

Table of Contents

Preface, Sponsors and Committees

Chapter 1: Materials Design

Design Analysis of Vertical Lathe Auxiliary Equipment for Large Pressure Vessel Processing H.N. Xing, X.P. Zhang, Z.L. Liu and L.Q. Jin	3
Effect of Ball Milling on Reaction Mechanism between Ti and B₄C and Subsequent Densification H.H. Wang, S.C. Sun, D.Y. Wang and G.F. Tu	8
Study on Polymer Powder Solid Extrusion Forming B.S. Mu, Z.X. Fan and D.C. Barton	13
Design of a Resonant Accelerometer J. Li, S.C. Fan and Z.S. Guo	18
Light Gauge Steel-Light Weight Aggregate Concrete Structure and Application X.P. Wang, T. Han and F. Yin	23
Influence of Solution Treatment on Atomic Diffusion and Mechanical Properties of AZ80 Magnesium Alloy J. Zhang, Z.H. Wang, W.C. Sun and L.B. Niu	27
Optimization of Resinification of Liquefied Products from Trash ACQ-Treated Antiseptic Wood F. Ding, Y.Y. Qiu, Z.G. Liu and Q.H. Zhang	31
Study on Deformation Performance of PVC Membrane Materials under Biaxial Cyclic Tensile Loads J.W. Chen, H.Q. Hou and W.J. Chen	36
The Plant Vitality and Air Anion Generator with its Use in Urban H. Lin and Z.Y. Bai	41
The Visualization Research on Cavitation Flaw of the Jubilance Toy's Part with Different Wall Thickness Y. Li, Y.X. Zhang, Z.Q. Sun and R.Z. Zhang	45
Optimization of Air Cooling Ribs for 1.5MW Wind Rotor Based on CFD M. Qin, M.W. Ge, W.J. Shi and S.C. Xiao	50
The Study on Tourism Development of Intangible Cultural Heritage - Taking Weifang City as Example C.X. Lu	55
The Simulated Analysis in the Computer on the Effect of Pile and Soil Working Together about the Push-Extend Multi-under-Reamed Pile Y.M. Qian, J.J. Ren and X.S. Yin	59
Lane Detection Algorithm Based on Genetic Algorithm and its Parallel Computing Realization X.H. Zhang, L. Qing and M. Li	65
A Disturbance Rejection Strategy for Asynchronous Motor of the Electric Vehicle in Speed-Open-Loop Operating Mode G. Zheng, J.D. Wu, M.W. Kuang, D. Zhang and Y. Yang	71
A Study on the Selection of Logistics Outsourcing Service Provider Based on Analytical Hierarchy Process Z.Y. Huang and Q.L. Zhao	76
Density Functional Theory Study of Oxygen Carrier Mn₃O₄(001) Surface Reaction with CO W.Y. Li and Q.L. Chen	81
Microstructure and Wear-Resistance Property of Laser Cladding Layer on GH710 B. Hu, F.Y. Hu, X.R. Huang, D.X. Yi, P.Z. Zhao, A.Y. Cui, C.L. Lu and P.F. Fu	88
Simulation of Ride Comfort of Tracked Vehicle Based on Road Random Excitation P.J. Liu, L. Hou, W.G. Lin, X.Y. Yu and W. Huang	93

Study on Cloud-Based Service Platform for Mass Customization J.H. Che, Q. Zeng and S.Y. Zhang	98
Simulation of Ring Blank Drawing by Finite Element Method T. Igarashi, Y. Ito, W. Natsu and T. Kuwabara	102
Broadband Unidirectional Electromagnetic Mode along an Arbitrary Surface K.Y. Tao	111
A High-Performance Heat Exchanger Using Modified Polyvinylidene Fluoride-Based Hollow Fibers B. Li and H.H. Fan	115
Chloride Penetration Resistance of Concrete Structures under Compressive Load F.X. Jiang, Y.T. Wang, T.J. Zhao and L.L. Liu	120
Study on the Application of Modified Chitosan in Cherry Preservation Y.F. Li, S.F. Zhu and X.J. Zhu	124
Application of Association Rules Mining in Employment Guidance L. Wang and C.X. Yi	129
Preparation and Characterization of CdS by Evaporation and Cu₂S Complex Photoelectric Thin Films S.N. Sun, S. Liu, F. Xu, L.F. Cao, J.J. Cao, J. Wang, L.M. Ma and H.N. Cui	133
Experimental Study on the Law of the Ground Surface Movement on the Old Goaf in Different Mining Conditions X.Y. Liu	137
Research on Green Supply Chain Operating Model of Electronic Manufacture Industry S.W. Ji, T. Deng and Y.T. Dong	142
Experimental Research on Non-Magnetic Steel 30Mn27Al4V C.S. Li, X.F. Xu, B. Ma, C.G. Yao and M. Wang	147
Experimental Study of Anti-Jamming Problem for Frequency Control System Y.Y. Chen and J.C. Zhang	156
Technical and Economic Analysis of Polyvinyl Alcohol Fiber Ferrocement Mortar in Reinforcement Project L.T. Bu and W.H. Wu	161
A Solar Cell Made by a Hybrid Film of P3HT and Cubic-Like PbS P. Wang, L.B. Fan, Z.H. Zhang, Y. Lei, Y.G. Zhang and P.J. Li	166
Experimental Study on the Seismic Performance of Steel Frame with Reinforced Beam Ends Y.T. Wang, F.X. Jiang, Y. Wang and X.L. Du	170
Field Experiment Study on Ventilation Characteristics of Block Stones Embankment in Qinghai-Tibet Railway X.L. Bian, P. He, Q.B. Wu and Y.H. Shi	174
The Mechanism of PEO Process on Al-Si Alloys in Zirconate Solution P. Wang, D.X. Liu, J.P. Li, Y.C. Guo and Z. Yang	178
Analysis of the Development of Xinjiang Electronic Government A. Abuduaini and B.W. Sun	182
Based on the CAD / CAE Technology Product Simulation Design System Y. Zhao	186
Impact Analysis of Different Cable Types on Saddle-Shaped Cable-Net in Construction Process Z.S. Liu and R. Zhang	190
Improve Manufacturing Execution & Cycle Time through Database LEAN Optimization F. Xiong, J. Yao and J.M. Li	194
Study on Energy Saving Coatings with Phase Change Material B.P. Yang, Y.H. Li, J.F. Cui, J.H. Guo and Y.P. Zhou	198
Investigation of Friction Temperature in Railway Disc Brake W.H. Nong, F. Gao, R. Fu and X.M. Han	202
Aided Navigation System Research Based on Multi-Information Fusion X.H. Zhang, L. Qing and M. Li	207
Effects of Passive Backup Force on Delamination in Drilling Composite Materials Using Twist Drill C.C. Tsao	213

Research on Mechanism and Model of Cutting Chatter Based on the Cutting Parameters J.H. Li, Y.X. Liu, H.L. Xie, W. Wang and B.Z. Feng	217
A Statistical Experimental Design to Degradation of Aqueous Methyl Orange Solution with Photocatalyst of Ti-TiO₂ Nanotube Array Y.C. Xu and H. You	221
Modeling Analysis and Optimization of Sand Casting Process Q.M. Chang, J. Yuan, Y.K. Yang and X. Chen	226
Structure and Electrochemical Performance of Cu and Al Codoped Nanometer α-Nickel Hydroxide J. Bao, Y.J. Zhu, Q.S. Xu, Y.H. Zhuang, R.D. Zhao, Y.Y. Zeng and H.L. Zhong	230
Dynamical Behaviors of Nonlinear Viscoelastic Piles with Damage D.F. Sheng	234
Study on Calcium and Magnesium Fouling of Vacuum Membrane Distillation B.A. Li, X.J. Liu and X.F. Gao	240
Blind Watermarking for CAD Models Based on Identification X. Liu, Y. Zhang, N. Liu and Z.Y. Chen	245
Coating Iron Oxides on Kaolinite for the Adsorption of Fluoride W.J. Xiang	250
ILP Model Research of Electronic Manufacturing Enterprise Green Supply Chain Inventory & Transportation Decision-Making S.W. Ji, W. Wang and Y.T. Dong	255
Vacuum Exhaust Processes in Vacuum Pressure-Swing Adsorption for Upgrading Methane in Ventilation Air Methane Y.L. Li, C.Z. Zhang, Y.S. Liu, X. Yang and Y. Meng	260
Study on the Distribution and Coordination Mechanism of Benefit for Parts Involved under the Agro-Product Supply-Chain Environment Z.W. He, S.F. Lei, F. Liu and L. Gui	266
Solution-Phase Synthesis of Single-Crystalline Mn₃O₄ Nanorods with Paramagnetic Properties Y.G. Zhang, P.J. Li, X.Y. Zheng, W.J. Fa, L.B. Fan and F.L. Yang	270
Influence of Different Type Winding Clamps on a Transformer Losses Y.F. Wang, J.H. Chi and Z.H. Song	274
Tire Tread Cutting Machine Design Exploration L.J. Qiu	278
The Symplectic Method for the Bending of Symmetrical Laminated Composite Plates with Clamped Boundary J.G. Song and Y.Z. Yang	282
Influence of Solidification Process on Calcined Kaolin Geopolymeric Powder Y.M. Liew, H. Kamarudin, M.M. Al Bakri Abdullah, M. Binhussain, L. Musa, I. Khairul Nizar, C.M.R. Ghazali and C.Y. Heah	286
The Influence of Supported and Restrained Elastic Coefficient on the Stability of Fluid Conveying Pipe R.D. Bao	292
Thermal Treatment to Improve the Antioxidant Activity of Half-Fin Anchovy Pepsin Hydrolysate and Application in Beef Storage R. Song, R.B. Wei and H.Y. Luo	299
The Discussion about Thermal Stress Analysis of Spherical Plain Bearings Y.F. Huang, X.J. Shen, S. Lv and L. Cao	305
Green Supply Chain Comprehensive Performance Evaluation in Electronics Manufacturers S.W. Ji, Q.X. Xie and Y.T. Dong	309
Optimization of Conditions for Calcium Lactate Nano-Particle Production by Chemical Precipitation Y. Wang, L. Huang and J. Wu	314
Study on Direct Chill Continuous Casting of 3003/4004 Clad Slab Z. Ren, X.R. Zhu, J.B. Sun, J.J. Tang and X.B. Zhao	318
Corrosion Behavior of New Weathering Steel in the Environment Simulating Coastal Industrial Atmosphere W.F. Cui, C.J. Shao and C.M. Liu	322

