Preface

Committees

SECTION I – MATERIALS FOR ADVANCED FOSSIL FUEL ENERGY TECHNOLOGIES

Materials Performance in Advanced Steam Cycle and in Oxy-Fuel Combustion Systems K. Natesan and Z.T. Zeng	1
Long-Term Stabilization of Creep-Resistant Ferritic Steels for Highly Efficient Ultra-Supercritical Power Plants F. Abe	12
Alloy Design and Processing Challenges for Advanced Power Systems: An Alloy Producer's Perspective G.E. Maurer and A.D. Patel	22
Computational and Experimental Design of Novel High Temperature Alloys T. Brammer, P.K. Ray, S. Misra, Y.Y. Ye, M. Akinc and M.J. Kramer	31
Comparison of High Temperature Mechanical Behaviour and Microstructure of the New Gamma-TiAl8Ta with Gamma-TiAl8Nb Alloy G. Angella, V. Lupinc, M. Maldini and G. Onofrio	40
Elaboration and Characterization of the Properties of Refractory Cr Base Alloys L. Royer, S. Mathieu, C. Liebaut and P. Steinmetz	46
Refractoriness, Microstructures and High Temperature Oxidation of TaC-Reinforced Iron-Based Alloys Protected by Chromium-Rich Coatings G. Michel, P. Berthod, M. Vilasi and P. Steinmetz	53
Hydrogen Uptake and Hydrogen Profiles in Chromia Scales Formed on Ni25Cr(Mn) in Low pO₂ Test Gases at 1000°C M. Hänsel, L. Garcia-Fresnillo, S.L. Tobing, U. Breuer and V. Shemet	59
Self Diagnostic EB-PVD Thermal Barrier Coatings J.R. Nicholls, R.G. Wellman, R. Steenbakker and J. Feist	65
A CFD Model of Erosion-Corrosion of Fe at Elevated Temperatures in Aqueous Environments M.M. Stack, S.M. Abdelrahman and B. Jana	75
Effects of Firing Conditions on the Coal Ash Fusibility Test D. Montinaro, M. Malavasi, G. Amante, A. Chiechi and A. Licciulli	87
Supported Oxygen Transport Membranes for Oxyfuel Power Plants M. Betz, F. Schulze-Küppers, S. Baumann, W.A. Meulenberg and D. Stöver	93
Water Gas Shift Reaction in Pd-Based Membrane Reactors A. Basile, P. Pinacci, S. Tosti, M. De Falco, C. Evangelisti, T. Longo, S. Liguori and A. Iulianelli	99
Ceramic Membranes in Carbon Dioxide Capture: Applications and Potentialities E. Drioli, A. Brunetti and G. Barbieri	105

SECTION II – MATERIALS IN HYDROGEN PRODUCTION AND STORAGE

II-1 Hydrogen Production

Two-Step Thermochemical Cycles for High-Temperature Solar Hydrogen Production T. Kodama and N. Gokon	119
Selection of Ceramics and Composites as Materials for a Supercritical Water Gasification (SCWG) Reactor T. Richard and J. Poirier	129
High Temperature Water Electrolysis Using Metal Supported Solid Oxide Electrolyser Cells (SOEC) G. Schiller, A. Ansar and O. Patz	135

Fabrication of Thin and Thick Films of Photocatalytic Titania A. Nakaruk, H.Z. Abdullah, J.S. Yun, D.A. Hanaor and C.C. Sorrell	144
---	-----

II-2 Hydrogen Storage

Evidence for Hydrogen Transport in Deuterated LiBH₄ from Raman-Scattering Measurements and First-Principles Calculations A. Borgschulte, R. Gremaud, A.J. Ramírez-Cuesta, K. Refson and A. Züttel	150
Proton Vibrations in Lithium Imide and Amide Studied through Incoherent Inelastic Neutron Scattering D. Colognesi, A. Pietropaolo, A.J. Ramírez-Cuesta, M. Catti, A.C. Nale and M. Zoppi	158
Hydrogen Desorption Reactions of the Na-Mg-B-H System D. Pottmaier, S. Garroni, M.D. Barò and M. Baricco	164
Metal Hydride-Based Composite Materials with Improved Thermal Conductivity and Dimensional Stability Properties M. Pentimalli, A. Frazzica, A. Freni, E. Imperi and F. Padella	170
Innovative Systems for Hydrogen Storage C. Guardamagna, A. Cavallari, V. Malvaldi, S. Soricetti, A. Pontarollo, B. Molinas, D. Andreasi, S. Lo Russo, G. Capurso, L. Magistri, M. Monteverde, R. Nava and V. Mazzanti	176
Nanonickel Catalyst for Kinetic Destabilization of LiAlH₄ (Lithium Alanate) for Facile Discharge of Hydrogen Z.S. Wronski and T. Czujko	182
Hydrogen Storage on Beryllium-Coated Toroidal Carbon Nanostructure C₁₂₀ Modeled with Density Functional Theory F.d.L. Castillo-Alvarado, J. Ortiz-López, J.S. Arellano and A. Cruz-Torres	188
Simple and Binary Hydrogen Clathrate Hydrates: Synthesis and Microscopic Characterization through Neutron and Raman Scattering M. Celli, D. Colognesi, A. Giannasi, L. Ulivi, M. Zoppi, V. Garcia Sakai and A.J. Ramírez-Cuesta	196
Numerical Simulation of Hydrogen Dynamics at a Mg-MgH₂ Interface S. Giusepponi and M. Celino	205
Thermodynamic Database for Hydrogen Storage Materials M. Baricco, M. Palumbo, E. Pinatel, M. Corno and P. Ugliengo	213
Environmental Reactivity of Solid State Hydride Materials: Modeling and Testing for Air and Water Exposure D.L. Anton, C.W. James, D.A. Tamburello, J.A. Cortes-Concepcion, J.R. Gray and K.S. Brinkman	219

