

Table of Contents

Preface, Committees

Chapter 1: Metal Physics, Mechanics and Technologies of Deformation Processes

Evaluation of Beverage Can End Forming Process Using Kolmogorov's Fracture Criterion V.G. Kolobov, E.V. Aryshenskii, Y.A. Erisov, A. Nam and M.S. Tepterev	3
Simulation of Extrusion of Tubes with Outer Heavy Ends A.E. Afanasyev, V.R. Kargin and B.V. Kargin	10
Study and Build-Up of Deformation Zone at Cutting of Thin-Walled Tube by Torsion S.G. Simagina	16
Study of Al-Cu-Mn and Al-Mg-Si Alloys Thin Sheets Weldability E.G. Demyanenko and I.P. Popov	22
New Technology of Combined Machining of Aluminium Alloys N. Dovzhenko, S. Sidelnikov, I. Dovzhenko and R. Galiev	29
Study of Isothermal Pneumatic Forming of High-Strength Materials Subject to Energy Theory of Short-Term Creep and Damage S.N. Larin, V.I. Platonov and E.V. Leonova	36
Development of a Mathematical Model of Plate Rolling on Hot Reversing Mills V.V. Yashin, E.V. Aryshenskii, E.D. Beglov, M.S. Tepterev and A.F. Grechnikova	48
The Research of Friction Influences on the Formation Process by Lateral Extrusion into Radial Wedge-Type Branches F.V. Grechnikov, A.I. Khaimovich, V. Mikhelkevich and C.P. Jiang	56
Features of the Process of Stretch Forming Shells Convex-Concave Shape V.A. Mikheev, S. Surudin, Y.A. Erisov and E.S. Khoruzhenko	63
Manufacturing of Axisymmetric Components out of Superalloys and Hard-to-Deform Steels by Roll Forming S. Mukhtarov, A. Ganeev, M. Nagimov, R. Shakhov, V. Valitov and F.Z. Utyashev	69
Procedure to Analyze the Formation of Segregations Using the PLS-SEM Approach C. Kawalla, M. Ullmann and M. Höck	75
V-Shape Part Bending Process Realized in Tool with Elastic Elements E. Nesterenko	84
Metal Formability Interactions in Laser Marking for Creating of Grid Patterns for Forming Strain Analysis of High Strength Steels S. Guk, M. Preiß and R. Kawalla	92
Influence Law of Initial Reverse Bulging on Sheet Hydroforming Process L.H. Lang and Q.D. Zhang	99
Effect of Annealing Treatment on Die Filling Rate of Mini Gear in Squeezing Forming Process T.H. Huang, C.P. Jiang, F.V. Grechnikov and Y.A. Erisov	108
Technological Parameters Forming the Surface Texture in Hyper Productive Surface Plastic Deformation Processing S.N. Grigoriev, N.M. Bobrovskij, I.N. Bobrovskij and C.P. Jiang	114
Research of Tool Durability in Surface Plastic Deformation by Wide Burnishing of Cast Iron without Metalworking Fluids S.N. Grigoriev, N.M. Bobrovskij, P.A. Melnikov, I.N. Bobrovskij and T. Zaborowski	120
Testing of External Cylindrical Surfaces of Car Parts after Wide Burnishing Processing S.N. Grigoriev, N.M. Bobrovskij, I.N. Bobrovskij, A.A. Lukyanov and A.R. Seitkulov	126
Temperature Validation of 3D Model for the Reversing Hot Rolling in Connection with a Coil Model A. Nam, R. Kawalla, A.V. Zinoviev, Y.A. Erisov, U. Prüfert and M. Eiermann	132

