

Table of Contents

Preface, Committees

Chapter 1: Electrophysical and Electrochemical Methods and Technologies of Materials Treatment

Optical Absorption Peculiarities of Al-Si-N Coatings Produced by Magnetron Sputtering A.V. Kabyshev, F.V. Konusov, A.L. Lauk, A.M. Lebedinskiy, V.N. Legostaev and E.A. Smolyanskiy	3
Influence of Plasma Assistance on Arc Deposited MoN Coatings O.V. Krygina, V.V. Shugurov, N. Koval and N. Prokopenko	9
Application of Electro-Discharge Blasting Technology for Destruction of Oversized Rocks and Rock Massive Splitting off N. Voitenko, A.S. Yudin and N.S. Kuznetsova	15
Particle Size Distribution of Aluminum Powders Obtained by Electric Explosion of Wires N.A. Yavorovsky, A.V. Pustovalov, S.P. Zhuravkov and O.S. Lutoshkina	20
Study of Products of Metallic Titanium Electrospark Dispersion in Aqueous Medium S.P. Zhuravkov, G.L. Lobanova, A.V. Pustovalov, V.V. Fedorov, G.A. Pribytkov and L.V. Nadeina	26
Pulsed Electron Beam Propagation in Oxygen G. Kholodnaya, R. Sazonov, D. Ponomarev and A. Poloskov	31
Kinetic Model of Pulsed High Current Electron Beam Propagation in the Gas Medium N.E. Aktaev and A.Y. Pak	37
Electrical Treeing in Solid Fossil Fuels S.M. Martemyanov	43
Influence of High-Intensity Zr Ion-Beam Treatment on Deformation and Fracture of 12Cr1MoV Steel under Static, Cyclic and Dynamic Loadings I. Vlasov, S. Panin, V. Sergeev, V. Naidfeld, P. Maruschak and B. Ovechkin	49
Multiple Rock Breakdown in Electrodischarge Technology V.M. Vazhov, S.Y. Datskevitch, M.Y. Zhurkov, V.M. Muratov and A. Rødland	55
Thermal Stability of Iron Micro- and Nanopowders after Electron Beam Irradiation A.V. Mostovshchikov, A.P. Ilyin, I.S. Egorov and D.V. Ismailov	60
Infrared Spectra Investigation of CuO-Al₂O₃ Precursors Produced by Electrochemical Oxidation of Copper and Aluminum Using Alternating Current N. Usoltseva, V. Korobochkin, A.S. Dolinina and A.M. Ustyugov	65
Non Catalytic Methane Formation from Syngas in the Dielectric Barrier Discharge Plasma, Initiated by Microsecond Pulses E. Litvishko, A. Ivanov and M. Goreshev	71
Structural and Phase Transformations in Ti-B₄C System Formed when Melting the Composition Film/Substrate by an Intense Electron Beam Y.F. Ivanov, O.L. Khasanov, Z.G. Bikbaeva, M.S. Petyukevich, A.D. Teresov, V.V. Shugurov, O.V. Ivanova and A.A. Klopotov	76
Structural Phase Transformations of the Surface Layer of SiC Ceramics Irradiated by Intense Electron Beam Y.F. Ivanov, O.L. Khasanov, M.S. Petyukevich, V.V. Polisadova, T.V. Milovanova, O.S. Tolkachev, A.D. Teresov and M.P. Kalashnikov	81
The Research of Diamond Coatings Morphology Evolution under the Action of Reactive Ion Etching in Perpendicular Direction V.V. Okhotnikov, S.A. Linnik and A.V. Gaydaychuk	87
The Influence of Plasma Composition on Mechanical Stresses in Substrate-Coating System S.A. Shanin	93
The Features of Diffusion and Mechanical Waves Interaction at the Initial Stage of Metal Surface Treatment by Particle Beam under Nonisothermal Conditions E.S. Parfenova and A.G. Knyazeva	99

Numerical Simulation of Temperature Field in Steel under Action of Electron Beam Heating Source	
V. Skeeba, V. Ivancivsky, N.V. Martyushev, D.V. Lobanov, N.V. Vakhrushev and A.K. Zhigulev	105
Textural Characteristics of Products Obtained by Electrochemical Oxidation of Copper and Cadmium Using Alternating Current	
A.S. Dolinina, V. Korobochkin, N. Usoltseva, E.A. Sudarev, A.V. Bikbaeva and M.V. Popov	112
Electrolytic Behavior Silver Microphases and Nanophases on the Graphite Electrode Surface	
D. Perevezentseva, E.V. Gorchakov and Y.A. Oskina	117
Cascade Probability Method and its Relationship with Boltzmann Equations	
A.I. Kupchishin, A.A. Kupchishin, N.A. Voronova and V.M. Lisitsyn	123

