

# Table of Contents

<b>Foreword</b>	iv
<b>Nanocrystalline CuO<sub>x</sub>-CeO<sub>2</sub> Systems: FTIR Analyses of Catalytic Reactions</b> S. Saitzek, S. Villain and J.R. Gavarri	1
<b>Microstructure, Properties and Biocompatibility of the Nitrided Ti-6Al-4V Alloy for Medical Application</b> A. Czyska-Filemonowicz, P.A. Buffat, E. Czarnowska and T. Wierzchoń	15
<b>Mechanical Properties of Ultra-Fine Grained Al-Li Alloys</b> B. Adamczyk-Cieślak, M. Lewandowska, J. Mizera and K.J. Kurzydlowski	25
<b>Microstructure and Mechanical Properties of the Stainless Steels Obtained by Sintering Mixtures of AISI 316L and Silicon Powders</b> K. Sikorski, A. Szymańska, M. Sekuła, D. Kowalczyk, J. Kazior and K.J. Kurzydlowski	35
<b>Quantitative Description of the Structure and Substructure of Hot – Deformed Fe – Ni Austenitic Alloy</b> K.J. Ducki, M. Hetmańczyk and D. Kuc	51
<b>Surface Heat Treatment Design Methodology of Large-Scale Castings</b> P. Kula, T. Liskiewicz and T. Pacyniak	61
<b>Technological Surface Layer Selection for Small Module Pitches of Gear Wheels Working under Cyclic Contact Loads</b> Z. Gawroński and J. Sawicki	69
<b>Change of Micromechanical Properties of Polyethylene Induced by a Tribological Process in Polymer/Metal System</b> J. Maszybrocka, J. Cybo, J.E. Frąckowiak and K. Krzemień	75
<b>Growth Structures and Phase Formation in Industrially Room-Temperature Pulsed Laser Deposited FCC Ti-Based Nitride Coatings</b> J. Lackner	85
<b>Comparison of Shot Peening and Nitriding Surface Treatments under Complex Fretting Loadings</b> K. Kubiak, S. Fouvry and B. Wendler	105
<b>Structure and Properties of the Wear Resistant Coatings Obtained in the PVD and CVD Processes on Tool Ceramics</b> L.A. Dobrzański and D. Pakuła	119
<b>Oxidation Resistance of Nanocrystalline Microalloyed <math>\gamma</math>-TiAl Coatings under Isothermal Conditions and Thermal Fatigue</b> B. Wendler, Ł. Kaczmarek, M. Jachowicz and A. Rylski	135
<b>Application of <math>^{18}\text{O}_2</math> Exposure-Based Approach to Study the Failure Mechanisms of Oxide Scales on Alumina Formers</b> J. Jedlinski	149
<b>Strain Induced Up-Hill Diffusion of Hydrogen in Al</b> E. Lunarska and O. Chernyayeva	165
