

Table of Contents

Sponsors, Committees and Preface

Effect of Surfactants on the Dispersion of Multi-Walled Carbon Nanotubes in Epoxy Resin Y. An, X.T. He, W.M. Yang and Y.M. Ding	1
Research on Bonding of PMMA Microfluidic Chip with Precisely Controlled Bonding Pressure B.Y. Jiang, Z. Zhou and Y. Liu	8
Pseudo-Plastic Behavior of a Film Foam Flow with Carbon Dioxide as the Internal Gas Phase D.X. Du, Y.G. Li and S.J. Sun	15
A Mechanical Model for TRIP Sheet Steel Forming T.K. Shan and L. Liu	21
Mechanical and Interfacial Properties of Hydrolyzed Kevlar Fiber Reinforced Wood Flour/HDPE Composites R.X. Ou, Q.W. Wang, F.P. Yuan, B.Y. Liu and W.J. Yang	27
Modification of Poly(vinylidene Fluoride) by Grafting of Functional Monomer 3-(Trimethoxysilyl)propyl Methacrylate L.N. Liu, Y.B. Chen and Y.F. Zhang	32
Preparation and Characterization of PES/SPSF Blend Ultrafiltration Membrane F. Ma, Y.Z. Zhang, X.L. Ding, L.G. Lin and H. Li	37
Influence of Transesterification on the Properties of PET/MAPE Blends Prepared by Reactive Extrusion L. Gong, Q.W. Wang, Y.M. Song, H.G. Wang, S.J. Sui and Y.Z. Cui	43
A Study on the Properties of Polypyrrole Coated Polyester Fiber J.Y. Xu and X. Jin	48
Influence of Draw Ratio on Crystal Morphology and Structure of β-Form of Isotactic Polypropylene B. Zhang, J.B. Chen, B.W. Qiu, F.F. Ji and C.Y. Shen	54
Physical Properties of Waste Lignin/HDPE Composites T. Liu, Q.W. Wang and H. Zhao	60
Preparation and Properties of High Performance Polyimide Foam K.L. Qi, G.C. Zhang, S.M. Li, L.W. Liu and Z. He	66
Impacts of Acid Treatment on the Characteristics of Native Corn Starch Granules X. Jin, S.Q. Hou, X.X. Sha and L. Yu	72
Eicosane/Polycarbonate Composite as Form-Stable Phase Change Materials for Latent Heat Thermal Energy Storage Y. Wang, T.D. Xia and H.X. Feng	78
Structure and Thermal Properties of Cellulose Diacetate-Graft-Poly(lactic Acid) Copolymer W.J. Deng, X.P. Zhuang, K.T. Guan and B.W. Cheng	85
Hydrophobic Modification of Natural Cellulose Fiber with MMA via Surface-Initiated ARGET ATRP G. Li, H.P. Yu and Y.X. Liu	90
Removal of Cesium from Aqueous Solutions Using Crosslinked Amphoteric Starch Prepared by Microwave Treatment L.X. Zou, Q.C. Liu and J.H. Rong	95
Synthesis of Carbon Nanotubes with Typical Structure from the Pyrolysis Flame Y.C. Liu, N.N. Zheng, J.D. Huang and B.M. Sun	99
Study on the Parametric Optimal Design of a Different-Speed Mixer Z.M. Fan, W.F. Hu, D.H. Choi and J. Xu	104
Experimental Study of Melt Electrospinning in Parallel Electrical Field M.F. Hao, Y. Liu, X.T. He, P.C. Xie and W.M. Yang	111
Influence of Hydrogen Dilution on Electrical Properties of Amorphous Silicon Thin Films Deposited on Glass Substrates Y.G. Li and D.X. Du	117

Study on the Surface Treatment of Special Screw for Light Guiding Plate's Precision Injection Molding	
G. Gou, P.C. Xie, Z.X. Wen, Y.M. Ding and W.M. Yang	123
Factors Influencing Diameter of Polypropylene Fiber in Melt Electrospinning	
M.F. Hao, Y. Liu, X.T. He, Y.M. Ding and W.M. Yang	129
