## Preface

|                                                                                                                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Scale-Dependent Crack Modeling for Investigation the Effect of Geometrically Necessary Dislocations in Micro/Nano Grain Size of Copper</b><br>A. Zaami and A. Shokuhfar                                                                              | 1   |
| <b>Effects of Mechanical Alloying on Solid Solubility</b><br>A. Patra, S.K. Karak and S. Pal                                                                                                                                                            | 17  |
| <b>Properties of Electroslag Steel 5XHM (5HNM) and 34 XH1M (34HN1M) Melted with "Solid" Start Using Exothermic Fluxes</b><br>A.F. Vlasov, N.A. Makarenko, A.M. Kushchiy, D.A. Volkov and D.M. Holub                                                     | 25  |
| <b>Effect of Relative Density and Strain Rate on the Deformation Behaviour Ni-Ti Foam Made through Powder Metallurgy Route Using <math>\text{NH}_4(\text{HCO}_3)</math> as Space Holder</b><br>D.P. Mondal, A.K. Barnwal, R. Dasgupta and A.N.C. Venkat | 35  |
| <b>Study of Mechanical Properties of Electroless Nickel-Phosphorus Coatings with Influence of Surfactant on AZ91 Magnesium Alloy</b><br>M. Imran Ansari and D.S.G. Thakur                                                                               | 56  |
| <b>Numerical Modelling and Simulation of the Hot Rolling Mill Process</b><br>F. Cianetti, C. Braccresi and M.C. Valigi                                                                                                                                  | 64  |
| <b>Numerical Simulation of Roller Hemming Operation on Convex Edge-Convex Surface Parts</b><br>S. Gürgen                                                                                                                                                | 75  |
| <b>Effect of Tomato Juice on Electrochemical Properties of Brass, Galvanized and Stainless Steel</b><br>O. Adetunji, A.A. Afolayan, N.O. Adekunle, O.J. Adeosun and K.I. Okediran                                                                       | 85  |
| <b>Design Improvement and Structural Analysis of a Carbon Fiber Reinforced Polymer Star Sensor "Baffle".</b><br>M. Vinyas, G. Srinivasa Rao, C.S. Venkatesha and M. Vishwas                                                                             | 92  |
| <b>Computed Torque Control of a Caterpillar Robot Manipulator Using Neural Network</b><br>M. Rahmani and A. Ghanbari                                                                                                                                    | 106 |
| <b>Time-Dependent Reliability Prediction of Bridge Member Based on MGPF and SHM Data</b><br>X.P. Fan and Y.F. Liu                                                                                                                                       | 119 |