Study on Constitutive Relationship of Ti-6Al-4V-Rare Earth Titanium Alloy during High Temperature Deformation	
Y.M. Zhang, P.F. Zhao, L. Zhang and Y.J. Zhou	327
Green Synthesis of Silver Nanoparticles Using Chitosan for 4-Nitrophenol Reduction	
X. Yang, D. Geng, L.J. Weng, Y.Y. Han and W.J. Yang	332
The CFD Study of Velocity of Tubes and Power Consumption in the Tank	
B. Jiang, C. Ge and L.H. Zhang	336
Power Generation from Randomly Oriented Electrospun Nanofiber Membranes	
J. Fang, X.G. Wang and T. Lin	340
The Novel Parameter Selection of Particle Swarm Optimization	
Z. Li and X.L. Qu	344
Altering Spectrum Method in Temperature Measurement Using Infrared Imager in Complex Background Environment	
Z. Yang, S.C. Zhang and L. Yang	348
Supplier Selection and Evaluation in Environmental Purchase	
F.M. Hou	352
Effect of Mechanical Activation on Kaolin-Based Geopolymers	
C.Y. Heah, H. Kamarudin, M.M. Al Bakri Abdullah, M. Binhussain, L. Musa, I. Khairul Nizar, C.M.R. Ghazali and Y.M. Liew	357
Special and New Monolithics	
N. Angelescu, S. Amziane, C. Ionita, I. Ion and D. Stanciu	362
Study and Current Environmental Situations Evaluation on a Coal Washing and Separating Project	
R.J. Su	366
The Design and Implementation of the Elder Fall Remote Monitoring System in the Smart Home	
W. Fu, L. Xiao and P. Wang	370
Synthesis of Monodispersed CeO₂ Nanoparticles Induced by Microwave Irradiation in Alcohol/Water Mixed Solvent and their Application in CMP	
Y. Chen, W.B. Mu, Z.F. Tang, Y.J. Zhu and Z.G. Chen	376
Preparation of a New Flame Retardant Based on Phosphorus–Nitrogen (P–N) Synergism and its Application on Cotton Fabrics	
Z.Q. Dong, D. Yu and W. Wang	381
A Study on 3D Modeling-Mapping Technology in Underground Pipelines Detection	
L.W.J. Zhang, N. Lin, K.S. He, D.W. Tao, X.G. Bi and R.Y. Gong	385
Effect of Hot Air Aging on Structure and Properties of Raw Natural Rubber	
B.L. Zhang, W.Y. Deng, P.Y. Wang, H.H. Huang, L. Ding and Y.Z. Wang	389
Fabrication Polyurethane/Expanded Graphite Powder Composite Antistatic Sponge by <i>In Situ</i> Polymerization	
D.Q. Chen	395
Defuzzification Methods for Fuzzy Inventory Model	
Q.X. Li	399
Electronic Properties and Magnetic Phase Transition in Half-Heusler Compound Fe_{1-x}Cu_xMnSb	
B. Wu, X.D. Yang and S. Zhang	403
Investigation on the Influence of Machining Fluid on Processing Characteristics in Micro-EDM	
S. Li, W. Natsu, T. Masaki and Z.Y. Yu	407
Effect of Cooling Rate and Nb Composition on Non-Isothermal Austenite Grain Growth Kinetics in Nb-HSLA Steel during Hot Rolling	
M.A. Mochtar, A. Manaf and E. S. Siradj	414
Super Gravity Dam Generalized Damage Study	
Y.J. Wang and W.H. Zhang	421
The Identification of Total Exports Peak Periods for Shaanxi Province	
Y. Zheng and J. Zhang	426
Rare Earth and Tetra Hydroxymethyl Phosphonium Sulfate Combination Tanning	
Y. Li, S.X. Shao, L. Jiang and K.Q. Shi	430
FEM Design and Experiment of a Micro-Gripper Based on Piezoelectric Material	
Z.L. Long, L.F. Zhang and J.G. Zhang	434

Experimental Research of a Flywheel Hybrid Vehicle X. Yang	439
A Review of Auto-Guided-Vehicles Routing Algorithms M. Dahari and Y. Liu	443
Design and Simulation of the New Bionic Soil Extruding Head D.H. Chen, X. Lu, X.W. Chai, B.G. Wang, H.X. Guo and Y.H. Ma	457
Numerical Simulation of Temperature Field in the Cyclone P.Y. Xiao and Z.W. Zhang	462
Multi-Sensor Data Fusion for MEMS Gyroscope of Seeker Y.F. Ren, Y.W. Ge and X.C. Bai	467
Investigation on Physical Properties of Ti-Based Quasicrystalline W.Q. Liu, X.L. Wang, S.S. Zhang and L.M. Wang	471
Comparison Study for Finished Accuracy of WEDM Process X.Y. Zhang, D. Wang and X.J. Li	476
Non-Precious Metal Catalytic Materials for Auto-Thermal Reforming A. Hsu, H. He and L.H. Huang	481
Carbon Fiber Frame for Military Use H. Yang, X.H. Zhang and X. Hu	488
Application of Multi-Monitoring Information for Bridge Safety Evaluation Y.J. Lee, J.C. Wen, C.H. Chen and Y.Y. Lin	493
Research to the Uniformity of Ni-Co Alloy Electroforming H.Z. Pei, J. Zhang, G.L. Zhang and P. Huang	497
Application Study of Cationic Polymethyl Acrylate Emulsion as Papermaking Sizing Agent Y.S. Ma, Y.F. Chen, X.H. Sun, C.J. Zhao and S.J. Nie	504
Organizational Machines Layout and the Application of Individual Features on the Specific Production Respectively Assembly through the Simulation K. Krajčová, F. Pecháček and K. Velíšek	508
The Influence of Curing Periods on the Compressive Strength of Fly Ash-Based Geopolymer at Different Aging Times O. A. Abdulkareem, M.M. Al Bakri Abdullah, H. Kamarudin and I. Khairul Nizar	512
The Machining Process and Stress-Strain Analysis of the Imprinter Bottom Roller Based on FEM H.W. Liu, L. Huang, W.C. Zhao, L.P. Chen and N. Liu	517
Adsorbents for Oxygen-Bearing Low Concentration Coal Mine Methane Enrichment by Proportion Pressure Swing Adsorption Y.L. Li, Y.S. Liu and X. Yang	521
Safety Levels of RC Frame Building in Wenchuan County Town D. Wu and Y. Xiong	525
Research and Simulation on Metal Cutting Process X.J. Nie and L. Wang	531
Strengthening and Toughening Efficiency of Calcium Carbonate Whisker-Reinforced Portland Cement with or without Silica Fume M.L. Cao and C. Zhang	536
Fabrication of Silver Shells onto Silica Sphere for Infrared Emissivity X.Y. Ye, C. Zheng, X.Q. Xiao and S.G. Cai	541
Levels and Possible Sources of Formaldehyde in Campus M.L. Weng	546
Thermal Wrinkling Analysis of the Platelet Thermal Management Devices F. Zhang, K. Xiao and W.Q. Liu	550
Multi-Depot Vehicle Routing Problem with Hybrid Genetic Algorithm L.W. Dang and X.M. Sun	555
Sub-Surface Cutting for Rapid Prototyping Y.H. Chen and J.N. Lu	561
Analysis of Expert System in the Field of Machine Design H.Q. Luo and M.Y. Wang	565
Direct Synthesis and Characterization of Carbon Nanotube Films Prepared by Premixed Ethanol Flame J.L. Lu, G.L. Wang, L.F. Sun, F.Q. Gao, F. Yu, H.Q. Zhou and G. Wang	569

A Study on the Weatherability of Weathering Steel after Atmospheric Corrosion Z.F. Wang, J.R. Liu, L.X. Wu, H.E. Huang and Q.X. Zhou	574
An Economic Analysis and Calculation for Selecting of the Phase-Change Heat Storage Materials Used in the Roof with a Solar Energy Storage Ventilation Systems J. Zhao, J. Lu, P. Chen, Y.Q. Zhang and L. Liao	578
Numerical Simulation of a Coke Oven D.D. Hao, W.S. Liu, L.P. Dang and H.Y. Wei	586
The Markov Skeleton Process Modeling on the Management and Decisions of New Technique Popularization Y.W. Zhou and H.H. Fan	590
Concretes for Special Applications N. Angelescu, S. Amziane, C. Ionita, I. Ion and D. Stanciu	595
Effect of Orientation Relationships on the Stiffness and the Strength of the Dual-Phase Metals: Molecular Dynamics Simulation Y. Zhang, Y. Zhao and F.C. Zhang	601
Enzymatic Extraction of Polysaccharides from Laminaria Japonica and their Free Radical Scavenging Activity and Antimicrobial Activity Evaluation J. Chen, M.P. Tian, S.G. Deng and X.B. Fang	605
Running around a Gyrotropic Material K.Y. Tao, Q. Wang and J.P. Zhai	611
Discharge Behavior Characterization of 12-Phase AC Arc and its Application Y.C. Yao, T. Watanabe and K. Yatsuda	615
Micro Mechanism of BaTiO₃ Ferroelectric Phase Transition Described by Electron Cloud Model C. Fang and L.Y. Chen	619
Study on Knowledge Integration Social Network of Scientific Research Team in University Y.F. Liu, Y.J. Yuan and C.G. Zhao	623
Using Ag95Al-Ti to Braze Si/SiC and Invar Alloy H. Zhang, J.H. Huang, H.T. Zhao and X.K. Zhao	628
The Research of Phase Method of Laser Ranging Measurement System J. Huang and B.Q. Dong	632
Preparation and Morphological Investigation of Sulfur Microcapsule Produced in Scale-Up Process via <i>In Situ</i> Polymerization Z.S. Zhang, H.J. Xiao, Q.J. Zhao, J. Li and S.J. Wang	636
Vector Geographic Data Encapsulated Based on ArcSDE L.J. Zhang and F. Zhang	640
Study on Supplier Selection and Evaluation in Serviced-Oriented Manufacturing Network Based on NN R. Guo, R. Mo and H.B. Sun	644
A Novel VPSA Process for Ventilation Air Methane Enrichment by Active Carbon Y.L. Li, Y. Meng, Y.S. Liu, X. Yang and C.Z. Zhang	648
The Study on the Periodic Left-Handed Materials of Convex-SRRs Structure J.F. Wu, Y.T. Zhang and H.C. Liu	654

