

Table of Contents

Preface and Committee

Chapter 1: Research on Material Engineering, Technologies and Applied Mechanics

| | |
|---|----|
| Low Resistivity Aluminium Alloy of High Tensile Strength and Elongation J.W. Zheng, Z. He, W. Cai, S.Y. Chen, L. Qiao, Y. Ying and L.Q. Jiang | 3 |
| Research on Electron Mobility Model for Tensile Strained-Si(101) with Properties of Semiconducting Materials N. Meng, H.Y. Hu, H.M. Zhang, X.J. Shi, R.X. Xuan and B. Wang | 8 |
| The Lattice Distortion-Induced Topological Insulating Material H.P. Han | 13 |
| Research on Microwave Absorbing Properties of Epoxy Resin Composites Containing Activated Carbon-Fiber Felt Screens J. Ren, Z.Y. Feng, T.C. Zou and H.L. Mou | 17 |
| Thermal Performance Test of the New Sandwich Insulation Composite Wall Panels J.G. Yang, G. Wang and K.W. Ding | 22 |
| Honing TC11 Titanium Alloy Material the Choice of Stone Y.S. Liu | 27 |
| Electrochemical Property Study of Water-Wall Tube 20G in SO_4^{2-} Medium at Room Temperature M.D. Li, X.Y. Tang, Y.H. Du, J. Liu, J.M. Zhao and Z.P. Zhu | 31 |
| Application of Si in Tool and Die Steel S.H. Huang, T. Lei, H.X. Chi and D.S. Ma | 35 |
| Prediction Model for the Boiler NO_x Emission with Material Properties Based on the Artificial Neural Network B.M. Sun, D.H. Wang, B. Yang, S.H. Zhang and L.Y. Kong | 40 |
| Enhanced Oil Recovery with Properties of Thermoplastic Material by Hot CO₂ Flooding C.J. Han | 46 |
| The Application of Circular Magnetic Grid Sensor in Automatic Viscometer for Measuring Viscosity of Liquid Material Based on Fluid Mechanics J.G. Zhao, M. Deng, Q. Wang and R. Yang | 51 |
| The Application of Absorbable Suture Materials and Tissue Engineering on Renovation of Exercise-Induced Anadesma Injury S.Q. Zhang, J.Y. Hou and G.Q. Wang | 56 |
| Influencing Factors of Self-Stressed Concrete Filled Steel Tube with Segments Bearing Capacity S.L. Wang and L.Y. Yi | 60 |
| Exploration of Goaf of Colliery Area with Engineering Materials in a Highway Tunnel S.L. Wang and L.Y. Yi | 65 |
| Situ Testing Study on Jacking Force of Manual Pipe-Jacking with Engineering Z.Y. Yang and L.Y. Yi | 70 |
| Study on Precast Concrete Beams on the Longitudinal Bearings J.J. Wen and L.Y. Yi | 76 |
| The Research of Electrochemical Behavior of Alloy AA5083 in 3.5% NaCl Solution S. Chen, G.M. Li, W.S. Chang and X.Q. Chen | 80 |
| Study on Beneficiation of a Low-Grade Refractory Copper Oxide Ore in Tajikistan P. Ding, Q.J. Liu and W.H. Pang | 85 |
| Study on Environmental Materials with the Influence of Soil Carbon of Temperate Forests along an Altitude Gradient Q.X. Tian, H.B. He and X.D. Zhang | 89 |
| Effect of Four Materials Including Glycine, Arginine, Proline and Sodium Glutamate on Survival of <i>Bifidobacterium bifidum</i> during Freeze-Drying Q. Ma, T. Qin, H. Chen and G.W. Shu | 93 |

