

# Table of Contents

## Preface

<b>Past as Future in Adaptive Buildings: Climatic Adaptation in Ancient Constructions</b> M. Niglio	1
<b>The Adaptation of Architecture to the Climate during the Roman Period According to Classical Authors</b> J. Burch and M. Prat	10
<b>The Use of Natural Earth as Concret Slab: The Dome for the Auditorium of Sant Julià de Ramis Fortress (Girona)</b> J. Fuses and J.M. Viader	19
<b>Advances in Research for Biomimetic Materials</b> S. Di Salvo	28
<b>The Role of Energy Technologies and Scenarios in the Decarbonisation Process</b> S. Di Caro	41
<b>Adaptive-Curvature Structures with Auxetic Materials</b> R. Naboni, S. Sartori and L. Mirante	53
<b>Building Optimization: The Adaptive Facade</b> A. Lanza Volpe	64
<b>Flussbad Berlin Re-Naturalization Project for the Spree River in the Museum Island</b> I. Marotta	76
<b>Kinetic Solutions for Responsive and Communicative Building Skin</b> S. Di Salvo	86
<b>Addition Strategy and Multi-Layered Envelopes in Building Adaptation: A Methodological Framework</b> C. Guerritore and S. Viscuso	98
<b>Textiles and Archaeological Sites: Towards a Methodology for Designing Lightweight Protective Structures</b> S. Viscuso, A. Zanelli and M. Barozzi	109
