

# Table of Contents

## Preface

## Chapter 1-A – Solid Oxide Fuel Cells

### Chapter 1: Fuel Cells

#### Development of a Subscale Hydrogen Generator Unit for SOFC as APU for Naval Applications

V. Recupero, L. Pino, A. Vita, C. Italiano, C. Fabiano and M. Laganà 1

#### Spin-Coated $\text{La}_{0.8}\text{Sr}_{0.2}\text{Ga}_{0.8}\text{Mg}_{0.2}\text{O}_{3-\delta}$ Electrolyte on Infiltrated Anodes for Biogas Utilization

Z. Salehi, F. Basoli, I. Luisetto, S. Licoccia and E. di Bartolomeo 7

#### Copper Doped Lanthanum Strontium Ferrite as Cathode for $\text{La}_{0.8}\text{Sr}_{0.2}\text{Ga}_{0.8}\text{Mg}_{0.2}\text{O}_3$

F. Zurlo, E. di Bartolomeo, A. d'Epifanio, V. Felice, I. Natali Sora and S. Licoccia 13

#### Biogas Reforming for Hydrogen Production: Performance of Ni/La-Ce-O Catalysts

L. Pino, A. Vita, C. Italiano, C. Fabiano, M. Laganà and V. Recupero 19

#### Electrical and Electrochemical Properties of $\text{La}_{2-x}\text{Ca}_x\text{NiO}_{4+\delta}$ and

$\text{La}_{2-x}\text{Ca}_x\text{NiO}_{4+\delta}\text{-Ce}_{0.8}\text{Sm}_{0.2}\text{O}_{1.9}$  Cathode Materials for Intermediate Temperature SOFCs  
E.Y. Pikalova, A.A. Kolchugin, N.M. Bogdanovich and D.I. Bronin 25

## Chapter 1-B – Polymer Electrolyte Fuel Cells

#### Activity and Durability of PEFCs Alloy Core-Shell Catalysts: Role of Surface Oxidation

G. Ramos-Sanchez, F. Godínez-Salomón, O. Solorza-Feria and P. Balbuena 31

#### Nitrogen Doped and Functionalized Carbon Materials as Supports for Catalysts in Electro-Oxidation of Methanol

M.J. Lázaro, C. Alegre, M.J. Nieto-Monge, D. Sebastián, M.E. Gálvez, E. Pastor and R. Moliner 41

#### Electrocatalysts Based on Iron Phthalocyanine and Polyindole Supported on Carbon Nanotubes for Oxygen Reduction in DMFCs

M.T. Nguyen, A. Iannaci, B. Mecheri, I. Luisetto, A. d'Epifanio and S. Licoccia 50

## Chapter 1-C – Direct Alcohol Fuel Cells (Duramet Workshop)

#### The Long Way of Achieving a Durability of 20,000 h in a DMFC System

M. Müller, N. Kimiaie, A. Glösen and D. Stolten 56

#### Improved Durability and Cost-Effective Components for New Generation Direct Methanol Fuel Cells - DURAMET Project

A.S. Aricò 61

#### Direct Methanol Fuel Cell Stack Design and Test in the Framework of DURAMET Project

O. Barbera, A. Stassi, D. Sebastián, V. Baglio and A.S. Aricò 65

#### Composite Anode Catalysts Based on PtRu and Metal Oxide Nanoparticles for DMFCs

D. Sebastián, V. Baglio, C. d'Urso, A. Stassi and A.S. Aricò 70

## Chapter 2: Hydrogen Production and Storage

### Chapter 2-A – Hydrogen Products

#### Ceria Based Materials with Enhanced OSC Properties for $\text{H}_2$ Production by Water Splitting Reaction

A. Pappacena, M. Boaro, O. Šolcová and A. Trovarelli 76

#### Effect of Doping of Fe into $\text{TiO}_2$ Layer in $\text{Fe}_2\text{O}_3/\text{TiO}_2/\text{FTO}$ System for High Performance of Water Splitting

A. Azad, E. Noh, K.S. Yun, H.J. Jeong, S.C. Jung, W.S. Kang, N.T. Moc and S.J. Kim 82

#### Optimization of Hydrogen Production by Co-Culture of *Clostridium beijerinckii* and *Rhodobacter sphaeroides* Bacteria

R. Zagrodnik 90

|                                                                                           |    |
|-------------------------------------------------------------------------------------------|----|
| <b>Plasma Chemical Reactor for Hydrogen Production</b><br>A.M. Essiptchouk and G.P. Filho | 96 |
|-------------------------------------------------------------------------------------------|----|

## **Chapter 2-B – Hydrogen Storage**

|                                                                                                                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Activated Carbon Fibre Monoliths for Hydrogen Storage</b><br>M. Kunowsky, J.P. Marco-Lozar and Á. Linares-Solano                                                                                                               | 102 |
| <b>Hydrogenation of Nanocrystalline Mg<sub>2</sub>Ni Alloy Prepared by High Energy Ball-Milling Followed by Equal-Channel Angular Pressing or Cold Rolling</b><br>A. Revesz, M. Gajdics, L.K. Varga and T. Spassov                | 112 |
| <b>Atomistic Models of Long-Term Hydrogen Diffusion in Metals</b><br>M.P. Ariza, K.G. Wang and M. Ortiz                                                                                                                           | 118 |
| <b>Hydrogen Technologies and Applications: Safety</b><br>P. Ruiz, C. Jiménez, M. Llorca and L.F. Vega                                                                                                                             | 124 |
| <b>A Millimeter Scale Reactor Integrated PEM Fuel Cell Energy System with an On-Board Hydrogen Production, Storage and Regulation Unit for Autonomous Small Scale Applications</b><br>A. Balakrishnan, C. Mueller and H. Reinecke | 131 |