Chapter 2: Mechanical Dynamics and Its Applications

Study of the Online Automatic Non-Destructive Detecting System of the Cracks in Vibrating Screen B.J. Yan	661
The Finite Element Method of Dynamic Analysis on the Structure of Simultaneous Effect of Static Load and Sinusoidal Load B.Q. Zhang and H.Z. Wu	665
Load Analysis of Wheel Hub Bearing in Wheel Driving System with Exterior Rotor Motor J. Wu and L. Xiong	670
A Survey of Outdoor Sportswear Requirement for Chinese Consumers Z. Liu	676
Modeling of an Underactuated Nonlinear Double-Container Overhead Crane W.M. Xu, Y.L. Li, J.X. Chu and X.W. Zhou	680

A Method for Modal Parameter Identification of Time Varying Vibration Systems Z.Y. Wu and K. Shi	688
Optimum Design of Double-Well Pumping Units Based on Calculation of MATLAB Optimization Toolboxes W.T. Qu, D.S. Liao, T. Ren and W. Sun	694
Modeling and Kinematics Simulation of a Six-DOF Segment Erector for Tunnel Boring Machine Based on Virtual Prototype G. Li, L.D. Zhu, J.Y. Yang and W.S. Wang	699
Dynamic Characteristic of MEMS Inertial Device by Simulation J. Wang, S.J. Liu and L. Zhang	703
With the Backlash Dynamics Simulation of a Crank-Slider Mechanism S.J. Bo and K. Ji	707
First Integrals of Discrete System Based on the Principle of Jourdain N. Zhang and G.L. Zhao	711
A New Dynamics Model of Structure-Changing Multibody Systems with Flexible Appendages Z.N. Yu, W.L. Li and Y.S. Zhao	715
Efficiency Research of the Equipment of Water Pumping and Gas Production for CBM Well T. Ren, Y.X. Guo, W.T. Qu and Y.P. Sun	720
The Dynamics Analysis on a Type Palletizing Robot J.Q. Li, S.X. Zhu and Q.S. Lei	725
Research on Hydrodynamic Characteristics of Underwater Gliding UUV Based on the CFD Technique P. Guang, B. Hu, X.X. Du and Y.Y. Wang	729
Prestress Force Identification Based on Forced Vibration Tests of Eccentrically Prestressed Concrete Beam J.L. Xu and Z. Sun	733
Research on Dynamic Characteristics of Integrated Bit-Rock-Drillstring-Well System R. Fan, C.S. Song, Z. Liu and W.J. Liu	739
Dynamic Analysis of Rubbing Rotor System Based on Hertz Contact Theory Y. Liu, Q.L. Li, Y.Z. Chen and B.C. Wen	743
Dynamic Simulation Analysis of Gatling Gun Based on Virtual Proto Model T. Li, R.L. Wang and L.H. Liu	748
Dynamics of a Crossed Beveloid Gear Pair with Time-Varying Mesh and Backlash Nonlinearity R. Fan, C.S. Song and W.J. Liu	752
Study on the Effect of Chassis Parameters on Light-Bus Steady State Handling Based on ADAMS R. Guo, Q.L. Yu and S. Qiu	758
Study on Typical Traditional Silk looms in Shanxi Province W. Lu and X.M. Yang	764
Using Load Method to Determine Bifurcation Point and Branch Path Based on FEM L.Z. Ma, J. Liu and X.L. Diao	768
Simulation of Shaper Kinematics and Dynamics Rules Based on MATLAB F. Liu, S.X. Lin, A.B. Wang and L.Y. Ni	772
Structural Design and Response Analysis of Piezoelectric Power by Flow-Induced Vibration J.C. Sun, H.J. Chen and P. He	778
An Analytical Method for Vibration Fatigue of Cracked Beams W.G. Liu and H.L. He	783
Research on Nonlocal Elastic Kernel Function under Ultrasonic Excitation of Ceramics Materials P.Y. Bian, B. Zhao and Y. Li	787
Solution to the Outlet Curve and Optimal Vibration Parameters of Vibrating Feeder J.F. Xia and Y.S. Wang	791
Safety Analysis for High Speed Bogie Technologies of CRH3 EMU S.L. Liang, R. Luo and P.B. Wu	797

Dynamic Analysis of Space Structure Deployment with Transient Thermal Load J. Wu, Z.H. Zhao and G.X. Ren	803
Slider-Crank Type Cluster Wells Pumping Motion and Dynamics Analysis T. Ren, D.S. Liao, W.T. Qu and W. Sun	808
Stability of Target Area Support System for SG-III Facility M.C. Wang, G. Chen, Y.L. Xu, W.K. Wu, M.Z. Zhu, J. Wang, S.R. Yu and X.Q. Chen	813
The 3D Incompatible Element Modeling of Flexible Body in Multibody System Dynamics D.Z. Cao, Z.H. Zhao, G.X. Ren and H.F. Qiang	818
A Generalized Cholesky Decomposition for Interval Matrix Z.L. Zhao, W. Li, C.Y. Deng and H.P. Wang	825
Pure Statistical and Multi-Level Industrial Pairs Trading: Bridged by Statistical Characters S.S. Wang, Y.G. Mai and H.Y. Ning	829
Synthetic Process Research and Development of Resveratrol Y. Zhang, Y.Y. Zhang, C.J. Yu, C.F. Wang and S.C. Zhao	833
Optimum Design of Kitchen Garbage Truck Lifting Mechanism Based on Virtual Prototype Z.C. Wang, D.W. Liu, R.C. Jiang and X.K. Ge	837
Numerical Analysis of a Slope Stabilized with Anchors S.W. Sun, J.C. Wang and Z.P. Zhang	841
Research on Optimization Method for Reuse Degree of Loader Bucket Module-Base Y.H. Chen and D.J. Zhou	845
Numerical Study on Laser Cladding of BT20 Alloy Q.M. Chang, J. Yuan, Y.K. Yang, X. Chen, C.J. Chen and S.Q. Bao	850

Chapter 3: Mechanical Transmission Theory and Applications

Probe Into the Scheme of the Structural Design of Stereoscopic Garage Y. Mei and M. Liang	857
Study on Teaching Method Reform of the Professional Course in Applied Undergraduate Colleges - Take Automobile Marketing Major as an Illustration H.G. Zhang	861
A Self-Adaptively Loading Mechanism for Planetary Cylindrical Roller Traction Drives D.S. Chen and X.W. Du	865
Checking Existence of Tolerance Solutions of Interval Linear Equations via Mixed Integer Programming H.P. Wang, W. Li, Q. Wang and Z.L. Zhao	872
Design for NGW Type Planetary Gear Transmission X.Z. Li, B.L. Yin, C.S. Liu and S.Y. Chen	876
Modeling and Simulation on the Control System of a Hydro-Mechanical Stepless Steering Mechanism Z.L. Han	880
Analysis of Geometric Characteristics of Scroll Compression Chamber for Scroll Fluid Machine X. Ma, H. Zhang, F.Q. Wang and Y. He	884
Application Research of a New Overrunning Clutch in Belt Conveyor T.L. Xue	890
Analysis of the Steering Mechanism Based on Spatial Linkages of an Underground Vehicle L. Dong, B.K. Wang and R.M. Shi	894
Research on Transmission Control Unit Testing for AMT of Heavy-Duty Commercial Vehicle Y.L. Lei, H.B. Zeng and X. Jiang	899
Application of Symmetrical Equations in Parametric Design of Involute Gear S.T. Zhuang, Y.Y. Ge and Q.M. Yang	903
Selection of the Measuring Teeth Number of Involute Cylindrical Gear Common Normal Q.C. Yang, Z.L. Qian and Y.J. Gu	908
Research on Kinematics for Planetary Bevel-Gear Trains B.L. Yin, X.Z. Li, Y.B. Chen, X.Y. Guo and Y. Liang	913

Study on Meshing Characteristic and CAM Technology of Eccentric Involute Gears Y.P. Liu, P.F. Meng and C.B. Hu	917
Research on Power Diffuence and Conflux Mechanism of Hydro-Mechanical Transmission Z.L. Han and F. Liu	921
Uniform Loading Analysis for Pin-Hole-Output Mechanism of FA Cycloid Drive L. Lei, Y. Tao and T.M. Guan	925
Simulation Analysis on Control Strategy of Launch with Two Clutches for Dry DCT Z.J. Liu, C.B. Ren and L. Wang	932
Mechanical Properties of Flexible Structures with Helical Reinforcements under Axial Load W. Huang, J. Shan and Z.J. Weng	937
Simulation Analysis of Contact Pattern and Strength of WN Gears Having Tooth Surface Deviations D.H. Chen and Z.W. Zhang	944
Study on Influence Factors of Bearing Capacity of Water-Lubricated Thrust Bearing and its Improving Methods X. Zhang, X.R. Wang, X.H. Li and X. Chu	949
The Research on Three-Dimensional Model of Non-Circular Gear G.X. Sun, C.Q. Sun and Q. Liu	953
Design and Technology of All-Welded Longitudinal Seam Sand Control Liner X.L. Liu	957

