Preface

Chapter 1: Metal Physics and Mechanics of Deformation Processes

Computer Analysis of Sinking Pass through one and Two Dies B.V. Kargin	3
Determination of One-Channel Press Dies Operating Corbels V.R. Kargin and B.V. Kargin	7
Testing Criterion Models of Destruction of Materials with Different Rheological Properties under Edge Cutting Machining V.P. Alekseev and A.I. Khaimovich	13
The Results Comparasion of Calculation Method and Computer Modeling of Double Curvature Sheet Shells in Stretch Forming Process V.A. Mikheev and S. Surudin	21
Influence of Temperature, Strain Rate, and Sheet Thickness on the Deformation Behaviour of Twin-Roll Cast, Rolled and Heat-Treated AZ31 under Uniaxial Loading F. Berge, M. Wollschläger, C. Krbetschek and M. Ullmann	29
Modeling the Hot Deformation Behavior of 1565ch Aluminum Alloy S.V. Rushchits, E.V. Aryshenskii, S.M. Sosedkov and A.M. Akhmed'yanov	35
Property Oriented Wire Rolling Technology for Mg-Al Alloys J. Dembińska, M. Graf, M. Ullmann, K. Neh, B. Awiszus and R. Kawalla	42
The Parameters of the Stress State in the Operations of Plastic Deformation E.N. Sosenushkin, V.A. Kadymov, E.A. Yanovskaya, A.A. Tatarencev and A.E. Sosenushkin	57
Influence of Temperature and Loading Rate on the Forming Limit Behaviour of Twin-Roll Cast, Rolled and Heat-Treated AZ31 as a Function of the Stress State F. Berge, T. Henseler, C. Krbetschek, M. Ullmann and R. Kawalla	67
The Study of Plastic Deformation at High Strain Rates in Upset Forging of Cylinders F.V. Grechnikov and A.I. Khaimovich	74
Evaluation of Formability of Thin Sheet Metal from Mechanical Properties S. Guk	80
Influence of Deformation Conditions on the Microstructure and Formability of Sintered Mg-PSZ Reinforced TRIP-Matrix-Composites S. Guk, D. Milisova and K. Pranke	86
Material Flow in Mg-PSZ Particle Reinforced TRIP-Matrix-Composites due to Hot-Rolling K. Pranke and S. Guk	97
Bainitic Steels, their Characteristics and Applications M. Shimanov, G. Korpala, A. Terzic and R. Kawalla	104
Upgraded Railway Front Searchlight Design Plastic Deformations by its Vibrations with Resonance Frequencies S.R. Abulkhanov and D.S. Goryainov	111
Residual Stresses Control for Large Scale Open Die Forged Parts M. Hardin and S. Burtsev	120
Mathematical Model of Anisotropic Elastoplastic Material Y.A. Erisov	127
Virtual Material Model with the Given Crystallographic Orientation of the Structure F.V. Grechnikov and Y.A. Erisov	134
Isothermal Backward Extrusion of Thick-Walled Anisotropic Pipe Blanks in Mode of Short-Time Creeping S.S. Yakovlev, A.A. Perepelkin and A.A. Pasyukov	143
Combined Isothermal Drawing of Axissymmetrical Parts Made out of Anisotropic Materials in Mode of Short-Time Creeping S.S. Yakovlev, O.V. Pilipenko and A.A. Pasyukov	152

Technological Modes of Stretching Operation Involving Wall Thinning of Axisymmetric Blanks Made out of Anisotropic Materials S.S. Yakovlev, M.V. Gryazev and V.Y. Travin	165
--	-----

