## Preface

## Committees

## SECTION I – MATERIALS FOR ADVANCED FOSSIL FUEL ENERGY TECHNOLOGIES

<b>Materials Performance in Advanced Steam Cycle and in Oxy-Fuel Combustion Systems</b>	1
K. Natesan and Z.T. Zeng	
<b>Long-Term Stabilization of Creep-Resistant Ferritic Steels for Highly Efficient Ultra-Supercritical Power Plants</b>	12
F. Abe	
<b>Alloy Design and Processing Challenges for Advanced Power Systems: An Alloy Producer's Perspective</b>	22
G.E. Maurer and A.D. Patel	
<b>Computational and Experimental Design of Novel High Temperature Alloys</b>	31
T. Brammer, P.K. Ray, S. Misra, Y.Y. Ye, M. Akinc and M.J. Kramer	
<b>Comparison of High Temperature Mechanical Behaviour and Microstructure of the New Gamma–TiAl8Ta with Gamma–TiAl8Nb Alloy</b>	40
G. Angella, V. Lupinc, M. Maldini and G. Onofrio	
<b>Elaboration and Characterization of the Properties of Refractory Cr Base Alloys</b>	46
L. Royer, S. Mathieu, C. Liebaut and P. Steinmetz	
<b>Refractoriness, Microstructures and High Temperature Oxidation of TaC-Reinforced Iron-Based Alloys Protected by Chromium-Rich Coatings</b>	53
G. Michel, P. Berthod, M. Vilasi and P. Steinmetz	
<b>Hydrogen Uptake and Hydrogen Profiles in Chromia Scales Formed on Ni25Cr(Mn) in Low pO<sub>2</sub> Test Gases at 1000°C</b>	59
M. Hänsel, L. Garcia-Fresnillo, S.L. Tobing, U. Breuer and V. Shemet	
<b>Self Diagnostic EB-PVD Thermal Barrier Coatings</b>	65
J.R. Nicholls, R.G. Wellman, R. Steenbakker and J. Feist	
<b>A CFD Model of Erosion-Corrosion of Fe at Elevated Temperatures in Aqueous Environments</b>	75
M.M. Stack, S.M. Abdelrahman and B. Jana	
<b>Effects of Firing Conditions on the Coal Ash Fusibility Test</b>	87
D. Montinaro, M. Malavasi, G. Amante, A. Chiechi and A. Licciulli	
<b>Supported Oxygen Transport Membranes for Oxyfuel Power Plants</b>	93
M. Betz, F. Schulze-Küppers, S. Baumann, W.A. Meulenberg and D. Stöver	
<b>Water Gas Shift Reaction in Pd-Based Membrane Reactors</b>	99
A. Basile, P. Pinacci, S. Tosti, M. De Falco, C. Evangelisti, T. Longo, S. Liguori and A. Iulianelli	
<b>Ceramic Membranes in Carbon Dioxide Capture: Applications and Potentialities</b>	105
E. Drioli, A. Brunetti and G. Barbieri	

## SECTION II – MATERIALS IN HYDROGEN PRODUCTION AND STORAGE

### II-1 Hydrogen Production

<b>Two-Step Thermochemical Cycles for High-Temperature Solar Hydrogen Production</b>	119
T. Kodama and N. Gokon	
<b>Selection of Ceramics and Composites as Materials for a Supercritical Water Gasification (SCWG) Reactor</b>	129
T. Richard and J. Poirier	
<b>High Temperature Water Electrolysis Using Metal Supported Solid Oxide Electrolyser Cells (SOEC)</b>	135
G. Schiller, A. Ansar and O. Patz	

## II-2 Hydrogen Storage

<b>Evidence for Hydrogen Transport in Deuterated LiBH<sub>4</sub> from Raman-Scattering Measurements and First-Principles Calculations</b>	150
A. Borgschulte, R. Gremaud, A.J. Ramírez-Cuesta, K. Refson and A. Züttel	
<b>Proton Vibrations in Lithium Imide and Amide Studied through Incoherent Inelastic Neutron Scattering</b>	158
D. Colognesi, A. Pietropaolo, A.J. Ramírez-Cuesta, M. Catti, A.C. Nale and M. Zoppi	
<b>Hydrogen Desorption Reactions of the Na-Mg-B-H System</b>	164
D. Pottmaier, S. Garroni, M.D. Barò and M. Baricco	
<b>Metal Hydride-Based Composite Materials with Improved Thermal Conductivity and Dimensional Stability Properties</b>	170
M. Pentimalli, A. Fazzica, A. Freni, E. Imperi and F. Padella	
<b>Innovative Systems for Hydrogen Storage</b>	176
C. Guardamagna, A. Cavallari, V. Malvaldi, S. Soricetti, A. Pontarollo, B. Molinas, D. Andreasi, S. Lo Russo, G. Capurso, L. Magistri, M. Monteverde, R. Nava and V. Mazzanti	
<b>Nanonickel Catalyst for Kinetic Destabilization of LiAlH<sub>4</sub> (Lithium Alanate) for Facile Discharge of Hydrogen</b>	182
Z.S. Wronski and T. Czujko	
<b>Hydrogen Storage on Beryllium-Coated Toroidal Carbon Nanostructure C<sub>120</sub> Modeled with Density Functional Theory</b>	188
F.d.L. Castillo-Alvarado, J. Ortíz-López, J.S. Arellano and A. Cruz-Torres	
<b>Simple and Binary Hydrogen Clathrate Hydrates: Synthesis and Microscopic Characterization through Neutron and Raman Scattering</b>	196
M. Celli, D. Colognesi, A. Giannasi, L. Ulivi, M. Zoppi, V. Garcia Sakai and A.J. Ramírez-Cuesta	
<b>Numerical Simulation of Hydrogen Dynamics at a Mg-MgH<sub>2</sub> Interface</b>	205
S. Giusepponi and M. Celino	
<b>Thermodynamic Database for Hydrogen Storage Materials</b>	213
M. Baricco, M. Palumbo, E. Pinatel, M. Corno and P. Ugliengo	
<b>Environmental Reactivity of Solid State Hydride Materials: Modeling and Testing for Air and Water Exposure</b>	219
D.L. Anton, C.W. James, D.A. Tamburello, J.A. Cortes-Concepcion, J.R. Gray and K.S. Brinkman	