Chapter 4: Mechanical Reliability Theory and Engineering

Study on Fatigue Strength for Axle of High Speed EMU P.Y. Zhou and P.B. Wu	965
Algorithm and Implementation Write by R Software for Estimating the Transition Matrix of Homogeneous Markov Chain in Reliability Predictions C.H. Chen and Y.F. Nie	971
The Optimization Design of the Tunneller Drive Wheels Walk Department L.J. Luan, N. Li, S. Chang and S.H. Yu	977
A Practical Synthetic Method for 7-ATCA C.H. Gao, Y. Zhang, W. Li and C.G. Jia	982
Analysis of Fretting Behavior for Fasten Surface between Diesel Engine Cylinder Block and Main Bearing Cap W. Li, R.D. Liao and Z.X. Zuo	986
Design and Achievement of Automatically Generated Fault Tree and Fault Diagnosis System for Loaders Y. Feng and J. Liao	990
The Fuzzy Reliability Robust Design Based on MATLAB G.H. Li, T.T. Liu and L.H. Zhang	995
SWOT-PEST Analysis of China's Dry Port J.H. Chen and Y. Wang	1004
New Method of Powertrain Reliability Test Correlated with Customer Field Usage Y.Z. Men, H.B. Yu, Y. Han, H. Wang and L. Xu	1013
Reliability Sensitivity Analysis for Differential Expansion of Steam Turbine by Saddlepoint Approximation L.X. Li, C.Q. Su and Y.J. Jin	1018
Frequency Reliability Robust Optimization for Rotor System C.Q. Su and L.X. Li	1023
Research on the Effects of Product Reliability Caused by Coupled Design W.X. Wang, C.M. He and H.D. Du	1027
Reliability Test Platform for High-Speed Motorized Spindle Based on Magnetic Loading Y. Hu, Z.J. Yang, X.M. Zeng, J.G. Song, J. Fang, K. Wang and Y. Zhu	1031
Quality Inspection of Reinforced Concrete Structures and Reinforcement N.R. Bu, H.Q. Cai, R.S. Bai and Z.Q. Li	1036
Design and Analysis on Powder Sorting Machine J. Yang	1041

Research on Reliability Calculation Method of Series System Based on Statistical Analysis Y.F. Jia and W. Cai	1045
Pareto and Cause-Result Diagram Analysis of Automatic Rifles Failures W. Cai, R.L. Wang and Y.F. Li	1049
Financial Competitiveness of China's Textile and Clothing Companies Based on Factor Analysis H.M. Chen and Y.N. Kang	1053

Chapter 5: Theory and Application of Friction and Wear

Discussion on Application of the Multifunctional Jack-Up Platform Y.H. Yang, S.C. Jin and Y.T. Zhang	1059
Effects of Geometric Misalignment Caused by Girth Weld on Fatigue Behavior of a Cylindrical Pressure Vessel M. Abbas, R. Qayyume and J.H. Afridi	1066
Product Design Research Based on Sustainable Concept J.X. Cheng	1070
Influences of Particle's Friction Coefficient on Tribological Behaviour of Third-Body Interface W. Wang, X.J. Liu, K. Liu and J.L. Shen	1074
Effects of the Varying Normal Force on the Stick Slip Motion of Systems with Friction L.L. Liu	1078
Parameter Identification of LuGre Friction Model for Robot Joints Y.Q. Zheng	1084
An Empirical Analysis on Efficiency of Foreign-Invested Manufacturing Enterprises in Hubei Z.Y. Wang	1091
Experimental Study on Temperature Characteristics of Water Lubricated Rubber Bearing Y.C. Cheng, Z.L. Liu, J. Wang, Y. Dai and E.G. Peng	1097
The Tribological Behaviour of Precipitation-Hardening Stainless Steel 0Cr17Ni4Cu4Nb against 30CrMnSiA Steel under Sliding Condition Z.H. Tan, Q. Guo, X. Li and Z.P. Zhao	1102
Coupled Thermal-Structural Analysis of Mechanical Seal L. Liu, Z.L. Liu, J. Wang and E.G. Peng	1110
Research on Experiment and Technique of Material Identification for Debris of Engineering Equipment Based on Computer Vision Q.Z. Tu, M. Pan, J.X. Zhao, D.Z. Su and G.T. Wang	1115
Full Shafting-Based Elastohydrodynamic Lubrication Simulation for Main Bearings of Marine Diesel Engine H. Xing, H. Zhang, Q. Wu and S.L. Duan	1119
A Wear Life Predication Based on Partial Least Squares under Boundary Lubrication Y.T. Yan, Z.L. Sun and G.W. Hu	1124
Erosion of Elbows in Oil and Gas Production Systems W. Ming Bo	1129
The Research on Wearing Pressure Comfort of Knitting Underwear Y.M. Liu	1133
Research of E-Government System Architecture Based on SOA-ESB W.L. Huang and F. Wang	1137
Experiment Study on the Running-In Properties of Double-Circular-Arc Gear J. Wu and S. Zhang	1141
Test of Physical Mechanical Properties of GinkgoHickory Nut and their Stalks X.F. Xu, W.B. Yao, J.H. Xu and W. Zhang	1145
Formalization and Verification of Exception Handling Logic in Service-Oriented Software Q. Wu	1151
The Brand Awareness and the Brand Image Enhancement of Chinese Health Food X.X. Yang	1155

Chapter 6: Vibration, Noise Analysis and Control

The Development of Computing System with Equivalent Beam Element Based on Matlab Software G.Z. Zhang and N. Zhou	1161
Virtual Piezoelectric Vibration Absorber with LR Parallel Shunt Circuit N. Li	1165
Identification of Rotor System Noise Source Based on Sound Intensity Measurement H. Li, Y. Li, Z.Y. Geng and L.J. Wang	1169
The On-Line Detection for AC Contactor's Vibration Noise X.M. Wu, R.C. Zhang and J.H. Yang	1174
Improved EEMD Method Research M.J. Zhang, S.C. Han, C. Wang and S.G. Li	1180
Estimation of Direction of Wavefront Propagation and Slowness Using Time Domain Wavenumber Analysis in Small-Size Dense Seismic Arrays P. Liu, H. Ma, X.W. Zhang, X.Y. Sun and F. Cao	1186
Stability Analysis of a Transverse Cylindrical Grinding Process Y. Yan and J. Xu	1190
Internal Unsteady Flow Induced Vibration in Centrifugal Pump C.L. Shao, J.F. Zhou and B.Q. Gu	1194
Dynamic and Control of Vibratory Road Roller Based on Magneto-Rheological Semi-Active Damper S.N. Liu, S.R. Yan, S.W. Li and Y.G. Zheng	1200
Aerodynamic Analysis in Time Domain of a Cable-Stayed Bridge C.H. Chen, Y.Y. Lin, C.H. Chang, S.C. Yang, Y.C. Cheng and M.C. Huang	1205
Dynamic Performance Optimization of Cylindrical Shell with Constrained Damping Layer Using Topology M.X. Wang and Q.Z. Li	1209
Research on Active Vibration Control of Simply supported Beam Base on Piezoelectric Actuator J.M. Wen, J.J. Ma, Y.H. Jiang, G.M. Cheng and Z.H. Zhang	1216
The Effect of Macro-Synthetic Fiber on the Seismic Performance of Reinforced Concrete Columns Carried Out by Experiment Study H. Ma, L.C. Zhou, Z.B. Li, H.H. Wang, X.M. Hao, X.Y. Sun and X.W. Zhang	1220
Identification of Three Dimension Vibration System Based on L-M Algorithm with Learning Rate S.M. Liu and Z.L. Wu	1225
Grey Correlation Analysis-Based Comprehensive Dynamic Characteristics Evaluation of NC Machine Tool J.M. Zhu, H.W. Li and Z.W. Huang	1230
Vibration Analysis for Pipeline Connected with Centrifugal Pump by FEM J.H. Dong, X.F. Bao and P.B. Xie	1237
Vibration and Noise Reduction of PASSIM 12K Cigarette Machine S. Li	1243
A Double Thick Beam FEM with Explosion Resistance Dynamics Analysis Based on Spline Wavelets in Underground Structure H.Y. Liu, G.L. Su, Q. Ou Yang and Q. Su	1247
Numerical Simulation Study on Healthy Monitoring of the Framework Based on Aseismatic Behavior X.M. Yang and J.Y. Wang	1253
A Case Study on Car Body in White Modal Analysis H. Li, Z.Y. Geng, Y. Li and L.J. Wang	1258
Analysis of Slope Stability Based on DE-BP Neural Network N.R. Bu, R.S. Bai, Z.Z. Li and D.Z. Lin	1263
Capability Test and Vibration Analysis of Squeeze-Type Magnetorheologic Grease Damper X.C. Jian, Q. Li, X. Wang and P.C. Sheng	1268

