tong, Q. Chen, Z.N. Jin and H.Y. Yang	155
Investigation of Intermediates Evolutions during Bornite Bioleaching by Mesophilic Mixed Bacteria X.X. Wang, M.H. Hu, X.T. Huang, R. Liao, H.B. Zhao, M.X. Hong and J. Wang	159
A Comparison of Bioleaching Behavior of Two Pure Chalcopyrite Minerals through Investigating Chalcopyrite Crystallographic Properties Y. Zhang, J.M. Zhang, B. Zhang, K.X. Chang, J. Wang, J.P. Xie, W.Q. Qin and G.Z. Qiu	164
Effect of Marmatite on Bioleaching Behaviors of Chalcopyrite R. Liao, J. Wang, H.B. Zhao, X.X. Wang, X.T. Huang and M.X. Hong	168
Influence of Citrate on Metal Dissolution and Respiration Rate of Microbial Leaching Cultures F. Giebner, J. Rolle, J. Helmich, M. Schlömann and S. Schopf	172
Research on Bio-Leaching of Nickel-Bearing Tailings in Jilin, China X. Wang, H.Y. Yang, L.L. Tong, Z.N. Jin and S.X. Zhao	177
Recovery of Copper from Pyritic Copper Ores Using a Biosurfactant-Producing Mixotrophic Bacterium as Bioflotation Reagent E. Sanwani, R.Z. Mirahati and S.K. Chaerun	181
Insights into Heap Bioleaching at the Agglomerate-Scale A. Cox and C.G. Bryan	185

Comparative Variants of Microbial Pretreatment and Subsequent Chemical Leaching of a Gold-Bearing Sulphide Concentrate I. Spasova, M. Nicolova, P. Georgiev and S.N. Groudev	189
Biosynthesis of Copper Nanoparticles Using Aqueous Extracts of <i>Aloe vera</i> and <i>Geranium</i> and Bioleaching Solutions A. Pawlowska and Z. Sadowski	193
Nickel Bioleaching at Elevated pH: Research and Application J.Z. Sun, B.W. Chen, J.K. Wen and B. Wu	197
Biological Production of Copper Sulfide Concentrate from Flotation Tailings and Low Grade Ore V.J. Zepeda, I. Nancucheo, M. Guillen, E. Becerra, C. Escuti, D. Cautivo, D. González, C. Colipai, C. Demergasso and P.A. Galleguillos	202
Biodesulfurization of a Coarse-Grained High Sulfur Coal in a Full-Scale Packed-Bed Bioreactor A.D. Milan, A. Ahmadi and S.M.R. Hosseini	207
Pyrite Oxidation by Moderately Thermophilic Microorganisms A. Bulaev and M. Labyrich	211
Biooxidation of a High-Grade Arsenopyritic Gold Ore Using a Mixed Culture of Moderate Thermophilic Microorganisms H. Abdolahi, A. Ahmadi, H. Zilouei and M. Khezri	215
Microbial Survey on Industrial Bioleaching Heap by High-Throughput 16S Sequencing and Metagenomics Analysis M. Acosta, P.A. Galleguillos, M. Guajardo and C. Demergasso	219
Preliminary Study on <i>In Situ</i> Realtime Quantitation of Target Bacteria on the Principle of Flow Cytometry G. Murakami, Y. Sugai and K. Sasaki	224
Investigating the Microbial Metabolic Activity on Mineral Surfaces of Pyrite-Rich Waste Rocks in an Unsaturated Heap-Simulating Column System D. Makaula, R.J. Huddy, M.A. Fagan-Endres and S.T.L. Harrison	228
The Impact of Heap Self-Heating on Microbial Activity during the Bioleaching of Low-Grade Copper Sulfide Ores D.W. Shiers, D.M. Collinson and H.R. Watling	233
Bioleaching of Low-Grade Chalcopyrite Ore by the Thermophilic Archaeon <i>Acidianus brierleyi</i> N. Saitoh, T. Nomura and Y. Konishi	237
Influence of CO₂ Supplementation on the Bioleaching of a Copper Concentrate from Kupferschiefer Ore A.G. Guézennec, C. Jouliau, J. Jacob, F. Bodenan, P. d'Hugues and S. Hedrich	242
Unravelling the Complexity of Heap Bioleaching J. Petersen	246
Copper Heap Bioleach Microbiology - Progress and Challenges F.F. Roberto	250
Microbial Dissolution of Iron Surface Coatings in Industrial Minerals J. Šuba, I. Štyriaková, I. Štyriak and D. Štyriaková	255