Chapter 2: Advanced and High-Energy Processes in Metal Pressure Working

Development of the Combined Technology of Manufacturing of the Facilitated Constructions of Seal of an Electrode S.V. Nescoromniy, E.L. Strizhakov, S.O. Ageev and D. Rogozin	177
Development of Methods and Research on High Voltage Capacitor Welding S.V. Nescoromniy, S.O. Ageev and E.L. Strizhakov	185
Formation of Hard Alloys of Chromium Carbide and Titanium Powder Mixtures by Explosive Pressing V.O. Kharlamov, A.V. Krokhalev, S.V. Kuz'min and V.I. Lysak	193
The Wear-Resistance and Antifrictional Properties of Hard Alloys of Chromium Carbide with Titanium Produced by the Explosive Compaction of Powders A.V. Krokhalev, V.O. Kharlamov, M.A. Tupitsin, S.V. Kuz'min and V.I. Lysak	198
Pressing Tubes with Conical-Stepped Needles Computer Simulating F.V. Grechnikov, A.E. Afanasyev, V.R. Kargin and B.V. Kargin	204
Characteristics of Large Bars Extruding Using Small Extrusion Ratio V.R. Kargin and A.Y. Deryabin	211
Development and Enhancement of Thin-Walled Tube Separation Methods S.G. Simagina	218
Determination of Rheological Properties of Titanium Alloys under Conditions of High Strain Rates A.V. Balyakin, A.I. Kondratyev and N. Galkina	222
Computer Simulation of the Half-Tore Forming Process from a Ring Blank I. Suleymanova, A. Shlyapugin and Y.A. Erisov	227
Stamping of Hemispheric Surface Parts in Die Tool Equipped with Steel Elastic Element E. Nesterenko	234
The Forming Process of the Sharply Curved Offsets by the Pushing Method V.D. Maslov, I.P. Popov and V.D. Misyura	242
Directional Thickness Alteration of a Thin-Walled Ring Blank Using Flanging and Forming for the Purpose of Receiving Conical Part E.G. Demyanenko and I.P. Popov	253
Forming of Small-Diameter Tubes via Pulse-Magnetic Technology D. Chernikov	263
Application of Structural Inheritance Phenomenon at Producing the Al-Mg System Alloys K.V. Nikitin, V.I. Nikitin and D. Chernikov	269
Research of the Parts Pressing Process Using the Elastic Media Pressure E.G. Gromova and E.V. Eskina	273

Chapter 3: Advanced Materials and Nanotechnologies

Nanostructured Aluminum Matrix Composites of Al-10%TiC Obtained <i>In Situ</i> by the SHS Method in the Melt A.P. Amosov, A.R. Luts and A.A. Ermoshkin	281
A Review on <i>In Situ</i> Synthesis of Al/TiC and Al/SiC-Composites H. Nath	287
Stress-Corrosion Defects Fatigue Development in Compressor Station Output Gas Pipeline I.V. Scherbo, S.A. Kholodkov, A.V. Afanasyev and M.I. Vaskov	293
Fabrication of Al-AlN Nanocomposites A.P. Amosov, Y.V. Titova, I.Y. Timoshkin and A.A. Kuzina	302
Obtaining Nanopowder Pseudo-Ligatures Al-(SiC+Si₃N₄) for Modification of Aluminum Alloys A.A. Kuzina and A.V. Kuts	310

Recovery Technology Features of Aerospace Parts by Layering Synthesis V.G. Smelov, A.V. Sotov and A.V. Agapovichev	316
Metal-Polymer-Metal Laminates for Lightweight Application H. Palkowski and A. Carradó	323
Study of Stress Relaxation for 5056 Alloy in Vacuum Conditions V.D. Yushin, V.I. Tregub and S.V. Voronin	335
Research of the Microstructure and Mechanical Properties of Copper and CuZn36 Developing during Deformation into the Equal Channel Speed Matrix with High-Intensity Cooling I.E. Volokitina, S.N. Lezhnev, E.P. Orlova and G.G. Kurapov	346
SHS Metallurgy of NiAl-Based Alloy V.I. Yuxhvid, M.I. Alymov, V.N. Sanin and D. Andreev	353
A New Method of Metallic Alloys Producing with Interphases, which are Formed Coherent Coupling of Compounds' Atoms V.A. Mikheev and G.P. Doroshko	359
Effect of Strain on the Anisotropy Coefficient of Sheet Alloys AA2024, Ti-2Al-1Mn, Titanium Grade 2, STEEL X10CrNiTi18-9 E. Nosova and F.V. Grechnikov	366
Fabrication of Aluminum-Ceramic Composites with TiC-Ni Skeleton by SHS Pressing Method A.F. Fedotov, E.I. Latukhin and V.A. Novikov	371
Study of Possibility of Obtaining Nanopowder Composition of "Aluminum Nitride – Boron Nitride" by Azide SHS Technology L. Shiganova, G. Bichurov, I. Kerson, V.A. Novikov and A.P. Amosov	379
Characterization Analytic Method Specifying the Steel X10CRNITI18-10 Cylinder Surface Layer Quality Hardened by a Traveling Sphere S.R. Abulkhanov, D.L. Skuratov and A.N. Shvetcov	387
Influence of 3104 Alloy Microstructure on Sheet Performance in Ironing Aluminum Beverage Cans A.V. Andrianov, E.G. Kandalova, E.V. Aryshenskii and A.F. Grechnikova	398

