Preface

Chapter 1: Additive Manufacturing

Silk Fibroin/PLA 3D Printed Composite Stent Fabricated through Direct Ink Write Technology E. Casanova-Batlle, A. Bosch, A.J. Guerra and J. Ciurana	3
Microstructure and Properties of AISI 316L Steel Processed by Selective Laser Melting Technology (SLM) and Hot Isostatic Pressing Technology (HIP) D. Bricín and J. Mocek	13
A Methodology to Characterize Structurally the Bonding between Two Parts Made of FDM-3D Printed Dissimilar Materials D. Rodríguez Engasa, P. Rodríguez de Francisco and J.L. Casado Corpas	23
Parametric Study of Functional Components Obtained by Additive Manufacturing Fused Filament Fabrication D. Jesus, C. Relvas and A.M. Ramos	33
Quality Comparison of Three Metal Additive Manufacturing Technologies on an Automotive Sealant Nozzle J. Ortiz-Cañavate, S. Ferrándiz, C. Cambralla and J. Igual	41
Digital Testing of Hybrid Components Manufactured by L-DED and Forging O. Murua De la Mata, J.I. Arrizubieta Arrate, G.G. Escudero, A.L. Mentxaka and E. Ukar	51
Porosity Reduction in 15CDV6 Steel Manufactured by L-DED A. Urresti Ubillos, J.I. Arrizubieta Arrate, O. Murua De la Mata, M. Aristizabal and E. Ukar	61
Methodology for the Acoustic Analysis of Acoustic Guitar Top Plates Designs by Additive Manufacturing Á. Burgos Pintos, P.F. Mayuet, M. Alonso Gracia and L. Rodríguez-Parada	71
Study of Improvement of the Build Rate of Ti-6Al-4V Alloy by Laser Beam Powder Bed Fusion Technology L. Portolés Griñán, J.R. Blasco Puchades, J. Zambrano Carrullo, O.J. Ferrando and J.A. García-Manrique	81
Fatigue Behavior Analysis in Reinforced PLA Parts Manufactured by FDM C. Bermudo Gamboa, S. Martín-Béjar, F.J. Trujillo Vilches, M. Herrera Fernández and L. Sevilla Hurtado	91
The Tolerancing Obtained with Binder Jetting Additive Manufacturing Process in 17-4PH Steel - Case Study E. Lima, C. Relvas and A.M. Ramos	99
Experimental Study on the Infill Density Effect on Reduced Compressive Mechanical Properties of Additively Manufactured ASA E.L. Papazoglou, N.E. Karkalos, P. Karmiris-Obratański and A.P. Markopoulos	107
Bringing Medical Model Scans into Reality through 3D Printing: Materials and Manufacturing Parameters B. Adrover-Monserrat, J. Lluma, B. Luis-Torres, R. Jerez-Mesa and J.A. Travieso-Rodríguez	117
Machinability of Selective Laser Melted 17-4 PH Stainless Steel in Turning Process A.I. Fernández Abia, P. Rodríguez González, M.Á. Castro Sastre and S. Giganto	127
Influence of Design Parameters and Materials on the Performance of Closed-Wall Lattice Structures S. De la Rosa, P.F. Mayuet, C. Silva, Á.M. Sampaio and L. Rodríguez-Parada	135
Influence of Process Parameters in LMD for Geometrical Accuracy and Thin Geometry with AISI316L C. de Lemos, D.G. Afonso, R. Torcato, M. Oliveira and C. Santos	143
Design and Fabrication of a New Filament, PLA with PTFE as Fillers, for Water Repellent Surfaces E. Molero, B. Torres, O. Rodríguez-Alabanda and G. Guerrero-Vacas	153
Machinability Characterization of 3D Printed PEEK D. Gómez-García, A. Díaz-Álvarez, M.H. Miguélez and J. Díaz-Álvarez	161

Improvement of the Thermal Performance of a Drilling Tool Case by Using Metal Additive Manufacturing	
C. Galleguillos, D. Hervás, A. Perinán and F. Lasagni	171
Tensile Behaviour of PLA Parts Manufactured by FFF with Defects in the Interlayer Filament Bonding and its Application in Product Design	
M.Á. Pardo-Vicente, D.M. Nieto, D. Moreno-Sanchez, P. Pavón-Domínguez and M. Herrera-Collado	179
Investigation of Basic Characteristics of Waterproof-Breathable Nonwoven Nano-Fabric Manufactured by Improved Melt-Blowing Method	
S.P. Tsai, W. Wu, H. Sota, T. Hirogaki and E. Aoyama	189
Exploring Microgravity Liquid Printing Based on Resin Solidification for Outer Space Applications	
F. Diaz Palacios, G. Sahonero Alvarez, G. Rojas, M. Clavijo, J. Ordoñez and K. Nallar	195

Chapter 2: Green Building Materials

Mechanical Properties of Concrete with Clam Shell Powder (CSP) as Partial Cement Replacement	
Y. Mahshuri, H. Sinin and A.E. Sinin	205
Determination of the Optimal Jar Mill Setting for Crushed Eggshells Used in LDPE Tile Creation	
R.A.S. delos Reyes, D.P. Higa, J.A. Montuya and N. Umantod	213