| | |
|--|-----|
| Research on Methane Hydrate Meta-Stable Property of Gas Hydrates for Application to Natural Gas Storage and Transportation B. Dou, B.B. Fan and L. Ren | 97 |
| The Research on Solar Cell of a Novel Ribbon Silicon Material J.G. Li, P. Wu, P. Yu and S. Li | 103 |
| Optimized Formulation of APN Toothpaste with Biochemical Materials Using Response Surface Methodology T. Kong, C.Y. Zhang, B. Bao, L. Sha, Z. Wang and W.H. Wu | 108 |
| Study on Environment Materials with Separation and Identification of Denitrifying Phosphorus-Removing Bacteria L.H. Zheng, Y.J. Luo and L.F. Qiu | 114 |
| Study on Environmental Materials with <i>Aspergillus niger</i> as Adsorbent for Sequestering Pb(II) from Aqueous Solution W.N. Xue and Y.B. Peng | 119 |
| Fluid Mechanics Analysis and Effect of Splitter Blades on the Characteristics of High-Speed Centrifugal Pump J. Liu, J.P. Yuan and W.J. Zhang | 124 |
| Study the Stability of Bending-Torsional Coupled Vibration of a Rotor System with a Crack and Variable Perturbation Method C.F. Wang and F.L. Wang | 130 |
| Study on Residual Stress and Numerical Simulation Technology of Welding to Thick Structure Construction M. Li, N. Li, Y. Liu and Q.S. Wang | 136 |
| Research on the Stability of a Rotor System Based on Mechanics Properties with Application of Floquet Theory F.L. Wang | 141 |
| Study on Stress Strain in UG-Based Fatigue Analysis of Piston Pin H.Y. Wang and W. Guo | 145 |
| Study on Kinematic Features of CNC Machine Based on Multi-Body System Theory with Error Modeling E.B. Peng, Y.H. Zhang and H.Y. Wang | 149 |
| Study on the Characteristics of the Hull Vibration Caused by the Shaft Surface Roughness Z. Li, Y. Gao, X.Z. Xie and L. Chen | 153 |
| Research on Photocatalytic Degradation Kinetics of S-Doped TiO₂ to Phenol J. Yu, M.J. Shan and L.F. Qiu | 158 |
| Mechanics and Pretreatment Research of Vibration Signals for the Numerical Control Machine E.B. Peng, H.G. Zhang and H.Y. Wang | 162 |
| Mechanics Study on the Leaning-Type Arch Bridge during the Construction Process Based on Building Materials X.C. Zeng, A.R. Liu, X.S. Zhao and J.D. Deng | 166 |
| Analytical Solution of Sidewise Buckling of Two-Hinged Circular Arch under Concentrated Force J.T. Kuang, A.R. Liu, Q.C. Yu and J.D. Deng | 170 |

Chapter 2: Electrical Power System, Electronics and Electrical Engineering

| | |
|---|-----|
| Research on Electrical Power System with Information Modeling and SCL Description of IED for Transformer Condition Monitoring Based on IEC61850 Y.T. Sun, X.J. Tang, J.L. Li and X.C. Jiang | 177 |
| Research on Electrical Power System with Analysis of Fault Operation State Magnetic Field about DFIG in Wind Power S. He, W.Q. Wang, H.Y. Wang, X.Y. Zhang, J. Cheng and J. Chen | 181 |
| New Theories and Methods of Low Frequency Oscillation Analysis under Smart Grid Framework in Electrical Engineering Z.J. Liu, R. Huang, S.M. Zhou and Y.C. Hou | 186 |

