

# Table of Contents

## Preface

## Committees, Preface

### State-of-the-Art and Perspectives in Pariculate Nanostructured Materials

R.A. Andrievski 1

### Nanostructured Oxide Ceramic Materials of High Density

L. Radonjić 11

### Nanocomposite Materials Prepared by Using Quantum Dots as Building Blocks

J.M. Nedeljković, N.M. Dimitrijević, M.I. Čomor, Z.V. Šaponjić and D.P. Uskokovic 19

### Peculiarities of the Low Magnetostrictive Amorphous Ribbons Crystallization Under Laser Heating

V.V. Girzhon 27

### Determination of Activation Energy Spectrum for Fe<sub>40</sub>Ni<sub>40</sub>B<sub>20</sub> Metallic Glasses

P. Tomić, M. Davidović and B. Arsenijević 33

### Relaxation Processes in Fe-B Metallic Glasses Under Low Energy Laser Treatment

V.V. Girzhon 37

### The Study of Crystallization Processes of TiNi Ribbon

B.B. Radojević, T.P. Perng and M. Davidović 41

### Nonequilibrium Plasmas for Material Processing in Microelectronics

Z.L. Petrović and T. Makabe 47

### Critical Parameters of Si Conversion into Si<sub>3</sub>N<sub>4</sub> Nanophase Powder for Plasma Process

P.L. Stefanović, P.B. Pavlovic, Ž.G. Kostić, S. Šikmanović and D. Cvetinović 57

### Synthesis of Cordierite Powder Performed Under the Conditions of Periodic Ultrasonic Fields Activity

V. Jokanović, D. Janačković, R. Čurčić, P. Živanović and D.P. Uskokovic 65

### Superconductivity and Fullerenes

J.P. Šetrajčić 71

### Nanotubes: Basic Structural and Energy Properties

A.S. Nikolić, V. Radmilović, M. Simićić and D. Koruga 83

### Charge-Transfer Reactions between C<sub>60</sub> and Hydrophilic Solutes

N.M. Dimitrijević, J.M. Nedeljković and Z.V. Šaponjić 93

### New Materials on the Basis of Amino Derivatives of Fullerene C<sub>60</sub>

J. Adamov and M. Vojinović-Miloradov 101

### Vibrational Properties and Structure of Carbon Nanotubes Based on C<sub>60</sub> Molecule and Its Symmetry

R. Kostić, D. Raković and M. Grujić-Brojčin 109

### New Materials Based on Endohedral Fullerenes: Mo@C<sub>60</sub> Complex

L. Matija and D. Koruga 115

### Organometallic Compounds as Precursors for Chemical Vapor Deposition of Thin Films of Inorganic Materials

P. Zanella, G.A. Battiston, G. Carta, R. Gerbasi, M. Porchia and G. Rossetto 123

### Optical Characterization of Mercury Cadmium Telluride Epitaxial Layers with Arbitrary Degree of Carrier Degeneracy

Z. Djurić, Z.M. Jakšić, Z. Djinović and V. Jović 131

### Investigations of TiN Films Optical and Mechanical Characteristics

M. Zlatanović, D. Šešum, D. Djukić and N. Popović 139

### Preparation of TiO<sub>2</sub> and ZnO Thin Films by Dip-Coating Method

N. Ignjatović, Z. Branković, M.D. Dramićanin, J.M. Nedeljković and D.P. Uskokovic 147

### Characterization of As Implanted Silicides by Frequency Noise Level Measurements

M. Stojanović, M. Milosavljević and C. Jeynes 153

### PV Solar Systems and Development of Semiconductor Materials

M. Stojanović, S. Stanković, D. Vukić, P. Osmokrović, P. Vasić and A. Vasić 157

### Catalytic Behaviour of Gold and Platinum Electrodes Modified by Formaldehyde (Iso-Propanol) in Electrooxidation of Iso-Propanol (Formaldehyde) in 0.1M NaOH

