Preface

Chapter 1: Adsorptive and Photocatalytic Materials for Environmental Remediation

Enhanced Photocatalytic Degradation of Methyl Orange under UV Irradiation Using Noble Metal-Loaded WO₃/WS₂ A.I.M. A'srai, M.H. Razali and N.A.A.C.M. Khairuddin	3
Correlation Analysis of Key Operational Parameters Affecting the Adsorption Performance of Bio-Based and Chitosan-Based Adsorbents for Copper Ion Adsorption P. Charnkeithkong and R. Phoophuangpairoj	11
Parametric Studies, Kinetic and Isotherm Modeling of Methyl Orange Adsorption by Chitosan - MIL-101 (Fe) - Polyethyleneimine Beads N. Saptorsantos, I.J.C. Dela Cruz and J.V.D. Perez	19
Mechanism of Carbon Dioxide Adsorption on Gallate-Based Metal-Organic Frameworks M. Ismail, M.A. Bustam, Y.F. Yeong and N. Jusoh	27
Synthesis and Characterization of Gum Arabic–Stabilized Gold Nanoparticles for Heavy Metal Remediation T. Al Shuaili, F. Al Hatmi, Y. Ajaj and A. Al Abri	35
Heterojunction Engineered FeWO₄/g-C₃N₄ Nanocomposite Photocatalyst for Methyl Orange Degradation A.I.M. A'srai, N.A.A. C.M. Khairuddin, N.A. Roslan and M.H. Razali	43

Chapter 2: Green Fuel Technologies

Preliminary Characterization of CaO and AlO Catalysts for Biomass-Derived Bio-Oil Production H.A. Kaoje, A.A. Adeleke, A. Olosho, S. Jesuloluwa, A.S.B. Gimba, H. Rasheed and D.J. Yerima	53
A Review of Hydroxyl Ammonium Nitrate (HAN) as an Alternative to Traditional Satellite Propellants I.G. Iheanacho, S.A. Agada, E.A. Theophilus, U.A. Shuaib, C.B. Ayogu, G.O. Uhiene, J.B. Adeniyi, M. Obidiagha and F. Nzekwe	67
Hydrogen Storage Potentials: Present and Future Prospects C.N. Chukwuati and T.C. Jen	79

Chapter 3: Materials for Biomedical Applications

Characterisation of Antibacterial Surface Textures on Titanium Alloys M. Iwasaki, M. Takaki, T. Shikata and K. Masuda	93
A Green Approach to Curcumin Encapsulation Using Chitosan–Carrageenan Nanoparticles C.S. Emolaga, L.C. Milo, M.C.O. Que and B.A. Basilia	105

Chapter 4: Cost-Effective and Alternative Building Materials

Life Cycle Assessment of Aluminium Alloys for Sustainable Building Materials and Components A. Mastropasqua, E.S. Mazzucchelli, P. Rigone and S.H. Zabihi	115
Refractory Bricks Characterization Manufactured from Geopolymers Based on Volcanic Ash J. Almirón, R. Churata, P. Huanca-Zuñiga, J. Torres-Almirón, G. Acevedo-Obando and D. Tupayachy-Quispe	123

Assessing GFRP Rebars as a Sustainable Alternative to Steel in Aggressive Environments: Tensile Testing and Material Implications	
G. González-Robles, J. Briones-Bitar, P. Carrión-Mero and L. Moreno-Alcívar	131
Effect of Repair Processing on Energy Absorption of Pre-Crack-Initiated Leather	
H. Katogi	139