Chapter 2: Innovative Methods in Bioleaching

Characterization and Localized Insight into Leaching of Sulfide Minerals M. Chen, Y. Yang and M. Vepsäläinen	261
Method for the Recovery of Indium from Diluted Bioleaching Solutions R. Vostal, U. Šingliar and M. Bertau	265
Changes in Metal Leachability through Stimulation of Iron Reducing Communities within Waste Sludge M. Roberts, D. Sapsford, A. Weightman and G. Webster	269
Mechanism of Silver-Catalyzed Bioleaching of Enargite Concentrate K. Oyama, T. Hirajima, K. Sasaki, H. Miki and N. Okibe	273
Bioleaching of Chalcopyrite with Two Different Metallogenic Types: A Mineralogical Perspective S. Deng, G.H. Gu, J. Ji and B.K. Xu	277

Investigation of Controlled Redox Potential with Pyrite during Chalcopyrite Bioleaching by Mixed Moderately Thermophiles X.T. Huang, J. Wang, H.B. Zhao, M. Gan, R. Liao, J.W. Liyu, X.X. Wang, M.X. Hong, W.Q. Qin and G.Z. Qiu	281
From Knowledge to Best Practices in Bioleaching C. Demergasso, R. Véliz, P.A. Galleguillos, S. Marín, M. Acosta, V.J. Zepeda, J. Bekios and J. Zeballos	285
Microbial Community Composition of Mine Wastes in Cornwall and West Devon (UK) T. Sbaffi, A. Buckling and C.G. Bryan	290
Incorporation of Indigenous Microorganisms Increases Leaching Rates of Rare Earth Elements from Western Australian Monazite M.K. Corbett, J.J. Eksteen, X.Z. Niu and E.L.J. Watkin	294
Reductive Dissolution of a Lateritic Ore Containing Rare Earth Elements (REE) Using <i>Acidithiobacillus</i> Species I. Nancucheo, D.B. Johnson, M. Lopes and G. Oliveira	299
The Mechanism of In and Ge Occurrence in Sphalerite Crystal and the Influence on Properties: A DFT (Density Function Theory) Simulation L.L. Tong, H.Y. Yang, J.N. Xu, P.C. Xu and C. Li	303
Innovative Biohydrometallurgical Approaches in the EU Project FAME S. Reichel, M. Martin, C.G. Bryan, C. Vila, A. Fiúza and W. Reimer	307
Fabrication of Magnetic Polymer Composite Sorbents and its Application for Recovery of Platinum from Acidic Solution M.H. Song, D.H.K. Reddy, J.K. Bediako, S. Lin and Y.S. Yun	311
Process and Cost Improved Agitator Solutions for Bioleach Reactors J. Jung and W. Keller	315

Chapter 3: Properties of Microbial Agents, Interaction Mechanisms of Microbial Agents and Processed Media

<i>In Situ</i> Characterization and Molecular Mechanisms Evaluation of Interfacial Interaction between Minerals and Bioleaching Microorganisms J.L. Xia, H.C. Liu, Z.Y. Nie, L.Z. Liu, H.R. Zhu, L. Wang, Y. Yang, Y.L. Ma, X. Pan, Y.D. Zhao, C.Y. Ma, L. Zheng, X.J. Zhen, L.J. Zhang and W. Wen	321
Mineralogical Dynamics of Primary Copper Sulfides Mediated by Acidophilic Biofilm Formation R.A. Bobadilla-Fazzini	325
Molecular Regulatory Network Involved in Biofilm Structure Development by <i>Acidithiobacillus thiooxidans</i> Includes Pel Exopolysaccharide Machinery M. Diaz and N. Guiliani	330
Mineral Specific Biofilm Formation of “<i>Acidibacillus ferrooxidans</i>” Huett2 F. Schieferbein, M. Bauer, A. Klingl and S. Schopf	334
16S rRNA and Multilocus Phylogenetic Analysis of the Iron Oxidizing Acidophiles of the <i>Acidiferrobacteraceae</i> Family F. Issotta, P.C. Covarrubias, A. Moya-Beltrán, S. Bellenberg, C. Thyssen, W. Sand, H. Nuñez, C. Mena, D.S. Holmes, R. Quatrini and M. Vera Véliz	339
Proteins Binding to Immobilized Rusticyanin Detected by Affinity Chromatography J. Kucera, O. Janiczek, J. Smoldas and M. Mandl	344
Inhibition Kinetics of Iron Oxidation by <i>Leptospirillum ferriphilum</i> to Residual Thiocyanate Present in Bioremediated Cyanidation Tailings Wastewater C.J. Edward, A. Kotsiopoulos and S.T.L. Harrison	350
Fungal Mineralization Processes in Rio Tinto M. Oggerin, N. Rodríguez and R. Amils	354
Genetic Basis of Metal Resistance in <i>Acidiphilium</i> sp. DSM 27270 (Yenapatur) F. Issotta, R.A. Bobadilla-Fazzini, A. Moya-Beltrán, P.C. Covarrubias, R. Quatrini and P. Martinez	358
Microorganisms Oxidize Iron (II) Ions in the Presence of High Concentrations of Sodium Chloride - Potentially Useful for Bioleaching D. Huynh, S. Kaschabek, W. Sand and M. Schlömann	364

