

Table of Contents

Foreword	iv
Nanocrystalline CuO_x-CeO₂ Systems: FTIR Analyses of Catalytic Reactions S. Saitzek, S. Villain and J.R. Gavarri	1
Microstructure, Properties and Biocompatibility of the Nitrided Ti-6Al-4V Alloy for Medical Application A. Czyrska-Filemonowicz, P.A. Buffat, E. Czarnowska and T. Wierzchoń	15
Mechanical Properties of Ultra-Fine Grained Al-Li Alloys B. Adamczyk-Cieślak, M. Lewandowska, J. Mizera and K.J. Kurzydłowski	25
Microstructure and Mechanical Properties of the Stainless Steels Obtained by Sintering Mixtures of AISI 316L and Silicon Powders K. Sikorski, A. Szymańska, M. Sekuła, D. Kowalczyk, J. Kazior and K.J. Kurzydłowski	35
Quantitative Description of the Structure and Substructure of Hot – Deformed Fe – Ni Austenitic Alloy K.J. Ducki, M. Hetmańczyk and D. Kuc	51
Surface Heat Treatment Design Methodology of Large-Scale Castings P. Kula, T. Liskiewicz and T. Pacyniak	61
Technological Surface Layer Selection for Small Module Pitches of Gear Wheels Working under Cyclic Contact Loads Z. Gawroński and J. Sawicki	69
Change of Micromechanical Properties of Polyethylene Induced by a Tribological Process in Polymer/Metal System J. Maszybrocka, J. Cybo, J.E. Frąckowiak and K. Krzemień	75
Growth Structures and Phase Formation in Industrially Room-Temperature Pulsed Laser Deposited FCC Ti-Based Nitride Coatings J. Lackner	85
Comparison of Shot Peening and Nitriding Surface Treatments under Complex Fretting Loadings K. Kubiak, S. Fouvry and B. Wendler	105
Structure and Properties of the Wear Resistant Coatings Obtained in the PVD and CVD Processes on Tool Ceramics L.A. Dobrzański and D. Pakuła	119
Oxidation Resistance of Nanocrystalline Microalloyed γ-TiAl Coatings under Isothermal Conditions and Thermal Fatigue B. Wendler, Ł. Kaczmarek, M. Jachowicz and A. Rylski	135
Application of ¹⁸O₂ Exposure-Based Approach to Study the Failure Mechanisms of Oxide Scales on Alumina Formers J. Jedlinski	149
Strain Induced Up-Hill Diffusion of Hydrogen in Al E. Lunarska and O. Chernyayeva	165