Research on Vibration Characteristics of the Pedestal and Equipment Systems with Variable Parameter	1273
H.L. Chen, Z.H. Qiu, F.Z. Pang and L. Zheng	
The Method of Random Vibration Signal Transformation from Frequency to Time Domain Based on FIR Digit Filter	1277
J. Li, J.L. Pang, X.Y. Wang, H. Lan and Z.Y. Wang	
The Design of Shock Absorbers for Chemical Equipments	1283
X. Yang, X.Y. Guo and M.L. Ding	
Analysis of Bolt Fracture Cause for Gearbox of Cold Rolling Mill	1288
X.D. Wang, L. Shi, W. Peng, Y.R. Li and A. Liu	
Simulation of Multi-Channel Active Noise Control Based on Dynamic Neural Network	1293
B. Wang and K.M. Zi	
Cause Analysis and Improvement of the Oil-Film Oscillation of the Centrifugal Compressor	1297
H.W. Chen and R.J. Wang	
Internal Friction Peaks in a Porous CuAlMn Shape Memory Alloy	1303
Q.Z. Wang, C.X. Cui, N.J. Yan and F.S. Han	
Research on Blade with Particle Dampers	1307
Z.W. Xia and Y.Y. Fang	
Analysis of Propulsion Shafting Torsional Vibration of Vessels with Double Engines and Double Propellers	1310
X.F. Wen, Q. Yuan, J.S. Lu and Z.D. Cui	
The Vibration Response Analysis of Coupling System and its Experimental Validation Based on the SEA Method	1314
S.W. Lu, H.H. Feng, X.L. Mou and Z.X. Zuo	
Research on Optimization of China's Urban Indemnificatory Housing Supply	1318
Z.Q. Li, J.X. Tian and T.H. Song	
Lathe Modal Parameters' Identification and Verification Based on the GLOBAL Method	1325
L.L. Zheng	
Sound-Structure Coupling Analysis of Multi-Flexible Plates Enclosure	1329
Z.C. Li, N. Chen and L.N. Gu	
Feature Extraction of AE Signal in Offshore Platform Tubular Joints Crack Propagation Based on Wavelet Coefficient Energy Theory	1334
G.J. Liu, M. Xu, S.F. Zhu and R.L. Jiang	
On the Reasons for the Ventilator Bearing Noise and its Control	1341
R.J. Wang and H.W. Chen	
Identification of Cabin Noise Source Based on Wavelet Transform	1345
W. Huang, L. Hou, R.S. Lai and S.Q. Lin	
A Mistuning Sensitivity Suppression Method of Bladed Disk	1350
Y.X. Li, C. Shao and Z.J. Zhang	
Research on the Decoupling Control Algorithm of Full Vehicle Semi-Active Suspension	1355
J.G. Chen, J.S. Cheng and Y.H. Nie	
Fault Diagnosis of Bearing Based on the Ultrasonic Amplitude Histogram	1361
L.C. Su, Y.E. Shi and X.L. Li	
The Numerical Simulation for Vibroacoustic Phenomena of a Slender Elastic Shell	1365
Z.X. Yang and S.H. Qiu	
The Noise Control and Research of Vibration Slot in Vibrating Conveyor	1371
S. Li, L. Xu and Y. Zhang	
Modal Analysis of Seat Frame of Bulldozer's Cab Based on Finite Element Method	1375
Y.L. Yao, C.P. Zuo, C.L. Li, L. Wang and H. Li	
Linear Stability Analysis of Marangoni Effect on Desorption Liquid Layer	1380
J. Chen, A.W. Zeng and L.M. Yu	
Analysis and Solution Proposals of the Coating Defects on the Galvanized Cables	1387
L.H. Hong and Y.L. Chen	

Chapter 7: Dynamic Mechanical Analysis, Optimization and Control

The Research of the Numerical Simulation on the Granular Ballast Bed Tamping X.J. Wang, Y.L. Chi, W. Li, T.Y. Zhou and X.L. Geng	1395
The Nonlinear Dynamic Response of Functionally Graded Material Flat Spherical Shells Y. Dai, X. Hong, J.F. Liu and L. Zhang	1399
Parametric Design of Parts in an Integrated Simulation System Based on Asynchronous Mode of Pro/TOOLKIT G.L. Zhao, Y. Jiang, Y.J. Chen and Y.L. Ma	1403
Tooth Root Stress Analysis of Gear Processed by Full Radius Hob Based on ANSYS/LS-DYNA Y. Ma, X.H. Dong and Q. Huang	1409
Optimization and Control Researches into the Cooling System of Pneumatic Disc Brake Z.Y. Duan, Y. Peng and H. Wu	1414
The Generation Principle and Mathematical Models of a Novel Spherical Gear Drive J. Wang, L. Hou and S.M. Luo	1421
Study on Knowledge Service Supporting Product Innovative Design W. Cao	1429
Study on the Wheel Load Variation Simulation Method of Automobile ABS Performance Test Bench M.J. Yu, F.P. Cao, T.Q. Xu and X.Y. Qiu	1433
Design of Fixture for Measuring Tensile Properties of Walnut Shell L. Liang and Y.M. Guo	1438
Optimized Design of the Structure of High-Speed Railway Bearing Test Rig X.Z. Jia, Y.J. Yu and H.B. Liu	1442
Numerical Analysis of Quasistatic Contact between Rubber Roller and Rigid Roller B. Wang and Z.W. Wang	1446
Discussion on Bearing Matching Principles of Balancing Disc-Type Centrifugal Pumps X.X. Cheng and S. Wu	1453
Meshing Performance Analysis of New Non-Zero-Positive Modification Spiral Bevel Gear H. Zhang and X.Y. Tie	1457
Shape and Cross-Section Optimization of Spatial Grid Structures Using Genetic Algorithm J.C. Xiao, J. Chen, Q. Li and S.Q. Xia	1463
The Design Based on the Hydraulic Control of the Mango Picking Machine X.W. Lian, D. Liang and Y. Zhang	1468
The Application of S7-200 PLC Reactive Compensation Device in Small Substation Q.H. Chu, W.S. Cao and Z. Nie	1476
Suspension Design and Research for Electric Vehicles with Independent Steering and Driving Z.R. Dong, Z.J. Deng, S.Y. Ren, H. Qiu and T.Z.M. Qi	1481
Optimal Piezoelectric Sensors and Actuators Deployment for Active Vibration Suppression of Satellite Antenna Reflector W.B. Li, X.R. Li, Z.G. Zhao, Y.Y. Wang and Y. Zhao	1490
Dynamic Behavior for an SIRS Model with Nonlinear Incidence Rate J.H. Li, N. Cui and H.K. Sun	1495
Research on Path Planning for Mobile Robot Based on Grid and Hybrid of GA/SA W.J. Yang, H.B. Wang and J.H. Wang	1499
Study on Dynamic Performance of Tower Crane Based on ADAMS Multi-Flexible-Body C.H. Zhao, S.J. Chen, J. Zhang, X.Y. Zhong and N. Yan	1504
Research on Block Thin Film Hydrostatic Guide Rail of Precision Grinding Machine for Optical Manufacturing T. Jiang and Y.B. Guo	1510
Simulation Analysis of Traditional and L Type Macpherson Suspension Based on ADAMS/Car W.H. Zhu, Y. Shen and J.Z. Feng	1515
Research and Analysis of Offset Printing Press Paper-Feeding Mechanism X. Ning, J.H. Wei, B.F. Yang, Q.L. Miao and C.X. Liu	1522
Indentation Rolling Resistance of Conveyor Belts Based on Maxwell Model F.S. Wang	1526

Dynamics Research of RRR-PRP Planar Six Bar Mechanism Y. Wu	1530
Dynamics Analysis for Naval Gun with Consideration of Contact between Arc and Gear X.W. Ke, J. Hou and P. Wei	1535
Study on Suspension Parameters of Motor Cars G.D. Li	1539
Multidisciplinary Simulation and Design Optimization of a Variable Cross-Section Cantilever Beam Z.P. Li, W.Q. Li and Y. Li	1545
Coupled Vibration Analysis of Water Turbine Generator Unit and Hydropower Station House Z.G. Zhang and G.H. Ji	1551
Experimental Study on the Design of Pressurization System in High-Rise Buildings J.Y. Zhang	1555
Dynamic Characteristic Analysis of Inertial Navigation Platform' Structure W. Zeng, H.M. Xia, Y.X. Wang and L.Y. Wang	1560
Kinematics Simulation and Design of Work Elements of Demolition Robot Based on Virtual Prototype G.M. Si, J.W. Liu, J. Zhang and X.J. Meng	1565

Chapter 8: Innovative Design Methodology

Reliability Analysis for Plunger Pump Fluid End Based on Random Finite Element Method T.C. Huang, S.Z. Zhou and X.M. Yuan	1573
The Method of Tangent Modulus Factor for the Design of External Pressure Vessels D.Y. Chen, C.H. Tong and K.L. Liu	1578
Development & Study of Cooperative Design Platform H. Xiang and M. Li	1585
Innovation of Men's Fashion Design of China Based on the Humanistic Philosophy L. Shen, J. Xu and Y.J. He	1589
The Evaluation of Module Division Programme Based on Information Entropy Y.L. Wu, B.Q. Mao, L. Xu, D.M. Dai and Y.C. Liu	1592
Modular Design for a Novel Aid about the Disabled in Lower Limb Based on the Function Requirement Analysis J.G. Zhang, H.R. Liu and Q. Xue	1596
Knowledge Retrieval Strategy Research for Product Creative Design F. Fan, W.Q. Li and Y. Li	1600
Optimal Design Method of Gear Molding H.J. Chen	1606
Design and Application of Modern Educational System Used in Vocational Schools W.G. Zhang and S.L. Tang	1610
Inversion of Infrared Nondestructive Testing with Evolution Algorithm Y. Huang	1614
Numerical Research on Performance Prediction for Aquatics Hub Cutter Y.D. Wang and W.L. Shen	1618
Research on Analysis and Simulation of Random of the Machine Gun RCWS B.Q. Mao, C.Y. Wang, X.L. Liu, Y.L. Wu and D.M. Dai	1622
Study on Variable Diameter Spiral Spring J. Gao, J.Z. Wang and S.L. Zhang	1627
Grinding Process Parameters Optimization and Surface Performance Analysis of Spiral Bevel Gear Based on the Orthogonal Test X.Z. Ming, H.Z. Yan, G.Q. He and X.H. Kong	1634
Modularization of Electromechanical Products' Design Knowledge Y. Zhang, W.Q. Li and Y. Li	1641
Experimental Study on Structural System of Throttle Multi-Hole Orifices in Refrigeration Plant T.Y. Zhao, J.L. Zhang and L.D. Ma	1650

