

# Table of Contents

## Preface

## Chapter 1: Sensor Systems for Monitoring of Structures

<b>An Inkjet-Printed Carbon Nanotube Strain Distribution Sensor for Quasi Real-Time Strain Monitoring of Lightweight Design Materials</b>	
Y.J. Zhao, C. Beisteiner, S. Gschossmann and M. Schagerl	3
<b>FBG-Galfenol Integrated Magnetic Field Sensors for Harsh Environments</b>	
V. Apicella, M.A. Caponero, C. Cianfarani, D. Davino, A. Polimadei and C. Visone	9
<b>New Directions of Health Monitoring for Building Structures</b>	
A. Nishitani, P. Xiang, S. Marutani, T. Hatada and R. Katamura	15
<b>A Magnetostrictive Energy Harvesting System for Bridge Structural Health Monitoring</b>	
C.S. Clemente, D. Davino, G. Maddaloni, M.R. Pecce and C. Visone	20
<b>Estimating Cable Forces in a Large Cable-Stayed Bridge</b>	
S. Casciati and L. Elia	26
<b>Sparse Solution Techniques in Load and Damage Monitoring Systems</b>	
C.P. Fritzen and D. Ginsberg	35
<b>Wind Turbine Fault Detection through Principal Component Analysis and Statistical Hypothesis Testing</b>	
F. Pozo and Y. Vidal	45
<b>Data Evaluation in Smart Sensor Networks Using Inverse Methods and Artificial Intelligence (AI): Towards Real-Time Capability and Enhanced Flexibility</b>	
S. Bosse, A. Lechleiter and D. Lehmuhs	55
<b>Integrated Sensing, Monitoring and Healing of Composite Systems</b>	
O.S. Kupunu, V. Kadirkamanathan, B. Bhattacharya and S.A. Pope	62

## Chapter 2: Research, Design and Modern Technologies in Robotics and Mechatronics

<b>Model Order Reduction in Nonlinear Systems</b>	
L. Faravelli and F. Casciati	71
<b>Shape Memory Alloys Wires: From Small to Medium Diameter</b>	
V. Torra, S. Casciati and M. Vece	79
<b>Controllable Truss-Frame Nodes in Semi-Active Damping of Vibrations</b>	
B. Poplawski, C. Graczykowski and Ł. Jankowski	89
<b>Robotic Fish Development for the Next Generation Underwater Vehicle</b>	
I. Yamamoto	95
<b>UAV-Deployed Impulsive Source Localization with Sensor Network</b>	
W. Greenwood, H. Zhou, J.P. Lynch and D. Zekkos	104
<b>Shape Memory Alloy Morphing Airfoil Sections</b>	
D. Saravanos, T. Machairas, A. Solomou and A. Karakalas	112
<b>Vision-Based Fuzzy Controller for Quadrotor Tracking a Ground Target</b>	
X.C. Chen, Z.Q. Cao, Y.Q. Yang and C. Zhou	121
<b>Yaw Control of a Smart Morphing Tailless Aircraft Concept</b>	
L.L. Gamble and D.J. Inman	127
<b>Adaptive Self-Protection against Shock and Vibration</b>	
Ł. Jankowski, C. Graczykowski, P. Pawłowski, G. Mikułowski, M. Ostrowski, B. Poplawski, R. Faraj, G. Suwała and J. Holnicki-Szulc	133

## Chapter 3: Technologies for Satellite Positioning System for Emergency Management

<b>SPARTACUS: Enabling Space Technologies in Security Research</b>	
C. Fuggini and I. Tesfai	145
<b>Positioning Units for Critical Asset Tracking and Emergency Management</b>	
L. Vittuari, B. Pavkovic, A. Guinamard, F. Casciati, M. Zanzi, A. Ghetti, L. Berbakov and M. Vece	152
<b>A Satellite and Inertial Navigation Solution in Crises Management Operation for First Responder Application</b>	
A. Ghetti, L. Vittuari and M. Zanzi	158
<b>A Satellite and Inertial Navigation Solution in Crises Management Operation for Transport and Relief Goods Application</b>	
F. Casciati, S. Casciati, L. Faravelli and M. Vece	168
