

Table of Contents

Foreword

Chapter 1: Preparation Techniques and Properties of Biocomposites

| | |
|---|----|
| Mechanical Properties of Nano Date Palm versus Nano Titanium Dioxide Particles Reinforced Composites: Experimental Characterization M. Alsafy, N. Al-Hinai and K. Alzebdeh | 3 |
| Evaluation of Fungal Decay and Biodegradation of Thermoplastic Composites Reinforced with Date Palm Fibres S. Awad, T. Hamouda, A. Mohareb, M. Midani and M. Badawy | 19 |
| Surface Modification Rout for Date Palm Fibers-Polymer Bio-composites Towards Improved Interfacial Crosslinking K. Alzebdeh and M. Nassar | 31 |
| Investigation on the Processability and Thermal Aspects of Date Palm Nanofiller/Polypropylene Biocomposites Processed via Melt Cast Film Extrusion H.M. Shaikh, O.Y. Alothman, B.A. Alshammari, A. Alhamidi and M. Jawaid | 51 |
| Design, Processing, Testing and Characterizing for Orthodontics Material of Palm-Fibres Based Bio-Nanocomposite R. El-Sheikhy and A. Al Khuraif | 61 |

Chapter 2: Production and Industrial Application of Biomass-Based Materials

| | |
|---|-----|
| Analyzing the Impact of Annealed Steel Sludge Doses on the Physicochemical Properties of Biochar Obtained from Waste Date Palm Frond H.M. Almarri, S.M. Alluqmani, M. Alshammari, S. Alenzi and N. Alabdallah | 81 |
| Sustainable Approaches for the Fabrication of Nanocellulose-Polyamide Membrane Based on Waste Date Palm Leaves for Water Treatment S.S. Alterary, A.A. Alshahrani, A. Elhadi and M.F. El-Tohamy | 91 |
| Developing New Natural Surfactant from Date Seeds for Different Field Applications N. Al Otaibi, M. Aly and T. Moawad | 113 |
| Comparative Study of Mechanical Behavior between an Adhesive Made from Date Palm Waste and FM-73 Adhesive S. Maachou, A. Benbakhti and A. Moulgada | 125 |
