

Table of Contents

Chapter 1: Materials and Technologies of Materials Processing in Mechanical Engineering

Online Prediction and Verification of Cured Quality of Advanced Composites in Autoclave Process Y.A. Zhang and L.H. Zhan	3
Steel Tube Bending with a Filling Medium of Fiber-Reinforced Ice (FRI) T. Ohashi	11
Influence of the Brittle Behavior of Work Materials on Microgrooving S. Sakamoto, M. Gemma, K. Hayashi, Y. Kondo, K. Yamaguchi, M. Yamaguchi and T. Fujita	17
Design of Complex Component for Determination of a CNC Milling Machines Accuracy J. Moravčíková and P. Pokorný	22
Comparative Research on the Quality of Micro Hole in Superalloy GH2135 and Stainless Steel 420J1 by Laser Processing L. Wang, N.F. Ren, Y.L. Wang and L.Z. Zhu	27
Machining and Characterization of Deep Micro Holes on Super Alloy Processed by Millisecond Pulsed Laser Y.L. Wang, L.Z. Zhu, C.Y. Chen, Z.C. Liu, W.X. Ren and L. Wang	34
Study on Roll Forming of Reel Mower Helical Blades C.M. Tan and G.Y. Lin	39
Wear Mechanisms of Ceramic Cutting Tool when Cutting Hardened Steel Rolls X.Y. Song and G.C. Du	44
Predicting Edge Cracks on Shear-Cut High-Strength Steels by Modified Uniaxial Tensile Tests M. Feistle, I. Pätzold, R. Golle and W. Volk	49
Analysis on Phases and Grain Evolution of TC4 Ti-Alloy in Hot Forming in Time and Space Based on Deform-3D G.H. Quan and X.Y. Zhao	56
Effects of Heat Treatment on Microstructure and Properties of Stainless Clad Plate H.R. Jin, X.K. Yang, Y.W. Cui and Y.L. Yi	61
The Influence of Graphite Heat Conductor Technology on the Preparation and Crystal Structure of Single Crystal Blade Y. Li, Y.T. Zhao, X.F. Liang and Z.H. Jia	65
Thermoelectric Properties of Silicon Germanium Alloy Nanocomposite Fabricated by Mechanical Alloying and Spark Plasma Sintering Z.Y. Zhu and S.L. Guo	70
Advance of Sintering Methods of High Purity Alumina Ceramics Q.B. Tian, J.S. Dai, L.N. Xu and X.H. Wang	76
Phase Field Simulation of the Lamellar Microstructure Formation in TiAl Alloys C.Y. Teng, Y. Fu, Z.Y. Ren, Y.H. Li, Y. Wang and W.L. Ouyang	81
Toughening Effects of Carbon Nanotubes on 3Y-ZrO₂ via Different Material Molding Technologies C.C. Wang, C.L. Chen, M.Y. Luo, X.Y. Huang and Z.L. Huang	87
Effect of Preheating Temperature on Microstructure of Fe Based Alloy Coating by Laser Direct Metal Deposition R.R. Shi, S.Y. Chen, Y.G. Peng and Z. Zhang	94
Microstructural Dependence of Magnetization and Magnetostriction in Fe-20at.%Ga Y.M. Shi	100
Fatigue and Cyclic Behavior of 304L Stainless Steel in the Presence of Boriding Surface Treatment O. Allaoui and L. Taleb	106
Microstructure and Tribological Properties of Microarc Oxidation Coatings on Al-Si Alloy C. Lu, F.Q. Xie and L.P. Zhu	112

Study on the Microstructure and Properties of Iron-Based Wear-Resistant Coating on the Inner Wall of an Aluminium Cylinder Block Z.R. Li, D.Y. Li, H. Huang and B. Wu	119
---	-----