| | |
|---|-----|
| Design of Power Line Communication System Underground Based on Zigbee in Electrical Control Engineering T. Jin, P.X. Yang and Z.B. Liu | 193 |
| Low-Speed Common Rail Diesel Engine Electronic Control System Structure and Working Principle in Electrical Control Engineering E.Z. Song, Y.F. Wang, Y.F. Liu, Z.H. Zhang and X.C. Shi | 199 |
| Studies on Power Distribution of AC and VSC-HVDC Hybrid System for Wind Power Integration Y.Q. Zhang, Y.Q. Zhu and Y.Z. Liu | 204 |
| Study of the Electricity-Draw Control System in Electrical Engineering Based on Neural Network DTC L.H. Shi and Y.H. Li | 209 |
| Design of Controller in Electrical and Electronic Engineering Based on Dual Micro Controller Units for a Brushless DC Motor Y.Q. Rang, H. Xiong, D. Xiang, Q. Wu, G.W. Meng and Z.Q. Yang | 213 |
| A Fault Phase Selection Method Based on Arc Voltages for High-Voltage Line Protections in Electric Power Systems X.H. Zeng, Y.H. Chen and G.Q. Tan | 218 |
| A Commutation Strategy for Matrix Sinusoidal Waveform Converter with High-Frequency Link in Electric Power Systems J.Z. Quan, S.H. Wu, P.J. Cao and J.S. Xu | 222 |
| Research of Compensated AC Regulated Power Supply in Electric Power Systems Based on a High-Frequency Isolated Transformer Q.L. Zhang, P. Wang and L. Yang | 227 |
| The Numerical Simulation and Design of the Electrical Heating System for Electric Conductive Ultra-High-Temperature-Ceramics Test Specimen Z.Y. Zeng and S.L. Wu | 231 |
| Study on Power Delivering in Energy Management for Hybrid Electric Vehicle P. Sun, X.M. Yu and W. Dong | 235 |
| Design of the Impedance Measurement Instrument in Electrical Engineering Based on Phase-Sensitive Detector Y.W. Zhai, W. Liu and X. Yang | 242 |
| Optimal Dispatching of Electrical Sensors for Automatic Control J.L. Liu, J. Yang and W.Y. Liu | 246 |
| Minimum Amplitude of Geomagnetic Disturbance in Electrical Power System Leading to 500kV transformer DC Bias W.L. Wu | 251 |
| EHV Generator Loss of Field Protection Research in Electrical Power System Y.L. Lv, B.J. Ge, S. Wang and H.Z. Bai | 255 |
| Development of Transformer Winding Distortion Testing Device in Electrical Power System Based on Electrical Properties Z.D. Gu, W. Wu and Q.L. Xu | 260 |
| Double-Loop Control of Inverter with LCL Filter in Electrical Power System Based on Improved Instantaneous Symmetrical Component Y. Ren, J.R. Wan, L.G. Shi and R. Liu | 265 |
| Research on Fault Diagnosis of High-Voltage Circuit Breaker in Electrical Power System Based on KPCA Y.P. Wang, F. Mei, J.Y. Zheng and J. Mei | 269 |
| Research on LCR Filter in the Link of Shunt Active Power Filter in Electrical Power System C.Y. Zhang, J.Y. Zheng and J. Mei | 273 |
| Research of Grid-Connected Photovoltaic System in Electrical Engineering with Energy Storage Based on DC Bus C.L. Shi and X.S. Tang | 277 |
| Influence of the Arc Suppression Coil with Parallel Resistance on Single-Phase Arc Grounding Overvoltage H. Xue, J.J. Song and Y.C. Cui | 284 |
| Study on Electromechanical Coupling Vibration of Simulation Technology Based on the Drive System H.Y. Wang | 289 |

| | |
|---|-----|
| Novel Man-Machine Interface of Intelligent Leak Detector for Advanced Material with Material Properties in Fuel-Gas Pipe Based on Electrical Power System L.J. Zhang and J.Q. Ren | 293 |
| Modeling Permanent Magnet Synchronous Motor System in Electrical Automation Engineering Based on Adaptive Neuro-Fuzzy Inference System H.Y. Zhang | 297 |
| The Software Design for an Automation Intelligent Distribution Terminal Unit in Electric Power Systems Based on C and Assembly Language H. Song, X.H. Zeng and W.P. Zhou | 302 |
| On-Line UHF Monitoring System of Partial Discharge for Electrical Equipment G.J. Chen, M. Xu, T.T. Liu, J. Ni, D. Xie and Y.P. Zhang | 306 |
| Design and Implementation of Synchronous Wireless On-Line Detection System of MOA Resistive Current in Electric Power System Based on GPS T. Cui, Y.X. Cao, A. Xu, J.L. Li and G.H. Sheng | 312 |

Chapter 3: Related Topics

| | |
|---|-----|
| Research on On-Line Anti-Icing Technology for Catenary along Electrified Railway L. Guo and Q.Z. Li | 321 |
| Sound Transmission through Lightweight Metallic Plate by Fourier Transform Method Y.Q. Jin, F.Z. Pang, D. Tang and X.Z. Xie | 325 |
| A Modified Maximum Power Point Tracking Algorithm under Partial Shading Conditions B. Sun and J.Y. Zheng | 330 |
