

Table of Contents

Preface

Chapter 1: Preparation and Performance Prediction of Functional Nanomaterials

SelfPropelled Nanomotor Probe Enabled Lateral Flow Immunoassay for Sensitive Detection of Inflammatory Factors J.C. Guo, Y.M. Zhang, Y.S. Fu, C.H. Ren and J.S. Duan	3
Development of Cross-Linked Chitosan Films Reinforced with Chitin Nanofibers S. Tanpichai and K. Yuwawech	9
Prediction of Wear Rate for Aluminium-Based Nano and Hybrid Nano-Composites Using Machine Learning V.P. Krishna, T.G.S. Nandan, V.K. Verma and S.V. Komarina	15
Tensile Strength Prediction for Crystalline Nanocellulose-Polyvinyl Alcohol Composites Using Machine Learning Algorithms C. Massay, M. Cornejo and H. Baykara	21
Low-Cost Furnace-Grown Silicon Nanoparticles on Nanographite: A New Pathway to Produce LIB Anodes R. Patil, M. Phadatare, M. Hummelgård, D. Brandell and J. Örtengren	29

Chapter 2: Mechanical Behavior and Extreme Environmental Response of Advanced Materials

Describing Crack Growth via <i>In Situ</i> Measurement of the Electrochemical Potential during Corrosion Fatigue Experiments M. Wolf and A. Pfennig	37
Elucidation of Fatigue Damage Factors in Metal Diaphragms and Effect of Tightening Loads on Fatigue Life X. Zhu, S. Abe, K. Takahashi, A. Sakamoto, N. Kanai, H. Iwasakii and H. Toyota	43
Effect of Pre-Existing Helium Bubbles in Tungsten under High Energy Displacement Cascades M. Abu-Shams	49
Simulation Study on Thermal Protection Performance of Firefighting Clothing under the Action of Internal Air Convection X. Wang, B. Liu, D.Q. Chen and K.N. Li	55
Study on Aging Behavior of BL-60 Basalt Composites in Marine Atmospheric Environment F.C. Zhao, L.Z. Luo, J.H. Liu, Y.R. He, H. Tao, Z.X. Fu and J.K. Wang	65

Chapter 3: Advanced Metal Processing Technology

Effect of Annealing on the Hardness Variation and Deformation Behaviour of W-Ni-Cu and W-Ni-Fe Alloys W. Su, C. Sun, H.T. An and T.H. Gu	75
Effects of Heat Treatments on Fatigue Damage of Aluminum Alloy 2017A A. May, Z. Bouabdallah and A. Belattar	83
Nano Finishing of Orthopedic Implant Plates Using Abrasive Flow Machining S. Saroj, S. Bhukya and V. Gudipadu	89

Chapter 4: Catalysts for Pollution Removal

Ti Doped Layered Manganese Oxide as an Efficient Catalyst for the Low-Temperature SCR of NO with NH₃ H.W. Zhang, X. Xiao, S. Shu, L.B. Jiang and J.J. Li	97
Enhancing Dye Decolorization: CS/TiO₂-ZrO₂ Nano Hybrid Catalyst for Malachite Green Removal M.A. Mohd Adnan, M.F. Majnis, M.A.A. Taib and N. Muhd Julkapli	113

Chapter 5: Eco-Friendly Materials and Technologies

Characterisation of Fibres from Pandanus Atrocarpus Leaves: Morphology, Functional Structure, Thermal Stability, and Dielectric Properties B.S. Yew, S.A. Hashim, F.H. Wee, I.Y.A. Fatah, N.H.M.Y. Ariffin, M.N.F. Pargi and M. Muhamad	121
Morphological, Structural and Chemical Analysis of Bioleached Kaolin by <i>Bacillus</i> Species M. Rajamohan, S. Chieng, S. Lim, K.K. Chong and S.H. Kuan	127
Characterization of New Rubber Compounds with Incorporation of Recycled Rubber Powders N.S. Domingues and L.M. Gonçalves	133
Characteristic of Surface Modification of Eco Processed Pozzolan (ePP) with n, n- Dimethyl Dodecyl Amine (oePP): Temperature Profile M.A. Mohamad Rosli, C.H. Nur Syuhani and F. Hamzah	139

Chapter 6: Materials and Technologies for Electronics and Photonics

Cu Ribbon Ultrasonic Bonding on Die-Top Nanotwinned Cu Films Evaporated on SiC Chips for Power Modules T.H. Chuang, C.H. Tsai, W.C. Huang, J.H. Chen, J.Y. Chang, C.H. Chen, Y.H. Chen, Y.T. Chen and A.Y. Lin	147
Development of Ag Nanotwinned Film Coated Pre-Formed Silver Sintered Sheets for the Die Bonding of SiC Chips with DBC Ceramic Substrates T.H. Chuang, J. Wang, Y.H. Chen, C.H. Chen, A.Y. Lin, J.Y. Chang, J.H. Chen and W.C. Huang	153
The Electrical Properties of VN Thin Films Prepared Using Reactive Magnetron Sputtering Y.C. Lee, Y.J. Liou and Y.C. Wang	161
Purcell and Pulse Induced Impact for Measurement Based on Nitrogen-Vacancy Centers in Diamond L.M. Ji, L.Y. Zhao and Y.H. Wang	169

Chapter 7: Properties and Processing Technologies of Cultural Monument Materials

Research on the Three-Dimensional Numerical Model and Characteristics of Rock Materials of Stone Cultural Relics L.Y. Zhang and S.Y. Yang	177
Analysis of the Firing Process of Tobe Porcelain Using Finite Element Method and its Applications to Design X. Zhu, K. Koretaka, M. Onishi, Y. Fujimoto, G. Hirakawa and H. Toyota	183