Chapter 4: Tools and Machine Parts, Assurance of Materials Quality, Organization of Production

Manufacturing Process Optimization at Enterprises E.A. Matveeva and S.G. Simagina	409
Constructional Materials Quality Management According to the Scanning Thermal Analyzer V.A. Mikheev, G.P. Doroshko and V.N. Ilyukhin	414
Efficiency Improvement of Metal Lathing by Using of an Evaluation Technique of Assembly Machine Tools Quality D.S. Vasilega and M.S. Ostapenko	421
An Industrial and Sociological Research of Consumers Requirements to a Lathing Tool M.S. Ostapenko and D.S. Vasilega	429
Enhancement of a Methodology of Assembly Lathing Tools Quality Evaluation M.S. Ostapenko and A.M. Tveryakov	435
Peculiarities of Quality Ensuring in Parts from Ti-Based Alloy VT6 with Ultrafine-Grained Structure E.V. Safin and A.M. Smyslov	440
Structural Strength of Materials as a Factor to Ensure the Quality of Machine Parts E. Frolova, V. Trunov and T. Kuisokov	445
Application of the Method of Performance Evaluation of the Production Process Design Using Associative Design Y. Klochkov and A. Gazizulina	448
Improvement of Methodology of Evaluation of Efficiency of the Metallurgical Complex Processes Development Y. Klochkov and A. Gazizulina	453

Quality Management of Metal Products Prepared by High-Speed Direct Laser Deposition Technology	
V. Glukhov, G.A. Turichin, O.G. Klimova-Korsmik, E. Zemlyakov and K. Babkin	461
The Quality Improvement in Manufacturing “Screw”-Parts Using the DEFORM-3D Software	
S. Zvonov and A. Shlyapugin	468
Development of FMEA Method with the Purpose of Quality Assessment of Can Stock Production	
Y. Klochkov, A. Its and I. Vasilieva	473
Mathematical Model and Program Development for the Efficient Process Conditions Determination during FeC0.15Cr12Ni2 Steel Diamond Smoothing	
A.N. Shvetcov and D.L. Skuratov	477
Testing of Thin-Walled Tubular Workpieces	
S.G. Simagina	483
Improvement of Technological Process of Multiproduct Production on the Bases of Simulation Modeling of Production Unit	
I. Khaimovich and M.A. Frolov	487
Designing Forging and Die Tooling for the Manufacture of Turbine Engine Compressor Blades in Siemens NX	
D.S. Goryainov, V.V. Anokhin and A. Shlyapugin	497
Multi-Block and Multi-Station Pulse-Magnetic Installations	
R.Y. Yusupov and V. Glushchenkov	507
Pulse-Magnetic Processing of Materials - Development - Problems and Solution Techniques	
V. Glushchenkov	511
Problems of Realization of Static-Dynamic Technologies and Ways of their Solution	
I.A. Belyaeva, R.Y. Yusupov and V. Glushchenkov	515
Actuator from a Material with the High-Temperature Shape Memory Effect and Examples of its Application in Engineering	
V. Glushchenkov, R.Y. Yusupov, V. Alekhina and Y. Egorov	523
Design Features of the Small-Scale PMI Power Unit	
E.E. Kostriukov and R.Y. Yusupov	530
