## Preface, Committee and Sponsors

## Chapter 1: Materials Science, Chemical Materials and Chemical Technologies

|                                                                                                                                                                                               |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Effect of Nb Content on the Impact Toughness of Coarse-Grained Heat-Affected Zone of Pipeline Steels under Large Heat Input</b><br>F. Zhou, Z. Gao and K.M. Wu                             | 3  |
| <b>Study on Solidification Kinetics and Crystallization Analysis of Dynamically-Vulcanized PP/EPDM Blends</b><br>L. Hu, B. Yang, R. Xia, J.B. Miao, F.X. Lu, M. Cao, J.S. Qian and Y.C. Zhang | 8  |
| <b>Occurrence and Control of Crack on Counterweight of Forklift Cast with High Manganese Pig Iron</b><br>A.M. Li, Q.F. Zheng, Z.Y. Yu, R.H. Chen and Y.W. Huang                               | 12 |
| <b>Controllable Preparation of Zinc Phosphate Materials with Different Morphologies and Particle Size</b><br>J.J. Wang, X.H. Yang, J. Wang, Q. Tong and J.K. Liu                              | 20 |
| <b>Analysis of Plastic Zone at a Crack Tip for I, II and III Mode Fracture with MY Criterion</b><br>M. Guan and Z.Z. Zhong                                                                    | 25 |
| <b>Characterization of Zirconia Sizing Nozzle Modifying Addictives Prepared by Sol-Gel Method</b><br>L. Zhao, Q.H. Xue and D.H. Ding                                                          | 31 |
| <b>Study on the Hydrolysis of PET Catalyzed by Carbonates under Microwave Irradiation</b><br>Z.D. Liu, X. Zhang, M.M. Wang and D. Zhang                                                       | 36 |
| <b>The Facile Preparation and the Performance of Killing Oncomelania Snails of Zinc Oxide Nanoparticles</b><br>J.Y. Ge, X.H. Yang, Y. Yang, H.H. Feng, X.Y. Hu and X.Y. Wang                  | 40 |
| <b>Zein: A Novel Porogen for the Preparation of PVDF Porous Membrane</b><br>H.X. Xuan and C.J. He                                                                                             | 45 |
| <b>Synthesis and Properties of the New Room Temperature Ionic Liquid</b><br>H.T. Xu and Y.T. Xu                                                                                               | 49 |
| <b>Improved Antifouling Property of PVDF Membranes with Crosslinked PEG</b><br>H.X. Xuan and C.J. He                                                                                          | 53 |
| <b>Effect of the Fixation Treatment on the Staining Results of Reactive Dyes for Dyeing Bamboo</b><br>C. Wang, X.J. Li, Y. Li, X.Y. Cheng and X. He                                           | 57 |
| <b>IPA Recycling by Hydrolysis Reaction of TDI Residue</b><br>L.M. Zhang, Y.D. Hu, L.Y. Wu, X. Wang and Z.M. Wang                                                                             | 61 |
| <b>Pull-In Behavior of Carbon Nanotubes in Networks</b><br>S.T. Wang, Y.L. Chen and C. Zhao                                                                                                   | 65 |
| <b>The Effect of TiH<sub>2</sub> Oxidation Treatment on Preparing Aluminum Foam Sandwiches</b><br>B.N. Song, Z.Z. Zhong, S.H. Zhang, L. Hong, G.Y. Zu and G.C. Yao                            | 70 |
| <b>Research on Applied Equipment in Sport Teaching Based on Fiber-Reinforced Composites</b><br>L. Gao                                                                                         | 74 |
| <b>Determination of Henry Constants of Azelnidipine Enantiomers on Chiralpak AD Column at Different Temperatures</b><br>Y.Y. Fang, X.L. Zha, H. Li and W.F. Yu                                | 78 |
| <b>Synthesis and Properties of 1-(3,5-dimethyl-4-isoxazole)-2-(2-methyl-(5-ethynyl)-3-thienyl)perfluorocyclopentene</b><br>M.L. Cai, Z.Y. Tian, S.Q. Cui and S.Z. Pu                          | 82 |
| <b>Synthesis and Photochromism Studies of 1-(2-methyl-3-benzofuran)-2-[2-methyl-5-naphthyl-3-thienyl]perfluorocyclopentene</b><br>X.R. Dong, H.Y. Xu and S.Z. Pu                              | 86 |