Researches on Diameter Automatic Measurement Device of Artillery Gun Tube W. Shi, X.J. Wang, S.Q. Ren and J.G. Wang	1655
Study on Driving Deceleration Model on Horizontal Curve Sections of Mountain Highways Y.Z. Men, H.B. Yu, H. Wang and L. Xu	1660
Application of Probabilistic Distribution Matching PATC on Robust Multi-Scale Design G.R. Sun	1665
Application of Robust Design Approach for Design Parameterization in Kansei Engineering S.B. Sutono, Z. Taha, S.H. Abdul Rashid, H. Aoyama and S. Subagyo	1670
Property Tests and Mathematical Model for Magneto-Rheological Fluid W.Y. Guo, Z.D. Xu, Y.Q. Guo, X.C. Zhang and Y.Q. Zhou	1681
The Influence of Lateral Confinement in Prestressed Concrete Structure under the Effect of Pre-Applied Force S.T. Fang, Y. Zhang and Y. Gao	1687
Study on Product Virtual Design for the Diesel Engine Combustion System Y.F. Liu, A.H. Zhu, J.W. Yang and H.S. Tian	1691
International Comparison of Continuous Improving Performance in Chinese Enterprises and the Research of Improvement Measure Y. Yang, C.S. Shi and L.R. Hu	1695
The Inspiration of Traditional Chinese Created Conception on the Eco-Design of Modern Architecture T.L. Xi, Y. Chen and J. Tang	1699
Non-Dimensional Design Method for Pressure Vessels Y. Liu, Y.P. Qu, W.Q. Wang and T.L. Chen	1704
Design and Research of Double-Drum Winch with Anti-Pressure Wheel K.A. Yu, T. Yang and C.Z. Gong	1709
Method of Customer's Requirements Gain and Analysis Q. Shan and Y. Chen	1714
Business Logistics Outsourcing Risk and Management X.S. Xiao	1718
Study on Modular Design in The Anchor and Windlass W.X. Tang, C.Y. Wu, F. Wang, Q.Y. Huang and B. Ma	1722
Customer Requirements Driving NPD Method Based on Integrated CAX Technology L. Lin, T.H. Luo and X.S. Ran	1728
Preparation of Magnetic Chitosan-β-Cyclodextrin Polymer and its Adsorption for Thallium (III) in Aqueous Solution Z.W. Zhou, J.S. Wang, Q.W. Guo and Z.C. Xu	1733
Modular Design of Mechanical Products Based on Module Family J. Li, J.K. Zhou, Q. Li and Y. Zhang	1737
Evaluation Model of Conceptual Design Scheme Based on Engineering Fuzzy Set Theory H.B. Miao	1741
Wheel Loader Working Device Optimization Design Based on the Sensitivity Analysis X. Li and Y.Z. Chen	1745
The Study of Three-Phase Numerical Simulation of Molten Bath in EAF Impinged by Supersonic Oxygen Jet S.C. Chen, R. Zhu, J.S. Li and C.L. He	1750

Chapter 9: Product Life Cycle Design

FEA on the Roller System of Rolling Mill Y.G. Wei, Y.T. Wang and C.T. Han	1759
A Simple Dynamic Model for Beams Subjected to Blast Loads Z.N. Yin	1763
Synthesis of Diethyl Carbonate from Ethyl Carbamate and Ethanol Catalyzed by ZnO-Fe₂O₃ from Zn/Fe Hydrotalcite-Like Compounds D.F. Wang and X.L. Zhang	1768
The Relationship between near Infrared Spectroscopy and Surface Color of Eight Rosewoods Z. Yang, B. Lv and Y.J. Fu	1772

Research for Fish Motion Model S.H. Cheng, C.H. Hu and W.T. Zhang	1777
Preparation of MgB₂ Superconducting Thin Films at Low Temperature Z.Y. Zhou, F.S. Yang, J. Yang, S. Wang and X.H. Fu	1781
Glass-Forming Ability and Crystallization Kinetics of Hf-Ti-Cu-Ni-Al Bulk Metallic Glass T.J. Chen	1786
Force/Position Cooperative Control for 6-DOF Parallel Platform H.H. Li, K.R. Hao and Y.S. Ding	1790
Corrosion Behavior of (Zr_{51.6}Cu_{48.4})₉₃Al₇ Bulk Metallic Glass T.J. Chen	1795
Hardware System Design Research on Operation Monitoring System of Hanjiatuo Yangtze River Bridge P. Yan, D.S. Shan and Q. Li	1799
The Properties of Textured GZO Film at Different Substrate Temperature L.X. Zeng, H.D. Yang, B. Huang and J.S. Zhang	1805
Research on Application of Damping Vibration Reduction Technology in Marine Gearbox J.G. Han and M. Qian	1809
Optimal Sensor Placement for CNC Machine Tools X.H. Bai, X.Y. Mao, H.Q. Liu, H.Z. Li and B. Li	1813

Chapter 10: Intelligent Optimization Design

3D-Multi Constrained Heterogeneous Packing Using Genetic Approach R. Kanna, P. Malliga and K. Sarukesi	1825
Preshaving Hob CAD and the Software Development X.R. Chou and R.F. Wang	1831
An Efficient Parameter Optimization Approach Based on Real-Coded Genetic Algorithm Z.Q. Chen	1835
Optimization of the Vertex Angle of Metal Saw Tooth Based on Static Analysis J. Liu, X.J. Liu and S.Q. Zhang	1841
Design and Optimization on Connecting Rod Parts of Engineering Clamp Hanger Based on Metamodel H.B. Zhao	1845
A New Method of the Constraints Expression and Handling for Excavator Boom Structural Optimization H.Y. Hua, S.W. Lin and Z.H. Shen	1851
Applications of Cultural Ant Colony Optimization in Optimal Excavator Mechanisms Design P.Q. Xie and S.W. Lin	1857
Finite Element Analysis and Multidisciplinary Design Optimization of Diesel Engine Connecting Rod Based on ISIGHT S.G. Yao, S.C. Zhao and F. Liu	1863
Conceptual Design for the Structure of Electric Car Body H.J. Yue, X.Y. Xu and L.J. Li	1868
Concept and Framework of Reconfigurable Intelligent Optimization Algorithm Y. Liu, Y. Zhang, D. Zhao, F. Tao and L. Zhang	1875
Parameter Optimization of Cyclone Separating Cleaning System Used on Combine Harvester of Wheat L.X. Geng, L.J. Zhang, S.D. Liu and Q.X. Shi	1880
Particle Swarm Optimization Based Algorithm for Ship Vertical Passage Layout Optimization W.Q. Wang, S. Huang, Y.L. Hu and Y.H. Hou	1885
Design of Power Fault Recorder Based on Embedded Systems T.P. Zhou	1889
An Efficient Hybrid Based on HS and GA Solving Blocking Flow Shop Scheduling Problems Y. Bao, L. Zheng and H. Jiang	1893

Design of Control System for Automotive CVT Based on ATmega164P MCU Y. Cheng	1897
The Nonlinear Finite Element Analysis and Optimum Design to the Thread Joint of 30 in. Marine Riser J.D. Ye, Y.T. Xi, S.Y. Tan, S.T. Li and Z. Li	1901
Design on an Intelligent Self-Locking System of Clutch for Bus Q. Zhang, X.Y. Tian, S. Zhang, C.N. Wu and L.W. Xu	1905
Finite Element Analysis and Optimization of Power-Assisted Structure of Wearable Human Lower Limb Exoskeleton F. Liu, W.M. Cheng and N. Zhao	1909
Research on Improved Genetic Algorithm Solving Flexible Job-Shop Problem M.S. Li and M.H. Yao	1918
The Design of Electronic Delay Detonator Z.G. Li	1922
Research of Accurate NURBS Curve Fitting Based on Genetic Algorithm Y.J. Zhang and Y.K. Wang	1927
Research on High-Precision Measurement of Position and Orientation of 6-DOF Parallel Robot Based on Stereo Vision and Positional Solution H.T. Wang, K.R. Hao and Y.S. Ding	1931
Multi-Objective Path Planning Model and Algorithm for Warship Evacuation C. Liu and C.H. Qiu	1936
Research and Design of Adaptive Noise Cancellation Based on Particle Swarm Optimization Algorithm J. Zhang and S.Q. Jiang	1942
Study on MAS-Based Fault Diagnosis System for GJW111 Excavator X.Y. Tang, Y.J. Cui, M. Zhou and J.X. Li	1946
Investigation on Optimization Strategies for the Hydrodynamic Design of DTMB 5415 J.F. Huang and B.W. Feng	1950
Optimization and Simulation of Portable Crane's Arm System Based on MATLAB X.L. Zheng, M.D. Li, H.R. Zheng and D.F. Chen	1955
Conditional Simulation of No-Gaussian Stochastic Process Based on Neural Networks J.H. Li, S.S. Chen and W.B. Sheng	1959
Optimization of Stamping Parameters Using Stochastic Focusing Search Algorithm L. Long, C. Song and G.F. Yin	1963
Denoising and Enhancement of Magnetic Resonance Image Based on the Dyadic Wavelet Analysis Z.H. Huang and L. Xia	1968
Design and Implementation of Network Reliability for Intelligent Fire Control Training System N. Hao, F. Bai and T.Q. Chang	1974
Design and Simulation of 3D Layout for MID Based on Open CASCADE Y. Zhuo, Y.J. Wu and J. Peng	1978
Research on Battery Management in Multi-Power Grid Generation System C. Wang, Z.H. Fang, T.T. Hong, Y. Sun, H.B. Xu and P.Y. Han	1982
The Influence of Rare Earth Oxide on the Structure and Properties of AgSnO₂ Electrical Contact Materials J. Zheng, S.L. Li and J. Guo	1986

