

Table of Contents

Preface, Scientific Committee

Chapter 1: Conventional and Special Concretes

| | |
|---|-----|
| Methods Considering the Concrete Creep due to Shrinkage | 3 |
| L. Zvolánek and I. Terzijski | |
| Non-Destructive and Destructive Monitoring Methods of Fibre Concrete Homogeneity | 9 |
| R. Čechmánek, M. Drdlová and M. Boháč | |
| Determination of Surface Roughness Parameters by Optical Profilometry and Sand Patch Test | 15 |
| Đ. Cairović, M. Zlámal, P. Štěpánek, T. Trčka, P. Škarvada and R. Macků | |
| Assessment of the Influence of Multiple Cyclic Loading on the Static Modulus of Elasticity of Hardened Concrete | 21 |
| P. Misák, P. Daněk, D. Kocáb, M. Potočková, B. Moravcová and L. Topolář | |
| Experimental Analysis of the Proposed Watertight Steel Fibre Concrete | 25 |
| V. Suchánek and M. Slováček | |
| Hybrid Cements with Non Silicate Activators | 30 |
| V. Bílek, F. Khestl and P. Mec | |
| Modulus of Elasticity in Tension for Concrete and Fibre Reinforced Concrete | 35 |
| M. Tipka and J. Vašková | |
| Mixing of Concretes with Extremely Low Water-Cement Ratio | 41 |
| M. Ženíšek, T. Vlach and L. Laiblová | |
| Drying Shrinkage of Concrete: Experiments and Numerical Models | 46 |
| M. Vinkler and J.L. Vítek | |
| Influence of Steel Fibres in Steel Fibre Reinforced Concrete on ULS and SLS | 52 |
| J. Fleissig | |
| Evaluation of Three-Point Bending Fracture Tests of Selected Concrete: Crack Initiation and Acoustic Emission Parameters | 58 |
| H. Šimonová, L. Topolář, I. Havlíková, M. Matysík, P. Daněk and Z. Keršner | |
| Evaluation of Three-Point Bending Fracture Tests of Selected Concrete: Mechanical Fracture Parameters | 64 |
| H. Šimonová, P. Daněk, D. Lehký, Z. Keršner and L. Pazdera | |
| Roof Structural System Study with Use of UHPC | 70 |
| M. Holý | |
| Effect of Temperature Increasing on Deformation Properties of TRC | 75 |
| T. Bittner, P. Bouška, Š. Nenadálová, M. Rydval and M. Vokáč | |
| Measurement of Chloride Permeability in UHPC by Accelerated Method | 80 |
| D. Dobiáš, M. Kouril, R. Novakova, P. Pokorný and R. Pernicová | |
| Residual Material Properties of High Strength Fibre Reinforced Concrete Exposed to Elevated Temperatures | 85 |
| D. Čítek, M. Rydval, J. Fořt, P. Pokorný, Z. Pavlík and J. Kolísko | |
| Functionally Layered Thin Slabs Made from UHPC and ECC Composites | 90 |
| M. Rydval, D. Čítek, J. Kolísko, Š. Nenadálová and T. Bittner | |
| Low-Strength Self-Compacting Concrete | 97 |
| L. Osuská, M. Labaj and J. Valek | |
| Thin Protective Layers Made out of Special Concretes | 101 |
| N. Stankiewicz and M. Bołtryk | |
| Proposition of a New Conformity Criterion for the Assessment of the Concrete Compressive Strength | 106 |
| E. Szczygielska and V.V. Tur | |

