

Table of Contents

Preface

Chapter 1: Multiferroic and Magnetoelectric Materials

Technology and Main Properties of PMN-PT-Ferrite Multiferroic Ceramic Composite Materials

R. Skulski, D. Bochenek, P. Niemiec, D. Brzezinska and A. Chrobak 3

The Basic Properties of the Ferroelectromagnetic Composites Based on the Ferrite and PZT-Type Powders

D. Bochenek, P. Niemiec, R. Skulski and J. Dercz 9

Chapter 2: Inorganic Luminescent Materials and Materials for Optoelectronics and Photovoltaics

Glass-Derived Photonic Crystal Structures

A. Chiappini, C. Armellini, A. Carpentiero, L. Pasquardini, L. Lunelli, A. Vaccari, S. Pelli, A. Lukowiak, C. Pederzolli, G.C. Righini, R. Ramponi and M. Ferrari 17

Cell Performances of Inorganic-Organic Hybrid Solar Cells Using Fluorosilicate/Phosphorus Oxide Composite Microparticles

K. Sato, Y. Sugano, K. Hirakuri and N. Fukata 26

Surface Plasmon Effects on Photoluminescence of YAG:Ce³⁺-Yb³⁺

T. Hussain, L. Tang, H.Q. Ye and D. Xiao 32

Cd-Free Quantum Dot Dispersion in Polymer and their Film Molds

Y.Y. Su, K.L. Liang and C.M. Leu 38

Recent Progress of Transparent Ceramic Scintillators

T. Yanagida 44

Versatile Lithium Fluoride Luminescent Detectors for High Resolution Imaging Applications from Extreme Ultraviolet to Soft and Hard X-Rays

F. Bonfigli, E. Nichelatti, M.A. Vincenti and R.M. Montereali 54

Luminescence Properties of Ytterbium Activated PLZT Ceramics

M. Plonska, W.A. Pisarski and J. Pisarska 64

Synthesis and Characterization of Lanthanide Metal-Organic Frameworks with Perfluorinated Linkers

A. Laurikėnas, J. Barkauskas and A. Kareiva 70

Characterization of Lead Lanthanum Zirconate Titanate Ceramics Co-Doped with Lanthanide Ions

M. Plonska and J. Dzik 75

Photoluminescent Color-Center Based Lithium Fluoride Radiation Detectors for Proton Beam Diagnostics

M. Piccinini, A. Ampollini, L. Picardi, C. Ronsivalle, M. Vadrucci, F. Bonfigli, S. Libera, E. Nichelatti, M.A. Vincenti and R.M. Montereali 82

Chapter 3: Metamaterials

Some Perspectives in Non-Hermitian Metamaterials

S. Savoia, G. Castaldi and V. Galdi 93

Full Measurement of the Stokes Parameters Using a Subwavelength Silicon On-Chip Polarimeter

A. Espinosa-Soria, F.J. Rodríguez-Fortuño, A. Griol and A. Martínez 103

Group-Velocity Anomaly Modes in Hybrid Bands of Photonic Crystals Made of Ferroelectrics

M.W. Takeda, A. Arikawa, R. Araki, Y. Nakata, F. Miyamaru and T. Yamaguchi 109

Chapter 4: Graphene and other 2D-Layered Nanomaterials

Graphene-Boron Nitride 2D Heterosystems Functionalized with Hydrogen: Structure, Vibrations, Optical Response, Electron Band Engineering and Bonding

A.I. Shkrebtii, B. Wilk, R. Minnings, R. Zapata-Peña, S.M. Anderson, B.S. Mendoza and I.M. Kupchak

117

Electromagnetic Properties in Multilayer Graphene within the Ritus Formalism: Transverse Electrical Conductivity

G. Murguía-Romero, A. Sánchez and R. Zavaleta-Madrid

125

Aerogels Based on Microwave Plasma Torch Synthesized Graphene

F.R. Sultanov, Z.A. Mansurov, S.S. Pei, S.C. Chang, S. Xing, F. Robles-Hernandez, Y.W. Chi and K.P. Huang

131