Study on the Synthesis and Properties of EP/PU Composite	
X.Q. Wang, Z.X. Huang, J.L. Zheng and Q.L. Mei	135
A New Process for Manufacturing Straw Particleboard by Impregnating and Enzyme Treatment	
C. Qi, W.H. Wang and W.J. Li	140
Effect of Spinning Conditions on the Morphology of Polyacrylonitrile Hollow Fiber Membranes	
X.G. Zhang, J. Li and Z.L. Miao	146
Springback Prediction of the TRIP Sheet Steel Stamping	
T.K. Shan and L. Liu	152
Simulation of Non-Isothermal Crystallization under Varying Cooling Rates for Polymer Melts	
B.W. Qiu, J.B. Chen, B. Zhang and C.Y. Shen	159
Finite Element Analysis of Performance for Radial Tires, Part I: Model, Material Constants	
Y. Liu, X.T. He, H. Yan, C.F. Guan and W.M. Yang	165
Finite Element Analysis of Performance for Radial Tires, Part II: Simulation Results	
Y. Liu, Y. An, Y.M. Ding, P.C. Xie and W.M. Yang	170
Experimental Research on Mechanical Adaptability Properties of Tri-Axis Differential-Drive In-Pipe Robot	
L.X. Sun, Q.J. Zhang, S.Y. Jiang, X.D. Jiang and Y. Wang	175
Analysis of Ring-Opening Reaction between Bisphenol A and Epichlorohydrin by the Method of Quantum Chemical Calculating	
J. Li, X.Z. Yu and K. Zhang	180
Swelling Characterization of Double Sensitive Hydroxypropylcellulose / Sodium Alginate Hydrogel	
G.L. Gong, H. Li and Z.H. Guo	184
Electronic Transport Properties of Hydrogenated Amorphous Silicon Thin Films Deposited on Plastic Substrates	
Y.G. Li and D.X. Du	189
Experimental Study on Pseudo-Plastic Behavior for Film Foam Flow in a Vertical Tube	
D.X. Du, Y.G. Li and S.J. Sun	194
Preparation and Mechanical Properties of Rubber/Organoclay Nanocomposites	
G.Y. Lin, B.F. Gao and C.S. Wang	200
Prediction of Forming Limit of Sheet Metal Based on Stören-Rice Model	
W.G. Guo, J.M. Chen, H.M. Li and L.D. Shao	205
Biodegradable Poly(lactic Acid)/TDI-Montmorillonite Nanocomposites: Preparation and Characterization	
N.L. Chen, H.X. Feng, J.W. Guo, H.M. Luo and J.H. Qiu	211
Preparation of Polyethersulfone Ultrafiltration Tubular Membranes with Superior Properties	
J. Liu and E.H. Liu	216
Research on the Curing Behaviour and Morphology of an Epoxy/OMMT Nanocomposite System	
G.Y. Lin, D.W. Qu and C.S. Wang	221
Study on the Dense Phase Pneumatic Conveying Property of Carbon Black	
Z.H. Li, J.F. Liu, L. Jiao and L. Guo	228
Influence Analysis of Sampling Time for Synthesis of Carbon Nanotubes in the V-Type Pyrolysis Flame	
Y.C. Liu, B.M. Sun and Z.Y. Ding	235
Deformation Analysis of Polyurethane Screen Deck in Linear Vibrating Screen	
Z.R. Zhang and Y.Y. Wang	240
The Mould Design of the Car's Oil Strainer Based on Pro/E	
Y.L. Zhang, L.F. Wu and K. Zhang	247

The Mold Flow Analysis of the Car that Based on Pro/E Y.L. Zhang and K. Zhang	253
Sealing-Spinning Technology for Thin-Walled Aluminum Alloy Tubes L.X. Sun, J.B. Jia, Y. Xu and S.Y. Jiang	259
Process Analysis and Numerical Simulation of UHMW-PE Pipe Gas-Assisted Precision Molding F.H. Tong and J.H. Qin	264
N-Lamina Model of Extrusion Pressure of Non-Plug Flow Solid Conveying in Feeding Section by Single-Screw Extrusion Molding C.H. Liu, J.H. Qin and D.L. Shi	271
