

Table of Contents

Preface

Chapter 1: Research of Concrete Properties and Preparation Technologies

AAM for Structure Beams and Analysis of Beam without Shear Reinforcement O. Sucharda, V. Bilek, P. Mateckova and L. Pazdera	3
Aspects of Testing and Material Properties of Fiber Concrete O. Sucharda and V. Bilek	9
Effect of Different Ingredients of Ultra High Performance Asphalt Concrete Pavement on Modulus of Elasticity Using Response Surface Modelling M.A. Mosaberpanah and O. Eren	15
Shrinkage in Cementitious Self-Levelling Floor Compounds D. Kocáb and B. Kucharczyková	23
Examining the Influence of the Shape, Size, and Type of Test Specimens on the Value of Young's Modulus in Lightweight Concrete D. Kocáb, P. Daněk, P. Žítt, A. Tichý and M. Alexa	29
Identifying Concrete Resistance to Corrosion by Deionised Water with Aggressive Carbon Dioxide D. Kocáb, I. Terzijski, J. Strnad, P. Štěpánek and M. Ševčík	34
Simple Comparison of Different Concrete Resistance to Sulphate-Induced Corrosion I. Terzijski, D. Kocáb, J. Strnad, M. Zlámal and P. Louda	40
Experimental Assessment of the Influence of Multiple Cyclic Loading on Selected Properties of Lightweight Concrete P. Misák, D. Kocáb, M. Alexa, B. Kucharczyková, P. Daněk and R. Halamová	45
Influence of the Poisson's Ratio on the Value of the Dynamic Modulus of Elasticity of Cement Materials in the Early Stage of Ageing R. Halamová, D. Kocáb, B. Kucharczyková, P. Misák and M. Alexa	50
Estimation of Tensile Strength of High Strength Concrete Based on Experimental Results R. Sinđić Grebović and M. Grebović	56
Fracture Response of Fine-Grained Cement-Based Composite Specimens with Special Inclusions M. Vyhlídal, I. Rozsypalová, T. Majda, P. Daněk, H. Šimonová, B. Kucharczyková and Z. Keršner	63
Time Development of Concrete Strength in Comparison with the Development of Concrete Shrinkage M. Janda and M. Zich	69

Chapter 2: Concrete and Sustainable Development

Possibilities of Processing of Slag Aggregate from Heap Koněv L. Procházka and J. Boháčová	79
Fracture Parameters of Concrete from Drill-Core Specimens from Objects at the Transgas Gas Control Center T. Majda, P. Daněk, P. Frantík, H. Šimonová, P. Rovnaníková and Z. Keršner	85
Influence of the Amount of Ammonium Salts in Fly Ash on Concrete with Ternary Binders M. Bambuchová, D. Pytlík and V. Bilek	91
Hydraulic Road Binder with High Share of Fly Ash after Denitrification L. Bulíková and F. Kresta	96
The Effect of Homogenization Procedure on Mechanical Properties of High-Performance Concrete with Partial Replacement of Cement by Supplementary Cementitious Materials J. Fládr, P. Bílý, K. Šeps, R. Chylík and V. Hrbek	102

Macroscopic and Microscopic Properties of High Performance Concrete with Partial Replacement of Cement by Fly Ash J. Fládr, P. Bílý, R. Chylík and Z. Prošek	108
Experimental Determination of Early Shrinkage of Alkali-Activated Slag M. Alexa, D. Kocáb, B. Kucharczyková and J. Kotrla	114

Chapter 3: Modeling and Design of Concrete Elements and Structures

Robustness Assessment Based on Pseudo-Static Full Probabilistic Approach A.V. Tur	123
Modeling of Interaction between the Bridge Girder and Piers with the Use of Commercial Software P. Havlíček and J. Šoltész	128
Numerical Analysis of the Experimental Flat Slabs L. Majtánová and J. Halvonik	134
Calculation of Resistance and Non-Linear Analysis of Reinforced Concrete Beams P. Mateckova, L. Mynarzova, O. Sucharda and V. Bilek	140
Tests of Slab-Column Connections Subjected to Reversed Cyclic Moments in Addition to Different Levels of Gravity Shear Load A. Abdelkhalik, T.H.K. Elafandy, A. Abdelrahman and A. Sherif	146
Non-Linear Analysis of Precast Concrete Element for Airport Pavement M. Šrámek and J. Novák	153
Numerical Analysis of Rigid Frame Joint with Textile Carbon Reinforcement J. Žalský, T. Vlach, L. Laiblová, Z. Jirkalová, J. Řepka and P. Hájek	159
Regarding the Interaction Diagram of Reinforced Concrete Cross-Section J. Holan and R. Štefan	164
Analysis of Fire Resistance of Concrete Structural Members Based on Different Fire Models: An Illustrative Example of the Slab Panel Assessment M. Benýšek, R. Štefan and J. Procházka	173
Progressive Spatially Curved Footbridges K. Žlatuška, M. Olšák, J. Stráský, R. Nečas and J. Koláček	183
Nonlinear FEM Analysis of Experimentally Tested Flat Slabs with Openings T. Augustín, L. Fillo and J. Halvonik	191
Nonlinear Analysis and Comparison of Design Methods for Slender Concrete Columns with their Impact on Economy and Reliability J. Dobrý, M. Čuhák, P. Čížek and V. Benko	197
Serviceability Limit State Evaluation in Discontinuity Regions M. Číhal, J. Kabeláč, M. Konečný and L. Juříček	203
B4 Model Adaptation for Prediction of UHPC Strains from Creep and Shrinkage V. Pribramsky	210
Influence of Test Configuration on Bond Strength of GFRP Bars O. Januš, F. Girgle, V. Kostiha, P. Štěpánek and P. Sulak	217
Flexural Strength of Thin Slabs Made of UHPFRC M. Holý, D. Čítek, P. Tej and L. Vráblík	224
Cracking and Failure Mode of the Self-Stressed Members with FRP Bars V. Semianiuk and V.V. Tur	230
Utilization of Vacuum-Formed Plastic Membranes for the Production of Lightened HPC Panels J. Řepka, T. Vlach, L. Laiblová, Z. Jirkalová and P. Hájek	236
New Composite Construction Method with STEEL/UHPFRC Constructing Railway Bridges W. Zimmermann and S. Kuss	242
Limits and Potential of 3D Printing Technologies for Construction of Concrete Shells M. Kovářik, P. Svoboda and H.H. Achten	249
Adaptive Estimation of the <i>In Situ</i> Characteristic Concrete Strength S.S. Derechennik and V.V. Tur	257
