

Table of Contents

Preface

Chapter 1: Functional Ceramics

Effect of Bi^{3+} and Fe^{3+} Ions Substitution on Electrical Response of BaTiO_3 Ceramic N. Gouitaa, F.Z. Ahjyaje, F. Abdi and T. Lamcharfi	3
Structural Refinement, Dielectric and Electromechanical Properties of $(1-x)\text{NBT}-x\text{KBT}$ Piezoceramics in the Morphotropic Phase Boundary Region M. Mesrar, N. Gouitaa, N.S. Echadou, F. Abdi and T. Lamcharfi	11
Impedance Spectroscopy and Study of Electrical Properties of $\text{Pb}(\text{Zr}_{0.52}\text{Ti}_{0.48})_{1-x}\text{Fe}_x\text{O}_{3-x}$ ($0 \leq x \leq 0.20$) Ceramics M. Ahabboud, N. Gouitaa, F. Abdi and T. Lamcharfi	37
Effect of $\text{Pb}_{0.8}\text{La}_{0.2}\text{Ti}_{0.95}\text{O}_3$ Doping on the Electrical and Dielectric Properties of CCTO Compound Synthesized by Hybrid Method M. Slaoui, N. Gouitaa, A. Harrach, F. Abdi and T. Lamcharfi	49

Chapter 2: Advanced Materials

Study of Polymer Inorganic Composites for Electromagnetic Radiation Absorption Using Potassium Titanates V. Lebedev, D. Miroshnichenko, O. Shestopalov, A. Hrubnik and B.B. Nyakuma	73
Optimization of the Technology of Creating Sensitive Gas Sensors Based on Zinc Oxide N. Minska, R. Ponomarenko, R. Shevchenko and O. Antoshkin	81
Thermohydraulic Analysis of Aqueous Dispersions Effectiveness with TiO_2 and Al_2O_3 Nanoparticles in a U-Shaped Geothermal Probe T. Rymar and O. Stanislavchuk	87
Potentiometric (pH-Metric) Methods of Studying Acid-Base Properties on the Surface of Dispersed Materials Y. Danchenko, V. Andronov, H. Olijnyk, A. Kosse and M. Rastorhueva	95
The Relationship between Specific Electrical Resistance and the Readiness of Coal Coke V. Vladymyrenko and I. Shulga	103
Optimal Process Parameters of the Binder to Reduce Air Pollution and to Improve the Emission Effect from Composite Production A. Kondratiev, O. Gaidachuk, T. Nabokina, S. Shapoval and O. Semkiv	109
Study of Smart Bioactive Humic-Polymeric Hydrogel Transdermal Materials K. Lebedeva, A. Cherkashina, T. Tykhomyrova and V. Lebedev	121

Chapter 3: Friction Stir Welding Technologies

Development of the Working Techniques Required to Apply Friction Stir Welding in Liquid Environment L.N. Botila, I.A. Perianu, G.V. Mnerie, E.F. Binchiciu, A.A. Geana and M. Marin-Corciu	131
Friction Stir Welding in Liquid Working Environment (SFSW) of EN AW 1200 Aluminum Alloy L.N. Botila, I.A. Perianu, M. Marin-Corciu, A.A. Geana, I. Duma and R.N. Popescu	143
Computer Aided Thermal Analysis of the FSW Tool Geometry M. Marin-Corciu, L.N. Botila and A.A. Geana	155
Fracture Characteristics of EN AW 1200 Tensile Test Specimens Joined with FSW and SFSW Processes E.F. Binchiciu, L.N. Botila, M. Nicolaescu and G.V. Mnerie	163
Friction Stir Spot Welding of Steel Structures - A Brief Review T. Georgescu, E.L. Nitu, M.D. Iordache and L.N. Botila	175

Mechanical Properties of Welded by Friction Stir Welding Aluminium Alloy AA 5754 N. Ferdinandov, D. Gospodinov, M. Ilieva and R. Radev	185
Finite Element Modeling and Verification of the Plunge Stage in Friction Stir Welding I. Draganov, D. Gospodinov, R. Radev and N. Ferdinandov	193
Influence of Welding Tool Geometry on the SFSW Joint Dimensions of the EN AW 1200 Aluminium Alloy G.V. Mnerie, L.N. Botila, I.A. Perianu, I. Duma, E. Dobrin and E.F. Binchiciu	205
