

Table of Contents

Preface

Chapter 1: Materials Synthesis and Properties

Self-Healing Magnetorheological Elastomer for Vibration Damping R.K. Shuib, N.L.N. Thajudin and M.H. Zainol	3
Formation of Co₃O₄ Nanoparticles Using <i>Moringa oleifera</i> Leaves Extract through Two Phases System of Hexane-Water and their Photocatalytic Activity Y. Yulizar, D.O.B. Apriandanu and Y. Pratiwi	9
Synthesis and Characterization of Plasmon-Enhanced SERS Substrate Based on Au-Ag Alloy-Coated, Large-Area Photonic (Methyl Methacrylate+Styrene) Co-Polymer S. Kassim, N.A. Mukhtar and R.A.A. Tahrin	14
<i>In Situ</i> Combustion Synthesis in Air of Calcium Titanate Powders Using Minerals as a Calcium Source S. Rongsawat, W. Bunma and T. Chanadee	20
¹³C/⁷Li Solid-State Nuclear Magnetic Resonance Study on Poly(Ethylene Glycol)-Poly(Propylene Glycol)-Poly(Ethylene Glycol)/LiCF₃SO₃ Copolymer Electrolytes L. Wei and D.W. Li	26
Effect of Silicon Nitride (Si₃N₄) Addition on the Mechanical and Tribological Performance of Al-Fe-Si Alloy (AA8011) J. Fayomi, A.P.I. Popoola, O.M. Popoola and O.P. Oladijo	34
A Design Method for Sound Absorbing Structure at Low Frequency Y.J. Fu, X.M. Wang and Y.L. Mei	39
GelMa Microbubbles Prepared in Microfluidics as Suitable Cell Carriers F.L. Jiang, H.B. Zhang and W.J. Zhang	51
Photo-Crosslinkable Double-Network Hyaluronic Acid Based Hydrogel Dressing Y.L. Ding, H.B. Zhang, R.X. Yin and W.J. Zhang	59
Preparation and Characterization of Protein Bioplastics from Fish Waste Using Different Plasticizers S.A. Alias and K.M. Ku Ishak	67

Chapter 2: Materials Forming

GLARE Hydro-Mechanical Deep Drawing Analysis Based on the Forming Depth H. Blala, L.H. Lang, E. Sherkatghanad and L. Li	75
Formability Analysis of Fiber Metal Laminates with Different Core and Skin Layers by Stamping Process L. Li, L.H. Lang, B. Hamza and S. Alexandrov	85
Application of 3D Printing in Future Manned Space Exploration Y.Y. Zhang, Z.J. Jin and W. Zhang	92
A Closed-Form Solution for Temperature Profiles in Selective Laser Melting of Metal Additive Manufacturing S.Y. Liang, J.Q. Ning and E. Mirkoohi	98
Finite Element Simulation of the Yoke Spline under Hot Forging Process S. Suranuntchai	106

Chapter 3: Materials Processing

Effects of Bismuth Content on the Microstructure, Shear Strength and Thermal Properties of Sn-0.7Cu-0.05Ni Solder Joints P. Sungkhaphaitoon and p. Suwansukho	115
Interfacial Bonding Behavior of Stainless Steel / Carbon Steel in Cold Rolling Process S. Li and Q.D. Zhang	121

Flat Metal Rolling Simulation by Finite Volume Method S. Suranuntchai	128
Process Development: Burr and Film Formation during High Speed Punching of Extruded PC Based Polymers S.F. Noller, R. Heiler and A. Pfennig	135
Microstructure Appearance of TC4 Titanium Alloy Welded Join by Pulsed Electron Beam H.L. Dai, R.Z. Du, Y. He, S. Xing and F.J. Liu	143
The Influence of Residual Stresses on Dimension Stability during Thermal Mechanical Processes for High-Precision Components X. Qiao, X.F. Bai, Y. Zhang and D.R. Meng	151

Chapter 4: Computational Materials Science

Calculation of Carbon-Titanium-Oxygen Conductivity by First Principle Y.Q. Guo, D.Q. Liang and Y. Deng	159
Mathematical Simulation and Physical Modeling of Self-Source Magnetization by Liquid Electrolyte Flow S.H. Li, A. Huang, Y.T. Qu, X. Lu, H.Z. Gu and G.Q. Li	165

Chapter 5: Building Materials and Structures

Experimental Study of AFRP-Confined Square and Circular Concrete Columns Using Fiber Bragg Grating Sensors Y. Liu, Y.T. Yang, J. Zeng and L. Chen	175
Cellular Automata Approach to Hydration Heat of Concrete Based on Equivalent Time Y. Liu, Y.T. Yang, L. Chen and J. Zeng	181
Geopolymer Preparation from Bamboo Ash Containing Kaolin as Ash Fusion Control Agent T.W. Samadhi, A. Purbasari and W. Wulandari	189
Nanoscale Evaluation of Multi-Walled Carbon Nanotube's Performance on Resisting Oxidization of Asphalt A. Al Mamun and O. Sirin	195
Flexural-Torsional Buckling of Pultruded Fiber-Reinforced Polymer Angle Beams under Eccentric Loading J. Thumrongvut, N. Pakwan and S. Krathumklang	201
