Preface

Chapter 1: Novel Functional Carbon Nanomaterials

Thermionic and Photon-Enhanced Emission from CVD Diamond: Influence of Nanostructure, Doping, and Substrate T.Y. Sun, F.A.M. Koeck and R.J. Nemanich	1
Research of Diamond-Like Carbon Film Deposited by Double Pulsed Lasers Y. Cheng, S.Y. Wang, Y.M. Lu, G.J. Huang, Y.L. Guo, X. Liu and B. Sun	11
Evolution of Cu Surface Morphology and its Effect on Graphene Synthesized by Chemical Vapor Deposition A. Ibrahim, A. Owais, M. Atieh, R. Karnik and T. Laoui	17
Liquid Crystal Assisted Selective Separation of Large Graphene Oxide and its Size Dependent Oxygen Reduction Catalytic Effect K.E. Lee, J.E. Kim, J.W. Lim and S.O. Kim	23
The Possibilities of Graphenes Application in Textronic Devices M. Puchalski, E. Skrzetuska and I. Krucińska	27
Improvement of Performance of Paper Transistor Using Carbon-Nanotube-Composite Paper and its Application to Logic Circuit Y. Hamana and T. Oya	32
Development of Carbon-Nanotube Composite Thread and its Application to "Thread Transistor" M. Yoshida and T. Oya	38
Energy Gap Associated to Photocatalytic Activity of MWCNT/TiO₂/ZnO Nanocomposites S. da Dalt, J. Schorne Pinto, F.A.L. Sanchez, A.K. Alves and C. Pérez Bergmann	44
Carbon Coils-Polyurethane Composites for the Shielding Materials of Electromagnetic Interference G.H. Kang and S.H. Kim	50

Chapter 2: Transport in Inorganic Materials

The Influence of the Exterior Surface on Grain Boundary Mobility Measurements A. Novick-Cohen, A. Zigelman and A. Vilenkin	56
Protonic SOFCs Using Perovskite-Type Conductors H. Yugami, H. Kato and F. Iguchi	66
Vacancy Diffusion under a Stress and Kinetic of Nanovoid Growth in Cubic Metals A. Nazarov, A. Mikheev and A. Zaluzhnyi	72

Chapter 3: Non-Volatile Inorganic Memory Devices

Two-Terminal Non-Volatile Memory Devices Using Silicon Nanowires as the Storage Medium K. Saranti and S. Paul	78
Extraction of Filament Properties in Resistive Random Access Memory (ReRAM) Consisting of Binary-Transition-Metal-Oxides T. Moriyama, R. Koishi, K. Kimura, S. Kishida and K. Kinoshita	84
Elucidation of Metal Diffusion Mechanism in Conducting-Bridge Random Access Memory (CB-RAM) Using First-Principle Calculation K. Kinoshita, T. Yamasaki, S. Yura, T. Ohno and S. Kishida	91
Resistive Switching Behavior in Undoped α-Fe₂O₃ Film with a Low Resistivity Y. Ogawa, Y. Sutou, D. Ando and J. Koike	96
Two Terminal Non-Volatile Memory Devices Using Diamond-Like Carbon and Silicon Nanostructures S. Alotaibi, N. Gabrielyan and S. Paul	100
Switching in Polymer Memory Devices Based on Polymer and Nanoparticles Admixture Z.H. Alhalafi and S. Paul	107

Thermal Properties of In-Sb-Te Thin Films for Phase Change Memory Application H.T. Nguyen, A. Kusiak, J.L. Battaglia, C. Gaborieau, Y. Anguy, R. Fallica, C. Wiemer, A. Lamperti and M. Longo	113
Thermal Conductivity Measurement of a Sb₂Te₃ Phase Change Nanowire A. Saci, J.L. Battaglia, A. Kusiak, I. De, R. Fallica and M. Longo	120
MRAM Concepts for Sub-Nanosecond Switching and Ultimate Scalability I.L. Prejbeanu, S. Bandiera, R. Sousa and B. Dieny	126
Doped Hafnium Oxide – An Enabler for Ferroelectric Field Effect Transistors T. Mikolajick, S. Müller, T. Schenk, E. Yurchuk, S. Slesazeck, U. Schröder, S. Flachowsky, R. van Bentum, S. Kolodinski, P. Polakowski and J. Müller	136
Integration of STT-MRAMs for Embedded Cache Memories T. Sugii, Y. Iba, M. Aoki, H. Noshiro, K. Tsunoda, A. Hatada, M. Nakabayashi, Y. Yamazaki, A. Takahashi and C. Yoshida	146
 Chapter 4: Novel Superconducting Materials	
Superconductivity at $T_c = 36.5$ K in Na-Substituted SrFe₂As₂ Single Crystals L. Shlyk, M. Bischoff, E. Rose and R. Niewa	150
Role of Mg-B-O Nanostructural Inhomogenities on the Performance of Superconducting MgB₂ T. Prikhna, M. Eisterer, W. Gawalek, V. Sokolovsky, A. Kozyrev, V. Moshchil, H.W. Weber, S. Dub, X. Chaud, V. Kovylaev, V. Sverdun, M. Karpets, T. Basyuk, N. Sergienko and T. Serbenyuk	156
Microwave Measurements of Surface Resistance and Complex Conductivity of NdBaCuO Films J. Mazierska, K. Leong, D. Ledenyov, A. Rains, N. Zuchowski and J. Krupka	162
Critical Current Density and Pinning Energy of Partial Melted Sm-Based Superconductor H. Imao	169
Critical Current of Bi-2212 Single Crystal by Doping Oxides as a Pinning Center T. Agou and H. Imao	175
High Critical Currents in Single Grain YBa₂Cu₃O_y Bulk Superconductors Produced by Infiltration-Growth K. Nakazato, M. Muralidhar, K. Inoue, M.R. Koblishka and M. Murakami	181
Development of Density Functional Theory for Plasmon-Assisted Superconductivity R. Arita and R. Akashi	186
Fabrication of MgB₂ Bulk Magnets with High Critical Currents M. Muralidhar, K. Inoue, M.R. Koblishka and M. Murakami	196
New Measurements of the Transition to the Normal State Induced by High Current Densities in High-T_c Superconductor Microbridges under Thermal Smallness Conditions J.M. Doval, J. Maza, C. Torron, J.A. Veira, M. Tello and F. Vidal	202