Expression of Candidate Cold Stress and Metabolic Related Genes in <i>Acidithiobacillus ferrivorans</i> PQ33 Strain Using Ferrous Iron as Electron Donor G. Guerra-Bieberach, R. Ccorahua-Santo, A. Eca, J. Bernaldo, T. Sánchez, C. Rojas-Ayala and P. Ramirez	368
Bioleaching of Pyrite by Iron-Oxidizing Acidophiles under the Influence of Reactive Oxygen Species D. Huynh, S. Bellenberg, M. Vera Véliz, A. Poetsch and W. Sand	372
Transcription Dynamics of CBB-Pathway Genes in <i>Acidithiobacillus thiooxidans</i> Growing under Different CO₂ Levels S. Marín, M. Acosta, P.A. Galleguillos, Y. Villegas, D. Cautivo, V.J. Zepeda and C. Demergasso	376
Microbial Ferrous Ion Oxidation versus Ferric Ion Precipitation at Low Temperature Conditions E.C. Chukwuchendo and T.V. Ojumu	381
Comparative Study of NaCl-Tolerance Mechanisms in Acidophilic Iron-Oxidizing Bacteria and Archaea J. Rivera-Araya, M. Schlömann and G.J. Levicán	385
Use of Specific Metal Binding of Self-Assembling S-Layer Proteins for Metal Bioremediation and Recycling M. Vogel, S. Matys, F. Lehmann, B. Drobot, T. Günther, K. Pollmann and J. Raff	389
Biochemical Aspects of Energy Metabolism in <i>Sulfobacillus thermotolerans</i> A. Panyushkina, V. Melamud and I. Tsaplina	394
Adhesion Studies of Microorganisms on Natural Ore Material N. Eisen, F. Straube, S. Schopf and M. Schlömann	398
The Effect of Initial Solution pH on Surface Properties of Ferric Ion Precipitates Formed during Biooxidation of Ferrous Ion by <i>Leptospirillum ferriphilum</i> B. Mabusela and T.V. Ojumu	403
The Mechanism of Skutterudite Acid Leaching: A DFT Study of H⁺ Effect on CoO (010) Surface J.N. Xu, H.Y. Yang, L.L. Tong, Z.N. Jin and Y. Song	408
Production of Amphiphilic Hydroxamate Siderophores Marinobactins by <i>Marinobacter</i> sp. DS40M6 for Bioflotation Process S. Schrader, S. Kutschke, M. Rudolph and K. Pollmann	413
<i>In Situ</i> Characterization of Superficial Organic Composition Changes of Thermoacidophilic Archaea <i>Acidianus manzaensis</i> YN-25 in Response to Energy Substrate L.Z. Liu, X. Pan, X. Xia, Y.H. Zhou, Z.Y. Nie and J.L. Xia	417
Construction of a Cell Surface Engineered Yeast Aims to Selectively Recover Molybdenum, a Rare Metal M.F. Chien, N. Ikeda, K. Kubota and C. Inoue	421
Introduction to High-Throughput Sequencing Technologies and Review of its Application in Bioleaching P. Lei, M. Gan, B.J. Yang, X.D. Liu, S.B. Yang and S. Zhou	425
Type IV Secretion Systems Diversity in the <i>Acidithiobacillus</i> Genus R. Flores-Ríos, A. Moya-Beltrán, P.C. Covarrubias, L.G. Acuña, O. Orellana and R. Quatrini	429
EPS Characterization of a Cell Wall-Lacking Archaeon <i>Ferroplasma acidiphilum</i> R.Y. Zhang, V. Blanchard, M. Vera Véliz and W. Sand	434
Metagenome-Derived Draft Genome Sequence of <i>Acidithiobacillus ferrooxidans</i> RV1 from an Abandoned Gold Tailing in Neuquén, Argentina R. Ulloa, A. Moya-Beltrán, F. Issotta, H. Nuñez, P.C. Covarrubias, E.R. Donati, R. Quatrini and A. Giaveno	439
Phage Display - A Promising Tool for the Recovery of Valuable Metals from Primary and Secondary Resources S. Matys, F.L. Lederer, N. Schönberger, R. Braun, F. Lehmann, K. Flemming, S. Bachmann, S. Curtis, R.T.A. MacGillivray and K. Pollmann	443
Simplified Expression and Production of Small Metal Binding Peptides R. Braun, S. Matys, N. Schönberger, F.L. Lederer and K. Pollmann	447
Investigation of Fluoride Tolerance in <i>Acidithiobacillus ferrooxidans</i> J.M. Tao, L.Y. Ma, C. Qin, H.Q. Yin, Y.L. Liang, G.Z. Qiu and X.D. Liu	452
Potential Bioleaching Effects in <i>In Situ</i> Recovery Applications C. Richter, H. Kalka and H. Märten	456