Study on the Preparation and Properties of Thermoplastic Tapioca Starch / Magnesium Hydroxide Composites X.Z. Mo, Y.X. Zhong, X. Qi and C. Mo	278
A Statistical Method to Determine the Volume Fractions of Inclusions in Polymer Composites X.L. Li, X.J. Li, J.W. Zhang, Y.H. Qie, X.Y. Li and B. Liu	283
Molecular Interdiffusion of Hauling Theory between Dissimilar Polymers Based on Novel USW G.H. Zhang, J.H. Qiu, L. Shao and X. Fu	289
Portable Benzo[a]pyrene Immunosensor Based on the Polyaniline Nanofiber Modified Screen-Printed Electrode C.P. Wang, J.D. Zhou, Y.B. Huang, G.Q. Liang, Y.J. Liu and H.T. Lei	295
Preparation and Characterization of Conductive Polyaniline/Zirconia Nanoparticles Composites H. Huang, Z.C. Guo, W. Zhu and F.C. Li	302
Preparation of Antibacterial Cotton Fabric Containing Patchouli Oil Microcapsules by Chemical Crosslinking Method Z.M. Yang, G.Q. Liang, L. Li, W.M. Au, H.Y. Zhong, T.K.S. Wong and Z.H. Yang	308
Preparation and Characterization of Polyacrylonitrile-Metal-O-MMT Nanocomposites H.X. Feng, G.W. Fu, Y. Wang, N.L. Chen and R.C. Yang	316
Study on the Effect of Thermal Design of Plane Mould on the Mechanical Properties of Epoxy Sheet Molding Compounds J. Li, Z.X. Huang and D.L. Jin	321
Liquid-State Synthesis and Properties of Fluorescent Conducting Polymers: α, β-SiW₁₁GaIII/Polyaniline W.L. Yang, R.J. Lv and R.H. Ma	326
End-Point Control of Holding Phase Based on Cavity Pressure for Injection Molding J. Wang, P.C. Xie and W.M. Yang	333
Preparation and Characterization of PVDF Hydrophobic Membrane H.F. Zhang, Y.Z. Zhang, L.G. Lin, X.L. Ding and H. Li	338
Development of a Two-Dimensional Force Model and Data Analysis for the Tire Uniformity Testing Machine B.L. Hang and Z.Y. Duan	343
Effects of Rotor Speed on Manufacturing Process of Short Fiber-Rubber Composite Material D.W. Zhang, C.S. Wang and G.Y. Lin	350
Study of the Heat Storage Device Characteristic in the Solar Chimney Power Plant System with Vertical Collector Y. Zhou, W.J. Zheng, X.H. Liu and Q.L. Li	356
Experimental Research and Performance Testing of Fe-Based Composite Plating P. Fu, C. Zhao and H. Tian	364
Experimental Study of Screw Speed Effects on Quality of Short Fiber-Rubber Composite Material C.S. Wang, D.W. Zhang, H.G. Bian, X.B. Wang and L. Guo	369
Experimental Study on Thermal Conductivity Property of Rubber Composites Filled with Carbon Nanotubes Z.P. Wang and Y. He	373
Study on Foaming Effect of the Biodegradable Buffer Material X.K. Zeng, G.Z. Meng and C.S. Wang	377

Thermal Conductivity of Composite Silicone Rubber Filled with Graphite / Silicone Carbide	
Y. He, X.S. Wu and Z.C. Chen	382
Research on Crafts of Ni-P-SiC Electroless Composite Plating on Surface Performances of the Mould	
J.Y. Hou, C.S. Wang and Y. Bai	389
Screw Conveyor Design and Processing in Rubber Production	
P. Fu, S.H. Li and C.S. Wang	394
Nonlinear Finite Element Analysis of the Bending of Shape Memory Alloy Hybrid Epoxy Beams	
