## Preface and Organizing Committees

## Chapter 1: Composites

|                                                                                                                                                                                                                                                                                       |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Mechanical Behaviors of Sic Particle Reinforced Al Matrix Composites: A Study Based on Finite Element Method</b><br>C. Sun, R. Shen, M. Song and Y. Du                                                                                                                             | 3  |
| <b>Preparation and Properties of Cf-TiB<sub>2</sub>-Cu-Graphite Composites</b><br>S.F. Xu, S.P. Xu, C.N. Zhu and C.Y. Yuan                                                                                                                                                            | 8  |
| <b>Microstructure and Mechanical Properties of <i>In Situ</i> TiB<sub>2</sub>/6061 Composites</b><br>L.H. Zhong, Y.T. Zhao, S.L. Zhang and R. Wen                                                                                                                                     | 14 |
| <b>Effect of High-Energy Ball Milling to Powders on Microstructure and Physical Properties of Al-50Si Alloy</b><br>L.J. Zhang, J.P. Xie and A.Q. Wang                                                                                                                                 | 18 |
| <b>The Influence of Nonlinear Matrix on Mechanical Behavior of Polymer Particulate Composite</b><br>Z. Majer                                                                                                                                                                          | 23 |
| <b>Study on Biomimetic Composites by Imitating Shell Structure</b><br>X.F. Ding, A.G. Lin, Z.D. Xie, Y.M. Diao and C.X. Mu                                                                                                                                                            | 27 |
| <b>Preparation and Electrochemical Properties of Amorphous Tin-Copper Composite Oxide CuSnO<sub>3</sub></b><br>T. Liu, R.B. Du and X.J. Kong                                                                                                                                          | 31 |
| <b>First Principles Study on the Electronic Properties of Cr, Fe, Mn and Ni Doped <math>\beta</math>-Ga<sub>2</sub>O<sub>3</sub></b><br>H. He, W. Li, H.Z. Xing and E.J. Liang                                                                                                        | 36 |
| <b>Rapid <i>In Situ</i> Reactive Sintering and Properties of ZrO<sub>2</sub>-ZrW<sub>2</sub>O<sub>8</sub> Composites</b><br>X.Y. Guo, C.Z. Fan, X.S. Liu, W.B. Song, C.X. Cheng, E.J. Liang, M.J. Chao and B. Yuan                                                                    | 42 |
| <b>Influence of LiCl Flux on the Process of <i>In Situ</i> Fabrication Aluminum Matrix Composites</b><br>G.R. Li, X.T. Yuan, H.M. Wang, X.Y. Zhang, Y.T. Zhao, J.J. Wang, K.X. Gu, H. Zhang and X.J. Xu                                                                               | 47 |
| <b>Effects of Different Factors on Antibacterial Properties of Crosslinked Chitosan-Coated Ag-Loading Nano-SiO<sub>2</sub> Composites</b><br>L. Zhang, M. Niu, J.M. Dai, L.Q. Wei, X.G. Liu and B.S. Xu                                                                               | 51 |
| <b>Piezoelectric, Dielectric and Pyroelectric Property in Morphotropic Phase Boundary MnO<sub>2</sub> Doped Bi<sub>0.5</sub>(Na<sub>0.82</sub>K<sub>0.18</sub>)<sub>0.5</sub>TiO<sub>3</sub>/P(VDF-TrFE) 0-3 Composites</b><br>M.Y. Fan, Y.Y. Zhang, Q.F. Zhang, G.Z. Zhang and L. Lu | 55 |
| <b>Field Emission of Gallium-Doped Carbon Nanotubes</b><br>H. He, C. Yuan, E.J. Liang and S.F. Li                                                                                                                                                                                     | 61 |
| <b>Study on the Polyethyleneglycol-Based Silicon Wafer Wire Cutting Fluid for its Stability Improvement</b><br>Y.S. Zhou, P. Wang and H. Gu                                                                                                                                           | 67 |
| <b>Experiment Study on Effects of Critical Factors on Quality of Prototypes in Fused Deposition Modeling</b><br>A.H. Peng                                                                                                                                                             | 73 |
| <b>Research on the Structure and Friction Properties of the SiC Particles Reinforced Copper-Based Self-Lubricating Composites</b><br>S.Y. Chen, H. Fan, D. An, J. Liang and C.S. Liu                                                                                                  | 77 |
| <b>Abrasive Wear Characteristics of <i>In Situ</i> TiC-Reinforced Iron Matrix Surface Gradient Composites</b><br>L.L. Wang, Y.H. Xu and L.S. Zhong                                                                                                                                    | 81 |
| <b>Ultrafine W-Cu Composite Powder Research Progress</b><br>J.X. Gao, Y.G. Li, Y. Tian and Y. Jiao                                                                                                                                                                                    | 86 |
| <b>Reservoir Fracture Characteristics and its Influence on Oilfield Development in Chang 4+5 Formation in Southern Puziwan Area</b><br>K. Zhang, J.W. Chen, Y.F. Zhou, P.G. Han and Q. Huang                                                                                          | 90 |