M. Avramov-Ivić, T. Vidaković and B. Nikolić 165

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Recovery of Radioactive Caesium with Insoluble Hexacyanoferrates: Problems and Perspectives</b>                                 |     |
| C. Loos-Neskovic, M. Fedoroff, E. Garnier and D.J. Jones                                                                           | 171 |
| <b>Adsorption Thermodynamics of Organics on Nickel- and Copper-Hexacyanoferrates</b>                                               |     |
| A. Onjia, S.K. Milonjić, M.R. Todorović, C. Loos-Neskovic, A. Fedoroff and D.J. Jones                                              | 183 |
| <b>Stability of Colloidal Ferricoxychloride in the Presence of Inorganic Anions</b>                                                |     |
| S.K. Milonjić and N.B. Vučić                                                                                                       | 189 |
| <b>X-Band Microwave Permittivity Measurements on Lithium and Cesium Salts of 12-Tunstophosphoric Acid</b>                          |     |
| T. Čajkovski, M. Davidović, D. Čajkovski, V. Likar-Smiljanić, R. Biljić, U.B. Mioč and Z. Nedić                                    | 193 |
| <b>Temperature Influence on the Composition of Ni-Ferrite Powders Obtained from Complex Compounds with Acetylacetonato-Ligands</b> |     |
| A.S. Nikolić, N. Cvetković, S. Djurić, J. Puzović and M.B. Pavlović                                                                | 199 |
| <b>Investigation of Microstructure of Zeolite Type Material by <sup>1</sup>H NMR Spectroscopy and Thermogravimetric Analysis</b>   |     |
| B. Djurić-Stanojević, L. Miljković, V. Manić and P. Dimitrijević                                                                   | 203 |
| <b>Ceramic Matrix Composites-Present Status and Future Trends</b>                                                                  |     |
| V.D. Krstić                                                                                                                        | 209 |
| <b>Pressureless Sintering of B<sub>4</sub>C-TiB<sub>2</sub> Ceramic Composites</b>                                                 |     |
| V. Skorokhod, M.D. Vlajić and V.D. Krstić                                                                                          | 219 |
| <b>Influence of Spinel Phase Composition on ZnO Varistors Properties</b>                                                           |     |
| Z. Branković, D. Poleti, L. Karanović and D.P. Uskokovic                                                                           | 225 |
| <b>Microstructure and Strength of Solid State Bonded Ni-Al<sub>2</sub>O<sub>3</sub>-Ni<sub>3</sub>Al Laminates</b>                 |     |
| M. Mitkov, D. Janković and D. Kičević                                                                                              | 233 |
| <b>Research on Advanced Carbon Materials</b>                                                                                       |     |
| S.N. Marinković                                                                                                                    | 239 |
| <b>Strength of Continuous Fibres Reinforced Composites</b>                                                                         |     |
| M.M. Stevanović                                                                                                                    | 251 |
| <b>Fibre Misalignment in Filament Wound Tubes</b>                                                                                  |     |
| T.B. Stecenko and M.R. Piggott                                                                                                     | 257 |
| <b>Composite Rods with Embedded Optical Fibre - Modeling and Evaluation</b>                                                        |     |
| P.S. Uskoković, S. Putić, A.M. Orlović, R. Aleksić, M. Srećković and S. Pantelić                                                   | 263 |
| <b>Structure Optimization of Polylactide Microcapsules for Controlled Drug Release</b>                                             |     |
| M.B. Plavšić, S. Tomić, L. Sajc, B. Bugarski and G. Jovanović                                                                      | 271 |
| <b>Examination of Rheological Properties of Fine Particle Dispersions as Carriers for Controlled Drug Release</b>                  |     |
| M.B. Plavšić, I. Pajić-Lijaković, S. Šiler-Marinković, B. Bugarski and N. Peinović                                                 | 281 |
| <b>Properties of Interpenetrating Polymer Networks Based on Segmented Polyurethanes</b>                                            |     |
| S.H. Wang, S. Zawadski and L. Akcelrud                                                                                             | 289 |
| <b>Modeling of the Structure and Properties of Poly(Urethane-Isocyanurate) Elastomeric Materials</b>                               |     |
| J. Budinski-Simendić, M. Ilavsky, M. Špírková, J. Šomvasky and K. Dušek                                                            | 295 |
| <b>Effects of EPDM Modification on Some Properties of Polypropylene-Wood Flour Composite</b>                                       |     |
| E. Dingova, M. Djiporović and J. Miljković                                                                                         | 303 |
| <b>Stress State Effect on Dynamic Strain Aging and Surface Markings During Stretching of AlMg7 Alloy Sheet</b>                     |     |
| E. Romhanji, D. Glišić, M. Popović and V. Milenković                                                                               | 309 |
| <b>The Influence of Obtainment Conditions of Didymium-Iron-Boron Permanent Magnets on their Structure and Properties</b>           |     |
| G. Brecharya, E. Vasilyeva and S. Ustynova                                                                                         | 315 |
| <b>Microstructural Morphology and Stability of Rapidly Solidified Duplex Stainless Steel</b>                                       |     |
| Z. Cvijović, D.V. Mihajlović and V.R. Knežević                                                                                     | 323 |
| <b>The Effect of Growth Rate on the Structure of Primary and Secondary Dendrites of Single Crystal of Ni Based Superalloy</b>      |     |
| S. Nikolić, A.V. Valčić and B.B. Radojević                                                                                         | 331 |
| <b>Dilatometric and Thermoelectric Properties of Wires for Thermocouple 'J' as a Function of Cold Drawing Variables</b>            |     |
| T.Z. Pavlović and S.L. Cotesu                                                                                                      | 337 |

**Influence of Titanium Carbide on Properties of Aluminothermic Mixture**

M.R. Todorović, M. Trtanj and Z. Maksimović

343

**The Role of NaCl in Chlorine Roasting of MoS<sub>2</sub>**

D. Zlatanović, M. Purenović, S. Zec and M. Miljković

349