Identification of Sulfur Activation Relevant Protein Genes of Extremely Thermophilic <i>Acidianus manzaensis</i>	
H.C. Liu, J.L. Xia, Z.Y. Nie, Y.L. Ma, Y. Yang, L.Z. Liu, X. Pan and P. Yuan	461
Evolution of Compositions and Contents of Capsule and Slime EPSs for Adaptation to and Action on Energy Substrates and Heavy Metals by Typical Bioleaching Microorganisms	
Z.Y. Nie, H.C. Liu, J.L. Xia, H. Liu, Y.L. Cui and G.Z. Qiu	466
Resistance of Moderately Thermophilic Acidophilic Microorganisms to Ferric Iron Ions	
A. Bulaev	471
Effect of Galactose on EPS Production and Attachment of <i>Acidithiobacillus thiooxidans</i> to Mineral Surfaces	
P. Aguirre, A. Sanchez Rodriguez, J.C. Gentina and A. Schippers	476
Molecular Response of the Acidophilic Iron Oxidizer “<i>Ferroplasma</i>” sp. JA12 to the Exposure to Elevated Concentrations of Ferrous Iron	
S.R. Ullrich, A. Poehlein, G.J. Levicán, M. Schlömann and M. Mühling	482
The Surface Chemistry Characterization of Pyrite, Sphalerite and Molybdenite after Bioleaching	
S. Ghassa, H. Abdollahi, M. Gharabaghi, S. Chehreh Chelgani and M. Jafari	487
Monitoring of Biofilm Development on Surfaces Using an Electrochemical Method	
O. Fysun, A. Maher, H. Brehm, B. Wilke and H.C. Langowski	492
EIS Studies of Chalcopyrite Involving Iron(II) Ions	
F.A.A. Delfino, D. Bevilaqua and A.V. Benedetti	496
Thermochelin, a Hydroxamate Siderophore from <i>Thermocrisum agreste</i> DSM 44070	
T. Heine, M. Mehnert, R. Schwabe and D. Tischler	501
Siderophore Purification via Immobilized Metal Affinity Chromatography	
T. Heine, M. Mehnert, R. Schwabe and D. Tischler	505
Revisiting the Chrome Azurol S Assay for Various Metal Ions	
M. Mehnert, G. Retamal-Morales, R. Schwabe, S. Vater, T. Heine, G.J. Levicán, M. Schlömann and D. Tischler	509
Gallium Mobilization in Soil by Bacterial Metallophores	
R. Schwabe, B. Obst, M. Mehnert, D. Tischler and O. Wiche	513
On the Immobilization of Desferrioxamine-Like Siderophores for Selective Metal Binding	
M.K. Anke, K. Szymańska, R. Schwabe, O. Wiche and D. Tischler	517
Are there Viruses in Industrial Bioleaching Econiches?	
P.C. Covarrubias, R. Muñoz, R.A. Bobadilla-Fazzini, P. Martinez and R. Quatrini	521
Diversity of Thermophilic Iron-Pyrite-Oxidizing Enrichments from Solfataric Hot Springs in the Chilean Altiplano	
S. Barahona, J. Cortés, M. Hengst, C. Dorador and F. Remonsellez	526
Comparative Analysis of Functional Gene Diversity of Acid Mine Drainage and its Sediment by Geochip Technology	
L. Tan, H. Yun, X.Y. Xu, J. He, H.Y. Wu, G.Z. Qiu, X.X. Liu and J.P. Xie	531
Investigation of a Bioflotation Interface with Infrared Spectroscopy	
T. Firkala, F.L. Lederer, K. Pollmann and M. Rudolph	537
Leaching of Pyrite by <i>Acidithiobacillus ferrooxidans</i> Monitored by Electrochemical Methods	
A. Saavedra and E. Cortón	541
X-Ray Diffraction of Iron Containing Samples: The Importance of a Suitable Configuration	
Y.M. Mos, A.C. Vermeulen, C.N.J. Buisman and J. Weijma	545