|                                                                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Non-Isothermal Crystallization Kinetics of Dispersible Nano-SiO<sub>2</sub>/PA66 Composites</b><br>L. Jia, L.P. Guo and X.M. Xu                                           | 94  |
| <b>Mechanical and Thermal Properties of Reactable Nano-SiO<sub>2</sub>/polyoxymethylene Composites</b><br>X.M. Xu, L.P. Guo, Y.D. Zhang and Z.J. Zhang                           | 103 |
| <b>Effects of Particle Volume Fraction on Dynamic Deformation Behaviors of B<sub>4</sub>C Reinforced Aluminum Matrix Composites</b><br>X.F. Li, B. Liu, W.M. Huang and H.W. Wang | 110 |
| <b>Synthesis of Magnetic Fe<sub>3</sub>O<sub>4</sub>@TiO<sub>2</sub> Nanocomposite and its Photocatalytic Property</b><br>D.Z. Wang, L.N. An, X.B. Zhang, X.Y. Li and J. Shi     | 117 |
| <b>Ballistic Impact Testing and Analysis of Triaxial Braided Composite Fan Case Material</b><br>L.L. Liu, H.J. Xuan, G.T. Chen, D. Ye, W.R. Hong, J. Xing and J. Wang            | 121 |
| <b>Fabrication of Si<sub>3</sub>N<sub>4</sub> Reinforced 316L Stainless Steel Composites by Powder Injection Moulding</b><br>D.D. Guan, X.B. He and X.H. Qu                      | 133 |
| <b>Density, Microstructure and Mechanical Property of Large-Scale C/C Composites Prepared by Thermal Gradient CVI</b><br>W.F. Cao, H. Li, L.J. Guo, K. Li and H.L. Deng          | 139 |
| <b>The Tribological Properties of Several PTFE Based Self-Lubricating Composites in Vacuum</b><br>J. Zheng, H. Zhou, Z.H. Wan and R.P. Sang                                      | 144 |
| <b>Preparation of Polyaniline/SiO<sub>2</sub> Composites by Modified Silica Using Succinic Acid</b><br>E.Y. Li, X.F. Wang, X.Z. Wang and H. Wang                                 | 149 |
| <b>The Effects of Oil Palm Fruit Bunch (OPFB) Fiber and Coupling Agent Loadings on the Performance of Hybrid Composites</b><br>A. Kalam, M.N. Berhan and I. Hanafi               | 154 |
| <b>The Preparation and Properties of MgO-CaO-ZrO<sub>2</sub> System Composite Materials</b><br>R.L. Wang, Y.P. Wang, Y. Cui and L.X. Yu                                          | 161 |
| <b>Preparation and Properties of Ce-Zr-Mn Composite Oxide Oxygen-Storage Materials</b><br>Y.Q. Zhou, D.W. Yin, X.Y. Yang and J.H. Ma                                             | 165 |
| <b>Influence of Sintering Temperature and Atmosphere on Phase Makeup of SiAlON-Graphite Composites</b><br>W.W. Wang, H.Y. Cao, J.X. Wang and Z.P. Zhang                          | 169 |
| <b>The Energy Absorption of Carbon Fiber Reinforced Polymer under Different Impact Speed</b><br>G.Z. Quan, Y. Tong and G.S. Li                                                   | 174 |
| <b>Synthesis of Carbon Nanofiber-Titania-Cordierite Monolith Composite and its Application as Catalyst Support on Citral Hydrogenation</b><br>J. Zhu, M.S. Li and M.H. Lu        | 178 |
| <b>Securing Superior Properties of Composite (PP+WF) through Central Composite Design</b><br>A.N.M. Karim, N.A.B. Khalid, R.N.H.R. Ismail, M. Haque and S. Begum                 | 186 |
| <b>Preparation and Research on Performance of Fluorine Rubber/Metal Composite Sealing Boards</b><br>A.L. Zhang, Y.F. Feng, S.X. Li, S. Wang and Z.Q. Lv                          | 190 |
| <b>Collision Ansysis of Sandwiched Polyurethane Composite Steel Tube</b><br>L. Wang and X. Zhang                                                                                 | 194 |
| <b>Microwave Absorbing Properties of MnO<sub>2</sub>/Ni-Zn Ferrite/Graphite Structural Composite</b><br>J.L. Deng and K. Huang                                                   | 201 |
| <b>Microstructure and Corrosion Resistance of <i>In Situ</i> Al<sub>0.983</sub>Cr<sub>0.017</sub>/Al Composites</b><br>J. Zhang, Q.L. Wang, B. Wan and L.Z. Zhao                 | 206 |
| <b>Damping Properties of Cups-Stacked Carbon Nanotubes (CSCNTs)/RTM6 Composites</b><br>Y. Liu, R.F. Li, H.X. Peng, A. Limmack and Z.W. Han                                       | 210 |
| <b>Theoretical Study of the Electronic Structures of Li-Doped ZnO</b><br>Q.X. Wan, J.Y. Chen, Z.H. Xiong, D.M. Li, B.L. Shao and G.D. Liu                                        | 214 |
| <b>Preparation and Photocatalytic Activity of TiO<sub>2</sub>/FeOOH Nanocomposite</b><br>D. Chen, S.J. Hu and G.H. Li                                                            | 219 |
| <b>Tensile Properties on Single-Bar Modified Tricot Fabric Reinforced Composites</b><br>X.H. Ma and Z.G. Qin                                                                     | 223 |
| <b>Study on Microstructure Characterization of SiCp/Al Composites</b><br>D.S. Li, X.L. Zhou, A.H. Zhou, X.Z. Hua and Y.W. Yu                                                     | 227 |