S.S. Sun, X.C. Jiang and G.J. Sun	399
Effect of Transformation on Springback for TRIP Steel Stamping	
L. Liu and T.K. Shan	405
Distributive Mixing Performance and Mixing Efficiency of Discs in a Series Disc-Screw Extruder	
J. Yang and B. Jiang	411
Study on Low Profile SMC for the Production of Cylinder Head Cover	
M. Yang, Y.J. Nie, X.F. Zhu and R.F. Ming	418
The Cooling Time of Gas Assisted Injection Molding	
Q.X. Bu, X. Zhang, H.Y. Chen and Q.Z. Yin	422
The Dynamics Analysis of Rolling Movable Teeth Reducer	
J.F. Wu, X.C. Zhu, W. Gao and Y. Yu	429
The Kinetic Parameter Calculations of the Shift Pairs about the Tripod Universal Joint	
L. Li	436
Control of Residual Vibration in Micro-Positioning Platform	
H.W. Ji and X.P. Hu	444
Design and Characterization of a Flexible Micro-Displacement Manipulator	
H.W. Ji and X.P. Hu	449
Study on Properties of Polyester Short Fiber-NR Composites	
C.S. Wang, M.L. Hou, L. Li and H.G. Bian	455
CAE Optimization of Hot Runner Sequential Injection Molding for Car Interior Trim Panels	
L.L. Yang, H.M. Zhang and M. Li	460
Study on Thermal Conductivity of Composites of Rubber/CB with Good Electrical Properties	
J.P. Song, Y. He and L.X. Ma	466
Instantaneous Dynamic Analysis of the New Stirring Kneader Shaft	
Z.M. Fan, G.T. Zhou and J.P. Liu	472
Optimal Design for Roller Motion Track of Tire Building Machine	
Z.M. Meng, Y.B. Qiao and C. Ren	478
Experimental Study on the Blending of EPDM/R-EPDM	
C.S. Wang, H.H. Su and G.Z. Meng	484
Experimental Research on Seal Ring in the Pipeline Mixed with r-EPDM	
X.K. Zeng, H.H. Su and C.S. Wang	490
Three-Dimensional Temperature Field of Mixer Chamber Analysis	
H.G. Bian, C.S. Wang, R.Q. Wang, Z.Z. Wang and J.L. Zhang	495
Process of Supercritical CO₂ Extraction and Improved Design of Extraction Equipment	
J.Z. Guo, P. Zhao and W.Q. Wang	505
The Study of Electroless Ni-P Coating on Aluminum Tyre Mold	
J.Z. Guo and B. Xu	511
The Effects of Interbedded Friction on Load Capacity of Rhombic Wire Wound Vessel	
J.F. Wu, W. Gao and X.C. Zhu	517
Optimization of Packing Pressure Curve in Injection Molding Based on Numerical Simulation	
H.M. Zhang, M. Li and L.L. Yang	522
Study on the Influence of Initial Temperature of Tire on Curing Temperature Field and Cure State	
Q.L. Li, L.C. Fan, T. Li and H.L. Chen	528

Determination of Thermo-Physical Properties of Rubber and its Effect on Curing Temperature Field of Tire	
Q.L. Li, L.C. Fan and T. Li	533
Effect of Helium on Synthesis of Carbon Nanotubes from the V-Type Pyrolysis Flame	
Y.C. Liu, B.M. Sun and Z.Y. Ding	540
Effect of Hydrogen on V-Type Pyrolysis Flame Synthesis of Carbon Nanotubes	
Y.C. Liu, B.M. Sun and Z.Y. Ding	545
Research of Polymerization Reactor Fault Diagnosis Based on Acoustic Emission	
Y.H. Huang, J.L. Wang, H.Q. Jiang, X.M. Jia, H.L. Chong, M. Hu and W. Yang	550
5m Drum's FEA and Optimum Design Based on SolidWorks Simulation	
Q.X. Bu	555
Study on One-Step Injection Moulding Technology of Screw Drill Stator Bushing	
D.M. Jiao and B.Y. Lv	562
Application Analysis of Radial Tire Mould Assembly Process	
