Preface AMRMT & MSME 2021

Preface ICMMPM 2021

Chapter 1: Materials Synthesis and Processing Technologies

Fabrication of Titanium Coatings for Medical Device Applications H. Zhou and C. Peng	3
The Effect of Laser Focus Shift on the Morphology of Melt Pool and Microstructure in Selective Laser Melting AlSi10Mg T.T. Wang, Z.H. Hu, S.W. Liu and H.H. Zhu	9
Tensile Properties of Additively Manufactured Continuous Glass Fiber Reinforced Onyx J.H. Li, Y. Durandet, X.D. Huang and D. Ruan	15
Synthesis of Graphene/Silver/Molybdenum Disulphide Composite for Supercapacitor Application G.T.S. Yao, H.M. Yen, L.K. Lun, O. Wei and J.X. Lim	21
Interfacial Phenomena and Microstructure of Copper/Steel Bimetal Structure Produced by a New Hybrid Additive Manufacturing Process Combining Selective Laser Melting and Directed Energy Deposition W.Q. Zhang, B.P. Zhang, H.F. Xiao and H.H. Zhu	31
Microstructure and Tensile Properties of Nickel-aluminum Bronze Coatings on Stainless Steel SUS630 L. Zhao, B.R. Du, K.L. Li, J. Yao and R.C. Ding	37

Chapter 2: Properties and Application of Materials

Research on Tribological Performance of Inconel 625 with Micro-textures Y.R. Chi, P. Luo, C.L. Ding, H. Xu, J.Y. Chen and Y. Li	45
Application of Modified CNFs in High Energy Nitramine Gun Propellant R.T. Wang, Y.B. Wang, L.Y. Zhao and W.D. He	51
Austenite Grain Growth Law of High-strength Steel for Offshore Engineering Z.P. Han, W.H. Sun, G.B. Li, P. Zhou, D.X. Xia, X.C. Li and Y.C. Pei	57
Coarse-graining Mean and Displacement of Granular Matter G.Q. Xie and H.Y. Wang	63
Effects of Oxygen Vacancy and Al-Ag doping on Electrical Properties of ZnO Resistance Valve X. Hu, C. Ding and L. Feng	69
Experimental Study on Sliding bearing of Sink Roll in Galvanizing Line W.X. Jiang and W. Wang	75
Synthesis and Photocatalytic Application of Mn₃O₄/CdS Composite Z.Y. Liu, L.F. Qiu, S.W. Duo, J.Y. Lu and Y.Y. Hou	83

Chapter 3: Metal Material Processes and Manufacturing

Numerical Analysis Growth Kinetics of Dendrite Tip during Laser Welding Nickel-Based Single-Crystal Superalloy Part I: Supersaturation-Driven Dendrite Growth Z.G. Gao	91
Numerical Analysis of Nucleation and Growth of Stray Grain Formation during Laser Welding Nickel-Based Single-Crystal Superalloy Part I: Morphology and Size of Dendrite Growth Z.G. Gao	101
Research Progress in Thermal Conductivity of Polymer Matrix Composites F. Zhu, Z.M. Fan, L. Zhang and Y.F. Wang	111

Research on the Influence of the Pitch of the Spiral Toolpath on the Forming Quality of Single Point Increment Forming H. Zhu, C. Ao and D.W. Jung	117
Developing Methods of Forming Sheet Materials Using Incremental Forming N. Kosimov, B. Krishna Singh, S.J. Li, W.N. Chen, J. Moon and D.W. Jung	123
Incremental Sheet Forming Simulation of Aluminum Alloys for Industry Level Production B. Krishna Singh, M. Murugesan, S.J. Li, W.N. Chen, J. Moon and D.W. Jung	129
Effect of Manufacturing Parameters on the Physical and Dimensional Properties of Single Jersey and Lycra Single Jersey Fabric M.M. Rahman, J. Sultana, M.S. Hossain and M. Adeel	135
