

Table of Contents

Preface

Applications and Prospective Markets for Advanced Technical Ceramics R.M. Spriggs	1
Advanced Engineering Ceramics for Biomedical Applications J.F. Shackelford	13
Crack Resistance Behaviour in Transformation Toughened Ceramics M.V. Swain	23
Alumina Ceramics for High Temperature Applications P.A. Badkar	45
A Review on Boron Carbide F. Thevenot	59
Titanium Carbide Based Cermets for Wear Resistance Applications D.M. Deo, J.P. Saxena and S. Basu	89
Key Issues in Si₃N₄ and SiC Matrix Composites for Automobile and Aerospace Applications S. Dutta	99
Nitride Ceramics - A Brief Account of Work Done in CGCRI J. Mukherji	107
Engineering Ceramics Development in BARC S.K. Roy	121
Structural Ceramics for Launch Vehicles and Satellites B.K. Sarkar	135
Comparative Evaluation of Alumina Powders Obtained from Different Routes for Engineering Applications C.H. Page and A.K. Chatterjee	151
Coated Powders for Ceramics and Composites D.K. Agrawal, S.B. Majumder and G.V. Ramani	165
Self-Propagating High Temperature Synthesis of Refractory Nitrides, Carbides and Borides S. Kumar	183
Spray Drying of Ceramic Slurries H.J. Graef and G. Seitz	189
Sintering Aspects of Nonoxide Ceramics G.S. Upadhyaya	205
Characterisation and Control of Rheological Properties in Engineering Ceramics R. Blanc, C. Camoin and J.C. Casanova	227
Silicon Nitride Powders and their Processing S.G. Malghan	243
Prospects and Problems with Ceramic Injection Molding B.C. Mutsuddy	265
Energy Conservation through Silicon Carbide 'ENECOAT' of Higher Emissivity I. Benko and A. Fargo	303
Characterisation of Engineering Ceramics by Electron Microscopy F. Appel, M. Bartsch and U. Messerschmidt	313
Nano-Composite Materials Based on Si₃N₄ and SiC K. Niihara, K. Izaki and A. Nakahira	319
Thermal Analysis of Engineering Ceramics S. Meriani, V. Sergo and C. Schmid	327
The Deformation and Fracture Characteristics of Superplastic Ceramics A.H. Chokshi	349
Indentation Techniques for Evaluation of Mechanical Properties of Ceramics and Glasses H. Matzke	365
Nondestructive Testing of Ceramic Engineering Components by X-Ray and Ultrasonic Techniques W. Arnold and H. Reiter	393

Classification and Standardization of Advanced Technical Ceramics G.C. Padgett	411
Test Methods of Advanced Ceramics - Reasonable Approaches to Certification of Ceramics G. Gogotsi	419
Ceramic Nuclear Fuels Development at BARC - Recent Activities C. Ganguly	435
Fabrication, Characteristics and In-Pile Performance of UO₂ Pellets Prepared from Dry Route Powder A. Chotard, A. Ledac and M. Bernardin	471
Sol Gel Processes for Nuclear Fuels and their Application Potential for Non Nuclear Materials P. Gerontopoulos	489
Synroc - An Alternative for High Level Nuclear Waste Fixation K.D. Reeve	507
Solidification of High-Level Radioactive Waste C.G. Sombret and A.F. Jouan	527
