Preface

Committees

SECTION I – ADVANCES IN BIOMATERIALS

Essential Factors to Make Excellent Biocompatibility of Phospholipid Polymer Materials K. Ishihara and Y. Inoue	1
Supramolecular Surfaces Modulating Cellular Response N. Yui	10
Molecular Modeling and Experimental Investigation of Hydrolytically Degradable Polymeric Biomaterials D. Hofmann, M. Entrialgo, J. Reiche, K. Kratz and A. Lendlein	16
Development of Bone-Integrating Hybrid Materials Useful for Hard Tissue Repair T. Miyazaki	25
Biodegradable Polymers Derived from Amino Acids for Biological Applications N. Cohen-Arazi, I. Hagag, M. Kolitz, A.J. Domb and J. Katzhendler	30
Self-Assembled <i>N</i>-Succinyl-Chitosan Nanofibers for Reduced Protein Adhesion E. Dayyoub and U. Bakowsky	36
Mineralization of Eroded Dental Enamel Seeded with Fluoride and a Tricalcium Phosphate Ternary Biomaterial R.L. Karlinsey, A.C. Mackey, E.R. Walker, T.J. Walker and C.X. Fowler	42
A New Generation of Scaffolds for Bone Tissue Engineering D. Bellucci, V. Cannillo, A. Cattini and A. Sola	48
XRD Studies on Transformation of Calcium-Deficient Apatite to β and α TCP in Dynamic and Technological Conditions B. Handke, A. Zima, Z. Paszkiewicz and A. Ślósarczyk	54
Effects of Mg Additives on Properties of Mg-Doped Hydroxyapatite Ceramics A. Zima, A. Ślósarczyk, Z. Paszkiewicz, M. Staszewska, W. Mróz and A. Chróścicka	60
Osseointegration and Biocompatibility Study of Macroporous Biphasic Calcium Phosphate (BCP) Ceramics Obtained by Consolidation Using Albumin C. Ribeiro, T.S. Goia, K.B. Violin, J.C. Bressiani and A.H.A. Bressiani	66
New Corrosion-Resistant Bactericidal Nitrogen-Containing Steels with Increased Strength L.M. Kaputkina, V. Prokoshkina and A.G. Svyazhin	72

SECTION II – MEDICAL DIAGNOSIS APPLICATIONS

Novel Biomaterials and Nano-Biotechnology Approaches in Tumor Diagnosis A.K. Dinda and C.K. Prashant	78
Sensing of Protein Adsorption by Composites Consisting of Silver Nanoparticles and Hydroxyapatite C. Ohtsuki, Y. Ichikawa, H. Shibata, T. Torimoto and I.Y. Kim	90
Incorporation of Acrylate Based Spiropyran Monoliths in Micro-Fluidic Devices for Photo-Controlled Electroosmotic Flow S. Scarmagnani, Z. Walsh, F. Benito-Lopez, M. Macka, B. Paull and D. Diamond	100

SECTION III – REGENERATIVE MEDICINE AND TISSUE ENGINEERING

Bone-Mimetic Laminated Nano-Structures for Regeneration of Skeletal Tissues E. Jabbari	106
Engineered Biomimetic Nanofibers for Regenerative Medicine S. Ramakrishna, J.R. Venugopal and S. Liao	114
Tissue Engineering with Natural Tissue Matrices A. Kishida, S. Funamoto, J. Negishi, Y. Hashimoto, K. Nam, T. Kimura, T. Fujisato and H. Kobayashi	125

A Hydroxyapatite-Collagen Composite Useful to Make Bioresorbable Scaffolds for Bone Reconstruction	
G.D. Guerra, C. Cristallini, E. Rosellini and N. Barbani	133
Specific Cell Cultivation on Nanofibrous Layer	
J. Michálek, D. Mareková, L. Martinová, R. Hobzová, P. Kostecká, D. Lubasová, P. Lesný, M. Přádny, P. Jendelová and E. Syková	139
Study on Bone Cell Adaptability of α-TCP/HAp Functionally Graded Porous Beads for Biomaterials Application	
S. Ohtake, T. Asaoka, K. Furukawa, T. Ushida and T. Tateishi	143
Self-Buckling at the Nanoscale	
N.M. Pugno	147
Modeling the Elastic Anisotropy of Woven Hierarchical Tissues: Experimental Comparison on Biological Materials and Design of a New Class of Scaffolds	
N.M. Pugno and Q. Chen	153
Catastrophic Instabilities in the Fracture of Nanotube Bundles	
N.M. Pugno and T. Abdalrahman	159