Chapter 2: Design of Multiscale Composites and Polymers of New Generation

Influence of Copper Nanoparticles on Tribological Properties of Nanolamellar Tungsten Disulfide	
Y. Irtegov, V. An, K. Machekhina and N. Lemachko	133
Structure and Worn Surface Morphology on Copper Containing Composites under Dry Sliding with High Contact Current Density	
V.V. Fadin, M.I. Aleutdinova, V.E. Rubtsov and V.A. Aleutdinova	137
Physical and Chemical Aspects of Formation of Epoxy Composite Material with Microfilling Agent	
A. Buketov, P. Stukhlyak, P. Maruschak, S. Panin and A. Menou	143
Regularities of Impact Failure of Epoxy Composites with Al₂O₃ Microfiller and their Analysis on the Basis of External Surface Layer Concept	
A. Buketov, P. Stukhlyak, P. Maruschak, S. Panin and A. Menou	149
Improvement of Wear Resistance of UHMWPE by Adding Solid Lubricating Fillers	
S. Panin, L. Kornienko, V.O. Alexenko and L.R. Ivanova	155
Influence of Nano- and Microfillers on the Mechanical and Tribotechnical Properties of “UHMWPE-PTFE” Composites	
S. Panin, L. Kornienko, V.O. Alexenko, L.R. Ivanova and S.V. Shilko	161
Polyfunctional Coatings on the Basis of Powder Paints Electrostatically Sprayed from the Composite Mixtures Treated in Planetary Ball Mill	
S. Panin, S.Y. Yazykov, L.A. Kornienko and B. Ovechkin	166
Sulfur-Containing Composite Material for the Concrete Production	
I. Frolova, V.V. Tikhonov, A.P. Poltoranina, N. Usoltseva, S.C. Fu and A.S. Knyazev	171
Features of the Fine Structure of the Active Layers of Organic Solar Cells	
A.I. Smirnov, N.V. Plotnikova, V.G. Burov and N.V. Martyushev	176
Waterproof Magnesia Binder for Composite Materials	
N.A. Mitina, I.B. Revva, A.A. Ditts and D. Simonov	182
Ceramic Materials for the Low-Temperature Synthesis of Dielectric Coatings Used in Electronics, Led Devices and Spacecraft Control Systems	
A.A. Ivanov, V.I. Tuev and A.A. Vilisov	188

Chapter 3: Materials and Technologies in Powder Metallurgy and Additive Manufacturing

Fabrication of «TiC-HSS Steel Binder» Composite Powders by Self-Propagating High Temperature Synthesis	
E.N. Korosteleva, G.A. Pribytkov, M.G. Krinitcyn, A.V. Baranovskii, V.V. Korzhova and V.E. Strelnitskij	195
Study of the SHS Addition Effect on Phase Composition of Cordierite Ceramics	
T.A. Khabas, A.I. Cherepanova and V.V. Promakhov	200
The Structure of Quaternary Iron-Based Alloy Obtained at High and Ultrahigh Cooling Rates	
Z.G. Kovalevskaya, E.A. Kovalevskiy and M. Khimich	205

Technology Development of Continuous Synthesis of Active Substance for Dispenser Cathode	
A.O. Bezmaternykh, Y.B. Shvaljov and V.N. Kudiiarov	211
Structural and Energy State of Electro-Explosive Aluminum Nanopowder	
A.V. Mostovshchikov, A.P. Ilyin and M.A. Zakharova	215
Temperature Calculation for Laser Sintering of Titanium and Niobium Taking into Account Properties Change due to Powder Layer Shrinkage	
A.G. Knyazeva and Y. Sharkeev	220
The Additives Influence on Heat-Conducting Properties of Aluminium Nitride Circuit Boards	
A. Karakulov, N.V. Gusev, Y.Y. Drozdov and N.Y. Nikonova	226
Mechanical Properties of Additive Manufactured Complex Matrix Three-Component Carbon Fiber Reinforced Composites	
A. Chumaevskii, E.A. Kolubaev, S.Y. Tarasov and A.A. Eliseev	232
Tungsten Powder Sintering	
E.S. Dvilis, A.G. Knyazeva, S.N. Sorokova and O.L. Khasanov	237
Thermal and Chemical Stability of Micron Aluminum Powders Subjected to Gaseous Water	
S.V. Zmanovskiy, A.M. Gromov, V.V. Smirnova, V.F. Petrunin and J.C. Kim	241
Capabilities of Laser Printers with Different Power	
R.G. Ahmetshin, V.V. Fedorov, K.S. Kostikov, N.V. Martyushev, V.A. Ovchinnikov, A.V. Razin and A.N. Yakovlev	246
Influence of Dispersivity of Micron-Sized Aluminum Powders on their Resistance to Water Vapor	
S.V. Zmanovskiy, V.V. Smirnova, A.V. Korshunov and A.P. Ilyin	251
Analysis of Initial Gas Media and their Influence on the Process of Diffusion Saturation	
K. Bakhrunov	256
Application of Aluminum Nanopowder for Pure Hydrogen Production	
A.P. Ilyin, L.O. Root and A.V. Mostovshchikov	261
Thermal Hardening of the Tin Bronze Alloyed with Nickel	
N.S. Klochkov, U.P. Egorov and O.M. Utyev	267

