

Table of Contents

Preface

Chapter 1: Concrete and Building Composites

Pilot Fracture Tests of Special Fine-Grained Composites	
I. Rozsypalová, E. Bystrianska, O. Koutný, P. Daněk, P. Frantík and Z. Keršner	3
Methodology of Controlled Crack Introduction in Cementitious Materials	
H. Schreiberova, J. Fládr, R. Chylík, T. Trtík and A. Kohoutková	9
Influence of the Method of Production of Test Specimens on the Result of the Frost Resistance Test of Concrete	
D. Kocáb, P. Daněk, P. Žitt and T. Vymazal	17
Determination of a Suitable Moment for Formwork Removal from a Concrete Structure Using Rebound Hammer Test Methods	
P. Misák, D. Kocáb and P. Cikrle	23
The Analysis of the Intensity and Vibration Time on the Mechanical Properties of Hardened Concrete	
T. Trtík, R. Chylík, J. Fládr and J. Vašková	28
Concrete in the Environment of Agricultural Buildings	
A. Hubáček and R. Hela	35
Effects of Concrete Compositions on the Elastic Modulus	
R. Hela, L. Bodnárová and K. Křížová	41
Comparison of Methods for Crack Development State for Steel Fibre Reinforced Concrete	
L. Musil, M. Tipka, H. Hanzlová and J. Vodička	48
Fracture Resistance of AAAS Composites with Ceramic Precursor	
I. Rozsypalová, P. Daněk, P. Rovnaníková and Z. Keršner	54
Strength of AAAS Composites with Ceramic Precursor over Time	
P. Frantík, P. Rovnaníková and Z. Keršner	60
Identification of AAAS Composites Mechanical Fracture Parameters	
M. Lipowczan, D. Lehký, I. Rozsypalová, P. Daněk, P. Rovnaníková and Z. Keršner	66
Properties of Spanish Broom Fiber Reinforced Concrete	
S. Juradin, I. Boko, I. Netinger Grubeša, D. Jozić, S. Mrakovčić and I. Vukojević	72
Use of Ash after Denitrification as an Additive to Concrete Based on Alkali-Activated Slag	
L. Procházka and J. Boháčová	78

Chapter 2: Research and Designing of Structural Concrete Members

Behavior of the Experimental Flat Slab Specimen Supported by an Elongated Column	
E. Kormosova and J. Halvonik	87
The Influence of Various Types of Reinforcement of the Concrete Pillars of Precast Walls with an Opening	
O. Šimek, M. Zich, M. Janda and R. Nečas	94
Experimental and Numerical Study of Reinforcement Strains in RC Ties	
R. Jakubovskis, D. Valiukas and G. Kaklauskas	100
Precast Dapped End - Nonlinear Analysis	
L. Juříček, M. Zich, M. Hasa, P. Komárková and L. Bobek	106
Experimental Analysis of Flat Slab Locally Supported by an Elongated Column	
S. Sarvaicová and V. Borzovič	111
The Effects of Floor Structures on the Masonry Walls of Multistorey Building	
L. Vejvara	117
Analysis of Zone Fire Models and their Application in Structural Fire Design	
N. Svobodová, M. Benýšek and R. Štefan	127
Effect of Membrane Forces on Punching Shear Capacity of Flat Slabs	
A. Vidaković, L. Majtánová and J. Halvonik	136

Experimental Verification of Slender Reinforced Concrete Columns Design J. Dobrý, V. Benko, M. Kováčik and H. Wolfger	142
Effect of Struts and Stirrups Inclinations on Shear Resistance L. Fillo and J. Halvonik	151
Production of the Test Timber-UHPC Composite Bridge M. Holý, D. Čítek, P. Tej and L. Vráblík	157
Fatigue Behaviour of GFRP Reinforced Beams O. Januš, F. Girgle, V. Kostiha, J. Prokeš and P. Štěpánek	163
Verification of Composite Steel and Concrete Bed Behaviour for Machine Tools V. Kostiha, F. Girgle, I. Švaříčková, P. Daněk and P. Štěpánek	170
Implementation and Testing of Short Span Footbridge System Made of UHPC J. Marek, J. Prchal, J. Kolisko, D. Čítek, P. Tej, M. Holý, M. Kalný and J. Komanec	176
Strengthening of Concrete Structures Using UHPC - Experimental Verification J.L. Vitek, L. Boháček, R. Coufal and D. Čítek	185
Evaluation of Behaviour of Plan Curved Structure Supported by Arch J. Trenz, K. Zlatuška, R. Nečas and J. Stráský	193

Chapter 3: Methods of Defectoscopy and Inspection of Concrete Members

Using the Ultrasonic Method for the Defectoscopy of Failures in Reinforced Concrete Columns K. Hrabová, S. Hüblová, P. Cikrle and T. Vymazal	203
Construction-Technical Survey of the Interspace of an Industrial Chimney M. Pešata, L. Procházka, V. Bilek and J. Boháčová	209
Assessment of Cores Using Electroacoustic Methods S. Hüblová, K. Hrabová, J. Láník and P. Cikrle	214
