

Table of Contents

Preface, Committees, Sponsors

Chapter 1: Integrated Product Development

Case Study Regarding Functional Design Based on Knowledge Databases Achievements M.R. Dijmărescu	3
Recognition of Machining Features Based on Identification of Inner/Outer Loops on Basic Face G.E. Armasoiu	9
Contribution of Wall Thickness and Corner Design for a Robust Design of Thermoplastic Products . Cotescu	15
Study Regarding the Influence of the Fuel Tank Constructive Characteristics on Slosh-Noise Effect O.M. Manta Balas, R. Balas and C.V. Doicin	22
The Use of 3D Scanning and 5-Axis Machining in Design and Fabrication of Dental Bridge J. Milde and L. Morovič	28
Eco-Audit and Environmental Impacts of Products C. Gheorghia and V. Gheorghia	34

Chapter 2: Technical and Technological Support of Flexible and Intelligent Manufacturing Systems

Numerical Simulation of Friction Stir Spot Welding M.A. Constantin, A. Boşneag, M. Iordache, C. Bădulescu and E. Niţu	43
Small Scale AS/RS System for Educational Purposes - Part 1 - The Virtual Prototype and the Small Scale Physical System C.A. Popescu, A. Nicolescu, G.C. Avram and A.M. Ivan	49
Small Scale AS/RS System for Educational Purposes - Part 2 - The Driving and Control System and the Programming Software C.A. Popescu, A. Nicolescu, G.C. Avram and A.T. Mantea	55
Improvement of Manufacturing Process by Reducing of the Failures Ratio through Genetic Algorithm N. Belu, L.M. Ionescu, D.C. Anghel and N. Rachieru	61
Finite Element Analysis of Stress Intensity Factors in the Cracking of Brittle Materials under Biaxial Loading H. Ayas, H. Hamli Benzahar and M. Chabaat	67
Improving Technological Process Performance by Using FMEA: A Study Case F. Fechete and A. Nedelcu	73
Verification CAE System for Plastic Injection L. Satin and J. Bílik	79
Aligning Tools on a Press by Means of 3D Scanning M.V. Drăgoi, A. Manolescu and M.A. Vasiloni	84
Influence of CAM Strategies on the Wear of Cutting Tools R. Zaujec and P. Pokorný	90
Some Aspects about the Significant Parameters of the Thread Whirling Process V. Merticaru, M.A. Mihalache, G. Nagit, O. Dodun and L. Slătineanu	96
Bore's Surface Condition on Single Multifunctional Insert Tools Turning I. Ciocan, M. Grigorescu and D. Iliescu	102
Simulation of the Machining Process for a Spur Gear Pump Body - A Practical Study I.G. Ghionea, A.L. Ghionea and S. Čuković	108

Research Regarding Backlash Improvement for Planetary Speed Reducers Used in the Actuation of Industrial Robots P.A. Butunoi, G. Stan, C. Ciofu and A.L. Ungureanu	114
A Comparative Approach Regarding the Dynamic Behaviour of Planetary Transmissions Used in Industrial Robots P.A. Butunoi, G. Stan, C. Ciofu and A.L. Ungureanu	120
On Overlapping the Pulses on Cumulative Microjets Stage at Ultrasonically Aided Electrical Discharge Machining D. Ghiculescu, N. Marinescu and O. Alupei	126
Study on Waterjet Machining of Soft Material Components T. Deaconescu and A. Deaconescu	132

Chapter 3: Technological Measurements

The Ultrasonic Testing Methods for Special Braze Cladding C.S. Petriceanu, C. Rontescu and G. Gârleanu	141
Ultrasound Methods for Evaluation the Quality of Welded Plastics C.S. Petriceanu, C. Rontescu, D. Nitoi and O. Teodorescu	147
Comparative Analysis of Short and Longweld Hardness N. Grigore	153

Chapter 4: Materials in Modern Production

Some Aspects Concerning the Mechanical Characterization versus Manufacturing Technology of Sandwich Composite Materials N. Constantin, M. Sandu, A. Sandu, P. Spânu, D. Roşu, C.V. Epuran and B. Pătrău	161
Links between Low Velocity Impact Results and the Residual Mechanical Performance of Sandwich Composite Materials N. Constantin, M. Sandu, M. Găvan, P. Spânu, D. Roşu, C.V. Epuran, B. Pătrău and C. Enescu	167
Experimental and Numerical Investigation on the Torsional Behaviour of Filament Winding-Manufactured Composite Tubes G. Mansour, K. Tzikas, D. Tzetzis, A. Korlos, D. Sagris and K. David	173

Chapter 5: Management, Production Planning and Quality

Study on Data Communication Management Methods for Distributed Intelligent Equipments in Manufacturing Systems T. Savu and B. Abaza	181
The Ant Lion Optimization Algorithm for Integrated Process Planning and Scheduling M. Petrović, J. Petronijević, M. Mitić, N. Vuković, Z. Miljković and B. Babić	187
Integrated Process Planning and Scheduling Using Multi-Agent Methodology J. Petronijević, M. Petrović, N. Vuković, M. Mitić, B. Babić and Z. Miljković	193
Usage of Network-Centric Approach to Distributed Management of Complex Systems I.S. Korovin, A. Kalyaev and M. Khisamutdinov	199
Lean Solutions in Batch Manufacturing Process with Applicability in Bumpers Production E.L. Terzea, A.C. Barascu and I.R. Soare	205
Improving the Organizational Performance in Automotive Manufacturing by Using Fast Response on Layers at Quality Issues I.C. Braga, A. Nedelcu and R. Udrioiu	211
Time, Cost and Quality Management Trilogy and its Impact on Lebanese Construction Projects Success A. AZAR, C. Militaru and C.P. Mattar	217

Chapter 6: Current Tendencies in Engineering Education

Study Regarding the Quality Improvement of the Higher Education System through Customized Career Counselling and Orientation Services	
C.V. Doicin, S. Chircu, B.G. Cote, M.E. Ulmeanu and M.S. Sălván	225
Research on the Influence of Internal and External Conditionings on Students' Perception about Future Career	
C.V. Doicin, M.S. Sălván, M.E. Ulmeanu, S. Chircu and B.G. Cote	231
The Teaching Degree – A Premise in Objective Satisfaction Evaluation in Technical Higher Education	
A.M. Bogatu, G. Solomon and D. Titi-Cicic	237