Chapter 4: Materials and Technologies for Biomedical Application and Environmental Engineering

One-Pot Synthesis of Chloropyridines from Aminopyridines via Diazotization	
Y. Lesina, P. Beysembay and A. Kassanova	273
Lighting Device with Variable Spectral Composition for Growing "Chlorella" in Artificial Conditions	
S.B. Turanov, A.N. Yakovlev and A.S. Malakhov	277
Synthesis and Properties of Iron-Based Magnetic Nanoparticles	
N. Sashko, E. Vaitulevich and T. Yurmazova	282
3D AlOOH/Fe Micro/Nanostructures: Facile Synthesis, Characterization and Application for Arsenic Removal	
O.V. Bakina, E.A. Glazkova, N.V. Svarovskaya, A.V. Berenda and M.I. Lerner	288
Study of Hematite Mineral Samples in Purification of Aqueous Solutions from As³⁺ and Fe³⁺ Ions	
D.V. Martemianov, S.P. Zhuravkov, M.B. Khaskelberg, P.E. Slyadnikov and L.V. Nadeina	295

Chapter 5: Measurement

Laser Monitors for High Speed Imaging of Plasma, Beam and Discharge Processes	
M.V. Trigub, S.N. Torgaev, G.S. Evtushenko and V.V. Drobchik	303
Testing of Plasticity of Protective Coatings under Pure Bending	
K. Bakhrunov	308
The Use of Laser-Doppler Vibrometry for Modal Analysis of Carbon-Fiber Reinforced Composite	
A.V. Filippov, V.A. Krasnoveikin, N.V. Druzhinin and V.E. Rubtsov	313

Investigation of Acoustic Parameters for Structural Health Monitoring of Sandwich Panel under Cyclic Load	
A.V. Eremin, M.V. Burkov, A.V. Byakov, P.S. Lyubutin, S. Panin and S.A. Khizhnyak	319
Application of 3D Computed Microtomography for Investigating the Microstructural Defects of Carbon Fiber Reinforced Composite Made by 3D-Printing	
A.V. Filippov, V.E. Rubtsov, S.Y. Tarasov and V.A. Beloborodov	324
Monitoring the Palladium Contents in the Tailings Using Stripping Voltammetry	
E.M. Ustinova, E.V. Gorchakov and A.V. Melkova	328
Determination of Platinum and Palladium in the Presence of other Metals in the Mineral Raw Materials	
E.M. Ustinova and E.V. Gorchakov	332
Optical Spectroscopy of Barium Fluoride Crystals under Simultaneous Pulsed Excitation	
V. Shtan'ko, E. Chinkov, V. Kolomin, T. Ivanova and S. Stepanov	338

Chapter 6: Materials and Technologies in Optoelectronics Production

Effects of Doped Oxygen on ZnWO₄ Crystal Luminescence	
V.M. Lisitsyn, Z.T. Karipbayev, L.A. Lisitsyna, A.K. Dauletbekova, I.A. Tupitsyna, A.T. Akilbekov and M.V. Zdorovets	345
Temperature Distribution on the Surface of LED Lamps	
S.M. Lebedev and S.Y. Gurin	351
Parameters Investigation of Phosphors for Solid State Lighting	
Y.V. Ryaplova, V.S. Soldatkin, K.N. Afonin, V.I. Tudev and A.A. Vilisov	357
Luminescence Spectrum of Yttrium Aluminum Garnet Based Phosphors with Initiating by Different Sources of Optical Excitation	
V.M. Lisitsyn, S. Stepanov, H.A. Abdullin, A. Tulegenova, Y.Y. Ju and V. Kolomin	362
Cathodoluminescence Properties of Commercial Phosphors for White LED	
E.F. Polisadova, V.A. Vaganov, D.T. Valiev, H.A. Abdullin, A.A. Marhabaeva and D.D. Kerimbaev	367
Pulsed Cathodoluminescence of LiF Crystals Doped with W and Ti	
V.I. Korepanov, P.V. Petikar, G.H. Ge and Y.Y. Li	372

Chapter 7: Modeling and Computational Procedures

Estimation of Thermodiffusion Influence on Formation of Transition Zones during Brazing	
M. Chepak-Gizbrekht	379
Acoustic Properties of Isotropic Hypoelastic Materials with Residual Technological Stresses	
V.N. Demidov	384
The Impact of the Dislocation Density, Lattice and Impurity Friction on the Dynamics of Expansion of a Dislocation Loop in FCC Metals	
Y. Petelina, S. Kolupaeva, A. Kayuda, A. Schmidt, O. Vorobyeva and A. Petelin	390
