Preface

Committees

SECTION I – MATERIALS CHALLENGES FOR FUTURE NUCLEAR FISSION AND FUSION TECHNOLOGIES

I-1 Low Activation Structural Materials for Nuclear Fusion Systems

Design and Integration of ITER Divertor Components

T. Hirai, V. Barabash, F. Escourbiac, A. Fedosov, L. Ferrand, S. Gicquel, T. Jokinen, V. Komarov, A. Martin and M. Merola 1

Tungsten as a Structural Divertor Material

M. Rieth, D. Armstrong, B. Dafferner, S. Heger, A. Hoffmann, M.D. Hoffmann, U. Jäntschi, C. Kübel, E. Materna-Morris, J. Reiser, M. Rohde, T. Scherer, V. Widak and H. Zimmermann 11

Microstructural Control for Improving Properties of V-4Cr-4Ti Alloys

T. Muroga, T. Nagasaka, P.F. Zheng and J.M. Chen 22

SiC/SiC Composites Irradiation Behaviour in Fusion Reactor Environment Conditions

C.H. Chen, J.J. Kai, F.R. Chen and Y. Katoh 27

Experimental Development at a Pilot Plant Scale of a Reduced Activation

Ferritic/Martensitic RAFM Steel, Asturfer®

A. Morán, R. Coto, J. Belzunce and J.M. Artímez 36

Corrosion Experiments of the Candidate Materials for Liquid Lithium Lead Blanket of Fusion Reactor

Q.Y. Huang, S. Gao, Z.Q. Zhu, Z.H. Guo, X.Z. Ling, Z.L. Yan, M. Kondo, V. Tsisar, T. Muroga and Y.C. Wu 41

I-2 Functional, Cladding and Fuel Materials for Nuclear Fission Reactors

Utilization of Hydride Materials in Nuclear Reactors

K. Konashi and M. Yamawaki 51

Progressive Development for Structural Integrity Quantification of Nuclear Grade Graphite in Very High Temperature Gas Cooled Reactor Core Environments

S.C. Tsai, Y.T. Hsieh, J.J. Kai and F.R. Chen 59

Multiscale Modelling of the Influence of Damage on the Thermal Properties of Ceramic Matrix Composites

J. El Yagoubi, J. Lamon and J.C. Batsale 65

General Corrosion Properties of Modified PNC1520 Austenitic Stainless Steel in Supercritical Water as a Fuel Cladding Candidate Material for Supercritical Water Reactor

Y. Nakazono, T. Iwai and H. Abe 72

From High to Low Enriched Uranium Fuel in Research Reactors

S. van den Berghe, A. Leenaers, E. Koonen and L. Sannen 78

Simulation and Modelling the Heterogeneous Effects of the Microstructure MOX Fuels on their Effective Properties in Nominal Pressure Water Reactor Conditions

R. Largenton, V. Blanc, P. Thevenin and D. Baron 91

Fabrication of Fuel and Recycling of Minor Actinides in Fast Reactors

J. Somers 97

I-3 Radiation Effects

Influence of the Microstructure on the $U_{1-y}Am_yO_{2-x}$ ($y=0.1; 0.15$) Pellet Macroscopic Swelling

D. Prieur, A. Jankowiak, C. Leorier, N. Herlet, L. Donnet, P. Dehaut, J. Lechelle, J.P. Laval and P. Blanchart 104

Geometrical Aspects of Dislocation-Obstacle Interaction in Iron P. Grammatikopoulos, D.J. Bacon and Y. Osetsky	109
Quantitative TEM Investigations on EUROFER 97 Irradiated up to 32 Dpa O.J. Weiss, E. Gaganidze and J. Aktaa	118
The Influence of Helium and ODS on the Irradiation-Induced Hardening of Eurofer97 at 300°C C. Heintze, F. Bergner, R. Kögler and R. Lindau	124

SECTION II – MATERIALS TECHNOLOGY FOR NUCLEAR WASTE TREATMENT AND DISPOSAL

Advantages Hot Isostatically Pressed Ceramic and Glass-Ceramic Waste Forms Bring to the Immobilization of Challenging Intermediate- and High-Level Nuclear Wastes E.R. Vance, S. Moricca, B.D. Begg, M.W.A. Stewart, Y. Zhang and M.L. Carter	130
Synthesis and Properties of Reaction-Bonded SiC Ceramic with Embedded UO₂ - TRISO Coated Particles A. Bukaemskiy, J. Fachinger and D. Bosbach	136
New Actinide Waste Forms with Pyrochlore and Garnet Structures T. Livshits, S. Yuditsev, S.V. Stefanovsky and R.C. Ewing	142
An Innovative Hybrid Process Involving Plasma in a Cold Crucible Melter Devoted to the Future Intermediate Level Waste Treatment: The SHIVA Technology F. Lemont, P. Charvin, A. Russello and K. Poizot	148
Development of New Waste Forms to Immobilize Iodine-129 Released from a Spent Fuel Reprocessing Plant H. Tanabe, T. Sakuragi, K. Yamaguchi, T. Sato and H. Owada	158
Study of New Filters Properties for Cs-137 Vapour Capture at High Temperature A.S. Aloy and A.V. Strelnikov	171
Using the Vitrification Test Rig for Process Improvements on the Waste Vitrification Plants R. Short, N. Gribble, E. Turner and A.D. Riley	176
Cold Crucible Inductive Melting Technology – Application to Vitrification and Ceramization of High Level and Actinide Wastes S.V. Stefanovsky, V.V. Lebedev, A.G. Ptashkin, S.A. Dmitriev and J.C. Marra	183
Lessons Learned from the Yucca Mountain and WIPP Projects E.J. Bonano, D.S. Kessel and L.J. Dotson	194