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Effect of Heat Treatment on the Microstructure and Mechanical Properties of Multilayered Composites Welded by Explosion</b> |     |
| E.A. Prikhodko, I.A. Bataev, A.A. Bataev, V.S. Lozhkin, V.I. Mali and M.A. Esikov                                                  | 231 |
| <b>Studies on the Thermal Conductivity of Al<sub>2</sub>O<sub>3</sub>/Epoxy Resin Composite Materials</b>                          |     |
| X.H. Wan, L.G. Wang, B. Zuo, E.Z. Wang and G.Z. Zhu                                                                                | 235 |
| <b>Production of Thermal Insulation Composite Material Based on Polymers</b>                                                       |     |
| A. Kalužová, J. Pěňčík, L. Matějka, L. Matějka, T. Pospíšil and D. Dostálová                                                       | 239 |
| <b>Isothermal Crystallization Kinetics of Poly(phenylene Sulfide)/ZnO Composites</b>                                               |     |
| Z.H. Zhang, W.X. Zhou, Y.D. Li and C.M. Yan                                                                                        | 243 |
| <b>Investigation on Rapid Prediction of Elastic Properties for Woven Fabric Composites</b>                                         |     |
| W.Y. Wu, Q. Liu, Y.Z. Lin and Z.J. Zong                                                                                            | 247 |

## Chapter 2: Micro/Nano Materials

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Preparation and Characterization of Regenerated Nanocomposite Made from Bacterial Cellulose/PMMA</b>                                               |     |
| C.C. Chen, D.G. Li, Q.Y. Deng, Y.M. Wang and D.L. Lin                                                                                                 | 255 |
| <b>Effect of the Addition of Nano-β-TCP on the Microstructure of Mg-Zn-Zr Alloy</b>                                                                   |     |
| C. You, Y.Z. Bi, M.F. Chen, Y. Sun and D.B. Liu                                                                                                       | 259 |
| <b>Synthesis, Characterization and Photocatalytic Properties of CdS Nanorods</b>                                                                      |     |
| L.J. Xie, L.M. Duan, L. Xu, Y. Wang, X.L. Wang and Z.R. Liu                                                                                           | 264 |
| <b>Study of the Nano Material Using Diisopropylamine as Replacing Solvent</b>                                                                         |     |