|                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Synthesis and Application of 1-(2,5-dimethyl-3-thiazolyl)-2-[2-methyl-5-phenyl-(4-vinyl)-3-thiophene]perfluorocyclopentene</b><br>F. Duan, G. Liu and Q. Zhang                                 | 90  |
| <b>Synthesis and Application of 1-[(2-methyl-3-benzothiophene)]-2-[2-methyl-5-(1,3-dioxolane)-3-thienyl]perfluorocyclopentene</b><br>Y.L. Fu, L.Y. Zhou, C.B. Fan and S.Z. Pu                     | 94  |
| <b>Synthesis and Properties of 1-(2-Methyl-3-benzothiophene)-2-[2-methyl-5-(3-fluoro-4-chloro)phenyl-3-thienyl]perfluorocyclopentene</b><br>G.M. Liao, C.H. Zheng and S.Z. Pu                     | 98  |
| <b>Synthesis and Application of 1-(2-methyl-3-benzothienyl)-2-[3-methyl-2-thienyl]perfluorocyclopentene</b><br>G. Li, G. Liu and S.Z. Pu                                                          | 102 |
| <b>Synthesis and Properties of 1-(2-methyl-3-benzothienyl)-2-[2-methyl-5-(3-trifluoromethyl)-3-thienyl]perfluorocyclopentene</b><br>J.J. Liu, H.J. Jia and S.Z. Pu                                | 106 |
| <b>Synthesis and Application of 1-[2-methyl-5-(4-hydroxymethylphenyl)-3-thienyl]-2-[2-methyl-5-(4-azidomethylphenyl)-3-thienyl]perfluorocyclopentene</b><br>L.L. Ma, H.Y. Xu, Q. Zhang and G. Liu | 110 |
| <b>Energy Efficiency Analysis of PET Hydrolyzed by Different Ways of Microwave Irradiation</b><br>M.M. Wang, N. Liu, Z.D. Liu and D. Zhang                                                        | 114 |
| <b>Preparation and Luminescent Property of <math>\text{Eu}_x\text{Y}_y(\text{TPTZ})_2(\text{POA})_6</math> Complexes</b><br>J. Kang, A.L. Wang, Y.R. Qu, H.B. Chu and Y.L. Zhao                   | 118 |
| <b>Application of Biological Materials on Countermeasures and Development in Exercise-Induced Meniscus Injury</b><br>G.X. Xu                                                                      | 122 |

## **Chapter 2: Processing of Natural Resources, Environmental Engineering and Construction**

|                                                                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study on Application of Low Velocity Non-Darcy Flow</b><br>X.K. Xin, G.M. Yu and Z. Li                                                                                       | 129 |
| <b>Research of Coupling Mechanism between Dynamic Damage of Fault Rock-Pillar and Gas Outburst in Front of Roadway</b><br>Z.R. Wang, Y.K. Li and Z.Y. Han                       | 134 |
| <b>The Study on Temporal and Spatial Distribution of Seabed Pipeline Spilt Oil's Floating Based on Energy Conservation</b><br>Y.B. Li, L. Wei and X.X. Luo                      | 139 |
| <b>The Physicochemical Properties and the Fate of Fly Ash along the Air Pollution Control Devices in Coal-Fired Power Plant</b><br>Y. Zhang, L.L. Fu, Q. Lu, X. Cao and J.Y. Lu | 144 |
| <b>Application of PP Model in Water Quality Evaluation of Dehuixin River</b><br>Y.M. Wang, S.Y. Li, C. Han, P.C. Li and J.R. Wang                                               | 149 |
| <b>Analysis of Acid Rain and the Main Effect Factors in Nanchang City</b><br>X.F. Yan, J.L. Wang, Y.H. Zhou and F. Liu                                                          | 154 |
| <b>Efficient and Circulation Raw Coal Processing Technology</b><br>D.J. Huang, L.M. Cao and P.H. Wang                                                                           | 158 |
| <b>Dynamic Analysis on Explosion Resistance Performance of Reinforced Concrete Wall</b><br>W.S. Li, H. Yang and B. Zhang                                                        | 162 |
| <b>Research on Rib Stiffener Distribution and Ultimate Strength of Steel Tubular Tower's K-Joint</b><br>X.G. Hu, J.B. Yang and M.H. Li                                          | 166 |
| <b>Increase Water Resistance Decorative Coatings on the Basis of Calcareous Dry Building Mixtures</b><br>V. Loganina, L.V. Makarova, R.V. Tarasov and K.A. Sergeeva             | 171 |