Chapter 2: Mechanical Properties of Engineering Materials

Effect of Pre-Deformation on the Cyclic Behavior and Fatigue of 304L SS L. Taleb and C. Kpodekon	125
Investigations on Interface Reactions and Wettability between Melt Superalloys and Ceramic Materials X.Y. Chen, F. Li, J. Wang and B.D. Sun	132
Study of DP590 High-Strength Steel Sheet Cruciform Specimen for Biaxial Tensile Y. Lei, Z.H. Meng, S.Y. Huang, J.H. Hu, M.C. Zhou and G.X. Dong	138
Analyses about the Anisotropic Behavior of a 2017A Aluminum Alloy M. Brik, M. Chabane Chaouche and L. Taleb	144
Experimental Study of Failure Mode Transition in Semi-Crystalline Polymers Polypropylene under High Strain Rate Y.G. Liao, H. Zheng and Z.P. Tang	149
Study on Ductile Brittle Transition Temperature of Q345C Steel MAG Welded Joints Y.S. Wu and Y.J. Liu	155
Experimental Analyses about Ratcheting of Extruded 2017A Aluminum Alloy Subjected to Proportional and Non-Proportional Loadings M. Brik and L. Taleb	160
A Study of Mechanical, Oil Resistance, and Low Temperature Resistance of NBR Vulcanizates K.H. Seo, G.M. Nam, D.G. Kang, G.H. Kim, D.Y. Kim and D.W. Lee	165
Observation of Cracks of PEEK Polymer Thrust Bearings under Rolling Contact Fatigue in Water X.C. Shi, M. Orito, Y. Kashima, K. Mizobe and K. Kida	172
Crack Observation of PPS Polymer Thrust Bearings under RCF Test in Water X.C. Shi, M. Ando, Y. Kashima and K. Kida	178
Relationship between Failure and Temperature of PTFE Thrust Bearings under Dry Condition X.C. Shi, T. Kamiya, Y. Kashima and K. Kida	183
Backlash Evaluation of Hybrid UHMWPE-PEEK Bushes in a Small Robot Joint System K. Kida, K. Kawai, K. Mizobe, H. Koike and K. Kanemasu	187
Effect of New Pocket Design on the Failure of Thrust UHMWPE Bearings in Dry Condition K. Mizobe, N. Fujimura, Y. Kashima and K. Kida	192
Rolling Contact Fatigue Observation of Radial PPS Bearings under Dry Condition K. Mizobe, T. Matsumura, Y. Kashima and K. Kida	197
Experimental Study on Evolution Process of Short Fatigue Crack in 2A12 Alloy under Complex Stress State S.L. Liu, L. Wang and Z. Wang	202

Chapter 3: Materials and Technologies for Photovoltaic Engineering

Application of Small Size Solar Furnace onto Preparation of Copper Oxide Thin Films by Sol-Gel Route T. Ehara, T. Sasaki and H. Motomiya	209
Investigation of Structural, Optical and Electrical Characterization of AZO Films Used for Solar Cells C. Song, Z.X. Lin, Y. Zhang, X. Wang, Y.Q. Guo, J. Song and R. Huang	214
The Effect of Reaction Time on Optical Trapping Nanostructure Formation on the Multi-Crystalline Silicon by Metal-Assisted Chemical Etching Y.R. Xiang, C.L. Zhou and W.J. Wang	219
Effects of Strain on Optical Properties of BiFeO₃: A First-Principles Study Z.Y. Zhu, S.Q. Wang and Q. Wang	224

The Effect of Substrate Surface Condition on Atomic Layer Deposited Alumina Passivation Films	
Y.R. Xiang, C.L. Zhou and W.J. Wang	230

Chapter 4: Chemical Synthesis and Properties of Chemical Materials

Synthesis and Characterization of Poly(<i>o</i>-Methoxyaniline) Microsheets with pH-Sensitive Fluorescence Properties	
Y.F. Guo, D.H. Sun and Y. Wang	237
Morphology Control and Upconversion Enhancement in NaYF₄:Yb³⁺,Er³⁺ Crystals via Ca²⁺ Ions Doping	
M. Wang, J. Wu and Z.S. Chen	242
Surface Modification of Nano-Al₂O₃ with Stearic Acid	
M.H. Xu, J.L. Ma, M.X. Qian and L.H. Jiang	246
The Influence of Geology Factor on Alkaline Surfactant Polymer Flood Effect and the Corresponding Strategy	
P. Ye, D. Zhang, L.B. Zhong, G. Wang, B. Fu and H.G. Jin	251
Study on the Synthesis of Waterborne UV Curable Polyurethane Acrylate	
Z.W. Liu, J.Y. He, W.J. Kang, X.D. Luo, Y.M. Ding and P.C. Xie	256
Structure and Properties of Dyes in Coloration of Textiles: Application of Fragment Approach	
F.Y. Telegin, J.H. Ran, M. Morshed, M.N. Pervez, L. Sun, C. Zhang and V.G. Priazhnikova	261
One-Pot, Low-Temperature Preparation of Pyrochlore-Like Na₂Ta₂O₆ Nanocrystals by Solvothermal Synthesis	
Q.S. Jiang, J. Gao, H.F. Yuan, L.R. Ding and L. Yi	267
Synthesis and Property of Polyurethane Acrylates Modified Graphene Oxide	
H.B. Liu, W.Y. Zhang and F. Lin	273
Preparation and Characteristics of Highly Expandable Graphite Intercalation Compounds by Two-Step Chemical Intercalation	
X.X. Li, J.J. Zhao and D.Y. Ma	278
Research on the Preparation and Properties of UV-Curable Organic Silicon Nanomaterials	
X.D. Luo, X.T. He, P.C. Xie, J.Y. He, Y.M. Ding and B.Q. Xia	284
Characteristics and Biodegradation Properties of Poly(3-Hydroxybutyrate-co-3-Hydroxyvalerate)/Functionalized Graphene (PHBV/FGO) Blends	
Y.N. Hang, K.Y. Wang and B. Li	290