Chapter 4: Biosorption, Bioremediation and Biopurification in the Environmental Engineering

Biogenic Iron Compounds for Hazardous Metal Remediation	
L. Castro, M.L. Blázquez, F. González, J.A. Muñoz and A. Ballester	551
Optimization of Bioscorodite Crystallization for Treatment of As(III)-Bearing Wastewaters	
M. Tanaka, T. Hirajima, K. Sasaki and N. Okibe	555
Chemical vs. Biological Crystals, all the Same?	
J. Weijma, P. Gonzales-Contreras and C.N.J. Buisman	559
Microbial Recycling of Precious and Rare Metals Sourced from Post-Consumer Products	
N. Saitoh, T. Nomura and Y. Konishi	563

Microbial Production of Schwertmannite: Development from Microbial Fundamentals to Marketable Products	
S. Reichel, E. Janneck, D. Burghardt, S. Peiffer, G. Kießig, T. Koch, I. Arnold and J. Laubrich	568
Rare Earth Elements Recovery and Sulphate Removal from Phosphogypsum Waste Waters with Sulphate Reducing Bacteria	
J. Mäkinen, M. Bomberg, M. Salo, M. Arnold and P. Koukkari	573
The Use of Algal Biomass to Sustain Sulfidogenic Bioreactors for Remediating Acidic Metal-Rich Waste Waters	
A.L. Santos and D.B. Johnson	577
Integrated Sulfate Reduction and Biosorption Process for the Treatment of Mine Drainages	
D. Cotoras, C. Hurtado and P. Viedma	582
Detoxification of Heap after Gold Leaching Using Biodegradation	
M.P. Belykh, S.V. Petrov, A.Y. Chikin, G.I. Voiloshnikov and N.L. Belkova	587
Development of Metal Ion Binding Peptides Using Phage Surface Display Technology	
N. Schönberger, S. Matys, K. Flemming, F. Lehmann, F.L. Lederer and K. Pollmann	591
Recycling of Florescent Phosphor Powder Y₂O₃:Eu by Leaching Experiments	
R. Auerbach, K. Bokelmann, S. Ratering, R. Stauber, S. Schnell and J. Zimmermann	596
Analysis of Microbial Communities Associated with Bioremediation Systems for Thiocyanate-Laden Mine Water Effluents	
R.J. Huddy, F. Kadzinga, S.F. Rahman, R. Kantor, J.F. Banfield and S.T.L. Harrison	601
pH and Soil Additive-Depending Uptake of Various Metals and Metalloids by <i>Helianthus tuberosus</i> from a Uranium Containing Test Field Site	
L. Jablonski, S. Willscher, J. Wittig and D. Kuehn	605
Biosorption of Heavy Metals Using Organic Waste from Tequila Processing	
R.E. Rivera Santillan, F. Patricio Ramirez, Y. Ayala Pichardo, E. Ordaz Romero and V. Sanchez Jimenez	609
South African Coal Tailings Bioflotation for Desulphurization Using <i>Mycobacterium phlei</i>	
M.A. Fagan-Endres and S.T.L. Harrison	613
Bioleaching of Cadmium from Contaminated Paddy Fields by Consortium of Autotrophic and Indigenous Cadmium-Tolerant Bacteria	
Y. Deng, X.D. Liu, H.W. Liu, H.D. Jiang, L.F. Xu, Y.H. Xiao, X.D. Hao, H.Q. Yin and Y.L. Liang	617
Bioremediation of Complex Pollutants from the Oil Industry Containing Cobalt and Molybdenum Catalysts	
S. Miletić, T. Jednak, J. Avdalović, V. Beškoski, M. Ilić, G. Gojgić-Cvijović and M.M. Vrvic	622