SECTION III – FUEL CELLS: MATERIALS AND TECHNOLOGY CHALLENGES

Feasibility of Liquid Fuels for SOFC with Ni-Base Anode H. Kishimoto, K. Yamaji, M.E. Brito, T. Horita and H. Yokokawa	230
Fabrication of an Intermediate-Temperature Anode-Supported Planar SOFC Via Tape Casting and Lamination C.M. An, Y.W. Sin, J. Yoon and N. Sammes	237
Improving the Oxidation Resistance of Fe-Cr-Mn Interconnector of Solid Oxide Electrolyte Fuel Cell with the Addition of Trace Elements W.S. Wang, S.S. Lian, C. Chen, K.C. Tsai, W.J. Shong and R.Y. Lee	243
High Temperature - FTIR Characterization of Gadolinia Doped Ceria A. Arabaci and N. Solak	249
A Novel Anode Based on Ni-Modified Perovskite for Direct Alcohol Solid Oxide Fuel Cells M. Lo Faro, G. Monforte, A. Stassi, M. Minutoli, V. Antonucci, V. Modafferi, P. Antonucci and A.S. Arico'	255
Fine Controlled Metallodendrimers for Advanced Nano-Catalysts K. Yamamoto	261
Hybrid Membranes for Proton Exchange Fuel Cell K. Valle, F. Pereira, F. Rambaud, P. Belleville, C. Laberty and C. Sanchez	265
Investigation of a Passive DMFC Mini-Stack at Room Temperature A.S. Arico', V. Baglio, A. Stassi and V. Antonucci	271

Pt Alloys on Carbon Nanostructures as Electrocatalysts for Direct Methanol Fuel Cell L. Giorgi, R. Giorgi, S. Gagliardi, E. Salernitano, T. Dikonimos, N. Lisi, M.F. de Riccardis and M. Alvisi	277
Status and Challenges of Molten Carbonate Fuel Cells S.J. McPhail	283
Solutions for Material Corrosion Problems in MCFC S. Frangini, A. Moreno and F. Zaza	291

SECTION IV –MATERIALS IN ELECTROCHEMICAL ENERGY STORAGE SYSTEMS

Study of Carbon Nanotubes for Lithium-Ion Batteries Application A. Varzi, C. Täubert, M. Wohlfahrt-Mehrens, M. Kreis and W. Schütz	299
Sago Gel Polymer Electrolyte for Zinc-Air Battery M.N. Masri, M.F.M. Nazeri and A.A. Mohamad	305
Solid State and Aqueous Li-Ion Batteries with Polyanionic Electrode Active Materials S. Okada, S.I. Park, E. Kobayashi and J. Yamaki	309
Ionic Liquid Binary Mixtures for Low Temperature Applications G.B. Appetecchi, M. Montanino, M. Carewska, F. Alessandrini and S. Passerini	315
Nanostructured Anode Material for Li-Ion Batteries G. Ferrara, C. Arbizzani, L. Damen, R. Inguanta, S. Piazza, C. Sunseri and M. Mastragostino	320
Energy Conservation and Management Strategies for Commercial Li-Ion Batteries in Telecommunication Applications T. Tsujikawa, K. Yabuta, T. Matsushita, M. Arakawa and K. Hayashi	325
Printed Supercapacitor as Hybrid Device with an Enzymatic Power Source J. Keskinen, E. Sivonen, M. Bergelin, J.E. Eriksson, P. Sjöberg-Eerola, M. Valkiainen, M. Smolander, A. Vaari, J. Uotila, H. Boer and S. Tuurala	331
A Molecular Dynamics Study on Pressure Dependence of Ag Diffusion in Ag₃SI M. Yarimitsu and M. Aniya	337
A Chemical Bonding Approach to Ionic Conduction and Thermal Expansion in Oxide Ion Conductors S. Taniguchi and M. Aniya	343