SECTION IV – NEW THERAPEUTICS AND INTELLIGENT DELIVERY SYSTEMS

XPS Characterization of Iron Oxide and Gold Nanoparticles for Tumor Care	
G. Speranza, L. Minati, S. Torrenco, B. Rossi, C. Migliaresi, D. Maniglio and L. Dalbosco	165
Novel Silicon Based Gene Carrier Systems	
A. Sommerwerk, G. Struckmeyer, J. Tillmann, M. Uhr, J. Schäfer, H. Richter and U. Bakowsky	171
Nanotechnology for Drug Targeting	
B. Ruozi, G. Tosi, F. Forni and M.A. Vandelli	177
Development of Pseudoboehmites for Nanosystems to Release Acyclovir	
A.H.M. Júnior, R.W. Novickis, S. Braunstein Faldini, R.R. Ribeiro, C.Y. Maeda and L.F. de Miranda	184
Study of Chitosan Addition in the PVP/PVAL Polymeric Blend	
M.C. Terence, L.F. de Miranda, S. Braunstein Faldini and P. Junqueira de Castro	190

SECTION V – PROGRESS IN IMPLANT PROSTHESES

A Critical Assessment of the Clinical Efficacy and Cellular Response to Low Intensity Pulsed Ultrasound for Fracture Repair	
C.T. Laurencin and Y. Khan	195
Development of Cardiovascular Implants Using Nanocomposite Polymer and Stem Cell Technology: From Lab to Commercialisation	
A.M. Seifalian, A. de Mel, H. Ghanbari, M. Ahmed, K. Chaloupka and A. Darbyshire	207
Novel, Rapidly Resorbable Bioceramic Bone Grafts Produce a Major Osteogenic Effect - The Pre-Clinical Evidence	
C. Knabe, G. Berger, R. Gildenhaar, P. Ducheyne and M. Stiller	214
Nano-Scale Evaluation of Surface Morphology Before and After Environmental Exposure <i>In Vitro</i> of an Advanced Alumina/Zirconia Composite for Arthroplastic Applications	
K. Yamamoto and G. Pezzotti	224
Carbon Nanotubes <i>In Vitro</i> and <i>In Vivo</i> Biological Effects	
S. Bellucci	229
Role of Grain Size Fluctuations on the Environmental Resistance of Alumina-Zirconia Composite in Comparison with Commercially Available Monolithic Zirconia Femoral Head	
N. Sugano and G. Pezzotti	235
Stoichiometry and Surface Stress Analyses in Advanced Alumina/Zirconia Composites for Hip Arthroplasty Applications	
A.A. Porporati, M.C. Munisso, K. Lessnau and G. Pezzotti	240
Development of Craniofacial Implants Produced by Metal Injection Molding of Titanium Alloy Using Novel Binder System Based on Palm Oil	
R. Ibrahim, M. Azmiruddin, M. Jabir, M. Ridhuan, M. Muhamad, M. Rafiq, N.A. Kasim and S. Muhamad	247

Creation of Superelastic Functional Properties in a Ti-50.7%Ni Wire for the Stapler Suturing of Blood Vessels	
I. Khmelevskaya, M. Soutorine, S. Prokoskin and E. Ryklina	253
Osseointegration of Titanium Alloy Macroporous Implants Obtained by PM with Addition of Gelatin	
T.S. Goia, K.B. Violin, M. Yoshimoto, J.C. Bressiani and A.H.A. Bressiani	259
An Efficient Low-pH Range Sensitive Artificial Muscle for Future Active Implantable Systems	
B. Tondu, N. Bardou and S. Mathé	264