Chapter 5: Materials and Technologies for Environmental Engineering

Preparation of Gypsum Retarding Material and Activated Carbon from Waste Mycelium	
M.M. Chen, M.M. Zhang and F.Q. Zhao	297
Photocatalytic Oxidative Decolorization of Methyl Orange with Iron Phthalocyanine/Calcium Alginate Gel Beads	
M.H. Xu, J.L. Ma, M.X. Qian and H.N. Qin	301
Oxidative Decolorization of Azo Dyes with Copper Phthalocyanine Supported Mg-Al Hydrotalcites	
M.H. Xu, J.L. Ma, M.X. Qian and H.N. Qin	306
Simple Synthesis and Activities of Visible-Light Activities BiVO₄ Doped Al via Solid State Method	
H.F. Chen, J.M. Chen and H. Zhao	311
Facile Solid State Method Route Synthesis and Enhance Visible Light Activities of BiVO₄ by Doping Co	
H.F. Chen, J.L. Hu and B. Xu	316
Preparation and Photocatalytic Activity of Cu/BiVO₄ by Solid State Grinding Method for Degradation of Methyl Orange	
H.F. Chen, J.M. Chen and Z.X. Pan	321
Preparation and Activities of Visible-Light-Driven BiVO₄ by Doping Ag via Solid State Method	
P.C. Ruan, H.F. Chen, J.L. Hu and J.Q. Ye	326

Experimental Research on Adsorbents Preparation Made from Oily Sludge C. Tang and J.J. Guan	331
Compound Mutation Breeding of <i>Streptococcus equi</i> JC-63 for Producing High Molecular Weight Hyaluronic Acid and Optimization of Culture Conditions R.H. Zhang and J.C. Feng	337

Chapter 6: Materials and Technologies in Construction

Dynamic Behaviors of Mucky Clay Material under Cyclic Loads Z. Lu, Z. Hu, H. Wang and H.L. Yao	345
3D Eddy Current Testing by FEM for Detection of Crack's in Materials K. Chabane, S. Harzallah and M. Chabaat	349
Effect of Nano-CaCO₃/Limestone Powder Composite on the Early Age Cement Hydration Products H.S. Yang, Y.J. Che and M. Zhang	354
Study on the Effect of Condensate-Type and Copolymer-Type Combined Superplasticizers on Hydration of Cement Y.F. Pan, Y.Q. Jiang and S.J. Zhang	360
Influence of Structural Irregularities of Tserkov Building on its Dynamic Behavior under Induced Seismic Shock of Mining Origin J.M. Dulinska and K. Nowakowska	365
Flexural Analysis for Tapered Cross-Section Steel-Concrete Material Composite Beam J. Xia, Z.Q. Shen and K. Liu	371
Changes in Magnetic Flux Density Distributions of Chromium Molybdenum Steel (JIS, SCM440) by Slit Opening and Crack Growth K. Kida, T. Nakashima and M. Ishida	376
Test Study on the Compressive Strength Properties of Compacted Clayey Soil H.B. Liu, H.Z. Zhang and J. Wang	380
Thermal, Strength and Leachability Characteristics of Cellulose Fibre Reinforced Lime-Soil Brick W. Namboonruang and P. Yongam-Nuai	386
The Water Retention Characteristics of an Unsaturated Compacted Loess Material Z. Hu, Z. Lu and H.L. Yao	396
Impact Resistance of Graded Cellular Metals Using Cell-Based Finite Element Models J. Yang, S.L. Wang, Z.J. Zheng and J.L. Yu	400
Effect of Aluminum Insertion Material on the Properties of AAC Y.F. Pan, W.M. Huang, Y.Q. Jiang and Q. Song	406
Mechanical Properties the Cast <i>In Situ</i> Foamed Lightweight Soil C. Zhou	411
Study of Migration Regularity and Controlling Factors of Subgrade Moisture under Atmosphere Action J. Liu	416