Z.K. Tian, Z.H. Zhang, H.M. Hu and X.B. Li	566
The Study of Fuzzy/PID Compound Control Algorithms in Rubber Sulfuration Process Based on Sugeno Rules	
C.T. Zhang and Z.Z. Yu	571
Experimental Research on the Hot Knife's Temperature in Radial Tire Building Machine	
Y. Tang and Y.P. Dai	577
The Study of the Extruder Screw for the Rubber and Plastics Blend	
G.Z. Wang	582
Experimental Investigation of the Thermoplastic Tapioca Starch/Sisal Fiber Composites	
X.Z. Mo, Y.X. Zhong, J.Y. Pang, T. Guo and X. Qi	586
Fluid-Solid Coupling Analysis on the 2-Dimensional Flow Field of Internal Mixer	
H.X. Zhao and H.G. Bian	592
Thermal Conductivity of Solid Argon Nano-Films from Molecular Dynamics Simulations	
L.X. Ma, Y.Z. Tang and Y. He	598
Numerical Analysis on Temperature Field in a LED Module	
D.X. Du, Y.G. Li and X.B. Luo	604
Research of Soccer Robot Target Tracking Algorithm Based on Improved CAMShift	
Y.H. Huang, J.L. Wang and X.M. Jia	610
The Effect of the Rotor's Shape for the Mixing about the Mixing-Extruding Machine	
L. Li, Y. Wang and C.S. Wang	615
Numerical Model of Melt-Through in a Fully Penetrated GTA Weld Pool	
P.C. Zhao and S.J. Li	622
Study on the Applied Research of a Different-Speed Mixer	
Z.M. Fan, H.M. Li and G.T. Zhou	629
Fixed Bed Column Studies for the Sorption of 2,4,6-Trinitrotoluene on the Aminated Lignin	
J.P. Zhang, X.Y. Lin, X.G. Luo and C. Zhang	635
Preparation and Characterization of Spherical Lignin/Polylactide Composite Adsorbent	
H. Zhu, X.Y. Lin, X.R. Zhuo, X.G. Luo and C. Zhang	640
Graft Copolymerization of Soybean Protein Isolated and Methyl Acrylate as a New Thermoplastic Material	
Y. Lu, X.G. Luo, X.Y. Lin and C. Zhang	644
Numerical Simulation of Shrinkage in the Microinjection Molding of Multi-Microparts Produced in one Mold	
J. Wang and W.M. Yang	649
PLA Nanofibers Electrospun from System of Low Toxicity Solvent	
L.W. Liu, W.M. Kang, B.W. Cheng and Y. Liu	657
Preparation of Pd Membrane Supported on Al₂O₃ Nanofiber Nonwoven Used in Hydrogen Separation	
J. Shi, D. Jia, B.W. Cheng, W.M. Kang and X. Bai	662
Single Screw Extruder Characteristics on Friction and Heat Generated with the Barrel Carved Spiral Groove	
F.H. Tong, D.L. Shi and J.H. Qin	668
Experimental Study on Surface Damage in Forming of Galvanized Steel Sheets	
Y.K. Hou	674

Research Progress and Application of Multi-Point Forming H.M. Li and W.G. Guo	679
Development of Carton Black's Dispersion Evaluation System Based on Statistics X.B. Wang, C.S. Wang and D.W. Zhang	684
A Preparation Method for Inner Liner of Non-Butyl Rubber Composites W.M. Yang, C.J. Li and S.J. Li	689
Study on Mechanism of Strengthened Vortex Diffusion for a Punched Agitator J.G. Chen, D.Y. Luan and X.C. Zhu	694
Studies on the Influencing Factors of Biodegradable Buffer Material C.S. Wang, G.Z. Meng and H.H. Su	701
FEM Analysis of Mixer Rotors of the Waste Rubber Reclaimed L. Guo, L. Wang and C.S. Wang	706
Composite Pressure Vessel Stress Analysis and Failure Research X.L. Luo and L.L. Liu	713