Biodegradation of Thiocyanate and Cyanide in CIL Leaching Waste's Liquid Phase	
A. Belyi, A. Teleutov, A. Revenko, N. Solopova, V. Sekachev, A. Malashonok and G. Krasilnikov	626
Utilization of Fe-Oxide Composites for as Removal from Aqueous Solutions	
A. Bekényiová, Z. Danková, I. Štyriaková and D. Štyriaková	630
Intensification of Arsenic and Zinc Mobilization by Combination of Bio-Chemical Leaching with EDTA in the Soil and Sediment Bioremediation	
I. Štyriaková, D. Štyriaková, A. Bekényiová and J. Šuba	634
Comparative Analysis of the Sulfate-Reducing Performance and Microbial Colonisation of Three Continuous Reactor Configurations with Varying Degrees of Biomass Retention	
T. Hessler, T. Marais, R.J. Huddy, R. van Hille and S.T.L. Harrison	638
Investigation of the Ga Complexation Behaviour of the Siderophore Desferrioxamine B	
R. Jain, F. Cirina, P. Kaden and K. Pollmann	643
Removal of Arsenic from Aqueous Solution by <i>Aeromonas hydrophila</i>	
L. Castro, M.L. Blázquez, F. González, J.A. Muñoz and A. Ballester	647
<i>In Situ</i> Bioremediation of Tailings by Sulfate Reducing Bacteria and Iron Reducing Bacteria: Lab- and Field-Scale Remediation of Sulfidic Mine Tailings	
X.Y. Liu, M.J. Zhang, Y.B. Li, Z.N. Wang and J.K. Wen	651
Immobilization of Arsenic by a Thermoacidophilic Mixed Culture with Pyrite as Energy Source	
S. Vega, J. Weijma and C.N.J. Buisman	656
Genomic Characterization of the Arsenic-Tolerant Actinobacterium, <i>Rhodococcus erythropolis</i> S43	
G. Retamal-Morales, M. Mehnert, R. Schwabe, D. Tischler, M. Schlömann and G.J. Levicán	660

Microbiological As(III) Oxidation and Immobilization as Scorodite at Moderate Temperatures	
Y. Era, T. Hirajima, K. Sasaki and N. Okibe	664
Investigating the Bioleaching of an Arsenic Mine Tailing Using a Mixed Mesophilic Culture	
E. Ngoma, K. Shaik, D. Borja, M. Smart, J.H. Park, H.J. Kim, J. Petersen and S.T.L. Harrison	668
Manganese Removal from Metal Refinery Wastewater Using Mn(II)-Oxidizing Bacteria	
S. Kitjanukit, K. Takamatsu, K. Takeda, S. Asano and N. Okibe	673
Microbially Catalysed Selenate Removal in an Inverse Fluidised Bed Reactor	
K.Y. Cheng, M.P. Ginige and A.H. Kaksonen	677
Evaluation of Substrate Consumption Kinetics in Different Support Materials for Biotrickling Filters Aiming Biogas Desulfurization	
L.F. Hidalgo, J.L. Santos, S.P. Tayar, A. Sarti, M.C. Palmieri, R.d.B. Solcia Guerrero and D. Bevilaqua	682
Adsorption of Chromium (VI) and Desorption as Chromium (III) from the Aqueous Chromium (VI) Solution Using Persimmon Gel	
T. Tsuruta and T. Hatano	687
Optimization of Ni, Cu and Zn Recovery in Bioleaching of Electronic Scrap	
M. Mostafavi, F. Rashchi, S. Beikzadeh Noei and N. Mostoufi	692
Bioleaching of Valuable Components from a Pyrometallurgical Final Slag	
P. Georgiev, I. Spasova, V. Groudeva, M. Nicolova, A. Lazarova, M. Iliev, R. Ilieva and S.N. Groudev	696