Chapter 2: Heat Treatment of Wrought Materials

Experimental Study of the Method for Resistance Heat Treatment of Tubes for Steam Generator	
G. Shimov, A.V. Serebryakov and A. Serebryakov	141
Properties of Powders from Stainless and Heat Resistant Alloys Produced by Gas Dynamic Spray for Manufacturing Parts of Complex Shape	
S. Oglezneva and A. Khanov	148
Influence of the Sheet Manufacturing Process on the Forming Limit Behaviour of Twin-Roll Cast, Rolled and Heat-Treated AZ31	
T. Henseler, M. Ullmann, R. Kawalla and F. Berge	154
Understanding of Processing, Microstructure and Property Correlations during Spheroidizing Heat Treatment of 100Cr6 Steel	
S. Guk, D. Hoppach and R. Kawalla	161
Thermal Treatment of Aviation Aluminum Alloys in Strip Processing Lines	
C. Sasse, F. Brühl and M. Schäfer	168
Effect of Hot Rolling and Thermal Treatment on the Microstructure Evolution of Microalloyed Bainitic Steels for Pipeline	
A. Kabanov, G. Korpala, R. Kawalla and S. Ionov	176
Influence of Heat-Treatment and Rolling Conditions on the Mechanical Warm Forming Properties of Twin-Roll Cast AZ31	
F. Berge, M. Moses, R. Kawalla and M. Ullmann	184
The Study of the Ageing Impact on Workability and Hardness of the Samples Made of Alloy VV751P (Ni-15Co-10Cr) after Selective Laser Sintering	
A.V. Balyakin, E. Nosova and N. Galkina	192

Chapter 3: Nanostructuring and Severe Plastic Deformation of Materials

Development of Technology of Nicrosil and Nisil Thermocouple Materials Using Extrusion of Metal Powders	
A.R. Samboruk, A.P. Amosov, E.A. Kuznets, A.A. Kuzina and Y.M. Markov	201
Self-Propagating High-Temperature Synthesis of Boron-Containing MAX-Phase	
A.P. Amosov, E.I. Latukhin, P.A. Petrov, E.A. Amosov, V.A. Novikov and A.Y. Illarionov	207
Metal Forming Aspects of Cyclic Severe Plastic Deformation of Ti-Ni Shape Memory Alloys Using MaxStrain Device	
V. Komarov, I. Khmelevskaya, G. Korpala, R. Kawalla and S. Prokoshkin	214
Synthesis of Cast Composite Materials by SHS Metallurgy Methods	
V.I. Yukhvid, D. Andreev, V.N. Sanin, V.A. Gorshkov and M.I. Alymov	219

Chapter 4: High-Energy Processes of Metals Forming

Combined Magnetic Pulsed Compaction of Powder Materials	
I.A. Belyaeva and V. Mironov	235
Investigation of Interface Morphology and Properties of Aluminum and Copper Samples Obtained by Ultrasound-Assisted Explosive Welding	
E.V. Kuz'min, A.P. Peev, S.V. Kuz'min and V.I. Lysak	240
Technological Schemes of Hybrid and Combined Technologies Using Static and Dynamic Loads	
V. Glushchenkov and I.A. Belyaeva	246
Changing of Mechanical and Technological Properties of Cast Metal as a Result of Pulse-Magnetic Processing of Melts	
D. Chernikov and V. Glushchenkov	255
Ti-Al-Nb Material for High-Temperature Applications: Combustion Synthesis from Oxide Raw Materials	
D. Andreev, V.I. Yukhvid, D.M. Ikornikov and V.N. Sanin	262

Chapter 5: Composite Materials Technologies

Computer-Aided Engineering of the Process of Injection Molding Articles Made of Composite Materials

I. Khaimovich and A.I. Khaimovich 269

Energy Absorption Behavior of Metal/Polymer/Metal Sandwich Crash Structures

V. Harms, M. Harhash, A. Carrado and H. Palkowski 275

Chapter 6: Issues of Aerospace Materials and Composite Industry

Results of the Sheet Parts Curved Edges Constrained Bending with Elastomer

V.K. Moiseyev, A.A. Sharov, E.G. Gromova and M.N. Mantusov 285

Investigation of Conditions of Processing Influence on Micro-Hardness Distribution in Surface Layer during Diamond Burnishing of Samples of FeC0.15Cr12Ni2 Steel

A.N. Shvetcov and D.L. Skuratov 290

Correlation Image Analysis of Surface Roughness

S.R. Abul'hanov, D.L. Skuratov and A.I. Khaimovich 296

Development Prospects of Production of Composite Materials in Russian Federation

D.U. Ivanov, G. Grishanov and V. Zaskanov 305
