

## Table of Contents

### Foreword, Introduction and Committees

### Characterization of Hyperelastic (Rubber) Material Using Uniaxial and Biaxial Tension Tests

Y.J. Adeel, A.I. Muhammad and A. Zeeshan 1

### Fatigue Crack Growth Behaviour of AISI 50100 Precipitation Hardened Steel after Welding

A. Sultan, R.A. Pasha, S.M. Ur Rehman Shah, H. Ali and A. Zulfiqar 9

### Thermo-Mechanical Testing of Epoxy Shape Memory Polymer Composites

A. Basit, G. L'Hostis and B. Durand 15

### Prediction of Delamination Crack Growth in Carbon/Fiber Epoxy Composite Laminates Using a Non-Local Cohesive Zone Modeling

H. Ijaz, L. Gornet, M.A. Khan, W. Saleem, K. Nisar and S.R. Chaudry 25

### Microstructure Study of Propellant Binder

N. Ahmad, S. Amir, R. Naheed, Z.I. Baig and M. Rizvi 37

### Microstructure and Corrosion Resistance of Dissimilar Welded Joints between Duplex Stainless Steel and Austenitic Stainless Steel

S.G. Wang, Y. Li and W.G. Zhai 43

### Design of Tape Wound Composite Cylindrical Shells Incorporating Different Failure Criteria and Winding Kinematics

H. Rahman, R. Jamshed, A. Khan, H. Ijaz and L. Min 53

### Effects of Stitching Parameters on Tensile Strength of FRPs under Hygrothermal Conditions

X.Q. Cheng, Y. Baig and Z.N. Li 63

### Modeling Lamb Wave Propagation in Damaged Structures Based upon Spectral Element Method

H. Sun and L. Zhou 79

### Sintering and Morphology of Porous Structure in NiTi Shape Memory Alloys for Biomedical Applications

I.H. Abidi and F.A. Khalid 87

### Hydroentangled Polymer-Glass Bi-Layer Fibrous Composites

M. Tausif and S.J. Russell 97

### Study on Preparation and Mechanical Properties of Ti-PEEK-C<sub>f</sub> Laminates

L. Pan, J.S. Wei and J. Tao 103
