

Table of Contents

Criteria for Fatigue Failure of Materials: Application in Fatigue Assessment of Structures S. Petinov and R. Guchinsky	1
Classification and Characteristics of Predominant Refractories Used in Metallurgy B. Ertuğ	9
Microstructural Evolution of Metal Matrix Composites Formed by Laser Deposition of Ti-6Al-4V Wire and WC-W₂C Powder P.K. Farayibi	22
Permanganate - Based Hybrid Nano-Conversion Coating on Aluminium M. Oki and A.A. Adediran	33
A New XRD Method to Quantitatively Distinguish Non-Stoichiometric Magnetite: Influence of Particle Size and Processing Conditions A.H. Mohd Yusoff, M.N. Ahmad Salimi and M.F. Jamlos	41
Effect of Carbon Nanotubes on Properties of Ceramics Based Composite Coatings K. Goyal, H. Singh and R. Bhatia	53
Parameters Dependence of Fibers Diameter and Pores Area in Electrospinning E. Zdraveva and B. Mijovic	67
Polarization Resistance Parameters of Anti-Corrosion Inhibitor of Cucurbit[N]Urils and Thioglycolurils in Aggressive Mediums E. Berdimurodov, A. Kholikov, K. Akbarov and D. Nuriddinova	74
Behavior of Exit Keyhole Diameter during Switch off Period in Plasma Keyhole Arc Welding A. Nguyen Van, T. Shinichi, H.M. Ngo, A. Murata, T. Murata and M. Tanaka	87