## SECTION III – FUEL CELLS: MATERIALS AND TECHNOLOGY CHALLENGES

<b>Feasibility of Liquid Fuels for SOFC with Ni-Base Anode</b>	230
H. Kishimoto, K. Yamaji, M.E. Brito, T. Horita and H. Yokokawa	
<b>Fabrication of an Intermediate-Temperature Anode-Supported Planar SOFC Via Tape Casting and Lamination</b>	237
C.M. An, Y.W. Sin, J. Yoon and N. Sammes	
<b>Improving the Oxidation Resistance of Fe-Cr-Mn Interconnector of Solid Oxide Electrolyte Fuel Cell with the Addition of Trace Elements</b>	243
W.S. Wang, S.S. Lian, C. Chen, K.C. Tsai, W.J. Shong and R.Y. Lee	
<b>High Temperature - FTIR Characterization of Gadolinia Doped Ceria</b>	249
A. Arabaci and N. Solak	
<b>A Novel Anode Based on Ni-Modified Perovskite for Direct Alcohol Solid Oxide Fuel Cells</b>	255
M. Lo Faro, G. Monforte, A. Stassi, M. Minutoli, V. Antonucci, V. Modafferi, P. Antonucci and A.S. Arico'	
<b>Fine Controlled Metallocendrimers for Advanced Nano-Catalysts</b>	261
K. Yamamoto	
<b>Hybrid Membranes for Proton Exchange Fuel Cell</b>	265
K. Valle, F. Pereira, F. Rambaud, P. Belleville, C. Laberty and C. Sanchez	
<b>Investigation of a Passive DMFC Mini-Stack at Room Temperature</b>	271
A.S. Arico', V. Baglio, A. Stassi and V. Antonucci	

<b>Pt Alloys on Carbon Nanostructures as Electrocatalysts for Direct Methanol Fuel Cell</b> L. Giorgi, R. Giorgi, S. Gagliardi, E. Salernitano, T. Dikonimos, N. Lisi, M.F. de Riccardis and M. Alvisi	277
<b>Status and Challenges of Molten Carbonate Fuel Cells</b> S.J. McPhail	283
<b>Solutions for Material Corrosion Problems in MCFC</b> S. Frangini, A. Moreno and F. Zaza	291
 <b>SECTION IV – MATERIALS IN ELECTROCHEMICAL ENERGY STORAGE SYSTEMS</b>	
<b>Study of Carbon Nanotubes for Lithium-Ion Batteries Application</b> A. Varzi, C. Täubert, M. Wohlfahrt-Mehrens, M. Kreis and W. Schütz	299
<b>Sago Gel Polymer Electrolyte for Zinc-Air Battery</b> M.N. Masri, M.F.M. Nazeri and A.A. Mohamad	305
<b>Solid State and Aqueous Li-Ion Batteries with Polyanionic Electrode Active Materials</b> S. Okada, S.I. Park, E. Kobayashi and J. Yamaki	309
<b>Ionic Liquid Binary Mixtures for Low Temperature Applications</b> G.B. Appetecchi, M. Montanino, M. Carewska, F. Alessandrini and S. Passerini	315
<b>Nanostructured Anode Material for Li-Ion Batteries</b> G. Ferrara, C. Arbizzani, L. Damen, R. Inguanta, S. Piazza, C. Sunseri and M. Mastragostino	320
<b>Energy Conservation and Management Strategies for Commercial Li-Ion Batteries in Telecommunication Applications</b> T. Tsujikawa, K. Yabuta, T. Matsushita, M. Arakawa and K. Hayashi	325
<b>Printed Supercapacitor as Hybrid Device with an Enzymatic Power Source</b> J. Keskinen, E. Sivonen, M. Bergelin, J.E. Eriksson, P. Sjöberg-Eerola, M. Valkiainen, M. Smolander, A. Vaari, J. Uotila, H. Boer and S. Tuurala	331
<b>A Molecular Dynamics Study on Pressure Dependence of Ag Diffusion in Ag<sub>3</sub>SI</b> M. Yarimitsu and M. Aniya	337
<b>A Chemical Bonding Approach to Ionic Conduction and Thermal Expansion in Oxide Ion Conductors</b> S. Taniguchi and M. Aniya	343