Chapter 11: Structural Strength and Robustness

The Influence of Blind-Hole Depth and Bore to Strain Energy Relief Coefficients-a Case Study X.H. Liu and C.Q. Guo	1993
Tangent Stiffness Matrix of Single-Layer Reticulated Shell's Members with Rigid Ends F. Wang and X. Wang	1997
Fatigue Life Reliability Analysis of Submarine Cone-Cylinder Shell Z.Y. Zhang, T.S. Song and Y. He	2001

Fatigue Testing of Resonating One-way Double-stiffened Plate W.G. Liu and H.L. He	2005
The Compensation of Automatic Control System Based on MATLAB J.F. Gou and Y. Jiang	2009
Study on Wind Load Performance for L Type Aerial Work Suspended Platform H.Y. Yu, L. Zhao, K. Zhang and Y.H. Wu	2013
Structure Optimization and Strength Analysis of CBM Special Anti-Clogging Drainage Pump W.T. Qu, Y.X. Guo, T. Ren and Y.P. Sun	2017
Equivalent Stress Linearization Method Based on Assessment Line of Nozzle-Cylinder Intersection J.H. Dong, H.Y. Tang and B.J. Gao	2022
Cause Analysis of Round Thread Connection Dropout Z.Y. Pan, S.Y. Song, W.H. Liu, X.L. Han, J. Han and D. Zhang	2028
Theoretical Study on Inner Support of Run-Flat Tire X. Zhang, H.R. Zhao, Y. Cao, L.W. Li, W.W. Cui, J.J. Cui, Z. Feng, S.Y. Li, G.Q. Hao and D.F. He	2033
Research on UG Overturning Characteristic of 75t Iron Ladle S. Li, B. Gao, Y.Q. Wang and L. Wang	2037
Experimental Research on Bearing Capacity of Concrete Columns with High Strength Concrete Core under Axial Compression Loading Y. Qi	2041
Finite-Element Analysis of 950 Mill Housing Based on ANSYS X.P. Guo and Y.F. Feng	2046
The Reliability Analysis of Cylindrical Helical Compression Spring of Various Design Parameters J. Shi, Y.Y. Huang, B.X. Hu and X.P. Hu	2050
Experimental Study on Fatigue for Stent with Micropores Z.M. Ma, H.Y. Dong and M. Qi	2055
Ontology Design of Airport Special Vehicle Training Simulator L. You, X.L. Liu, J.L. Li and X.D. Shi	2060
Study on Analysis Method of Transmission Gear Impact Property Z.L. Wang, Z.X. Pang, B.C. Zhang and T.J. Liu	2066
Analysis of Fatigue Reliability and Fatigue Life for a High Voltage Valve J.K. Bo	2072
Research on Hydraulic Self-Enhancement Technology of Fracturing Pump's Valve Box F.G. Jiang, Z. Liang, G.H. Zhao, P. Wang and L. Zhang	2076
Fingerprint Identification System Based on Two-Dimensional Barcode and DSP Y. Wang, L. Liu, Q. Song and Y.P. Bao	2082
The Graphics Section Moment of Inertia of an Area Rotation Axis Calculation Diagram Method——Moment of Inertia of an Area Circle X.Z. Song, M.L. Lu and T. Qin	2086
Research on Mine Gas Monitoring System Based on Multi Sensor Data Fusion X.J. Zi and H.J. Wang	2090
Experimental Test and Numerical Simulation of Torsional Strength for Welded Metal Bellows H.H. Si, M. Ahmat and W.A. Meng	2095
Structure Improvement and Fatigue Analysis of Single-Girder Crane Main-Beam C. Zhou, J.Z. Wan, X. Chen and F. Shuai	2099
Durability Fatigue Behavior and Vibration Modal Parameter Frequency Sweep for China-Made Car Rear Axle Y.Z. Men, H.B. Yu and N. Huo	2104
The Development of Stiffness and Strength Simulation Template for RCWS Barrel Based on ANSYS Workbench B.Q. Mao, L. Xu, Y.L. Wu and D.M. Dai	2109
Stress Spectrum Analysis of Random Vibration of Vehicle Frame Based on Virtual Excitation Method H.Q. Jiang and S.C. Li	2113

The Finite Element Analysis to the Reformation Structure of 75 Ton Iron Ladle Based on ANSYS-Workbench	
S. Li, Y.Q. Wang, B. Gao and L. Wang	2120
Finite Element Analysis of Dual-Frequency Vibrating Screen	
Y.J. Hou, P. Fang and L. Zeng	2124
Research on Load-Bearing Characteristics of Precision Air-Bearing Rotary Stage	
J.Q. Lin, L. Wang, M.H. Gao and T.H. Ran	2129
Probabilistic Model of the Multiaxial Low-Cycle Fatigue Life Prediction	
L. Wang, T.Z. Sui, H. Zhao and E.G. Men	2135

Chapter 12: Reverse Engineering

A Novel Hollow Fiber Membrane Biofilm Reactor for Esterification Wastewater Treatment	
B. Li, H.Y. Zhang and X. Wei	2143
Reverse 3 D Garment Model Reconstruction Technology Research	
N. Lin, J. Lin and N. Lin	2148
A New near Point Denoising Algorithm for Point Cloud	
C. Zhao, Y.L. Shi and J.T. Cheng	2152
Analysis on the Green Concept in Clothing Design	
S.C. Chen and Y.W. Wu	2157
Robust Tracking Control for a Class of Nonlinear Systems	
Y. Yu and W. Wang	2161
Study on Method of Recycling Liquid Crystal from Waste LCD Based on Supercritical CO₂ Fluid Technology	
H.B. Zhu, Y.L. Wang and G.F. Liu	2165
Product Environment Requirements Mapping and Processing Based on QFDE and TRIZ	
H. Bao, G.F. Liu and B.Y. Bian	2171
Automotive Electronic Control Components Energy Consumption and Environmental Emissions Analysis in China Based on Economic Input-Output Life-Cycle Assessment Model	
J.J. Wang, L. Wang and M. Chen	2177
The New Exploration of the Green Design of Industrial Products	
F.F. Wan	2182
Research on the Multi-Index Comprehensive Evaluation Method of Electromechanical Products' Disassembly	
J.B. Jiang, S.J. Zeng and M.S. Xu	2188
Study on Precision Evaluation of Reverse Modeling for Mechanical Parts	
Q.Z. Tu, J.X. Zhao, J. Yan and J.Y. Dai	2194
Melioration of Pyroelectric Cells for Power Conversion	
C.C. Hsiao, C.Y. Chang, A.S. Siao and J.C. Ciou	2199
Practice on No Pillar Simultaneous Extraction of Coal and Gas in Deep Mine	
X.G. Zheng, N. Zhang and Z.Y. Zhang	2206
Research on Electronic Ballast Start-Up Mode of High Pressure Sodium Lamp	
Q. Gao, C.H. Xu, T.L. Wang and W.T. Li	2211
Simulation Design of Bionic Blade on Wind Turbine	
H.F. Zhou, C.H. Du and Y.Q. Huang	2215
The Design of the Connecting Rod Rapid Prototyping Based on Reverse Engineering	
Y.Y. He	2222
Precision Analysis of Reconstructed Aluminum Alloy Handle	
H.L. Jiang	2226
Analysis and Reconstruct of Complex Data Based on 3D Laser Scanner	
X.M. Cheng, Z.Q. Ye and J.J. Zhang	2231
Hierarchical Correspondence of 3D Faces Based on Thin Plate Spline Deformation (HCTD)	
Y.Y. He, G.H. Geng, M.Q. Zhou, J.Q. He, J. Jia, K. Li, H.Q. Du and X.W. He	2235
Intelligent Vision Inspection System for IC Engine Head: An ANN Approach	
R. Kanna and M. Saravana	2242

Design of Flammable Gas Monitoring Circuit Based on TGS813 C.Z. Chang	2246
3D Model Reconstruction of the Broken Aeroengine Blade Based on Multi-Scale Genetic Algorithm H. Wang, Z.J. Cai and L.W. Wang	2250
Waste Money Drilling Environment Control Device Design X.C. Cheng, Q.L. Du and Z.X. Cheng	2255
Comparative Experimental Research on Cryogenic Gear Hobbing with MQL X.H. Zhang, C. Xia, P. Chen and G.F. Yin	2259

Chapter 13: Green Design and Manufacturing

Vibration Analysis and Optimization of Wobble Plate Engine J. Jin, Z.S. Zhang and X. Xiong	2267
Design and Simulation of a Novel Check Valve Made by SU-8 T. Guo, C.C. Zhang and G.F. Ding	2271
Experimental Study on Hygroscopicity of Rapeseed (Brassica Napus) M.J. Yang, W.M. Xu, T. Tang, L. Yang and F. Liu	2275
Research on the Design for Sustainability and its Green Building Materials K.Z. Sun	2279
Evaluating Quantitative and Qualitative Models: An Application for Eco-Environmental Quality Evaluation in Lake Dianchi Basin, China J. Li, M.C. Guo, J.J. Yu, J. Xia, H.H. An and X.M. Zhang	2283
Research on Characters Segmentation in One-Row and Two-Row of Vietnam License Plates V.H. Mai, D.Q. Miao and R.Z. Wang	2293
Transformer Protection Device Communication Management System Based on IEC60870-5-103 Z.H. Sheng, R. Sheng, T.P. Li and B. Li	2297
Performance Analysis of Automobile Friction Clutch Based on Entropy Fuzzy Comprehensive Evaluation Y.Q. Yang and M. Zhang	2301

