## Preface

## Chapter 1: Building Materials

|                                                                                                                                                                                    |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Improving the Properties of Cement Mortar Using Low Content Graphene Oxide</b><br>M. Maizuar, S.A. Nanda, B. Burhanuddin, S.J. Akbar, A. Jalil, S. Malaysi and F. Daulay        | 3  |
| <b>Characterization of Coal Fly Ash and Rice Husk Ash as Binders in Geopolymer with Material Microstructure Testing</b><br>L. Opirina, T.B. Aulia, M. Hasan and S. Aprilia         | 11 |
| <b>Porous Asphalt: A Comparison of Modified Optimized Asphalt Content and Conventional Optimized Asphalt Content</b><br>M. Refiyanni, S.M. Saleh, M. Isya, S. Aprilia and I. Fadil | 23 |
| <b>Study of the Compressive Strength of Geopolymer Concrete Using Rice Husk Ash and Seashells in Rigid Pavements</b><br>V. Veranita, Z. Zulyaden, J. Supardi and M. Balqis         | 33 |
| <b>Phytochemical Analysis and Antioxidant Properties of <i>Syzygium cumini</i> Fruit as a Corrosion Inhibitor</b><br>N. Ali, S. Fonna, Y. Saputra and J. Supardi                   | 41 |

## Chapter 2: Structural Engineering and Disaster Resilience Assessment

|                                                                                                                                                                                                                             |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>River Hydraulics in Analyzing the Impact of the River Groynes Distance on the Quantity of Erosion in River Channel</b><br>R.C. Wijaya, U. Lasminto, M.A. Maulana, A.A.N.S. Damarnegara, P.T. Kumala Sari and Z. Zulyaden | 51 |
| <b>Analysis of Monopile Foundation on Offshore Wind Turbine Structure</b><br>M.R. Aditya, K. Yusuf, C. Yovi, G.P. Wahyu and M. Maizuar                                                                                      | 59 |
| <b>Evaluating the Reliability of Satellite Gravity Data for Disaster Risk Mapping in West Coast Aceh's Coal Mines</b><br>A. Adib, R. Armi, S.T. Anda and A. Azwanda                                                         | 75 |

## Chapter 3: Urban Planning and Infrastructure Development

|                                                                                                                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>HEC-RAS Modeling for Urban Drainage Performance Evaluation in Overcoming Surface Runoff: Case Study</b><br>C.S. Silvia, A. Maulana and M. Ikhsan                                                    | 89  |
| <b>Flood Mapping Analysis for the Downstream Urban Area of the Keureuto Sub-Catchment with River Interventions</b><br>R. Renaldi, S. Nabila, F. Umar, K. Yusuf, A. Desmi, F. Fasdarsyah and T.M. Hafli | 99  |
| <b>Evaluation of the Road Transportation System in Supporting Connectivity between Activity Centers</b><br>M. Isya, M. Refiyanni, C. Chaira and A. Akhyar                                              | 107 |
| <b>Analysis of Demand and Distribution of Blue Water in the Malikussaleh University Medical Building Using EPANET Software</b><br>F. Fasdarsyah, T.M. Hafli, M. Putri, D. Adzuha and C. Yovi           | 119 |

## Chapter 4: Rural Planning and Development

|                                                                                                                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Community Participation in the Sustainability of the Jeuram Irrigation Network System to Support Agricultural Productivity</b><br>D. Febrianti, T. Farizal, R. Agusmaniza, A. Satria, R. Wilis, E. Elviani and N. Farida | 127 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