## **Chapter 3: Batteries, Supercapacitors and Thermoelectrics**

|                                                                                                                                                                                                                    |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study of New Active Materials for Rechargeable Sodium-Ion Batteries</b><br>S. Nakanishi, M. Nose, H. Nakayama and H. Iba                                                                                        | 137 |
| <b>Relating Electrochemistry of New Organic Materials for Batteries and Fundamental Understanding through DFT Calculations</b><br>C. Frayret, D. Tomerini, C. Gatti, Y. Danten, M. Becuwe, F. Dolhem and P. Poizot | 146 |
| <b>Hydrothermal Synthesis of Corn Cob-Like LiFePO<sub>4</sub>/C as High Performance Cathode Material for Lithium Ion Batteries</b><br>M. Lin, X. Wu, B.L. Chen and J.K. Yuan                                       | 152 |
| <b>Detecting Aging Phenomena in Commercial Cathodes for Li-Ion Batteries Using High Resolution Computed Tomography</b><br>L. Komsijska, S.A. Garnica Barragan, M. Lewerenz, D. Ledwoch and O. Osters               | 158 |
| <b>Direct Growth of Polyaniline Chains from Nitrogen Site of N-Doped Carbon Nanotubes for High Performance Supercapacitor</b><br>J.W. Lim, A.U. Haq and S.O. Kim                                                   | 164 |
| <b>Targeted Use of SPS Method for Improvement of Thermoelectrics</b><br>L.P. Bulat, I.A. Nefedova and D.A. Pshenay-Severin                                                                                         | 168 |

## **Chapter 4: Photocatalytic Materials for Environmental Applications**

|                                                                                                                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Development of Plasmonic Photocatalysts for Environmental Application</b><br>E. Kowalska, Z.S. Wei, B. Karabiyik, M. Janczarek, M. Endo, K.L. Wang, P. Rokicka, A. Markowska-Szczupak and B. Ohtani | 174 |
| <b>Highly Efficient Plasmonic Palladium-Titanium Dioxide Co-Catalyst in the Photodegradation of Rhodamine B Dye</b><br>A.M. Lacerda, I. Larrosa and S. Dunn                                            | 184 |
| <b>An Investigation into the Effect of Ferroelectricity of BaTiO<sub>3</sub> on the Photocatalytic Activity in Dye Decolourisation</b><br>Y.F. Cui, J. Briscoe and S. Dunn                             | 190 |
| <b>Development of High Surface Area Titania on Glass Fibre Supports for Photocatalysis</b><br>P. Yilmaz, A.M. Lacerda, I. Larrosa and S. Dunn                                                          | 196 |

## **Chapter 5: Magnetic Materials for Energy**

|                                                                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Influence of Magnetic Field of Super High Frequency on Hysteretic Properties of Soft Magnetic Microwires</b><br>A. Chizhik, J. Gonzalez, A. Zhukov, A. Stupakiewicz and A. Maziewski | 203 |
| <b>The Effect of Compacting Pressure on Power Loss in a SMC</b><br>B. Ślusarek, J. Szczygłowski, K. Chwastek and B. Jankowski                                                           | 208 |
| <b>Scanning Hall Probe Imaging of LaFe<sub>13-x</sub>Si<sub>x</sub></b><br>E. Lovell, K. Morrison, A.M. Pereira, D. Caplin, O. Gutfleisch and L.F. Cohen                                | 219 |

## **Chapter 6: Photovoltaic Materials**

### **Coherent Electronic Energy Transfer and Organic Photovoltaics**

E. Collini

225

### **Morphological Study of CdSe Nanocrystals Passivated with a Low Band Gap Rod-Coil Diblock Copolymer for Hybrid Solar Cells**

S. Zappia, S. Destri, M. Striccoli, M.L. Curri, A.E. di Mauro, Z. Ameer, G. Maruccio, A. Rizzo and R. Matria

235

### **CuZnSnSe Nanotubes and Nanowires by Template Electrosynthesis**

M. Battaglia, C. Sunseri, S. Piazza and R. Inguanta

241

## **Chapter 7: Transparent Conducting Oxides and Materials for Solid State Lighting**

### **Effect of Temperature on Phase Transition of Ni-Co Oxide and its Application on Optoelectronics**

S.Y. Tsai, K.Z. Fung, C.N. Wei and H.Y. Bor

247

### **Several Approaches to Bipolar Oxide Diodes with High Rectification**

M. Grundmann, F.L. Schein, R. Karsthof, P. Schlupp and H. von Wenckstern

252

### **Tunable Performance of P-Type Cu<sub>2</sub>O/SnO Bilayer Thin Film Transistors**

H.A. Al-Jawhari, J.A. Caraveo-Frescas and M.N. Hedhili

260

### **A Monolithic White-Light LED Based on GaN Doped with Be**

H. Teisseyre, M. Bockowski, T.D. Young, S. Grzanka, Y. Zhydachevskii, I. Grzegory and A. Kozanecki

264

### **InGaN/GaN Quantum Dot and Nanowire LEDs and Lasers**

P. Bhattacharya, T. Frost, A. Banerjee and S. Jahangir

270
