

Table of Contents

Preface

Chapter 1: Smart and Interactive Textiles

Chapter 1A: Adaptive, Active and E-Textiles Manufacturing and Functionality

Shape-Memory Nanocomposite Elastomers Filled with Carbon Nanomaterials G.C. Lama, G. Gentile, P. Cerruti, M. Lavorgna, V. Ambrogi and C. Carfagna	5
Textile Materials with SMA Elements for Active Protection against Heat and Flame G. Bartkowiak and A. Dąbrowska	11
Advanced Polyester Textiles Adaptive to Ambient Conditions P. Glampedaki	17
Printed Electroluminescent Fabrics B. Hu and P. Calvert	27
Exploring Process Technologies to Fabricate Fibrous Scaffolds and Bio-Textiles for Biomedical Applications V. Guarino and L. Ambrosio	31
The Incorporation of Phase Change Material into Soft Armour Inserts: Achieving a Level of Cooling without Compromising Ballistic Protection K.C. Ng, A.P. Hunt, P. Tan, H. Billon and M.F. Ling	38
Airbrushed Liquid Crystal/Polymer Fibers for Responsive Textiles J.L. West, J.R. Wang and A. Jákli	43

Chapter 1B: Smart and Interactive Applications

Color Tuning in Electroluminescent Textiles E. Lempa, C. Graßmann, M. Rabe, A. Kitzig and E. Naroska	53
Design Proposal of Space Clothes that Supports Lives in the Future Space Tourism Era M. Ohkubo, M. Xue, M. Yamamura, J. Kanebako, L. Ishigami, S. Yamaguchi, T. Nojima, H. Uchiyama and N. Yamazaki	59
Electrospun Drug-Loaded Textiles for Biomedical and Healthcare Applications I. Bonadies, F. Cimino, V. Ambrogi and C. Carfagna	64
Electroluminescent Textile for Therapeutic Applications C. Graßmann, E. Lempa, M. Rabe, A. Kitzig, E. Naroska and B. Neukirch	73
Soft Condensed Matter Hybrid Fiber Sensors for Vital Function Monitoring M. Melnykowycz, M. Tschudin, R. Selle, K.R. Maynard, R.R. Richards-Kortum, Z.M. Oden and F.J. Clemens	79

Chapter 2: Micro- and Nanosystems

Ripples in Graphene Sheets and Nanoribbons S. Prabhakar and R. Melnik	87
Fabrication of Micro Three Dimensional Structures by Two Photon Polymerization with SiO/Resin M.G.d.R. Herrera Salazar, H. Akiyama, T. Nakayama, H. Suematsu and K. Niihara	93
RF-MEMS Application to RF Tuneable Circuits R. Sorrentino, P. Farinelli, A. Cazzorla and L. Pelliccia	100
Comparison between MEMS and Meso Scale Piezoelectric Energy Harvesters A.D.T. Elliott, L.M. Miller, E. Halvorsen, P.K. Wright and P.D. Mitcheson	109

Gas Supply through Agarose Walls in Cell Culturing Microchips F. Bunge, S. van den Driesche and M.J. Vellekoop	115
A Wearable Swallowing Detecting Method Based on Nanometer Materials Sensor Y. Kang, D.Y. Chen, M. Lawo and S.J. Xia Hou	120
Sensor Sticker for Detection of Fungi Spore Contamination on Bananas P. Papireddy Vinayaka, M. Kahali Moghaddam, S. van den Driesche, R. Blank, W. Lang and M.J. Vellekoop	130
Fluidic Physical Sensors and Sensor Systems B. Jakoby	134

Chapter 3: Wearable Body Sensors and Technology for Healthcare Applications

Smart Eyeglasses, e-Textiles, and the Future of Wearable Computing O. Amft	141
Multimaterial and Multiscale Rapid Prototyping of Patient-Specific Scaffold A. de Acutis, C. de Maria and G. Vozzi	151
The Role of Wearable Monitor for Healthcare T. Tamura, Y. Maeda, M. Sekine and M. Huang	159
Extraction of Stair Walking Parameters in Living Space by Using Kinect v2 A. Ogawa, A. Yorozu, A. Mita, M. Takahashi and T. Bock	166
Smart Wearable Systems for Enhanced Monitoring and Mobility R.A. Shoureshi, J.R. Rizzo and T.E. Hudson	172

Chapter 4: Bio-Inspired Materials and Devices

Textile as Artificial Nature - From Synthetic Sea Grass to Fibrous Implants N.K. Persson	181
Biomimetic Design and Manufacturing of Anti-Erosion Functional Surfaces Inspired from Desert Scorpion Z.W. Han, M.K. Yang, W. Yin and J.Q. Zhang	187
Recent Developments in Bio-Inspired Sensors Fabricated by Additive Manufacturing Technologies G.J.M. Krijnen and R.G.P. Sanders	197
Auto-Gopher-2 - Wireline Deep Sampler Driven by Percussive Piezoelectric Actuator and Rotary EM Motors Y. Bar-Cohen, K. Zacny, M. Badescu, H.J. Lee, S. Sherrit, X.Q. Bao, D. Freeman, G.L. Paulsen and L. Beegle	207
