

Table of Contents

Preface, Committees, Sponsor

Chapter 1: Metals and Alloys, Processing Technologies

Fabrication of Cu@Sn Core-Shell Structured Particles and the Application in High Remelting Temperature Bonding T.Q. Hu, H.T. Chen and M.Y. Li	3
Methods for Obtaining Forming Limit Diagrams of Material Defects Q.W. Zhao and L.F. Yang	8
Gas Blow Forming in AA2017 Aluminium Alloy G. Gillo	13
Synthesis and Photophysical Properties of New Three-Coordinate N-Heterocyclic Carbene Copper Complex S.B. Liu, C. Yi, H.Y. Xia and F. Zhao	18
Impact of Original Micro-Structure on Grind-Hardened Layer of 42CrMo Steel in Grind-Hardening G.C. Wang, B. Jiao, J.F. Zou and H.J. Pei	22
Optimization of the Isothermal Forging Process of a Spur Bevel Gear X.H. Zhao, D.D. Liu, X.H. Wang and X.H. Wu	28
Effects of Aging Treatment and SiCp Addition on Compressive Performance and Corrosion Behavior of Mg-10Zn-0.6Zr Alloy X.H. Xiong, H.T. Li, J.K. Cai, G.X. Wang and Q.X. Zhang	33
Influence of High-Temperature Ageing on the Microstructure of Stainless Steel/Low Alloy Steel Clad Plate Welded Joints X. Ding and X. Li	38
Simulation and Experimental Studies on Grain Selection Behavior of DD5 Single Crystal Superalloy Y.H. Yan, J.W. Liu, Z.H. Jia, S. Qiu, Z. Guo, K. Liu, A.L. Ma and L. Xu	42
Influence of High-Temperature Ageing on Mechanical Properties of Low Alloy Steel Clad Plate Welded Joints Z.L. Wang and X. Li	51

Chapter 2: Polymers and Composites

The Fabrication and Microstructure Analysis of Carbon Fiber Composites with Interlaminar Reinforcement Y.Y. Yao, L.P. Zhao, R.S. Dou and Z. Tong	59
Large Scale Synthesis of Porous Carbon-Nitride Microsphere for Visible Light Harvesting J. Liu, G.Z. Gong, J.J. Ding, P. Zhang, H.T. Sheng, S.B. Jin and W.F. Yang	64
Coating Thickness Characterization of Composite Materials Using Terahertz Waves K.H. Im, S.K. Kim, D.K. Hsu and J.A. Jung	70
Study on Process Parameters on Single Point Incremental Forming of PVC X.B. Zhang, J. Wang and S.Q. Zhang	74

Chapter 3: Technologies in Chemical Engineering

Study on Influence of Silicon Crystal Dislocation on Removal in Atmospheric Pressure Plasma Polishing G.L. Jia, B. Li and J.F. Zhang	83
The Mechanical Properties of TiN Films Grown by a Pure N₂ Plasma Sputtering B.S. Jang, C.H. Lee, J.W. Choi, J.S. Kwon, H.K. Kim, C.H. Park and H.M. Kim	89

Isotope Effect of the Stereodynamics for the Reactions $N(^4S)+HD \rightarrow NH+D$ and $N(^4S)+HD \rightarrow ND+H$ Y.H. Guo	96
Preparation of Coal-Based Columnar Activated Carbon for Removal of Benzene G.Z. Gong, J. Liu, W.F. Yang, Y.Y. Zhou, H.T. Sheng and Y. Fang	101
Characterisation of Silicon Carbide from Dark Red Meranti Wood N.L. Abdul Rahman, K.M. Hyie, A. Kalam, T.W. Dung and H. Elias	108

Chapter 4: Mechanical Properties of Materials and Tribotechnology

Effect of Groove Geometry on Rolling Contact Fatigue of PEEK Thrust Bearings in Water M. Orito, K. Kida, Y. Hashizume, M. Ishida, K. Mizobe and Y. Kashima	117
Investigation on Strength Model of Metal Plastic Deformation under High Strain Rate Y.P. Fu and L.F. Yang	122
Measurement Methods of Friction Coefficient for Plastic Deformation of Metals under High Strain Rate J.P. Ma and L.F. Yang	127
Evaluations of Stochastic Fatigue Crack Growth Models through Experimental Data C.C. Ni	132
Observation of Fatigue Fracture on PEEK Shaft against Alumina Bearing's Ball under One-Point Rolling Contact H. Koike, G. Yamaguchi, K. Mizobe, Y. Kashima and K. Kida	137
Evaluation of Tribological Thermal Failure on PEEK-PTFE Hybrid Alumina Ball Bearings H. Koike, T. Matsumura, K. Mizobe, Y. Kashima and K. Kida	142
Study on Friction of Bearing Cable and Saddle with Different Material in Freight Ropeways J. Qin, J. Chen, J.C. Wan and Y.J. Xia	148

Chapter 5: Materials and Technologies in Construction

Influence of Autogenous Shrinkage and early Anti-Cracking Behavior of USHC with Pretreatment RHA X. Wu, Y. Peng, W.Q. Li, S. Wang and J.C. Lin	155
An Experiment on the Bond-Slip Behaviors of Pre-Tensioned Prestressed UHPC Members J.S. Kim and D.H. Choi	161
Experimental Study on the Inner Set Bolted Joint of Steel Tube Subject to Axial Pressure X. Li and H. Chao	165
Evaluation Methods Research Based on the Concrete with Rheological Properties J.C. Lin, Y.X. Gao, W.Q. Li, X. Wu, Y.X. Huang and Y. Peng	170