## **Chapter 3: Advanced Technologies in Machinery, Mechatronics, Automation and Control**

|                                                                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study on Optimizing the Queuing Theory Based on Car Diagnosis</b><br>C.L. Zhang, J.L. Mao, L.X. Fu and F.H. Xiang                                                 | 177 |
| <b>Experimental Analysis for Jet Noise Reduction of Chevron Pylon-Based Nozzles</b><br>J.Y. He and Y.B. Xu                                                           | 183 |
| <b>Research on the Steering Character for Kiloton all Terrain Crane</b><br>Z.Y. Liu                                                                                  | 187 |
| <b>Research on Parameter Optimization Method of <math>\nu</math>-SVRM Forecasting Model for Crane Load Spectrum</b><br>F.Y. Lu, S. Wang, G.N. Xu and Q.S. Qi         | 191 |
| <b>Research on Aqueous Foam Jamming Device for Transport Vehicle</b><br>J. Huang                                                                                     | 197 |
| <b>Out-of-Plane Stability Analysis of Crane Jib with Auxiliary Bracing</b><br>T.F. Wang, P. Lan and N.L. Lu                                                          | 201 |
| <b>Applied Engine Electronic Control Technology in Situation and Analysis of Experimental Teaching System</b><br>J.M. Sun, Y. Yang, L.H. Gao and S.Y. Shao           | 206 |
| <b>Transient Dynamics Analysis of the Reachstacker Spreader Based on ANSYS</b><br>Y.F. Shu and Y.F. Zheng                                                            | 212 |
| <b>Design of Multi-Legged Walking Machine</b><br>F.B. Meng and T. Wu                                                                                                 | 216 |
| <b>Stability Analysis of Latticed Shells</b><br>W.B. Shi                                                                                                             | 220 |
| <b>Design of Mousetrap Based on Solid Works Software</b><br>Y.B. Ran and T. Wu                                                                                       | 224 |
| <b>Study of Jet Noise Reduction on Separated Exhaust System Using Chevron Nozzles</b><br>W.R. Shao, X.H. Xu, J.Y. He and F. Wu                                       | 228 |
| <b>Simulation Research of Engine's Electronic Control System Based on Modular Modeling Method</b><br>J.M. Sun, L.H. Gao and Y. Yang                                  | 235 |
| <b>The Research on Simulation Model of BF Raceway Based on Kinetic Theory of Granular Flow</b><br>J. Wang, G.Q. Yang, F. Ying, J.Q. Mu, W. Gao and W.Y. Ding         | 239 |
| <b>Application of Optical Fiber Laser Sensing Technology in Signal Detection</b><br>X. Wang, D.D. Hu and X.L. Wang                                                   | 246 |
| <b>Application of Improved Hash Function in the Message Authentication and Message Integrity</b><br>S.G. Jin and G.J. Wang                                           | 250 |
| <b>Application Analysis of Smart Sensor Node Based on Data Mining Association Technology</b><br>Y. Wang and T.J. Lu                                                  | 254 |
| <b>Study on High Specification PAC Motion Controller System</b><br>Y.L. Zhao and M.Q. Wang                                                                           | 258 |
| <b>Study on GPRS Mobile Terminal System for Rural Informatization</b><br>Y.L. Zhao and S.H. Zhang                                                                    | 262 |
| <b>Mechanics Analysis and Optimization of the Reachstacker Spreader</b><br>Y.F. Shu and Y.F. Zheng                                                                   | 266 |
| <b>Experimental Study on Spray Characteristics of Diesel Engines and Analysis of Fuel Dripping Phenomenon</b><br>Y.Q. Wu, Q. Wang, Z.S. Gao, Z.R. Zhang and L.M. Dai | 271 |
| <b>Visualization of the near Field Microscopic Spray Structure in Diesel Engine</b><br>Z.S. Gao, Q. Wang, Y.Q. Wu, Z.X. He and L.M. Dai                              | 276 |
| <b>Multi-Stage Ejector Design and Numerical Simulation for Marine Gas Turbine</b><br>T. Sun, B. Wan, C.J. Sun and Z.W. Ma                                            | 280 |
| <b>Application of Object Oriented Computer Automatic Classification in Land Use</b><br>X.F. Yan, J.L. Wang, Y.H. Zhou and F. Liu                                     | 286 |
| <b>Preference Selection Index Method for Machine Selection in a Flexible Manufacturing Cell</b><br>S.Y. Jian, S.J. Tao and X.R. Huang                                | 290 |
| <b>An Automatic Modeling Method for Intersected Cross-Sections</b><br>S.H. Mei, Q. Zhao, G.L. Chen and X.L. Leng                                                     | 294 |

|                                                                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Segmentation and Localization of Microscopic Cell Image</b><br>Z.Z. Zhong, P.J. Qi, M. Guan and B.N. Song                                                               | 300 |
| <b>Analysis of the Antiplane Problem of Functionally Graded Coating with Generally Oriented Crack</b><br>L.F. Guo, X. Li and Y.Z. Yang                                     | 305 |
| <br><b>Chapter 4: Communication, Networks, Applied Information Technologies, Algorithms and Data Processing</b>                                                            |     |
| <b>Design of Low Noise L-Band Frequency Source</b><br>S. Zhao and Y.B. Yue                                                                                                 | 313 |
| <b>Design of the Weighted Series Feeding Microstrip Antenna Array</b><br>S. Zhao and Y.Q. Liu                                                                              | 317 |
| <b>Network Security Separated Card Based on Physical Isolation Technology Optimization</b><br>D.M. Zhao and K.F. Zhu                                                       | 321 |
| <b>Online Homework Correcting Integrate System Based on ASP.NET</b><br>D.M. Zhao and K.F. Zhu                                                                              | 325 |
| <b>Wireless Sensor Network Link Selection Algorithm with Bayesian Technique</b><br>L.J. Luo and H.P. Ren                                                                   | 329 |
