

Table of Contents

Preface

Chapter 1: Active Noise Control

A Higher-Order Spectra Based Method of On-Line Secondary Path Model Identification for Active Noise Control Systems T. Główka and J. Figwer	3
Active Casing Controlled with a Partial-Update Neural Network S. Kurczyk and M. Pawelczyk	11
Active Rejection of Harmonic Disturbances with Nonstationary Harmonically Related Frequencies Using Varying-Sampling-Time LPV Control X.Y. Shu, P. Ballesteros and C. Bohn	19
Employment of Double-Panel Casing for Active Reduction of Device Noise S. Wrona and M. Pawelczyk	27
The System for Active Control of Sound Transmission through a Window Panel – The Concept and Simulation Results L. Morzyński, W.M. Zawieska and T. Krukowicz	35
Topology Optimization of a Bounded Space for a Vibroacoustical Problem in a Low Frequency A. Blazejewski	41
Vibration Measurements for Active Noise Control in a HVAC System with a Passive Absorber K. Szumski and M. Pawelczyk	49
Virtual Microphone Control for an Active Noise-Cancelling Casing K. Mazur and M. Pawelczyk	57

Chapter 2: Active Vibration Control

Extended Kalman Filter in 2S1 Tracked Vehicle System with Hybrid Control A. Jurkiewicz, J. Kowal and K. Zająć	69
Effectiveness of the Sliding Mode Control in a Two Coupled Discontinuous Dynamical Systems with Dry Friction P. Olejnik and J. Awrejcewicz	77
A Novel Backstepping Approach for the Attenuation of Torsional Oscillations in Drill Strings F.K. Ullah, F. Duarte and C. Bohn	85
A Comparison of Active and Semi-Active Sliding Mode Controllers Applied in Vibration Reduction Systems J. Snamina and P. Orkisz	93
Semi-Active Method of Motion Stabilization Applied to Mechanical System with the Constant Reaction Force Vibroisolation (CRF) – Model Study M.W. Dobry	103
Semi-Active Reduction of Vibrations of Periodically Oscillating System M. Michajłow, T. Szolc, L. Jankowski and R. Konowrocki	111
Reduction Methods of Structure Models for Control System Purposes A. Koszewnik and Z. Gosiewski	119
Optimal Controller for Active Vehicle Suspension Disturbed by Sinusoidal Signals M. Sibielak, W. Rączka, J. Konieczny and J. Kowal	127
The Application of xPC Target Platform for a Circular Plate Vibration Control M. Sierżęga and L. Leniowska	135
An Analysis of Axial Vibration in Face Packing Seals S. Gudkov, V. Martsynkovskyy and C. Kundera	142

Chapter 3: Methods of Measurements, Modeling and Identification

Balance Maintaining by Human	
A. Kot and A. Nawrocka	155
Hybrid Simulation of Tracked Vehicle Suspension on Real-Time Environment	
S. Kciuk, P. Kielan, A. Mężyk and K. Wilk	161
Identification of Kinematic Excitation Function by the Modal Coordinates Estimation of the System's Dynamics	
K.J. Kalinński and M. Mazur	169
Output-Only Identification of Vibratory Machine Suspension Parameters under Exploitational Conditions	
J. Iwaniec and M. Iwaniec	175
Rock Bolts Health Monitoring Using Self-Excited Phenomenon	
J. Kwaśniewski, I. Dominik, K. Lalik, W. Korzeniowski, K. Zagórski and K. Skrzypkowski	186
Shaping the Dynamic Characteristics of Military Special Vehicles	
T. Machoczek, A. Mężyk and S. Duda	192
Study of Flow-Induced Vibration Phenomena in Automotive Shock Absorbers	
M. Sikora	204
Analysis of Selected Pressure Signal Descriptors Used to Control Combustion Engine	
A. Bąkowski, L. Radziszewski and M. Źmindań	211

Chapter 4: Smart Materials and Devices

Design and Pre-Implementation of Micro-Movements Sensor with Magnetic Shape Memory Material	
S. Flaga and I. Dominik	219
Discrete Preisach Model of a Shape Memory Alloy Actuator	
W. Rączka, J. Konieczny, M. Sibielał and J. Kowal	227
Magnetic Shape Memory Alloys Modelling and Pneumatic Applications	
S. Flaga, A. Nowak, F. Stefański and B. Minorowicz	235
Piezoelectric Generators in the Energy Harvesting Systems	
D. Grzybek	243
Experimental and Simulation Investigations of the Cantilever Beam Energy Harvester	
R. Nowak and M. Pietrzakowski	249
