## Preface

## Chapter 1: Structural Alloys

|                                                                                                                                                                                                  |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Tribological Properties of Spark Plasma Sintered Ti48Al48Cr2Nb2 Alloy</b><br>M.R. Mphahlele, P.A. Olubambi and E. Olevsky                                                                     | 3  |
| <b>A Study on Alloy Characterizations for Long Term Service Based Effects on Materials</b><br>A. Alduaij and H. Sundaram                                                                         | 11 |
| <b>Effect of Adding Minor Cu Amounts on Stability of Constituent Phases in Al<sub>x</sub>CrFeMnNi High Entropy Alloy Microstructure</b><br>M. Navazani, S.R. Kada, D. Fabijanic and M.R. Barnett | 19 |

## Chapter 2: Polymers and Composites

|                                                                                                                                                                                                           |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Surface Finish Optimization of Vapor Smoothened PLA Fabricated Parts with Microstructural Analysis</b><br>C.E. Alviar and B.A. Basilia                                                                 | 29 |
| <b>Investigation of the Mechanical Properties of Urethane Dimethacrylate (UDMA) Reinforced with Abaca Cellulose for Vat Photopolymerization (VP)</b><br>C.A. Dela Cruz, J.A.M. Medenilla and B.A. Basilia | 35 |

## Chapter 3: Materials Corrosion and Corrosion Protection

|                                                                                                                                                                                                                                                              |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>TiO<sub>2</sub>- Polyurethane Cocopol Blend Nanocomposites as an Anticorrosion Coating for Mild Steel</b><br>A.G. Ruda, M.T. Bonilla, K.S.M. Ubas, A.C. Tilendo, D.J.E. Estrada, R. Capangpangan, R.M.T. Cumba, J.P. Labis, N.L.B. Sayson and A.C. Alguno | 43 |
| <b>Effect of Gadolinium Content on the Microstructures and Corrosion Properties of Mg-4Zn-3Gd Alloy</b><br>M. Khanam, C. Kumar Roy and H.M.M. Al Rashed                                                                                                      | 51 |
| <b>Corrosion Inhibitive Effects of Orange Juice for Brass in Acidic Medium 5M H<sub>2</sub>SO<sub>4</sub></b><br>L. Lebea and M. Pita                                                                                                                        | 59 |
| <b>Investigation of the Adsorption Characteristics of <i>Theobroma cacao</i> Peels Biomass Inhibitors on Mild Steel Surfaces by EIS, SEM-EDX, XPS, and Chemical Studies in Acidic Media</b><br>Y. Yetri, G. Gunawarman, R. Rakiman, A.Y. Rivai and I. Nur    | 69 |
| <b>Effects of Sn on Corrosion Resistance of Rare-Earth-Free Mg-2Zn Alloy</b><br>A. Tasnim, C. Kumar Roy and H.M.M. Al Rashed                                                                                                                                 | 83 |

## Chapter 4: Numerical Investigations and Modelling

|                                                                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Mitigation of Erosion Wear Produced by Fly-Ash Slurry on 90° Elbow by Changing the Cross-Section Shape and Area Ratio</b><br>L. Ananya and V.K. Patel                                     | 93  |
| <b>Integrated Phase Field and Machine Learning Study of Microstructure Evolution during Interface-Controlled Spinodal Decomposition</b><br>O. Ahmad, R. Maurya, R. Mukherjee and S. Bhowmick | 101 |
| <b>Exploring Sintering, Densification, and Mechanical Behaviour of Invar Alloys through Molecular Dynamics Simulations</b><br>S.K. Sahni, S. Bhowmick and A. Upadhyaya                       | 107 |
| <b>Thermostamping Simulation of a Carbon Fiber-Reinforced PAEK Composite Stringer</b><br>A. Haris, Y.W. Cheah and W.S. Teo                                                                   | 113 |