Chapter 14: Design for Sustainability

Novel Design of Biped Robot Using Cable Differential Joint H. Wei, M. Shuai and Z.Y. Wang	2307
Optimization of Electric Turn-Over Bed Based on Mechanism Linkage S.J. Xin and H.H. Zhang	2311
Performance Atlases of Global Conditioning Index of Planar 3-DOF Parallel Manipulator with Actuation Redundancy B. Wang and W.N. Han	2316
Formulating an Invariant Manipulability Index of Gough-Stewart Platform G.J. Liu, S.T. Zheng, X.C. Liu, Y.B. Wang and J.W. Han	2321
Analysis on Velocity Performance of Planar 3-DOF Parallel Manipulator with Actuation Redundancy B. Wang and Z.H. Wei	2327
Kinematics Analysis of Exoskeletons Rehabilitation Robot Based on ADAMS M.L. Yu, J.R. Wang, J. Li, W. Cui and D. Li	2333
A Study on De-Icing Technology for Electric Transmission Line Q.Z. Huang, J.W. Liu, Y. Zhou, Y.J. Liao and N. Lv	2339
Research on Hobbing Process Principles and Linkage Models for Higher-Order Elliptic Gear Y.Y. Liu, J. Han and G.Z. Zhang	2343
The Ball Screw Installation Position Parameter Decisions and Simulation K.J. Kim, C.D. Wu, F. Wang and S.G. Wen	2347
Twin-Track Robot Obstacle Three-Dimensional Modeling and Simulation B. Wu and Z.J. Wei	2351

Design and Analysis of Hydraulic-Driven Bionic Joint for Undulating Thruster H.J. Xu, C.Y. Pan, D.B. Zhang and X. Zhang	2355
Kinematics Analysis and Experiments of an Artificial Robot Upper Limb C.J. Wang, B.H. Fan, H. Jiang and Z.X. Zhang	2361
Optimization Design and Trafficability Analysis of a Flexible Squirm Pipe Robot Y.H. Zhang, M.W. Zhang, W.L. Feng and H.X. Sun	2365
Excitation and Detection Mechanism of Resonant Gas Sensors Based on Micro-Cantilever S.M. Li, G.M. Li and N. Wang	2372
A New Vehicle Platform for Crop close Proximity Measurements B. Zhao, F. Gao and L. Tian	2376
Numerical Simulation of the Nozzle with Self-Oscillating Flow Using the VOF Model Z.F. Zhang, J.W. Wang and F. Bao	2380
Seriation Design and Research on Cam Shedding Mechanism of Looms G.Q. Zhou, R.W. Yuan and X.M. Jiang	2383
Analysis on Influence Coefficient of Workspace of a Configuration Palletizing Robot J.Q. Li, S.X. Zhu and Q.S. Lei	2389
Research on the Performance of Space Liquid Lubrication System with Oil-Storage F.Z. Ji, Y.C. Guo, F.R. Du, S.C. Yang and B. Xu	2393
Simulation Study on Smooth Movement of Mobile Robot S.J. Bo and J. Tian	2398
Design of 8-DOF Humanoid Robot Foot H. Wei, M. Shuai and Z.Y. Wang	2403

Chapter 15: New Mechanisms and Robotics

The Research Progress of Supervisory for Concentration of Emulsion S.H. Zhao, Z.Q. Liu, Q. Wang, Y.L. Bai and Y.C. Guo	2409
Performance Calculation of Mill Hydraulic Loading System X.B. Ji, X.Y. Qi, Y.H. Feng and Y. Zhang	2416
Modular Product Family Design for Pumping Unit Based on Design Structure Matrix Y. Zhang, G.N. Qi, Y.J. Ji, L.W. Song and P. Jiang	2420
An Implementation Method of Encrypting Partial Bitstream Based on FPGA W. Wang, F. Xu and J. Yin	2424
Design of Complex Multi-Axis Control System Based on the Aircraft Flexible Tooling Platform Y.G. Yang, J.C. Yang, D.W. Wu and J.F. Xiao	2429
Large-Scale Board Host Rolls over the Production Line Main Electrical Machinery's Electric Control D.L. Chen and X.H. Hua	2433

Chapter 16: Complex Electro-mechanical System Design

Three-Dimensional Numerical Analysis of Tunnel Seepage Based on the Iteration Method F.S. Liu, G.Y. Xu, S.B. Hu, W.T. Huang and M. Hu	2441
Structural Analysis and Lightweight Design for Cab Overturned Support of a Medium-Duty Truck Y.D. Dong, Y.J. Liu, L.L. Wang, T.Z. Li, Y.K. Yang and C.Y. Liu	2446
Mathematical Model and Simulation Analysis of Hot Runner Temperature Field Y.F. Lv	2452
LPDC Process Optimization of Copper-Alloy Taps Based on CAE Technique L. Tian, Q.F. Wang, H.Z. Duan, J.N. Shen and Y.P. Li	2457
Modeling and Simulation of Large Erecting System Based on Virtual Prototyping Y.B. Feng, C.L. Ma, X.S. Guo and C.Q. Yu	2462
3D Cavitations Turbulent Transient Calculation in the Francis Turbine Model D. Zhang and Y. Zheng	2466

GPS Monitoring and Warning Example of Bazimen Landslide Engineering P.F. Tu, H. Peng, H.T. Li and L. Xia	2471
Kinematics Simulation of Luffing Mechanism of Hydraulic Roofbolter Based on Virtual Prototype Technology X.Y. Wang and D.D. Wei	2477
Thermal Characteristic Analyses of NC Machine Spindle System Z.Q. Sheng, X.D. Shi, S.L. Dai and Y. Jin	2481
Optimal Design Method of Automotive Charged Air Cooler Based on the Matching of Hot-Side and Cold-Side Flow Channels B.L. Xiao, W.M. Wu, X.L. Yu and G.D. Lu	2485
Study on the Structural Improvement Methods for Car Frontal Crash C.Q. Huang and F. Lai	2489
Deploying Analyses of Large Deployable Space Antenna under Gravity Environment F. Zheng, M. Chen, H.M. Hao and J.L. Zhang	2493
Simulation of Compliant Bump Foil Journal Bearing Using Coupled Reynolds Equation and Finite Element Model Method J. Liu and F.R. Du	2499
A Ship General Integrated Design Platform Based on Digital Ship J.F. Huang	2504
Gear Stress Analysis and Discrete Optimization for Wheel-Legged Rover H.B. Huang, Y.M. Wang and T.H. Fan	2511
FEM Analysis on Slope Step Reinforcement Micro-Pile H. Huang, S.Z. Yao, W.S. Zhang, X. Li and G. Huang	2517
A High Performance Hardware Architecture of Sub-Pixel Interpolator for H.264/AVC Encoder G.H. Chen, W.P. Su, F.J. Wang, A.Q. Wang, W.M. Zeng, R.J. Wang and S.F. Dai	2521
Achievement of the Novel Lidar Visibility Measurement System S. Feng, L.H. Jiang, X.L. Xiong and Z.B. Zhuang	2525
Research on the Relationship of Flow Velocity and Particles' Separation in Cyclone Y. Zhang and Z.W. Zhang	2529
Effect of Assembly Error on the Meshing Characteristic of Spacial Beveloid Gears H.X. Wang, J.D. Chang and L. Zhang	2533
A Mechanical Calculation of the Flexible & Floating Anti-Ship Collision Device for Bridge Piers W. Lv, R.L. Lu, X.L. Ning, Y. Yuan, Y.X. Hu and H.J. Zeng	2540
Study on the Thermal Characteristics of a Motorized Spindle Unit T.Q. Wu, H. Liu, M.Q. Jing and H.W. Fan	2546
A Numerical Study of the Effect of Bubble Layer on Propulsion Performance of Deep-Vee Hull Form Ship Q.Y. Li and O. Yongpeng	2551
A Study on Dynamic Simulation of Litchi Pitting Process Based on ANSYS / LS-DYNA Z. Chen, C.Y. Li and F.Y. Xu	2557
Effects of Material Properties and Thickness of Die Attach on Package Delamination of IC Packages C.L. Chang, C.L. Chang and Y.L. Wang	2564
Study on Design Method of Non-Uniform Beam of Mechanical Structure G.Z. Zhang	2568
New Fault Isolation Method during Functional Test in Manufacturing L.N. Lee and Y.F. Phuah	2572
The Implement of Optimization Design of a Car Body Based on VCD-ICAE System W.B. Hou, Z.J. Bi, H.Z. Zhang and P. Hu	2577
A Study on the Numerical Analysis of Three-Dimensional Parachute Inflation Process J. Qian, H. Cheng and L.H. Su	2582
Virtual Surface Measurement of Large Deployable Space Antenna Structure M. Chen, F. Zheng and Y.Y. Zhang	2586

Chapter 17: Advanced CAE Technique

Research of Automatic Multi-Function Flat Tea Frying Machine and Process Performance Parameters	
W. Xiao and Z.G. Pan	2595
Difficulties and Solutions on Tight Sandstone Reservoir Hydraulic Fracture in Yanji Basin	
X.L. Bi, S. Hou, W. Li, Y. Zhang and S.M. Du	2600
Intelligent Substation 3D Design System Structure	
Q. Lan, Y.J. Wang and Z. Zhang	2605
On <i>In Situ</i> Calibration of SINS and Doppler Dead Reckoning Navigation System	
K. Yao, Q.D. Zhu and B. Zhang	2610
Design and Application of KPI Query and Analysis System Based on Warehouse	
X. Wen, M.J. Li and R. Luo	2616
Research on the Feed Servo System of CNC Machine Tool	
X.J. Nie, L. Wang and K. Li	2620
The Remote Intelligent Monitoring and Fault Diagnosis & Processing System	
C.Y. Wang, P. Bao and Z. Zhang	2625
Design of Stepper Motor Controller Based on Fuzzy BP Neural Network	
J.Q. Yang and J.Y. Liu	2630