Chapter 2: Bridge Engineering

| | |
|---|-----|
| Assessment of Load-Bearing Capacity of Bridges J. Navrátil, M. Drahorád and P. Ševčík | 113 |
| Long-Term Monitoring of a UHPC Footbridge J. Tichý, D. Čítek, B. Slánský and S. Ševčík | 119 |
| Spatially Curved Cable-Supported Bridge Structures K. Zlatuška, J. Stráský and R. Nečas | 125 |
| The Bridge over the Chomutovka River Valley R. Cihlář, M. Nožička and J. Aubrecht | 130 |
| Shear Resistance of Slabs Subjected to Concentrated Loads R. Vida and J. Halvoník | 135 |
| Application of Precast UHPC Web Members for Long-Span Bridge Structures V. Pribramský and M. Kopálová | 140 |
| The Approach Slab Experiment - Design and Set up of the Experiment K. Laco and V. Borzovič | 146 |
| Non-Linear FEM Analysis of Integral Bridges Transition Area M. Pečník, V. Borzovič and K. Laco | 152 |
| Effects of Differential Shrinkage in Concrete Bridges L. Kadlec, V. Kříštek and C.P. Strobach | 158 |
| Joints of Precast Structures Using UHPC J.L. Vítěk, D. Čítek and R. Coufal | 164 |

Chapter 3: Structural Elements and Systems

| | |
|---|-----|
| The Use of Moment-Resisting Frames and Braced Frames for Lateral Stability of Multi-Storey Precast Concrete Structures A.L. Rocha, M.d.A. Ferreira, W.d.S. Morais and B. Catoia | 173 |
| Strut-and-Tie Model for Predicting the Punching Shear of Flat Slabs with Shear Reinforcement L. Lyčka and P. Štěpánek | 178 |
| Nonlinear Analysis of Precast Dapped-End Beams M. Hasa and M. Zich | 184 |
| Assessment of the Effects of Wind on Multi-Storey and High-Rise Concrete Building I. Abrahoim and I. Harvan | 190 |
| Contribution of Settlement of a High-Rise Building with Recession in a Ground Plan to Punching Shear J. Nováček and M. Zich | 198 |
| Analysis of the Overall Reliability Slender Concrete Columns V. Benko, T. Gúcky and A. Valašík | 203 |
| Resistance of Flat Slabs with Openings L. Fillo, T. Augustín, A. Bartók and O. Keseli | 209 |
| Numerical Modeling of an Existing RC Frame for the Design of Strengthening through Composite Materials R. Cerioni, L. Ferrari and F. Leurini | 215 |
| Structural Fiber Reinforced Concrete Elements J. Novák and A. Kohoutková | 221 |
| Numerical Simulation on the Aerodynamic Characteristics Effect of Ribs Acting on the Cooling Tower P. Harazim and L. Vráblík | 227 |
| The Maximum Punching Capacity of Flat Slabs L. Majtánová, J. Halvoník and J. Hanzel | 232 |
| Thin Lightweight Panels Made of Textile Reinforced Concrete J. Řepka, T. Vlach, L. Laiblová, P. Hájek, M. Ženíšek and P. Kokeš | 238 |
| Uncertainty of Predicting Shear Strength V. Červenka, J. Červenka, T. Sajdlová and R. Pukl | 244 |
| Screw Connection in Reinforced Concrete Column Joints of Prefabricated Structures I. Hranilović, D. Meštrović, Z. Kokrehel and D. Čizmar | 249 |

Reliability of Existing Concrete Structures Determined with Physical Models - Carbonation Induced Corrosion

I. Zambon, A. Vidović and A. Strauss

255

Chapter 4: Progressive Structure Systems

Demountable Frame Structure with an Elastically Embedded Diaphragm

J. Witzany, D. Makovička, R. Zigler and A. Polák

263

Moment-Rotation Response of Beam-Column Connections in Precast Concrete Structures

M.Â.S. Hadade, M.d.A. Ferreira, R.C. Carvalho and B. Catoia

269

Construction and Static Loading Tests of Experimental Subtle Frame from High Performance Concrete for Energy Efficient Buildings

C. Fiala, J. Hejl, V. Bílek, T. Vlach, M. Ženíšek, J. Růžička and P. Hájek

275
